

PROCEEDINGS OF SPIE

Sixteenth International Conference on Machine Vision (ICMV 2023)

Wolfgang Osten

Editor

15 – 18 November 2023

Yerevan, Armenia

Organized by

Russian Academy of Sciences (Russian Federation)

University of Stuttgart (Germany)

Sponsored by

Russian Academy of Sciences (Russian Federation)

University of Stuttgart (Germany)

Published by

SPIE

Volume 13072

Proceedings of SPIE 0277-786X, V. 13072

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Sixteenth International Conference on Machine Vision (ICMV 2023)*, edited by Wolfgang Osten, Proc. of SPIE 13072, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Conference Committees</i>
xi	<i>Introduction</i>

IMAGE CLASSIFICATION

13072 02	On optimizing morphological neural networks for hyperspectral image classification [13072-49]
13072 03	sMoBYAL: supervised contrastive active learning for image classification [13072-15]
13072 04	Quantization method for bipolar morphological neural networks [13072-12]
13072 05	Fast keypoint filtering for feature-based identity documents classification on complex background [13072-7]
13072 06	Multi-class object classification using deep learning models in automotive object detection scenarios [13072-38]
13072 07	Sequence models for drone versus bird classification [13072-36]

IMAGE SEGMENTATION

13072 08	Enhancing crop segmentation in satellite image time-series with transformer networks [13072-23]
13072 09	Segmentation of human olfactory bulb glomeruli on its phase-contrast tomographic images with neural networks [13072-26]
13072 0A	CattleDeSegNet: a joint approach to cattle denoising and interpretable segmentation [13072-14]

PATTERN RECOGNITION

13072 0B	Training of binary neural network models using continuous approximation [13072-11]
13072 0C	SAIGAN: arbitrary length and out-of-vocabulary handwriting synthesis preserving geometrical annotation [13072-4]
13072 0D	Building an optimal document authentication system [13072-24]

- 13072 0E **Multilanguage ID document images synthesis for testing recognition pipelines** [13072-5]
- 13072 0F **FARA: fast and accurate RFDoc descriptor approximation** [13072-31]
- 13072 0G **Enhanced multiple-instance pruning for learning soft cascade detectors** [13072-48]
- 13072 0H **Limitations of anomaly detection: beyond which size defects can be reliably recognized** [13072-50]

IMAGE DETECTION AND DETECTION MODEL

- 13072 0I **L-shape fitting algorithm for 3D object detection in bird's-eye-view in an autonomous driving system** [13072-40]
- 13072 0J **False positive elimination in object detection methods for videos** [13072-17]
- 13072 0K **Copy-move document image forgery detection and localization based on JPEG clues** [13072-18]
- 13072 0L **Incremental one-class learning using regularized null-space training for industrial defect detection** [13072-19]
- 13072 0M **Detection of fingers in document images captured in uncontrolled environment** [13072-42]
- 13072 0N **Methods for non-intrusive out-of-distribution images detection** [13072-27]
- 13072 0O **Image edge detection using pseudo-Boolean polynomials** [13072-35]
- 13072 0P **Specialized indoor and outdoor scene-specific object detection models** [13072-41]
- 13072 0Q **Bipolar morphological YOLO network for object detection** [13072-10]

IMAGE ANALYSIS AND PROCESSING METHOD

- 13072 0R **Point scene understanding via points-to-mesh reconstruction and multi-level utilization of proposals** [13072-34]
- 13072 0S **Search for image quality metrics suitable for assessing images specially precompensated for users with refractive errors** [13072-46]
- 13072 0T **Threshold U-Net: speed up document binarization with adaptive thresholds** [13072-3]
- 13072 0U **Integrated channel attention method for Siamese tracker** [13072-22]

- 13072 0V **Assessment of the color compatibility of garments for building a recommendation system for an outfit** [13072-8]
- 13072 0W **Maintaining topological maps for mobile robots** [13072-37]
- 13072 0X **Spectral filters design for a better hyperspectral reconstruction** [13072-47]
- 13072 0Y **Method of color image formation taking into account the human perception features** [13072-51]

DIGITAL PHOTOGRAPHY TECHNOLOGY AND COMPUTER VISION BASED ON IMAGING

- 13072 0Z **CT metal artifacts simulation under x-ray total absorption** [13072-44]
- 13072 10 **HoughToRadon transform: new neural network layer for features improvement in projection space** [13072-1]
- 13072 11 **Distortion-aware super-resolution for planetary exploration images** [13072-21]
- 13072 12 **Robust automatic rotation axis alignment mean projection image method in cone-beam and parallel-beam CT** [13072-28]
- 13072 13 **StereoYolo+DeepSORT: a framework to track fish from underwater stereo camera in situ** [13072-30]
- 13072 14 **Embracing uncertainty flexibility: harnessing a supervised tree kernel to empower ensemble modelling for 2D echocardiography-based prediction of right ventricular volume** [13072-33]
- 13072 15 **Efficient single- and multi-DNN inference using TensorRT framework** [13072-43]
- 13072 16 **CADCP: a method for chromatic haze compensation on remotely sensed images** [13072-45]

DATA-BASED INTELLIGENT COMPUTING AND ALGORITHM

- 13072 17 **Insights of anomaly detection: How does polluted training data influence performance?** [13072-6]
- 13072 18 **EANet: enhanced attribute-based RGBT tracker network** [13072-16]
- 13072 19 **Portfolio selection via topological data analysis** [13072-32]
- 13072 1A **A data parallel approach for distributed neural networks to achieve faster convergence** [13072-29]

13072 1B **Quantum time series forecasting** [13072-39]

13072 1C **CG-MER: a card game-based multimodal dataset for emotion recognition** [13072-20]
