Volume 13084

Proceedings of SPIE 0277-786X, V. 13084

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *MIPPR 2023: Multispectral Image Acquisition, Processing, and Analysis*, edited by Jianguo Liu, Zhong Chen, Changxin Gao, Yang Xiao, Sheng Zhong, Hanyu Hong, Xiaofeng Yue, Proc. of SPIE 13084, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Symposium Committee*
ix *Introduction*

MULTISPECTRAL IMAGE ACQUISITION

- 13084 02 **Electrically tunable liquid-crystal Fabry-Pérot filter with high-birefringence nematic mixture for spectral imaging** [13084-5]
- 13084 03 **Depth from focus with electrowetting liquid lens** [13084-6]
- 13084 04 **An electrically controlled liquid-crystal (LC) interference filter by light orientation for infrared multispectral imaging** [13084-7]
- 13084 05 **Mid-long-wave infrared broadband absorber based on multi-layer plasma cavities metasurface** [13084-8]
- 13084 06 **Design of polarimetric camera based on the single-layer twisted nematic liquid crystal device** [13084-9]
- 13084 08 **Application of nanotips metasurface in extending image depth of field** [13084-11]
- 13084 0A **Fully electrically controlled light-field camera via electrowetting liquid lens and liquid-crystal microlens array** [13084-13]
- 13084 0C **Study on transmission and nanofocusing characteristics of surface array micronano metasurface** [13084-16]
- 13084 0D **Tuning of near-field optical properties based on magneto-tip array super-surfaces** [13084-17]
- 13084 0E **Metal-insulator-metal metasurface for strongly absorbing incident radiation in a wide wavelength range of 5-14 μ m** [13084-18]
- 13084 0F **Ice area and 3D ice shape measurement method based on polarized light imaging** [13084-20]
- 13084 0G **Study on the polarization response of aluminum gratings with graphene** [13084-22]

MULTISPECTRAL IMAGE PROCESSING AND ANALYSIS

- 13084 0J **Toroidal composite liquid crystal microlens array co-driven by four independent signal voltages** [13084-3]

- 13084 0N **Semi-supervised polarimetric SAR images classification based on FixMatch** [13084-24]
- 13084 0O **Overview of remote sensing image fusion based on deep learning** [13084-25]
- 13084 0Q **A MAP-based high quality destriping algorithm with multi-orders noise estimation and adaptively unidirectional total variation priors** [13084-10]
