Volume 13086

Proceedings of SPIE 0277-786X, V. 13086

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *MIPPR 2023: Pattern Recognition and Computer Vision*, edited by Jianguo Liu, Zhong Chen, Changxin Gao, Yang Xiao, Sheng Zhong, Hanyu Hong, Xiaofeng Yue, Proc. of SPIE 13086, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

ix *Introduction*

PATTERN RECOGNITION AND COMPUTER VISION

- 13086 02 **CamLife: accelerating precise anomaly detection for camshaft on edge devices (Invited Paper)** [13086-2]
- 13086 03 **Robust facial landmark detection network based on multiscale attention residual blocks (Invited Paper)** [13086-3]
- 13086 05 **Residual multi-scale pixel attention fusion network for image deblurring (Invited Paper)** [13086-7]
- 13086 06 **Human pose estimation constrained by human structure information (Invited Paper)** [13086-9]
- 13086 08 **Suitable matching area selection for aircraft navigation based on multi-modal information fusion (Invited Paper)** [13086-13]
- 13086 09 **Cross-modal vehicle re-identification based on multi-scale features and attention mechanism (Invited Paper)** [13086-14]
- 13086 0A **Accurate extraction of line-structured optical stripe centerlines under low exposure (Invited Paper)** [13086-16]
- 13086 0B **Research on grid inspection technology based on general knowledge enhanced multimodal large language models (Invited Paper)** [13086-19]
- 13086 0C **A comparison between deep-learning models for scene recognition (Invited Paper)** [13086-20]
- 13086 0D **Binary network design for dedicated hardware circuits (Invited Paper)** [13086-22]
- 13086 0E **Evaluation of training datasets for typical target detection networks (Invited Paper)** [13086-23]
- 13086 0F **Optimal exposure selection of high dynamic range-based reflection compensation for printed circuit board reconstruction using structured light 3D measurement system (Invited Paper)** [13086-24]
- 13086 0G **Fall detection model based on AlphaPose combined with LSTM and Lightgbm (Invited Paper)** [13086-25]
- 13086 0J **An image enhancement algorithm based on multi-scale Retinex theory to improve the images quality of sensors (Invited Paper)** [13086-32]

- 13086 OL **Plant fruit counting using context aware feature and point to point pairing (Invited Paper)**
[13086-36]
- 13086 OM **A coarse-to-fine multi-view stereo network based on attention mechanisms (Invited Paper)**
[13086-39]
- 13086 ON **Research on point cloud scene parsing method based on M2F (Invited Paper)** [13086-41]
- 13086 OO **A fuzzy hyperbolic secant function clustering algorithm (Invited Paper)** [13086-42]
- 13086 OP **A cross-level semantic aggregation segmentation method in aquatic scenes (Invited Paper)**
[13086-43]
- 13086 OQ **A two-stage network for underwater image enhancement based on dual attention and multi-color space stretch (Invited Paper)** [13086-46]
- 13086 OS **Coarse registration of color point clouds by combining color feature and geometric feature (Invited Paper)** [13086-48]
- 13086 OT **Deep fusion network based on two-stream CNN for radar target recognition (Invited Paper)**
[13086-49]
- 13086 OU **A novel method based on snake optimization algorithm for improving fuzzy clustering**
[13086-50]
- 13086 OW **3D semantic segmentation under adverse weather conditions** [13086-53]
- 13086 OX **Unveiling decision-making in remote sensing with deep learning interpretability** [13086-54]
