

PROCEEDINGS OF SPIE

Fifteenth International Conference on Graphics and Image Processing (ICGIP 2023)

Chunping Liu
Liang Xiao
Editors

10–12 November 2023
Suzhou, China

Hosted by
Soochow University (China)

Co-hosted by
Nanjing University of Science and Technology (China)
Suzhou University of Science and Technology (China)
Nanjing University of Posts and Telecommunications (China)

Organized by
Soochow University (China)

Co-organized by
Jiangsu Computer Society, Jiangsu Association of Artificial Intelligence (China)

Published by
SPIE

Volume 13089

Proceedings of SPIE 0277-786X, V. 13089

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fifteenth International Conference on Graphics and Image Processing (ICGIP 2023)*, edited by Chunping Liu, Liang Xiao, Proc. of SPIE 13089, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

IMAGE ANALYSIS AND IMAGE RECONSTRUCTION

- 13089 02 **Fast online dynamic MRI reconstruction based on subspace tracking** [13089-105]
- 13089 03 **Causality-inspired comparative learning supervised model for domain generalization** [13089-67]
- 13089 04 **Weighted sparse constraint-based reconstruction networks for sparse view CT imaging** [13089-3]
- 13089 05 **PAN source image data reconstruction based on data hiding** [13089-83]
- 13089 06 **A novel self-learning network integrating contrastive learning, perceptual learning and masked image modelling** [13089-93]

IMAGE SEGMENTATION AND ALGORITHMS

- 13089 07 **Weakly supervised semantic segmentation based on positive and negative hybrid learning** [13089-81]
- 13089 08 **Feature augmentation with transformer for medical image segmentation based on self-attention mechanism** [13089-73]
- 13089 09 **Pathological image segmentation of gastric cancer based on deep learning** [13089-84]
- 13089 0A **A novel method for facial attribute editing by integrating semantic segmentation and color rendering** [13089-61]
- 13089 0B **An effective segmentation method for retinal blood vessel image** [13089-21]
- 13089 0C **Based on K-Net adhesive syllable segmentation for historical Tibetan document images** [13089-1]
- 13089 0D **Brain tumor image segmentation algorithm based on hybrid model feature extraction** [13089-27]
- 13089 0E **A new circular minimal path model for interactive image segmentation** [13089-32]
- 13089 0F **Image dehazing algorithm for image partition optimization based on generalized Gaussian function** [13089-25]

- 13089 OG **Dense rebar end face segmentation based on YOLACT_REBAR instance segmentation network** [13089-39]
- 13089 OH **DAPFormer: dual-attention and pyramid-aware network for medical image segmentation** [13089-69]
- 13089 OI **A multiscale circular geodesic model for image segmentation** [13089-82]
- 13089 OJ **Infrared small target segmentation network with contextual semantic information based on area features** [13089-70]

IMAGE CLASSIFICATION AND COMPUTING

- 13089 OK **Multisource remote sensing image classification based on adaptive pooling transformer and multilevel correction** [13089-8]
- 13089 OL **Lightweight 2D human pose estimation based on simple coordinate classification** [13089-33]
- 13089 OM **Spectral-spatial inverted residual attention network for hyperspectral image classification with pre-activation** [13089-35]
- 13089 ON **DNN compression approach based on Bayesian optimization tensor ring decomposition** [13089-56]

IMAGE DEFECT DETECTION

- 13089 OO **Lightweight YOLOx-based transmission line insulators and their defects detection** [13089-51]
- 13089 OP **Crack detection based on mask RCNN and trajectory similarity measurement** [13089-85]
- 13089 OQ **An improved rail crack detection method based on the wavelet subband LMS adaptive filtering and wavelet analysis** [13089-16]
- 13089 OR **Road detection for urban planning from satellite images using transfer learning** [13089-19]
- 13089 OS **Weakly-supervised battery defect detection based on enhanced regions of interest** [13089-23]
- 13089 OT **Research on pavement crack detection algorithm based on adversarial and depth-guided network** [13089-43]
- 13089 OU **Pavement crack detection algorithm based on reinforcement learning and traditional supervised learning** [13089-54]

IMAGE NOISE AND IMAGE RESTORATION

- 13089 0V **CF-HOSVD: a two-stage denoising method based on higher-order singular value decomposition for 3D magnetic resonance images** [13089-106]
- 13089 0W **SSAB-DGUNet: enhancing shadow removal in images using a multistage progressive approach with spatial attention** [13089-78]
- 13089 0X **A deep encoder-decoder based primal-dual proximal network for image restoration** [13089-64]
- 13089 0Y **Image inpainting based on edge and smooth structures prediction** [13089-66]
- 13089 0Z **Research on an image restoration method of cubic phase plate wave-front coding with mixed noise** [13089-11]

DIGITAL IMAGE TRANSFORMATION AND PROCESSING METHODS

- 13089 10 **Dual-path U-transformer network for assessment of brain midline shift in hemorrhagic stroke** [13089-7]
- 13089 11 **Construction of a new database for Japanese lip-reading** [13089-48]
- 13089 12 **MRI and PET/SPECT image fusion based on residual network** [13089-111]
- 13089 13 **Indoor location of UAV based on QR code** [13089-24]
- 13089 14 **Filter pruning via Schatten p-norm** [13089-104]
- 13089 15 **A review of cross-modal retrieval for image-text** [13089-86]

COMPUTER VISION AND DATA VISUALIZATION

- 13089 16 **A novel channel attention module for integrity and importance of feature map** [13089-42]
- 13089 17 **Multi-view self-supervised product quantization for robust fabric image retrieval** [13089-50]
- 13089 18 **An effective visual tracking approach under low-light environments** [13089-5]
- 13089 19 **A spatio-temporal-frequency features fusing based lightweight human pose estimation network** [13089-17]
- 13089 1A **An AI-based multitask framework for cardiac function assessment through echocardiograms** [13089-53]

13089 1B **Towards robust visual explanations for deep convolutional networks with weight-wise perturbations** [13089-45]

IMAGE PROCESSING AND COMPUTING MODEL BASED ON MACHINE LEARNING

13089 1C **KuchiNavi: lip-reading-based navigation app** [13089-47]

13089 1D **Distribution-aware FAST feature point extraction and matching based on FPGA** [13089-110]

13089 1E **Intelligent electronic document layout recognition via deep learning** [13089-99]

13089 1F **The hybrid attention single image super resolution network with conditional random field** [13089-44]

13089 1G **Research on insect recognition method based on convolutional neural network** [13089-6]

13089 1H **Incomplete multiview clustering with multiple contrastive learning and attention mechanism** [13089-13]

13089 1I **High-performance nonlinear least square optimization via domain specific language** [13089-96]

13089 1J **Attention-guided unsupervised semantic fusion for infrared and visible images** [13089-14]

13089 1K **Adversarial feature calibration network for few-shot learning** [13089-88]

DIGITAL IMAGING AND PHOTOGRAPHY TECHNOLOGY

13089 1L **Intelligent pattern reconstruction based on primitive spatial relationship adaptive transformation** [13089-92]

13089 1M **Neural radiance field by adaptive selection** [13089-36]

13089 1N **Improved anti-aliasing algorithm based on fast approximate anti-aliasing** [13089-49]

13089 1O **Research on test technology of airborne ADVB avionics system** [13089-10]

13089 1P **Local color harmony adjustment via color envelope transformation** [13089-57]

13089 1Q **Semantic combined lightweight transformer low light image enhancement method** [13089-34]

13089 1R **Research on image foreground target extraction algorithm under uneven illumination** [13089-46]

13089 1S **Fast pose and focal length estimation for camera using a single point correspondence**
[13089-40]

IMAGE DETECTION TECHNOLOGY AND ENGINEERING APPLICATIONS

13089 1T **Boosting object detection via diffusion-based data augmentation** [13089-107]

13089 1U **Multiview image tampering detection and localization in real scene based on spatial-channel attention** [13089-101]

13089 1V **Self-supervised fabric defect detection model combined with transformer** [13089-97]

13089 1W **An effective dynamic SLAM algorithm integrating YOLOv7 model** [13089-71]

13089 1X **Salient object detection via a novel saliency ranking tree integrating low-level and high-level features** [13089-80]

13089 1Y **STURM: exploiting swin transformer Unet with random masks for self-supervised anomaly detection** [13089-52]

13089 1Z **Transformer-enabled adaptive spatial feature fusion for small traffic sign detection** [13089-108]

13089 20 **Automatic dental arch detection and panoramic imaging from cone beam computed tomography dataset** [13089-12]
