PROCEEDINGS OF SPIE

Advanced Fiber Laser Conference (AFL2023)

Pu Zhou
Editor

10–12 November 2023
Shenzhen, China

Organized by
Shenzhen Technology University (China) • National University of Defense Technology (China) Beijing University of Technology (China) • Huazhong University of Science and Technology (China) Jiangsu Normal University (China) • Institute of Chemical Materials, China Academy of Engineering Physics (China) • Key Laboratory of High Energy Laser Science and Technology, China Academy of Engineering Physics (China) • Laser Fusion Research Center, China Academy of Engineering Physics (China) • Shandong University (China) • Shanghai Institute of Optics and Fine Mechanics (China) Shanghai University (China) • South China University of Technology (China) Tianjin University (China) Tsinghua University (China)

Sponsored by
The Chinese Society for Optical Engineering (China)

Published by
SPIE

Volume 13104

Part One of Three Parts

Proceedings of SPIE 0277-786X, V. 13104

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Advanced Fiber Laser Conference (AFL2023)*, edited by Pu Zhou, Proc. of SPIE 13104, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xvii *Conference Committee*

Part One

ADVANCED FIBER LASER CONFERENCE (AFL2023)

13104 02 **Synchronously pumped 3.5μm mode-locked fiber laser** [13104-1]

13104 03 **Study on laser performance of tapered ytterbium doped fiber in nanosecond pulse amplifier** [13104-2]

13104 04 **White-box digital-twin-based real-time polarization tracking** [13104-3]

13104 05 **Control of optical rogue waves in ultrafast fiber lasers by genetic algorithms** [13104-5]

13104 06 **160W narrow-linewidth fiber laser with a homemade polarization-maintaining Tm-doped fiber** [13104-6]

13104 07 **Photonic nanostructures for advanced light trapping in thin crystalline-silicon solar cells** [13104-8]

13104 08 **Mask detection method for automatic stereoscopic display** [13104-9]

13104 09 **Review of cold atom quantum-based vacuum metrology** [13104-10]

13104 0A **Research progress of high-precision polishing technology on optical diamond material surface** [13104-16]

13104 0B **Fabrication of large aspect ratio single crystal diamond microchannel by femtosecond laser** [13104-17]

13104 0C **Compact fiber sensor for simultaneous strain and temperature measurement based on malposition splice cascading single-mode-multimode-single-mode fiber grating** [13104-19]

13104 0D **Bidirectional demarcated vector-based bidirectional link failure localization method in optical network** [13104-20]

13104 0E **Research on high-precision tracking of space laser terminal based on energy-optimized SPGD** [13104-21]

13104 0F **Powder sintering fabrication of the Ba-Al-S:Eu single sputtering target** [13104-23]

13104 0G **Study on pixel evaluation function of air film hole image of turbine blade** [13104-25]

13104 0H **396-MHz 1030-nm hybrid CPA amplifier based on fiber-Yb:YAG crystal thin rod** [13104-26]

13104 0I **Simplified coherent optical transmissions utilizing noise shaping and non-integer-oversampling clock data recovery** [13104-27]

13104 0J **Localization and recognition of specific targets in land-based hyperspectral images based on combined spatial and spectral information** [13104-29]

13104 0K **Laser system for Shanghai soft x-ray free-electron laser facility** [13104-30]

13104 0L **Research progress of chirp managed lasers** [13104-33]

13104 0M **Integrated 2D beam-steering scanner based on cross-bar structure** [13104-34]

13104 0N **Multi-attitude small aircraft object detection based on Gm-APD LiDAR** [13104-35]

13104 0O **A novel variance estimation approach for modified Rayleigh radial model based on the Kullback-Leibler divergence** [13104-36]

13104 0P **Evaluation method for communication equipment health status based on dynamic composite weights** [13104-37]

13104 0Q **Abrupt change fault, slow change fault and intermittent fault data oversampling technique for health evaluation of transmission equipment in electric power communication network** [13104-38]

13104 0R **Preparation conditions investigation on high-quality lithium niobate thin films on SiO_2 substrates** [13104-39]

13104 0S **Study on total dose radiation effect of γ rays on β-Ga_2O_3 SBD** [13104-40]

13104 0T **Study on the preparation of Ag_2Se colloidal quantum dots and its infrared properties** [13104-42]

13104 0U **Colorization of short wave infrared image based on depth learning** [13104-43]

13104 0V **Raman amplifier placement in C+L-band elastic optical networks** [13104-44]

13104 0W **Distributed optical fiber fusion sensing system based on dual light source and pulse precision delay technology** [13104-45]

13104 0X **Experiment on protection performance of plasma array to 6GHz high-power microwave** [13104-48]

13104 0Y **Design of an integrated reconfigurable polarization rotator based on right-angle Sb_2S_3 inlaid in 4H-SiC** [13104-49]

13104 0Z **Distributed fiber optic sensor for branch localization using twice-FFT** [13104-50]

13104 10 **Deep-learning-based method for concealed object detection in terahertz (THz) images** [13104-51]

13104 11 **Signal stability improvement of underwater LIBS for a submerged Al target assisted with circulating sink** [13104-52]

13104 12 **Structural and optical characteristics of $InAs_{0.02}Sb_{0.82}N_{0.16}$ thick epilayers grown by melt epitaxy** [13104-53]

13104 13 **Research on the infrared radiation characteristics of typical ground object background in the shooting range** [13104-58]

13104 14 **The effect of antireflection coating on the characteristics of wideband silicon avalanche photodetectors** [13104-59]

13104 15 **A broadband and integrated microwave photonic transceiver** [13104-60]

13104 16 **A lightweight measurement algorithm for target velocity and direction in airborne optoelectronic system** [13104-61]

13104 17 **Accelerate all-to-all for deep learning with optical switching network architecture** [13104-62]

13104 18 **Fatigue life prediction of a dynamic optical cable under a turret-moored FPSO** [13104-68]

13104 19 **253km BOTDR sensing system based on bypass remote optical pumped and backward Raman amplification** [13104-69]

13104 1A **High-power continuous array semiconductor laser** [13104-70]

13104 1B **Improved OAM mode purity and stability by ring-core fiber with single-sided gradient index profile** [13104-75]

13104 1C **Dual-parameter balloon-type fiber optic sensor based on MIL-101 moisture-sensitive material** [13104-76]

13104 1D **Application of producer-consumer pattern in real-time infrared image inversion at the missile range** [13104-77]

13104 1E **Study on the improvement of ultraviolet damage characteristics of DKDP crystal by dual-wavelength laser conditioning** [13104-79]

13104 1F **Deep reinforcement learning-based routing and spectrum allocation for variable-bandwidth gridless optical networks** [13104-80]

13104 1G **An integrated uni-traveling-carrier photodetector with 3dB bandwidth of over100 GHz** [13104-81]

13104 1H **DSSS assisted high receiving sensitivity inter-satallite integrated laser communication/ranging link** [13104-83]

13104 1I **Silicon nitride based Mech-Zehnder thermo-optic switch** [13104-86]

13104 1J **Research on high efficiency ultra precision grinding technology of sapphire** [13104-90]

13104 1K **Avoiding-mode-crossing-free micro-resonators on a wafer-scale ion-sliced 4H-silicon-carbide-on-insulator platform** [13104-92]

13104 1L **Mid-infrared conventional solitons and soliton molecules in a polarization-maintaining fluoride fiber oscillator** [13104-95]

13104 1M **Determination of blind elements of InGaAs short-wave infrared focal plane detector with high effective pixel rate for low-orbit satellite communication based on dark signal voltage change rate and sliding window detection** [13104-99]

13104 1N **Research on high precision and large range automatic focusing method for digital lithography** [13104-101]

13104 1O **Study of the broken chain diagnosis method based on space laser communication** [13104-105]

13104 1P **Long-distance and high-precision fiber microwave frequency transmission** [13104-106]

13104 1Q **Fast prediction method for dynamic RCS of rotary wing small UAVs** [13104-110]

13104 1R **Fast preparation method for spiral phase plates based on digital grayscale mask** [13104-111]

13104 1S **Design and fabrication of the terahertz antenna structures based on micro-nano optics** [13104-112]

13104 1T **Detection of moss coverage and growth rate on rock surfaces based on semantic segmentation** [13104-117]

13104 1U **High-performance tracker for infrared small targets** [13104-121]

13104 1V **Experimental demonstration of photonic crystal resonator enabling wavefront shaping and beam steering** [13104-124]

13104 1W **Brillouin fiber swept laser based on distributed Rayleigh scattering in optical fibers** [13104-125]

13104 1X **Continuous laser two-way time-frequency transfer in the presence of motion** [13104-129]

13104 1Y **Dual wavelength microwave frequency fiber interferometer system for distributed localization based on time delay estimation** [13104-131]

13104 1Z **Application of optical fiber sensing technology in traffic tunnel pavement disease monitoring** [13104-132]

13104 20 **The dynamic OSPF routing scheme of optical networks** [13104-134]

13104 21 **In-situ observation and detection of the dynamic crystallization in acoustically levitated droplets** [13104-135]

13104 22 **Hardware accelerator design for object detection based on convolutional neural network** [13104-136]

13104 23 **Watt-level 2.94μm Er: ZBLAN fiber laser with low threshold** [13104-137]

13104 24 **Multi-view autostereoscopic display based on tilt-fit lenticular lenses** [13104-138]

13104 25 **Enhanced light absorption using inverted triangular grooved cover glasses for triple-junction GaAs solar cell modules** [13104-139]

13104 26 **Absolutely consistent phase synchronization technology with a wide temperature range based on fiber-optic time and frequency transfer** [13104-140]

13104 27 **Photon response induced by single quantum phase slip of superconducting nanowire single photon detector** [13104-142]

13104 28 **Magneto-optical study of exciton fine structures in 2D HOIP $(PEA)_2PbI_4$** [13104-143]

13104 29 **Lightweight fire detection algorithm based on deep learning** [13104-144]

13104 2A **Tightly focusing characteristics of perfect vortex vector beam** [13104-145]

13104 2B **Growth of large-sized 2D Ruddlesden-Popper perovskite single crystals for high-performance photodetectors** [13104-147]

13104 2C **A quantum well infrared photodetector capable of distinguishing circularly polarized light operating at very long infrared wavelengths** [13104-149]

Part Two

13104 2D **A product characteristic data display design based on three-dimensional real-time stereoscopic projection** [13104-150]

13104 2E **Effective suppression of stimulated Raman scattering in high-power fiber oscillators using single CTFBG** [13104-158]

13104 2F **Suppression of self-pulsing in high power Tm^{3+}-doped fiber laser** [13104-161]

13104 2G **Correction for phase-generated carrier algorithm demodulation errors caused by uneven frequency response** [13104-162]

13104 2H **Research on software modeling of aerial electro-optical system based on UML** [13104-166]

13104 2I **Research on echo intensity characteristics of moving targets detection under atmospheric conditions** [13104-167]

13104 2J **Mode-locked PM-LMA Er/Yb-doped fiber oscillator based on nonlinear polarization evolution** [13104-168]

13104 2K **Influence of line manufacturing errors on the accuracy of line localization algorithms on reticle** [13104-170]

13104 2L **Wafer defect detection based on adaptive multi-scale optical flow detection** [13104-172]

13104 2M **Point spread function-inspired deformable convolutional network for holographic displays** [13104-173]

13104 2N **High coupling efficiency two-color quantum well infrared photodetectors based on dual micro-cavities** [13104-174]

13104 2O **PINN-based neural network for photoelastic stress recovery** [13104-175]

13104 2P **Cross-interference correction for multi-gas TDLAS detection** [13104-176]

13104 2Q **The wired and wireless hybrid access network based on optimized self-homodyne and heterodyne technology** [13104-177]

13104 2R **Lightpath provisioning in a hybrid ULL fiber-SSMF elastic optical network** [13104-178]

13104 2S **Polarization-insensitive ultraviolet super-oscillatory metalens doublet for large-field-of-view focusing and imaging** [13104-180]

13104 2T **Enhancing imaging resolution of superlens through transient illumination** [13104-181]

13104 2U **SCN-doped SnO_2 electron transport layer enhanced photoelectric performance of all-inorganic $CsPbBr_3$ perovskite solar cells** [13104-183]

13104 2V **Optical design of mesoscope objective with high resolution and large field of view** [13104-184]

13104 2W **Optimization design method of cascaded FSR-Free microring filters using IPSO algorithm** [13104-185]

13104 2X **Simulation of photoelectric response in pixel microregion of silicon APD array** [13104-186]

13104 2Y **Measurement method of laser beam quality of solid-state laser** [13104-190]

13104 2Z **A monolithic 2042nm hybrid pumped gain-switched thulium-doped fiber laser** [13104-191]

13104 30 **Research on surface relief grating design technology for augmented reality display** [13104-192]

13104 31 **A flexible SERS sensor of PANI/GO/Ag film for detecting pesticide residue of glyphosate** [13104-193]

13104 32 **Application analysis of spectrum sensing technology** [13104-194]

13104 33 **Sensitivity-enhanced fiber optic gyroscope for rotational seismology** [13104-198]

13104 34 **Mid-infrared supercontinuum generation in a thulium-doped ZBLAN Fiber** [13104-199]

13104 35 **Enhancing second harmonic generation efficiency by coupling fano and surface lattice resonances in dolmen-type gold metasurface** [13104-200]

13104 36 **Availability analysis of atmospheric channel for ground candidate sites for satellite-ground laser communication** [13104-201]

13104 37 **Self-injection locking dual-DFB lasers based on a micro-resonator for ultra-low noise microwave generation** [13104-202]

13104 38 **Research on the calculation of pollution source concentration distribution in industrial parks based on passive FTIR** [13104-209]

13104 39 **Uniformity optimization for indoor visible light communications with multiple light sources** [13104-210]

13104 3A **Wide-range OFDR strain sensor based on UV-exposed-SMF and distance compensation method** [13104-212]

13104 3B **Performance comparison of 100Gbps upstream coherent passive optical network** [13104-213]

13104 3C **Guidance to effective and natural adversarial attack via visual explanation for DNNs** [13104-214]

13104 3D **A node upgrade scheme based on node importance in optical transport networks** [13104-216]

13104 3E **Research on vortex millimeter wave suppression divergence technology based on wavefront modulation** [13104-218]

13104 3F **Lateral optical force modulation due to electromagnetic multipole polarization** [13104-223]

13104 3G **Geometrically analyzed target localization algorithm based on IMU-LK optical flow** [13104-225]

13104 3H **Simulation analysis of laser wireless energy information synchronization transmission under low-speed conditions** [13104-227]

13104 3I **Dichloromethane detection based on near-infrared absorptive sensing** [13104-228]

13104 3J **Influence of temperature on the total ionizing dose effects in Al_2O_3-doped optical fibers** [13104-230]

13104 3K **Cascaded traveling wave electrodes designed for group velocity matching in electro-optic modulation** [13104-234]

13104 3L **A novel scheme for acoustic sensing based on a Floquet optical lattice clock** [13104-235]

13104 3M **Opto-mechanical dynamics optimization of electro-optical stabilized sighting system based on data driving** [13104-238]

13104 3N **Research on wide-band disturbance observation and compensation for electro-optical stabilized sighting system** [13104-239]

13104 3O **Design of a fixed number stage programmable differential ring oscillator** [13104-240]

13104 3P **Flexible feedback intelligent routing algorithm based on DQN for large-scale LEO networks** [13104-242]

13104 3Q **Dynamic routing planning method for large-scale low-orbit satellite networks based on location guided and multi-agent DQN network** [13104-243]

13104 3R **A review on the application of carbon quantum dots on optical biosensors** [13104-245]

13104 3S **Programmable chiral liquid crystal elastomer with broadband tunability** [13104-250]

13104 3T **Data processing method for improving the in-situ detection performance of flue gas concentration in laser modulation spectroscopy** [13104-251]

13104 3U **Impact of compression ratio on reconstruction quality in coded aperture compressive temporal imaging** [13104-254]

13104 3V **A data processing method of photon counting LIDAR for high-speed moving targets** [13104-256]

13104 3W **Influence of pixel mesa structure on the performance of InGaAs focal plane array detectors** [13104-258]

13104 3X **Raman lidar for remote sensing of gas** [13104-263]

13104 3Y **LSTM-based signal processing for slow-changing strain trend of Brillouin optical time domain reflectometry** [13104-264]

13104 3Z **Dual-path 1907nm high-power thulium-doped fiber laser** [13104-265]

13104 40 **Effect of NiO film thickness on the performance of NiO/n-Si UV photovoltaic detector** [13104-266]

13104 41 **Research and experiment on strain measurement of R-angle structure based on OFDR technology** [13104-272]

13104 42 **Experimental investigation of 800Gb/s 2×FR4 optical module** [13104-273]

13104 43 **Research on calculation method of vertical axis error for photoelectric theodolite** [13104-274]

13104 44 **Athermal optical design of laser altimeter direction measurement system with wide spectrum** [13104-277]

13104 45 **Research on photonic communication technology and its prospects for defense applications** [13104-278]

13104 46 **Self-localization of UAVs based on visual-inertial integrated navigation** [13104-280]

13104 47 **Photonic-assisted generation of chirp microwave waveforms with switchable bands and immunity of dispersion-induced power fading** [13104-282]

13104 48 **Optimization design method of super-size carbon fiber main bearing structure** [13104-283]

13104 49 **Optimization of dual-polarization full spectrum modulation NFDM system based on probability shaping and LMMSE** [13104-287]

13104 4A **Real-time traffic prediction for PON based on adaptive online learning** [13104-289]

13104 4B **Observation of gallium droplets directly formed on GaAs substrate by in-situ laser irradiation** [13104-291]

13104 4C **Controllable synthesis of monodispersed PbS colloidal quantum dots and their size regulation** [13104-292]

13104 4D **Traffic prediction for PON based on pre-matched cross-port transfer learning** [13104-294]

13104 4E **Experimental research on fiber Bragg grating sensor in high speed penetration damage monitoring** [13104-295]

13104 4F **FeS quantum dots: preparation, structure and optical properties** [13104-296]

13104 4G **Preparation and optical properties of Br-doped GQDs** [13104-297]

13104 4H **Target anti-jamming acquisition method based on machine vision classification technology** [13104-298]

13104 4I **Preparation and optical properties of CoS QDs using liquid phase ultrasonic exfoliation** [13104-299]

13104 4J **Fabrication of GaAs quantum rings by in-situ laser irradiation** [13104-300]

13104 4K **MBE growth of Ga droplets with the size of wide distribution via an in-situ laser irradiation** [13104-301]

13104 4L **Research on MEMS fast steering mirror technology requirements for space optical communication system** [13104-302]

13104 4M **Design and fabrication of 780nm Fabry-Perot and distributed-feedback laser towards narrow linewidth** [13104-304]

13104 4N **The MAC aware routing algorithm in elastic optical networks** [13104-305]

13104 4O **Robust hybrid FC-AE-1553 space network with parallel optical wireless and radio frequency links** [13104-307]

13104 4P **Research on gas concentration measurement under intrusive damage testing** [13104-311]

13104 4Q **Influence and correction of infrared window on package blackbody radiation ideality** [13104-312]

13104 4R **The effect of iodine gas phase doping on electrical performance of indium zinc oxide thin-film transistors by solution method** [13104-315]

13104 4S **Research on electrical properties of flame retardant polyolefin materials for UHV optical cable** [13104-318]

13104 4T **Study of progress on application of hyperspectral imaging combined with deep learning approaches in detecting foods content** [13104-319]

13104 4U **Topological edge states electro-optic modulator based on valley photonic crystals** [13104-320]

Part Three

13104 4V **Force analysis of optical fiber tweezers with different endface configurations** [13104-321]

13104 4W **Learned spinning mask for high-speed single-pixel imaging** [13104-322]

13104 4X **Spiking photonic reservoir computing system based on photonic spiking neuron** [13104-324]

13104 4Y **Research on supercontinuum generation in a dispersion-engineered silicon nitride waveguide** [13104-326]

13104 4Z **Research on low-loss silicon nitride waveguide based on high-confinement silica cladding** [13104-327]

13104 50 **Influence of nutating deflection on fiber coupling efficiency for fiber optic nutator** [13104-328]

13104 51 **Algorithm for de-scattering 3D images from infrared time-of-flight(ToF) cameras** [13104-330]

13104 52 **Analysis on the laser linewidth tolerance for uplink in coherent OFDMA-PON system** [13104-332]

13104 53 **Design and micro-assembly of irradiation-resistant optoelectronic transceiver module** [13104-333]

13104 54 **Image processing method in bump height measurement in chip packaging** [13104-334]

13104 55 **Investigating the possibility of multiple board parallel test of atmospheric-neutron induced soft errors** [13104-335]

13104 56 **Phase retrieval network for multi-functional holography based on self-supervised learning** [13104-337]

13104 57 **Expanding non-line-of-sight imaging distance without compromising resolution** [13104-339]

13104 58 **A compact femtosecond laser system based on homemade Yb:YAG single crystal fiber gain module with high pulse energy and good beam quality** [13104-340]

13104 59 **National defense quantum tech: deployment analysis and future prospects** [13104-341]

13104 5A **Controlling the resolution of ghost imaging with shaped modulated incoherent source** [13104-342]

13104 5B **Research on vertical radial plume mapping scanning optical path localization method based on reinforcement learning algorithm** [13104-344]

13104 5C **Mining and analysis of artificial intelligence chip technology route based on quantitative model** [13104-345]

13104 5D **Low-loss spot size converter based on the integration of graded-index waveguide and 3D tapered waveguide** [13104-346]

13104 5E **Realization of EBAPS imaging under 10^{-5}lx illumination based on micro-nano preparation** [13104-347]

13104 5F **A monolithic integrated plasmonic Schottky photodetector array for direct-detected miniaturized spectrometers** [13104-348]

13104 5G **Delay aware routing and spectrum allocation based on Q-learning** [13104-350]

13104 5H **Research on LED fingerprint identification method based on convolutional neural network** [13104-351]

13104 5I **Accuracy analysis of optical external ballistic velocity parameter measurement** [13104-353]

13104 5J **Application of IBE etching process in EBAPS device** [13104-354]

13104 5K **Visual artifacts caused by pulse width modulation in AR/VR displays: a case study on Magic Leap 2 head-mounted display (HMD)** [13104-355]

13104 5L **Intelligent metasurface for self-adaptive electromagnetic manipulation based on power recognition** [13104-357]

13104 5M **Multi-objectives optimization for catenary meta-optics via field-driven optimization** [13104-358]

13104 5N **A comprehensive review on application of composite guidance technology in aerial guided bombs** [13104-359]

13104 5O **Characterization of optical forces and torques in polystyrene spheres steered by tightly focused orbital angular momentum beams** [13104-360]

13104 5P **A high precision passive coupling scheme between optical fiber and waveguide** [13104-363]

13104 5Q **Pixel-level phase-controllable multifunctional metalenses** [13104-364]

13104 5R **Model optimization of infrared homogenization for inertial confinement fusion cryotargets** [13104-366]

13104 5S **Precision measurement of optical force based on torsion balance** [13104-368]

13104 5T **Vector displacement sensor based on femtosecond laser direct writing gratings and waveguides in a seven-core fiber** [13104-369]

13104 5U **Optimized optical catenary structures empower compact on-chip polarization detector** [13104-370]

13104 5V **Investigation on wavelength-dependent absorption characteristic of wavelength-stable LDs in fiber laser** [13104-371]

13104 5W **Femtosecond Bessel beam-assisted wet etching for the fabrication of microhole arrays on YAG crystal** [13104-374]

13104 5X **Ultrafast laser lift-off technology for delamination of GaN layers** [13104-377]

13104 5Y **The real-time vectoring measurement method based on the optimal liner filtering** [13104-382]

13104 5Z **Non-contact laser-based test method for vibration performance parameters of hemispherical resonator** [13104-384]

13104 60 **Nonlinear equalizer for spectral efficient IM/DD FBMC/OQAM transmission system** [13104-386]

13104 61 **Super-elastic liquid-metal-based triboelectric fibers and textiles** [13104-387]

13104 62 **Single-crystal InSe fiber-based microlaser fabricated by a convenient molten core drawing technique** [13104-392]

13104 63 **A method for comparative analysis of multidimensional data based on product characteristics** [13104-395]

13104 64 **Macroscopic subdiffraction Fourier ptychography imaging based on the camera array** [13104-396]

13104 65 **Quantitative research of topological insulator based on mining and analysis model** [13104-398]

13104 66 **Large-range continuously adjustable low-loss terahertz phase shifter** [13104-399]

13104 67 **High efficiency non-reciprocal metasurface based on vanadium dioxide** [13104-400]

13104 68 **Study of mid-IR laser generation based on $BaGa_4Se_7$ optical parametric oscillators** [13104-402]

13104 69 **An accuracy reservation method for quantized inference of neural network on FPGA platform** [13104-403]

13104 6A **Real-time implementation of selection combining algorithm for mode diversity free space coherent optical receipt** [13104-404]

13104 6B **Compensation of Doppler frequency shift based on a two-stage frequency offset estimation algorithm for coherent optical QPSK system** [13104-408]

13104 6C **Prior-free non-invasive imaging through biological layers exceeding memory effect with low data volume** [13104-411]

13104 6D **Broadband and compact arbitrary ratio curved directional coupler enabled by inverse design** [13104-412]

13104 6E **Passive Q-switching fiber laser based on MnS saturable absorber** [13104-414]

13104 6F **Data center interconnection resolution with metro transport network technology** [13104-416]

13104 6G **A laser frequency-stabilised control system for space-borne gravitational wave detection** [13104-420]

13104 6H **The joint method of UAV track based on single station optical telemetry** [13104-421]

13104 6I **Degradation mechanisms of total ionizing dose effect in photocouplers** [13104-422]

13104 6J **Entangled photon pair source with efficient modal phase matching on AlGaAs platform: a solution to fully connected quantum internet** [13104-423]

13104 6K **LED fingerprint recognition method based on transformer self-attention mechanism** [13104-424]

13104 6L **Back-illuminated image sensor for hyperspectral application based on P-type high-resistivity silicon substrate** [13104-425]

13104 6M **Research on intelligent management scheme of passive transmission network resources** [13104-429]

13104 6N **Key technologies for the satellite optical network** [13104-433]

13104 6O **Research on the performance of PAM4 space chaotic downlink laser communication system under atmospheric turbulence** [13104-435]

13104 6P **Design of optical antenna for space optical communications and coarse pointing error analysis** [13104-437]

13104 6Q **Structural deformation monitoring based on distributed fiber optic sensors** [13104-438]

13104 6R **Indium antimonide-based saturable absorber to demonstrate passively Q-switched and mode-locked operation** [13104-442]

13104 6S **Multi-pixel SiPM joint estimation and detection for UAV under pointing errors** [13104-443]

13104 6T **Network Time Protocol (NTP) implementation for laser inter-satellite networks** [13104-444]

13104 6U **Brief analysis on the development of physical security technology in optical network** [13104-445]

13104 6V **A learning-based dynamic routing and spectrum allocation algorithm in satellite elastic optical networks** [13104-446]

13104 6W **Distribution of Gaussian entanglement of cluster state with different structures** [13104-447]

13104 6X **Smart infrared camouflage based on inverse design** [13104-448]

13104 6Y **Cold shield matching of cooled infrared system based on telecentric optical structure** [13104-449]

13104 6Z **Fabrication of 12×14 MEMS-based Fabry-Pérot tunable filter array** [13104-451]

13104 70 **Monitoring the life cycle stages of *Haematococcus pluvialis* by using FLIM** [13104-452]

13104 71 **Strain testing of concrete using embedded fiber optic sensors in explosive testing** [13104-453]

13104 72 **A graphene ridge nanowire hybrid surface plasma waveguide with longer transmission length** [13104-454]

13104 73 **Cross-media detection simulation of blue-green laser radar in the dynamic sea surface** [13104-455]

13104 74 **Key assembling and alignment technology of laser communication opto-mechanical system** [13104-456]

13104 75 **Characteristics analysis of fused silica material and experimental research on polishing removal efficiency** [13104-457]

13104 76 **Fourier phase retrieval using multiple constraints based on physics enhanced neural network** [13104-458]

13104 77 **Study on γ-irradiation effect of silicon single photon avalanche diodes** [13104-461]

13104 78 **A high precision temperature control system for ultra-stable laser reference cavity in space gravitational wave detection** [13104-462]

13104 79 **All optical wavelength selective switch based on lithium-niobate-on-insulator microring resonators** [13104-463]

13104 7A **432-Gbps DP-QPSK transmission over multi-core fiber with low complexity self-coherent receiver** [13104-464]
