Table of Contents

Through-wall localization based on exponential moving average and distance decay elliptic model..... 1
Carbon price forecasting method based on CEEMDAN-SE-LiESN.....7
Compensation of guided wave signals in plastic water filled pipelines based on baseline signal stretch13
Immersive Teaching Enhancing Ability of Scientific Paper Writing: A Case Study in the Fields of Instrumentation and Measurement.....19
A domain mapping transfer learning method for fault diagnosis based on current signal..... 24
An Improved Tracking Algorithm for Reducing the Effects of Ionospheric Scintillation..... 29
A Review of Industrial Non-Intrusive Load Monitoring.....34
Dynamic Power Management of Wire Energy Harvester Powered Wireless Sensor Node.....40
Sampling the Scenario Feature for Pedestrians Trajectory Prediction..... 45
Transformer-based Bolt Looseness Detection with Data Enhancement by Variational Autoencoders.. 51
Fusing Item Knowledge And Sequential Graph Information For Session-based Recommendation.....55
FPGA-based design of oil debris signal processing system..... 61
Human Motion Prediction Based on Graph Convolutional Networks and Multilayer Perceptron..... 65
Research on Cooperative Control Technology of New Energy Fusion Energy Storage System..... 71
Magnetorheological Fluid-Based ThresholdFeedback Overload Protection System for the Miniature Turbine Generator.....77
Terahertz Characterization for Debonding Defects of Composites based on the Group-CNN Network 83
THz Signal Identification for Intelligent Characterization under High-resolution Mode based on RFECNet.....89
Multi-View Contrastive Self-supervised Triplet network for Skeleton-based Action Recognition.....94
An Emerging Fault Diagnosis Framework with Incremental Meta-learning for Rotating Machinery..100
RCTNet-A Defect Detection Network for Tiny Debonding Defects in Terahertz Images..... 106
Impact Detection Based on In-situ Direct Writing Piezoelectric Polymer Sensor Array.....111
Research on sEMG pattern recognition algorithm and implementation of a gesture recognition system117
Image classification network enhancement methods based on knowledge injection..... 123
Radar-Based Non-Contact Audio Recovery Method for Multi-Target Sound Equipment Monitoring 130
Human-Machine Interaction Assisted Autism Identification based on RepNet.....137
The two-way knowledge interaction interface between humans and neural networks.....143
A Novel Combinatorial Network for Anomaly Monitoring of Wind Turbines.....149
Multicriteria Fatigue Detection with Rapid Facial Tracking and Individualized Thresholds..... 155
Bayesian Exponential Regularized Tensor Based Approach for Sparse Geomagnetic Data Completion161
A Physics-Informed Artificial Neural Network Modeling Approach for Wide Temperature Range 4H-SiC MOSFETs.....167
A Data Augmentation Method Based on Multi-Modal Image Fusion for Detection and Segmentation171
Content-Conditioned Generation of Stylized Free-hand Sketches..... 176
Effect of surface roughness of ceramic substrate on microstructure and electric detonation performance of explosive foil..... 182
Robust Factor Graph Optimization Integrated Navigation Based on Improved Chi-square Test..... 186
Badminton Action Classification Based on Human Skeleton Data Extracted by AlphaPose..... 192

Research on image-based 3D reconstruction method in underwater welding scenes.....197
Three-dimensional dynamic analytical modeling of deep groove ball bearings with fault excitation.. 203
Research on High-Precision and Low-Power Quartz MEMS Gyroscope Signal Demodulation Circuit Based on AFE and FPGA Fusion..... 209
A Novel FPGA-Based Delay-Line Implementation and Interpolation Method Using TDCs..... 215
Few-Gradients-Based Qualitative Analysis for Diffusion-Ordered NMR Spectroscopy..... 221
Intelligent Edge Gearbox Faults Diagnosis System via Multiscale Depthwise Separable Convolution Network.....226
A multimodal gesture recognition dataset for desktop human-computer interaction..... 232
Multimodal sentiment analysis missing modality reconstruction network based on shared-specific features..... 238
Feature Extraction of Electromagnetic Signals from Photovoltaic Modules of Black Piece Recognition using SVD and Wavelet Packets.....244
Improved Vocal Tract Length Perturbation for Improving Child Speech Emotion Recognition.....250
Design of a wireless torque measurement system for real-time monitoring of marine shaft..... 255
Fault Diagnosis of Harmonic Drives Based on A FDG-ResNet Joint Methodology..... 259
Research on Emotion Recognition Based on Multi-modal Physiological Signals..... 266
Research on frequency identification method for rotating blades based on the sampling-aliasing frequency map.....273
Production line action behaviour recognition based on dynamic attention mechanism in sequence space280
A lightweight network based on adaptive knowledge distillation for remaining useful life prediction under cross-working conditions..... 287
Modeling and analysis of external gear pump broken tooth failure mechanism..... 293
Application of VAE-WGAN-GP in imbalanced bearing data fault diagnosis..... 298
A few-label contrastive transfer fault diagnosis method for rolling element bearings.....304
Research on a Wide-Measurement Frequency PVDF Piezoelectric Film Vibration Sensor using a Double Cantilever Beam Structure..... 310
Depthwise Separable Convolutional Neural Network for Fault Diagnosis in Motor of CRF Pump-Unit Using Infrared Thermal Imaging..... 316
Using Multi-modal MRI Data for Parkinson's disease Diagnosis Based on 3D Convolutional Neural Network.....321
MuFF-E: Sleep Spindle Detection using Multi-Feature Fusion and Ensemble.....326
Research on Selection of Wavelength Scanning Mechanism for Ultraviolet Photoelectron Spectroscopy331
Influence of Control Parameters on Wind-thermal-bundled Transmission System with High Wind Power Penetration..... 338
Research on Real-Time Pedestrian Detection Based on Infrared-Visible Image Fusion..... 344
Multimodal fusion-based fault diagnosis of motor in CRF pump-unit under data imbalance..... 350
Design and analysis of a low-frequency vibration energy harvester with a piezoelectric stack and a negative stiffness structure.....357
An Improved Initial Parameter Setting Method for Variational Time-Domain Decomposition.....362
Effect of doping Ni-Cr on the firing performance of Tan Transducer.....368
Measurement of Radiation-induced Conductivity of Alumina Material under Steady-state X-ray Irradiation.....371

An Attention Conditional Regularized Least Squares Generative Adversarial Network for Gearbox Fault Diagnosis..... 375
A parameterized optimization approach for gearbox dynamics response prediction..... 382
High-efficiency Energy Collection Module of Vacuum Ultraviolet Monochromator Based on Image Slicers.....387
Intelligent Real-time Monitoring System Based On Flight Test Model Design and Development... 391
Embedded fall-detection method based on MediaPipe and LSTM neural network..... 396
An Advanced Edge Intelligent Approach for Capsule Defect Recognition Based on CNN Using an Embedded Platform.....401
Deformation initial value estimation method based on an improved SIFT algorithm.....406
A Data-Driven Approach for Power IGBT Operation State Prediction Based on domain adapted BiLSTM networks.....411
Simulation Study on Performance Parameters of GIS Built-in UHF Sensors.....417
Lowlight human pose estimation using depthwise separable convolution curve matching networks...422
Research on Weld Defect Detection of Multi-scale Normalized Gray-level Co-occurrence Matrix.... 427
Research on Pathological Voice Recognition using Multi-Scale Convolutional Neural Network.....432
Usage of ResNet18 with CBAM Attention Mechanisms in Facial Emotion Recognition..... 437
An Improved Shift-Invariant Sparse Bearing Fault Diagnosis Method Based on Feature Learning Base Atoms..... 443
Bearing Fault Feature Extraction Method Based on Center-frequency Adaptive Filter Assisted Sparse449
CSFormer: Cross-Scale Transformer for Feature Matching.....455
A Low-Frequency, Broadband Electromagnetic Vibration Energy Harvester Using Magnetic Levitation System and Impact Mechanism..... 461
PAM-DETR: Parallel Attention-MLP for Insulator Defect Detection..... 467
Phase Space Smooth Mode Decomposition for Bearing Fault Diagnosis..... 473
Spacecraft Fault Knowledge Graph Completion Based on Knowledge Reasoning..... 478
A cooprative hybrid evolutionary algorithm for flexible scheduling with AGVs..... 482
An Evolutionary Algorithm-based Neural Architecture Search for Feature Separation in Classification Problems.....489
A hybrid particle swarm optimization based on Q-learning for multiobjective distributed flow-shop scheduling problem..... 495
Sensitivity-Enhanced Tilt Sensor Based on Femtosecond Fiber Bragg Grating..... 501
Long and short term network Unet personnel activity identification based on CSI..... 507
Simultaneous Measurement for Blade Tip Clearance and Vibration Based on Capacitive Probe..... 512
PID-Based Remote Operated Control System for Continuum Robots..... 518
Design of Claw-type Continuum Robot Based on Rigid Flexible Coupled Structure.....524
An Improved Graph Sampling-based Machine Fault Diagnosis under Edge Computing Architecture 528
Research and Application of Safety Monitoring System Based on Fiber Bragg Grating Sensors..... 534
Semantics and Spatial Structures Guided Point Cloud Registration.....539
Intelligent Condition Monitoring of Network Devices in Fault Recording Systems..... 545
Efficient Planning in Spacecraft Telemetry Task Flow for Real time Fault Detection and Isolation Based on Directed Graph Topology Sorting.....550
Research on Voltage Stability in Photovoltaic Power Generation Systems..... 555

Fuzzy assessment of hierarchical state of relay protection equipment in intelligent substation based on entropy weight DSmT..... 559
Transformer Fault Diagnosis Method Based on Deep Belief Networks and DSmT..... 565
Modeling Analytical Redundancy for Sensor Anomaly Detection with Graph Nodes Masked Autoencoder..... 571
Planetary gearbox fault diagnosis based on a multi-convolutional neural network with SVMD and feature fusion under variable speed conditions..... 577
Zero-Shot Compound Fault Diagnosis Based on Weighted Semantic Autoencoder..... 583
Embedding to Metric Model for Few-Shot Cross-Domain Fault Diagnosis..... 589
Classification of Demagnetization Faults based on Performance Evaluation of Machine Learning Algorithms via Flux and Vibration Signals in Permanent Magnet Wind Turbine Generator..... 595
Gesture recognition based on the fusion of millimeter-wave radar and camera..... 599
Optimization of Charging Process Parameters for Initiator Based on Orthogonal Experimental Method 604
The Quantum Efficiency Calculation of Perovskite Materials Based on an Extended Moments Model 608
Photovoltaic Module Electroluminescence Defect Detection Method and Defect Analysis..... 613
A Sub-1ppm/°C Wide-Temperature-Range Bandgap Voltage Reference with Superior-Order Temperature-Curvature Compensation..... 617
Learning to Optimize Vehicle Routes Problem: A Two-Stage Hybrid Reinforcement Learning..... 622
Multi-source signal localization analysis via ST-IMUSIC for trackside acoustic system..... 628
Design of Dielectric Constant Sensor for Transformer Oil Condition Detection Based on AllMetal Metamaterial..... 634
Numerical Study on RFV Model of Conductivity Induced by Steady X-ray Radiation of Polyimide Materials..... 638
Numerical Calculation and Experimental Study of Ultraviolet Photoelectron Emission Yield of Metallic Aluminum..... 643
Demagnetization Fault Diagnosis Based on Feature Extraction and Convolutional Neural Network for Permanent Magnet Generator..... 647
Design and Implementation of Routing Algorithms for Mobile Ad Hoc Network Applying TDMA Strategy Based on Smart Antenna..... 651
UWB-Based Large-Range Wireless Positioning Using DE-Dogleg..... 657
Study on detonation transmission law of micro-scale explosive train..... 663
UHF RFID Indoor Positioning System using Multi-Base Stations and Laiyite-Gaussian Filtering..... 667
Multiscale Park's Vector Approach for Identifying Early Stator Fault Severity Using MCSA in DFIGs 673
Design of A New Groove Structure of Quartz Tuning Fork with High Performance..... 677
A DRT based Lithium battery multi-time scale model parameter identification and SOC estimation. 682
A Novel Charging Load Prediction and Carbon Emission Calculation Method for Electric Vehicle... 689
Behavior-based classification of dairy cattle health from inertial sensor data using correlation analysis and machine learning..... 694
Theoretical Modeling for UV Photoelectron Emission Yield of Spacecraft Surface Materials..... 699
Data-driven fault detection of power distribution network based on temporal convolutional network and long short-term memory..... 705
Research on Spatial Angle Super-Resolution Algorithm Based on Adaptive Layered Sparse 711
Optimization of a double-sided annular dome-like quartz crystal resonator 716
PVDF-based Sensing Technology of Dynamic Characteristic for Rotation Shaft 721

A data-driven framework based on deep learning with self-attention mechanism for fault detection in power distribution networks 726
A novel Transformer model based on dynamic convolution and ProbSparse self-attention for RUL prediction of bearings 732
A Prognosis Swin Transformer Network for Rolling Bearing Remaining Useful Life Prediction 738
Center of Gravity Trajectory Modeling and Structural Stability Health Evaluation of Reclaimer under Variable Load Conditions 744
Damage diagnosis of rotary structure of large reclaimer based on dynamic modeling 749
Research on Denoising Methods for Hyperspectral Images Based on Low-Rank Theory and Sparse Representation 755
Structural Design of A Novel Quartz Tuning Fork Temperature Sensor with Optimized Sensitivity 760
Original cuts of quartz tuning fork for temperature sensor designed by image automatic generator....767
An Accelerometer and Magnetometer-based Indoor Positioning System for Firefighters.....773
