### General Session 1: Planning, Operation and Control of Energy Internets

|                                                                                                                                                      |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Joint Rebalancing and Vehicle-to-Grid Coordination of EVs Through an Aggregative Game Model.....                                                     | 1  |
| <i>Tengfei Zhou, Zhe Zhou, Xue Li, Bo Zhang</i>                                                                                                      |    |
| A Quantitative Calculation Method for the Flexibility Demand of Provincial Power Grid.....                                                           | 7  |
| <i>Feifei Sun, Qingyue Chen, Yangqing Dan, Zongxiang Lu, Ying Qiao, Lei Zhang</i>                                                                    |    |
| Correlation Analysis between Electrification and Energy Efficiency of Park-Level Integrated Energy System Considering Operational Optimization ..... | 12 |
| <i>Fumin Chen, Xinwei Shen</i>                                                                                                                       |    |
| The Optimization Design Scheme about Parameter of Process Layer Network Packet in Smart Substation .....                                             | 19 |
| <i>Chen Fan, Zhiqiang Yao, Hui Ren, Naichao Chang, Yu Liu, Zhihuai Shu</i>                                                                           |    |
| Cluster-Based Hierarchical Coordination Planning and Control Strategy for Distribution Network Generation-Load-Storage .....                         | 26 |
| <i>Wang Xuli, Zhang Hui, Zhou Yuanke, Ling Ru, Hu Xudong, Xu Ran</i>                                                                                 |    |
| A Technology Maturity Assessment Model Modified by Mutation Theory.....                                                                              | 33 |
| <i>Chao Gao, Peng Liao, Hanxing Zhang, Yuanji Cai, Zhuochen Guo, Weiran Li</i>                                                                       |    |
| Power Coordinated Control of Multi-port Electric Energy Router Based on VSG Adaptive Parameter Tuning .....                                          | 38 |
| <i>Zifan Kong, Xiaozhi Gao, Huiqin Sun, Qiyang Zhao, Yicong Xie, Jiaqi Zhang</i>                                                                     |    |
| Dynamic Economic Dispatch of Wind-CHP Coupling System Considering Multiple Uncertainties.....                                                        | 44 |
| <i>Yuxi Wu, Libao Shi</i>                                                                                                                            |    |
| A Multi-stage Resilient Optimization Method for Coupled Electric-Gas System Based on Island Division .....                                           | 51 |
| <i>Hua Bai, Xiaoqing Han, Tingjun Li, Jianan Du, Yizhulin Li</i>                                                                                     |    |
| Small-signal Stability Analysis of Offshore Wind Farm Integrated Grid-forming VSC-HVDC System.....                                                   | 57 |
| <i>Lanfang Li, Qinan Li, Yuntong Jiang, Yuping Zhang, Yunyun Xie, Ziyang Wang</i>                                                                    |    |
| Hybrid Energy Storage Location and Capacity Planning Considering Frequency Safety .....                                                              | 63 |
| <i>Dandan Zhang, Bin Ji, Xiaomeng Ai, Li Chang, Lili Li, Linsong Liu</i>                                                                             |    |
| Research on Operation Strategy of User-side Energy System Based on Data Driving .....                                                                | 70 |
| <i>Jingyi Lin, Zhongdong Wang, Hao Li, Chang Liu, Chao Zhou</i>                                                                                      |    |

|                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Research on Charging Control of Electric Vehicle Charging Station Based on New Energy Consumption.....                                      | 76  |
| <i>Xiangyu Lv, Xuefei Chang, Jiarui Wang, Dexin Li, Xiangdong Meng</i>                                                                      |     |
| Reactive Power Planning Contributed by Energy Storage under Uncertainty of Renewables and Load .....                                        | 81  |
| <i>Ming Yu, Chunli Zhou, Xin Lin, Teng Lin</i>                                                                                              |     |
| Research on a Differentiated Development Path Method for Provincial New Type Power Systems.....                                             | 85  |
| <i>Xingtong Chen, Yinan Wang</i>                                                                                                            |     |
| Research on Prediction Methods of Key Parameters for Regulating the Heat Supply in District Heating System with Data Augmentation .....     | 90  |
| <i>Yun Bai, Xiaojie Lin, Wei Zhong, Zheng Luo, Ning Zhang</i>                                                                               |     |
| Multi-objective Ordered Charging Strategy for Electric Vehicle Guided by NSGA-II Algorithm Based on Real-Time State of Traffic Network..... | 96  |
| <i>Chang Chen, Yuqiang Wang, Yiqing Jiang, Lijun Liu</i>                                                                                    |     |
| <b>General Session 2: Grid Planning, Operation and Management</b>                                                                           |     |
| A Data-Driven Method for Approximation of Dynamic Security Region Boundary Based on Kernel Fuzzy Membership .....                           | 102 |
| <i>Wei Fan, Lu Miao, Yingjie Qin, Yu Liu, Deyang Chen, Jinchang Chen, Guoduan Zhong, Baixi Chen</i>                                         |     |
| Primary and Secondary Collaborative Planning Method Based on New Power Distribution System.....                                             | 108 |
| <i>Feng Guo, Chuanguang Fan, Qingxue Cui, Xinyuan Yang, Wei Xu, Yuling Du</i>                                                               |     |
| Comprehensive Assessment of the Power System Blackout Source Events Damage .....                                                            | 115 |
| <i>Zifa Liu, Yichi Zhang, Haoran Liu, Xuemin An</i>                                                                                         |     |
| Sheath Loss Calculation and Loss Reduction Analysis of 220 kV Cable System .....                                                            | 120 |
| <i>Keji Chen, Ningjie Su, Guoqiang Li, Hanshan Zhu, Enzhe Wang, Xiangrong Chen</i>                                                          |     |
| Two-stage Day-ahead and Intra-day Peak Shaving Strategy Considering Flexible Loads Resources.....                                           | 124 |
| <i>Tian Xia, Sheng Chen, Hongyu Rao, Ziang Liu, Xinwei Shen</i>                                                                             |     |
| Collaborative Real-time Operation for Long-term and Short-term Energy Storage: A Scheduling-Corrective Approach ...                         | 129 |
| <i>Yue Fan, Wei Cui, Wei Wang, Ying Wang</i>                                                                                                |     |
| Estimation of Urban V2G Carbon Emission Reduction Potential .....                                                                           | 135 |
| <i>Chen Fang, Wenlong Li, Haojing Wang, Yun Zhou, Shanshan Shi, Donghan Feng</i>                                                            |     |
| Optimal Capacity of Wind Thermal Pumped-Storage Baling Transmission System .....                                                            | 142 |
| <i>Xiong Wu, Mingkang He, Wenwen He, Xiaofei Li, Penglei Wang, Yibo Su</i>                                                                  |     |
| Joint Planning of Energy Storage and Distribution System Considering Network Reconfiguration.....                                           | 148 |
| <i>Shaoguang Dong, Tian Zhou, Wei Li, Liya Ye, Nengneng Zhao, Gaoyao He, Guangchao Geng</i>                                                 |     |
| Comprehensive Assessment of Wind Farm Lifecycle Performance Based on Improved CRITIC Weighting Method.....                                  | 153 |
| <i>Chi Ma, Liangcai Qi, Yongli Wang, Siwen Zhang, Yuyang Li, Shuting Jia</i>                                                                |     |
| Operation Risks Analysis and Supply Guarantee Strategies for Urban Power System .....                                                       | 159 |
| <i>Jun Ye, Xianfeng Li, Yibing He, Jiong Ma, Ran Zhang</i>                                                                                  |     |
| Reactive Power Cooperative Optimization of Wind Farm with Various Reactive Power Compensation Devices .....                                 | 165 |
| <i>Zhen Zhang, Keqin Tian, Yukun Qiu, Leilei Chen, Heng Nian</i>                                                                            |     |
| High Wind Power Penetration System Power Flow Off-Limit Early Warning Based on GCN and Rule Guidance.....                                   | 170 |
| <i>Zyu Mu, Jian Xu, Jun Zhang, Siyuan Chen, Riqi Si, Qining Wang</i>                                                                        |     |

|                                                                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A Method for Analyzing User Energy Saving Potential Based on Cluster Analysis.....                                                                      | 177 |
| <i>Yucui Wang, Lijuan Gao, Pengyu Li, Chutong Wang, Xiaoyan Zhang, Yizong Guo</i>                                                                       |     |
| The Electricity Spot Market Clearing Method Considering the Participation of Electric Energy Storage Based on Capacity Compensation Mechanism.....      | 183 |
| <i>Silin Zhu, Youquan Jiang, Nianjie Tian, Menglin Lu, Qingquan Tang, Bo Hong</i>                                                                       |     |
| Comparative Study on Common and Different Values of Pumped Storage and Thermal Power.....                                                               | 189 |
| <i>Cheng Xin, Muyang Li, Chenfang Peng, Jie Chen</i>                                                                                                    |     |
| The Coordinating Thermal Energy Storage Capacity Planning of Concentrated Solar Power Considering Demand Side Response.....                             | 196 |
| <i>Pengfei Xu, Xing Tian, Guojie Li, Zongchuan Zhou, Zhiyang Kang, Lei Tang</i>                                                                         |     |
| An Efficient Optimization Method for Randomly Aggregating Unit Variables in SCUC .....                                                                  | 201 |
| <i>Yanguang Chen, Haoqi Yang, Zhaoye Pan</i>                                                                                                            |     |
| A Collaborative Control Method of Air Conditioner Groups Considering Rebound Reward and Punishment under Multi-market Mechanism .....                   | 208 |
| <i>Lu Chen, Shiyun Ma, Tianao Zheng, Hui Gao, Huping Bao, Xiaodong Cao</i>                                                                              |     |
| Evaluation of the Robustness of a Transmission Line Network Using Available Transfer Capacity.....                                                      | 214 |
| <i>Apsara Adhikari, Tanus Bikram Malla, Bishal Silwal</i>                                                                                               |     |
| Scheduling Optimization Method for Charging Piles in Electric Vehicle Charging Stations Based on Mixed Integer Linear Programming .....                 | 220 |
| <i>Junfeng Zhou, Yun Zhou, Kaiyu Zhang, Shu Liu, Shanshan Shi, Hengjie Li</i>                                                                           |     |
| An Extreme Scenario Reduction Algorithm for Multi-time Scale Net-Load .....                                                                             | 225 |

| An Interpretable Soft Sensor Model for Power Plant Process Based on Deep Learning .....                                                               | 2079 |
| <i>Yurong Jing, Han Liu, Runyuan Guo</i>                                                                                                              |      |
| Model-Agnostic Meta-Learning Based Short-term Carbon Emission Price Forecasting .....                                                                 | 2086 |
| <i>Liang Shao, Xinyi Lai, Gang Lu, Peng Xia, Fuqiang Zhang, Fushuan Wen</i>                                                                           |      |
| Blockchain Based Decentralized Multi-microgrid Collaborative Control.....                                                                             | 2091 |
| <i>Yulin Li, Yong Yan, Hesuan Hu, Fushuan Wen</i>                                                                                                     |      |
| A Load Balancing Method of New Energy Specialized Chip Based on Segments Division Adjustment .....                                                    | 2097 |
| <i>Dehong Liu, Wei Xi, Ming Hu, Xiaohua Li, Zexiang Cai, Xuran Liang</i>                                                                              |      |
| Observability Assessment and Optimal Placement of Measurement Terminals in Distribution Networks with Graph Theory and Intelligent Optimization ..... | 2104 |
| <i>Fan Yang, Ji Qiao, Yuyao Chen, Mengjie Shi, Hong Zhu, Wei Zhang</i>                                                                                |      |
| Distributed Settlement Mechanism Design for Carbon Market Based on Blockchain-enabled Edge Intelligence .....                                         | 2110 |
| <i>Zifei Wang, Hongyi Li, Yuting Qi, Hongxun Hui</i>                                                                                                  |      |
| Topology-Adaptive Small-Signal Stability Assessment Based on An Edge-Graph Learning Scheme .....                                                      | 2116 |
| <i>Jiyu Huang, Lin Guan, Mengxuan Guo</i>                                                                                                             |      |
| Blockchain-based Carbon Emission Accounting Method for Multi-Energy Systems .....                                                                     | 2121 |
| <i>Kexin Wang, Hongyi Li, Zifei Wang, Shan He, Silin Chen, Jing Wang, Hongxun Hui</i>                                                                 |      |
| A Forecasting-aided State Estimator Based on Enhanced Autoformer-UPF for Active Distribution Networks .....                                           | 2127 |
| <i>Jiahui Guo, Yue Yu, Jingyi Zhang, Bingqing Nie</i>                                                                                                 |      |
| Research on Intelligent Algorithm of Transformer Area Topology Recognition Based on Distribution Network Measurement Data .....                       | 2132 |
| <i>Huiqin Wang, Jiahuan Ling, Zicong Yang, Huiquan Li, Yi Liu, Duo Li, Wei Hu, Qiuting Guo</i>                                                        |      |

|                                                                                                                                 |      |
|---------------------------------------------------------------------------------------------------------------------------------|------|
| WGAN-GP Based Data Reconstruction for Operational Faults of Power Distribution Networks .....                                   | 2138 |
| <i>Kaibin Guo, Yixian Liu, Qiang Yang</i>                                                                                       |      |
| Design and Implementation of an Intelligent Customer-Transformer Relationship Topology Recognition System .....                 | 2145 |
| <i>Zixun Ma, Xi Yao, Peixin Zhang, Jiayi Huang, Shulin Cai, Jianwu Jiang, Jinpeng Meng, Feiyang Lu</i>                          |      |
| Implementation of GPU Scheduling Method for Kubernetes.....                                                                     | 2152 |
| <i>Hao Li, Ming Xu, Zhun Li, YuZhe Wang</i>                                                                                     |      |
| Optimizing Substation Communication: A Time-Sensitive Networking Approach for Addressing Real-time Transmission Demands .....   | 2157 |
| <i>Huibin Jia, Kun Wu, Wenrui Wu, Shuaikang Wang, Wei Wang, Weiran Hou, Siqi Wan</i>                                            |      |
| Assessing Interconnected Factors in CO <sub>2</sub> Emissions: A Case Study of India Using Principal Component Analysis .....   | 2163 |
| <i>Yiteng Zhang, Arjun Pakrashi, Soumyabrata Dev</i>                                                                            |      |
| A Lithium Battery SOC Estimation Method Based on AEKF-Composite Neural Network Hybrid Driven Model.....                         | 2168 |
| <i>Cun Dong, Peng Li, Kecheng Li, Bingyu Sang, Ruzhe Ge, Shibo Wang, Youpeng Pan, Jiahao Wang</i>                               |      |
| Research on Improving the Measurement Accuracy of the Hall Current Sensor Based on the Extreme Learning Machine .....           | 2174 |
| <i>Chaofeng Zhang, Wen Kang, Xiangyang Xia, Zhanfan Zhou, Yanan Liu, Qing Peng</i>                                              |      |
| A Semantic Understanding Method for Patent Text Based on Large Language Model .....                                             | 2179 |
| <i>Chenchen Zhang, Sun Jian, Luo Chao, Chen Fan, Li Bo, Luo Chen</i>                                                            |      |
| Simulation Testing Method for Distribution Network Control Based on Embedded Energy Management System and Matlab .....          | 2183 |
| <i>Zhi Li, Zhiyao Zheng, Guangyao Ying</i>                                                                                      |      |
| Identification of Abnormal Users based on Isolated Forests during Electricity Price Implementation .....                        | 2189 |
| <i>Xu Cheng, Dong Yao, Fangze Zhou, Hui Zhou</i>                                                                                |      |
| A Heuristic Method for Route Programming in Puzzle-based Energy Storage Systems.....                                            | 2195 |
| <i>Yang Zou, Jianxiao Wang</i>                                                                                                  |      |
| Federated Learning based Non-Intrusive Load Monitoring in Domestic Energy Systems.....                                          | 2201 |
| <i>Xuan Wang, Zebang Zhang, Qiang Yang</i>                                                                                      |      |
| A Data-driven Approach for Lithium-ion Battery Lifetime Classification Based on Early Cycles.....                               | 2208 |
| <i>Minzheng Hu, Shengyu Tao, Yu Wang, Yaojie Sun</i>                                                                            |      |
| Research and Analysis on the Influence Factors of Smart Meter Disturbance based on Time Series Interval Values.....             | 2214 |
| <i>Juntao Pan, Yuxiang Peng, Zhou Yang, Zhenglei Zhou</i>                                                                       |      |
| A Demand-Side Adjustable Resource Response Interaction Capacity Assessment Method Based on Scale-Space Theory .....             | 2223 |
| <i>Tang Tianyue, Li Bin, Chen Songsong, Gong Feixiang, Zhang Ping, Xiang Xinyu</i>                                              |      |
| <b>General Session 9: Emerging Technologies and End-user Systems</b>                                                            |      |
| Enhancing the Efficiency of Relay Coils in Three-Coil Wireless Power Transmission Systems through Design and Optimization ..... | 2228 |
| <i>Haoze Zhuo, Jing Xiao, Yuhong Mo, Wenlan Gong, Dongdong Zhang</i>                                                            |      |
| Analysis of Body Grid Aggregation and Sharing via An Umbrella: A Case Study of Shenzhen Metro Station.....                      | 2235 |
| <i>Jiahe Xu, Xuan Zhang, Chongbo Sun</i>                                                                                        |      |

|                                                                                                                                                         |      |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Thermal Analysis and Simulation of Quad Flat No-Leads Packaging on Printed Circuit Board with ANSYS .....                                               | 2241 |
| <i>Junyan Fu, Hui Huang, Chi Zhang</i>                                                                                                                  |      |
| Data-Driven Demand-Side Carbon Emission Accounting for Residential Users .....                                                                          | 2246 |
| <i>Chun Wang, Libo E, Xiao Liu, Binrong Zhang, Yuxiong Huang, Gengfeng Li</i>                                                                           |      |
| <b>General Session 10: Microgrids, Standalone Power Systems and Virtual Power Plants</b>                                                                |      |
| Two-Level Scheduling Model for Air-Conditioning Load Aggregators Considering User Conditioning Behavior .....                                           | 2252 |
| <i>Hongbiao Wang, Kai Ma, Zhifa Lin, Xin Cao, Yan Li, Tianan Guo</i>                                                                                    |      |
| Robust Optimization of a CCS-P2G Virtual Power Plant Accounting for Penalized Carbon Price .....                                                        | 2258 |
| <i>Shuangning Ding, Zhiyun Sun, Xiaolong Lu, Qizhen Wei, Hewei Chen, Yuancheng Tang</i>                                                                 |      |
| A Scenario-based and Model-supported Analysis of Economic Benefit for Virtual Power Plant.....                                                          | 2264 |
| <i>Han Shi, Yunyun Xie, Sheng Cai, Jinsheng Sun, Miao Yang, Weixu Tian</i>                                                                              |      |
| Optimal Scheduling of Virtual Power Plants Considering Load Demand Response under Ladder-Type Carbon Trading Mechanism.....                             | 2270 |
| <i>Jinxing Zhong, Min Le, Xuqing Wu, Jinman Luo, Chenyu Hu, Changcheng Li</i>                                                                           |      |
| Distribution System Recovery Method Based on Virtual Synchronous Generator Technology of Distributed New Energy Generator After Natural Disasters ..... | 2276 |
| <i>Sijia Tang, Chen Chen</i>                                                                                                                            |      |
| A Multi-Period Analysis Method for Dispatch Potential of Electric Buses.....                                                                            | 2282 |
| <i>Fan Hua, Jian Geng, Wei Liu, Yiqiao Geng, Peng Xu, Yan Zhao</i>                                                                                      |      |
| Application Research of Blockchain Technology in Virtual Power Plant Dispatching and Trading .....                                                      | 2288 |
| <i>Yu Shaoyuan, Yu Tao, Geng Jian, Chen Ailin, Huang Yupeng, Wei Tao</i>                                                                                |      |
| A Projection-based Clustering of Flexibility Resources for Peak Load Shaving .....                                                                      | 2292 |
| <i>Yajun Mo, Xuan Yang, Gang Wang, Lin Chen, Mingchang Wang, Jianpeng Zhao</i>                                                                          |      |
| Optimal Allocation of Energy Storage Capacity for Microgrid Primary Frequency Modulation.....                                                           | 2297 |
| <i>Fu Shen, Wenhao Wang, Jieshan Shan, Yutao Zhang, Yang Cao, Guangbing Yang, Chong Wang, Suwei Zhai</i>                                                |      |
| Mixed Game Optimization Scheduling of Integrated Energy Systems with Shared Energy Storage.....                                                         | 2303 |
| <i>Mohan Lin, Jia Liu, Pingliang Zeng, Yuanyuan Zhang, Xiaohui Qin, Baodi Ding</i>                                                                      |      |
| Robust Optimization Planning for Shared Energy Storage Systems in Multi-microgrid Distribution Networks .....                                           | 2310 |
| <i>De-Pin Feng, Tao Chen, Bo Cui, Jie Li, Liang Zhang, Xiao-Tong Ji</i>                                                                                 |      |
| Distributed Operational Scheduling of Virtual Power Plant in Peak-regulation Ancillary Service Market Considering Uncertainty .....                     | 2315 |
| <i>Huihong Mo, Jing Li, Qiming Sun, Wei Wei</i>                                                                                                         |      |
| Wind-Solar Coordinated Optimization of Port Microgrids .....                                                                                            | 2321 |
| <i>Zeyuan Lin, Zhiyong Zhou, Pengfei Li, Youmei Liu</i>                                                                                                 |      |
| Economic Scheduling Strategy of Virtual Power Plant with Electric Vehicles.....                                                                         | 2327 |

| Power System Security Boundary Identification and Rules Extraction based on Tighten Weighted Oblique Decision Tree .....                                  | 2806 |
| <i>Liangcheng Cheng, Jiahao Yan, Jianguo Yao, Shengchun Yang, Fang Yu, Feng Li</i>                                                                        |      |
| Improved Self-Synchronization Technology Using in Current Differential Protection of Distribution Grid .....                                              | 2813 |
| <i>Junyang Tian, Haiyong Li, Chao Huang, Zizheng Shen, Liandian Jiang, Pengfei Huang, Xiang Li, Guibin Zou, Chenghan Zhou</i>                             |      |
| An Approach for Extracting Key Weather Processes Affecting Power Supply Driven by Meteorological Data .....                                               | 2820 |
| <i>Weijie Gong, Mengxia Wang, Yifan Liu</i>                                                                                                               |      |
| Wideband Oscillation Identification and Oscillation Source Localization Method Based on Response Data and Primary Features .....                          | 2826 |
| <i>Hangyu Sun, Wenfeng Li, Dongping Ai, Jian Zhang, Dingyi Cheng, Linlin Ma, Cheng Wu</i>                                                                 |      |
| Optimal Reactive Power Allocation in Power Systems Based on Improved Binary Table Particle Swarm Optimization ..                                          | 2833 |
| <i>Xiaodong Yu, Jie Dang, Mo Chen, Jiale Wang, Fei Tang, Ying Wang, Peng Yuan</i>                                                                         |      |
| Analysis of Voltage Transformer Failure Mechanism and Prevention Measures Based on ATP-EMTP .....                                                         | 2840 |
| <i>Yunguo Yang, Jun Lin, Xujie Wang, Yifan Zhao, Xinglong Feng, Shaoqi Wang, Yanlin Song, Haojie Wei, Wei Nie</i>                                         |      |
| Graph Convolutional Network Based Power System Risk Assessment .....                                                                                      | 2846 |
| <i>Xinfan Jiang, Yonggang Liu, Jinbo Wu, Zhuping Liu, Yuanxi Chen, Chuangxin Guo</i>                                                                      |      |
| Improved Differential Protection Method for the Transmission Line of Photovoltaic Station .....                                                           | 2852 |
| <i>Qiang Huang, Rongqi Fan, Kuan Li, Yudun Li, Yuntao Sun, Guohui Zhang</i>                                                                               |      |

|                                                                                                                                                              |      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Damping Level Enhancement Strategy for Large-Scale Renewables Penetrated Power System Based on Data-Driven Global Sensitivity .....                          | 2856 |
| <i>Lixin Wang, Siyu Wang, Cheng Liu, Han Gao, Donghe Sha, Chao Jiang</i>                                                                                     |      |
| Online Condition Monitoring Methods of Inverter IGBT Based on Output Voltage .....                                                                           | 2862 |
| <i>Zerun Wang, Zhihao Ye, Cheng Chen, Banglin Zhuo</i>                                                                                                       |      |
| Resilience-Oriented Load Restoration Considering the Topology Transition Process .....                                                                       | 2867 |
| <i>Jie Ma, Ke Li, Shaoli Quan, Shigong Jiang, Hao Zhu, Jingqi Fan</i>                                                                                        |      |
| Low-Order Frequency Response Modeling for Offshore Wind Farm-MTDC Systems .....                                                                              | 2874 |
| <i>Jianguo Zhou, Ye Guo, Zichao Meng, Lun Yang, Hongbin Sun</i>                                                                                              |      |
| Robust Damping Controller Design in Renewable Integrated Power System Considering Communication Resilience .....                                             | 2880 |
| <i>Hao Ying, Zhicheng Li, Zhen Wang, Dawei Chen, Weijun Zhang</i>                                                                                            |      |
| Automatic Generation Technology of Secondary System Configuration in Substations .....                                                                       | 2887 |
| <i>Li Chen, Qiongliang Chen, Yangxin Huang, Renyi Xia, Bifu Qian, Qianqian Dai</i>                                                                           |      |
| Virtual Fault Resistance-Based High Impedance Fault Section Location for Active Distribution Networks .....                                                  | 2891 |
| <i>Maoran Zheng, Haiyong Li, Bin Liu, Liandian Jiang, Pengfei Huang, Xincheng Zheng, Guibin Zou</i>                                                          |      |
| Optimal Restoration of Distribution System under Multiple Faults Considering Outage Propagation .....                                                        | 2897 |
| <i>Fengjun Li, Mingming Xu, Chenwei Gao, Siyuan Sun, Ming Chen, Gengfeng Li, Hengbo Xu, Zhaohong Bie</i>                                                     |      |
| Distributed Hierarchical Resilient Event-Triggering Control for DC Microgrids under Mixed Cyber Attacks .....                                                | 2902 |
| <i>Duanjiao Guo, Hongxing Wang, Yuan Ge, Xinlong Wu, Qiyu Lin, Renfeng Chen</i>                                                                              |      |
| Analysis of Energy Path Transmission in Direct Drive Grid Connected System under Transient Fault Conditions .....                                            | 2908 |
| <i>Bixing Ren, Qiang Li, Yongyong Jia, Chenggen Wang, Xiaoming Zou</i>                                                                                       |      |
| Analysis of the Effectiveness of Stability Indices for Various Stability Modes in New Power Systems .....                                                    | 2915 |
| <i>Tao Li, Qianni Cao, Chen Shen, Linlin Ma, Huan Ma, Zhe Jiang</i>                                                                                          |      |
| Robust Control Method for LCL-Type Grid-Connected Inverters Based on Adaptive Correction of Grid Voltage Feedforward Considering Digital Control Delay ..... | 2923 |
| <i>Xuejing Xia, Longyue Yang, Shuaijun Qiao, Dexian Kong, Junyu Chen, Shuai Chen</i>                                                                         |      |
| Online Monitoring of Primary Frequency Regulation Capability of High-proportion new Energy Power System .....                                                | 2929 |
| <i>Shaoyong Yao, Pei Yi, Hongjuan Gao, Ning Guo</i>                                                                                                          |      |
| Line Pilot Protection for DFIG Wind Farm Transmission Lines Based on Wasserstein Distance .....                                                              | 2936 |
| <i>Ziyuan Zhao, Guibin Zou, Shuo Zhang, Xiangyu Lin, Xuanren Meng</i>                                                                                        |      |
| Communication Restoration and Fault Location in Distribution System by UAVs .....                                                                            | 2941 |
| <i>Haochen Zhang, Chen Chen, Ruihuan Liu</i>                                                                                                                 |      |
| Impact Mechanism of DC Power Recovery Speed on Transient Stability after Sending-end AC Fault .....                                                          | 2946 |
| <i>Wei Yu, Bo Chen, Chen Zhou, Chenxing Jin, Xiaoxia Jie, Silei Yao, Hao Li</i>                                                                              |      |
| Resilience-Oriented Optimal Allocation of Multi-Port Soft Open Point in Distribution Network .....                                                           | 2950 |
| <i>Chenwei Gao, Furong Pan, Gengfeng Li, Yang Zheng, Zhaohong Bie, Kai Xu, Ke Jia, Mingjun Xue</i>                                                           |      |
| Research on Fault Self-Healing Control Method of Intelligent Power Distribution System Based on Deep Learning .....                                          | 2956 |
| <i>Jingru Li, Shigong Jiang, Hongjun Li, Wei Chai, Jiacheng Fo, Fengzhang Luo, Nan Ge, Shengyuan Wang</i>                                                    |      |

## General Session 12: Policy, Electricity Market, Innovative Business Mechanism, Policy/Regulatory Aspects

|                                                                                                                                   |      |
|-----------------------------------------------------------------------------------------------------------------------------------|------|
| Typical Elastic Load Regulation Performance Evaluation and Optimal Selection Method .....                                         | 2963 |
| <i>Yanbin Xu, Yi Liao, Jiaxin Ma, Ming Zeng</i>                                                                                   |      |
| Development Analysis and Prospective Research for New Type Power Systems .....                                                    | 2969 |
| <i>Yinan Wang, Xingtong Chen</i>                                                                                                  |      |
| Regional Integrated Energy Optimization Scheduling Considering Mutual Recognition of Energy-Consuming Quota and Carbon Quota..... | 2975 |
| <i>Yanjin Zhu</i>                                                                                                                 |      |
| User-side Cloud Energy Storage Locating and Capacity Configuration .....                                                          | 2980 |
| <i>Yongji Ma, Fen Cao, Zhihang Zhou, Anyuan Yang, Huifang Wang</i>                                                                |      |
| Improved TOU Tariff Design for Facilitating Peak-cutting and Valley-filling in Power Systems.....                                 | 2986 |
| <i>Shuxu Li, Chengchen Sun, Zhiyi Li</i>                                                                                          |      |
| Bidding Strategy of Load Aggregator in Day-Ahead Market Based on Conditional Value-at-Risk .....                                  | 2992 |
| <i>Lingyu Chen, Lingfang Li, Dajun Si, Yixuan Chen, Siyang Liao</i>                                                               |      |
| A Clearing Model for Cross-Provincial Spot Market Based on Network Flow.....                                                      | 2997 |
| <i>Min Wu, Xiaogang Li, Zhongyang Chen, Yuting Xu, Yanhong Zhang, Zhaoxia Jing, Yuxuan Zhao</i>                                   |      |
| Electricity Markets with Complex Orders: A Review of Theory and Application .....                                                 | 3001 |
| <i>Xinyi Ren, Runfan Zhang, Yulong Yang</i>                                                                                       |      |
| Evaluation of Industrial Load Adjustable Capability Considering Technological Processes .....                                     | 3007 |
| <i>Zhi Zhang, Zhe Zhang, Jiazheng Sun, Hengyu Liu, Haifeng Li, Zhibo Wang, Taiyu Gu, Qiang Chen</i>                               |      |
| Joint Planning Strategy of New Energy and Energy Storage under Regional Low-carbon Policy.....                                    | 3012 |
| <i>Shuai Wang, Zili Chen, Linrun Guo, Na Meng, Peidong Han, Zhaoyuan Wu</i>                                                       |      |
| A Method for Identifying Abnormal Risk Points in Electricity Market Prices Based on Time Series Decomposition.....                | 3018 |
| <i>Wei Zheng, Lin Tian, Jiansheng Sheng, Shuqin Kong, Lei Qing, Min Xie</i>                                                       |      |
| Method and Application of Energy Storage Spot Trading Based on Dual Settlement Market Model .....                                 | 3025 |
| <i>Xiyang Guan, Ming Yang, Ningning Liu, Haijing Zhang, Jialu Zhang, Qiang Li, Huan Li</i>                                        |      |
| Multi-dimensional Analysis of Power Supplier Bids in Interprovincial Electricity Markets .....                                    | 3030 |
| <i>Mengyuan Wang, Yiding Jin, Tong Xing, Yifan Gu, Xiaoyuan Xu, Zheng Yan</i>                                                     |      |
| Enlightenment from the Method of Obtaining Reserve Demand in the US Electricity Market .....                                      | 3037 |
| <i>Li Chang, Dandan Zhang, Rongzhang Cao, Bin Ji, Xiangkuan Wan</i>                                                               |      |
| Bidding Strategic of Virtual Power Plant Based on End-to-End Deep Reinforcement Learning .....                                    | 3044 |
| <i>Jiaxuan Li, Ye Guo, Hongbin Sun, Xin Wen</i>                                                                                   |      |
| Locational Marginal Electricity-Carbon Price Considering Wind Power Uncertainty .....                                             | 3050 |
| <i>Denghui Fu, Hao Wang, Chenhui Wu, Xu Zhang, Yuanhao Li, Yanpei Song</i>                                                        |      |
| Research on High-Frequency Spatiotemporal Electrical Carbon Intensity.....                                                        | 3055 |
| <i>Shaodong Zhao, Yachen Tang, Zhiwei Huang, Qi Li, Guangyi Liu, Shiqi Zhang</i>                                                  |      |
| Multi-dimensional Risk Assessment Framework Based on Interrelation in Electricity Market Operation .....                          | 3061 |

| <i>Haini Zhou, Qingqing Chi, Le Yang, Guoliang Zhu, Weijin Yang</i>                                                                                |      |
| Analysis of SCADA Data Preprocessing Methods for Wind Power Farms .....                                                                            | 3578 |
| <i>Xiaoli Liu, Yangning Zhang, Yunpeng Zhang, Changhong Deng</i>                                                                                   |      |

#### **General Session 14: Smart Homes, Buildings and Cities and Cyber Security**

|                                                                                                                                  |      |
|----------------------------------------------------------------------------------------------------------------------------------|------|
| A Method for Cyber Attack Threat Assessment of Electric Power Supervision and Control System Considering Its Vulnerability ..... | 3584 |
| <i>Yichi Zhang, Jingzhe Tu, Hua Huang, Delong Yang, Xuemin An, Xingfang Cheng, Hua Sheng</i>                                     |      |
| Physics-Informed Appliance Signatures Generator for Energy Disaggregation.....                                                   | 3591 |
| <i>Ilia Kamyshev, Sahar Moghimian Hoosh, Henni Ouerdane</i>                                                                      |      |
| CamDetector: Detecting and Positioning Hidden Cameras with Raspberry Pi 4 via EM Radiation .....                                 | 3597 |
| <i>Han Chen, Ruochen Zhou, Chen Yan, Xiaoyu Ji, Wenyuan Xu</i>                                                                   |      |
| Application and Verification of Trusted Computing for Substation Automation Equipment .....                                      | 3603 |
| <i>Haifei Miao, Qing Lin, Baoding Chen, Shaoqian Hu, Zhenyu Tang</i>                                                             |      |
| Fuzzy PID-based Temperature and Humidity Adaptive Air Conditioning Regulation System.....                                        | 3609 |
| <i>Ying Le, Conghao Ma, Chao Guo, Yi Li, Baozhong Zhou, Mingchao Li, Qi Zhao, Sihan Wu</i>                                       |      |
| HIL-based Distributed Control of Inverter-Air-Conditioner for Power System Frequency Regulation.....                             | 3616 |
| <i>Yuming Zhao, Tong Wu, Silin Chen, Hongxun Hui</i>                                                                             |      |
| Analysis of Energy Consumption of Office Buildings .....                                                                         | 3622 |
| <i>Dinghao Liu, Gaoxiang Wu, Xuewen Wang, Zhe Li, Jin Gao</i>                                                                    |      |
| Optimizing Remote Sensing Image Classification with Spectral Indices and Convolutional Neural Networks .....                     | 3628 |
| <i>Wendong Yao, Shane Donohue, Soumyabrata Dev</i>                                                                               |      |
| Exploring Adversarial Robustness of LiDAR-Camera Fusion Model in Autonomous Driving.....                                         | 3634 |
| <i>Bo Yang, Xiaoyu Ji, Zizhi Jin, Yushi Cheng, Wenyuan Xu</i>                                                                    |      |

#### **General Session 15: Smart Condition Monitoring and Fault Diagnosis Techniques**

|                                                                                                                          |      |
|--------------------------------------------------------------------------------------------------------------------------|------|
| Survey of Electric Vehicles and Charging Equipment for Fault Warning with Deep Learning .....                            | 3640 |
| <i>Yuan Xin, Minghuan Yang, Chao Deng, Chengwei Peng</i>                                                                 |      |
| Research on Transformer Oil Breakdown Voltage Detection Method Based on Digital Images .....                             | 3646 |
| <i>Zhuo Wei, Tian Yuan, Gang Wu, Pengfei Jia, Jiayun Zhu, Kunfang Hu</i>                                                 |      |
| Design of a Low-Noise Multi-range Broadband Front-End Amplifier for MEMS Electric Field Sensor .....                     | 3650 |
| <i>Shiping Chen, Zhanqing Yu, Jiaxu Shi, Jinpeng Wu, Zhengyu Chen, Lu Qu</i>                                             |      |
| A Novel IR Drop Elimination Method for Polarization Potential Detection of Grounding Grid in Homogeneous Soil...         | 3655 |
| <i>Yuda Li, Sheng Lin, Yidi Ma</i>                                                                                       |      |
| Fault Identification Model of Dry-type Air-core Reactor Based on Fault Feature Extraction and Ensemble Learning.....     | 3661 |
| <i>Fei Guo, Yujin Zhang, Jiansheng Zhao, Limeng Xia, Shihan Jia, Haonan Dai, Fei Wang</i>                                |      |
| An Accurate Auxiliary Monitoring Method for Substation Environment Based on Dynamic Simulation Technology.....           | 3667 |
| <i>Wenxuan Liu, Liu Han, Fangzhou Chu, Junhui Hui</i>                                                                    |      |
| Optimal Monitor Allocation Method of Voltage Sag Source Location .....                                                   | 3672 |
| <i>Kaican Li, Weina Kong, Xiang Li, Yinlei Liu, Fuliang Chu, Jinglei Fu, Yongbo Zhao, Zhaoliang Cheng, Yue Hou</i>       |      |
| Stochastic Correlation Estimator Fault Location Method on Lossy Transmission Lines with Multi Uncertain Parameters ..... | 3679 |
| <i>Akif Nadeem, Arslan A. Rizvi, Salah-ud-din Khokhar, Ahmer Khan Jadoon, Tengfei Lei, Lina, Wang Yanling</i>            |      |

|                                                                                                                                           |      |
|-------------------------------------------------------------------------------------------------------------------------------------------|------|
| Inertia Evaluation Strategy for Power System Partition Based on GPU.....                                                                  | 3685 |
| <i>Xuegang Lu, Bin Hu, Shitao Dong, Zhaoxin Wen, Zhaoyi Jin</i>                                                                           |      |
| Fault Segment Detection Method of Multi-terminal Hybrid Overhead-submarine MMC-HVDC Transmission Lines Based on Waveform Similarity ..... | 3690 |
| <i>Hui Qin, Xuebo Qiao, Zhen Pan, Peng Liu, Changyue Zou, Haoyong Chen</i>                                                                |      |
| Multi-physical Field Simulation Study of High Voltage Converter Valve Saturated Reactor .....                                             | 3697 |
| <i>Jialei Xing, Xin Chen, Chenguang Peng, Guowei Zhou, Kewen Tang</i>                                                                     |      |
| Gas Sensing Performance of Composite MoS <sub>2</sub> @CMOF to Li-ion Battery Off-Gas C <sub>2</sub> H <sub>4</sub> .....                 | 3703 |
| <i>Hang Chen, Wenqiang Deng, Xiaosen Cui, Mingxing Shen, Qu Zhou, Zhongyong Zhao</i>                                                      |      |
| Analysis and Suppression of High-Frequency Common-Mode Electromagnetic Interference for Tunnel Cable PD Monitoring .....                  | 3707 |
| <i>Xizhou Du, Qiang Xu, Xing Lei, Hao Li, Ting Ye, Zongqi Wang</i>                                                                        |      |
| Feature Sequence Fusion Faster R-CNN-based Metal Foreign Object Detection for Electric Vehicle Wireless Power Transfer System.....        | 3713 |
| <i>Thomas Wu, Xueqing Yang, Hongyu Zhu, Yingxin Wu, Lina Yang, Dongdong Zhang</i>                                                         |      |
| Modeling of Induction Motor Bearing Fault by Using Finite Element Method .....                                                            | 3720 |
| <i>Gaurav Dhakal, Abhinav Bhattarai, Bishal Silwal</i>                                                                                    |      |
| Resilience Enhancement of Distribution Power Network Through Defect Location of XLPE Cables Based on BIS .....                            | 3726 |
| <i>Bingliang Shan, Shigong Jiang, Liang Ma, Zhongjian Liu, Ruixin Qian, Danlei Hu, Xianing Jin, Qingxi Li</i>                             |      |
| Fault Diagnosis Method of Transformer Based on WSO and SVM.....                                                                           | 3732 |
| <i>Ke Li, Guoqing Yang, Kai Wang, Bo Lu, Jinglong Jia, Tong Sun</i>                                                                       |      |
| Li-ion Battery SOH Estimation Based on BO-SVR Model.....                                                                                  | 3737 |
| <i>Zhicheng Li, Dawei Chen, Junjie Lu, Weijun Zhang, Chaoping Deng</i>                                                                    |      |
| Design and Application of Online Evaluation System for Deep Peak Regulation Capacity of Thermal Power Units.....                          | 3743 |
| <i>Lin Cheng, Xiaoyu Liu, Nan Cao, Shiyu Liu, Yuanchao Huang, Chong Ren, Gang Zhang, Huisan Wang</i>                                      |      |
| Prediction of Dissolved Gases Concentration in Transformer Oil Based on VMD and ELM.....                                                  | 3749 |
| <i>Ke Li, Guoqing Yang, Kai Wang, Bo Lu, Jinglong Jia, Tong Sun</i>                                                                       |      |
| Li-ion Battery SOH Estimation Model Based on Finite Sampling in Relaxation Phase .....                                                    | 3754 |
| <i>Jinyu Chen, Dawei Chen, Zhicheng Li, Junjie Lu, Weijun Zhang, Shuling Zhang, Tongtong Gao</i>                                          |      |
| A Fast Iterative Method for Dynamic State Estimation with Unknown Noise Statistics .....                                                  | 3760 |
| <i>Dongchen Hou, Yonghui Sun, Venkata Dinavahi, Sen Wang</i>                                                                              |      |
| Online Identification Solution and Key Technology for Secondary Equipment and Circuit Anomalies in Substations .....                      | 3765 |
| <i>Yadong Liu, Zexin Zhou, Yanjun Li, Zhongqing Li, Guosheng Yang, Wenhuan Wang, Chenguang Gao</i>                                        |      |
| Research on Runoff Flow Prediction Based on Variational Mode Decomposition and PSO-SVM Model.....                                         | 3770 |
| <i>Ping Zhou, Dongwei Yang, Rongxin Wang, Sihao Yang, Song Guo</i>                                                                        |      |
| Interfacial Defect Detection of Three-Layer Structure in Composite Cross-Arms Using Active Infrared Thermography....                      | 3776 |
| <i>Zhen Huang, Zheng Wang, Huijie Li, Fanghui Yin, Liming Wang, Xiangyang Peng</i>                                                        |      |
| A Fault Branch Location Approach for Partially Observable Distribution Network.....                                                       | 3781 |
| <i>Zhaoxiang Ma, Jiawei Zhang, Miao Yu</i>                                                                                                |      |

|                                                                                                                                                      |      |
|------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Data Driven and Combinational Empowerment based Operational Assessment for Electric Distribution Transformers...                                     | 3786 |
| <i>Yu Chen, Yuanyi Chen, Qiang Yang</i>                                                                                                              |      |
| Research on Denoising of Partial Discharge Signals in Converter Valves Based on Improved Wavelet Threshold.....                                      | 3792 |
| <i>Hui Zou, Guowei Zhou, Jialei Xing, Linlin Wei, Mianxiao Wu</i>                                                                                    |      |
| Numerical Simulation Method for Aging Detection of 10 kV Composite Insulator Based on Microwave Transmission Method.....                             | 3797 |
| <i>Liu Chun, Chen Wanyi, Xie Beimin, Xie Tao, Fan Peng, Shen Houming</i>                                                                             |      |
| Model Driven Based PMU Data Calibration Method Considering Time-Varying Characteristics of Line Parameters .....                                     | 3802 |
| <i>Lingzhi Xia, Yang Cheng, Songyuan Cao, Zhong Fu, Jinglei Deng</i>                                                                                 |      |
| Multiphysics Coupling Simulation Calculation of Anode Saturable Reactor.....                                                                         | 3808 |
| <i>Guowei Zhou, Jie Yang, Jialei Xing, Lintao Sun, Siluyu Zhang</i>                                                                                  |      |
| An Identification Method for Biological Electric Shock in Low-Voltage Distribution Networks .....                                                    | 3813 |
| <i>Rui Tong, Hao Bai, Dang Li, Wei Li, Jingru He, Yipeng Liu</i>                                                                                     |      |
| Support Vector Machine Based Data Cleaning for Water Supply Network Monitoring.....                                                                  | 3821 |
| <i>Xinjie Lai, Mengsi Xiong, Xin Hu, Zhongwei Liu, Ziyue Yang, Yijie Hu</i>                                                                          |      |
| <b>General Session 16: IoT Enabled Energy Systems</b>                                                                                                |      |
| Fast Access of Power IoT Devices Based on Deep Message Parsing .....                                                                                 | 3827 |
| <i>Fangliao Yang, Xin Huang, Hongzhi Tan, Haozhi Li, Shi Zhu</i>                                                                                     |      |
| Research on State Sensing Technology for Substation Equipment Based on Internet of Things .....                                                      | 3832 |
| <i>Song Chaohui, Ma Longtao, Zhu Jiayun, Jia Pengfei, Yang Ning, Li Lihua</i>                                                                        |      |
| Research on Fast Transmission Communication Method for Client-Side Heterogeneous Resource Information Modeling .....                                 | 3838 |
| <i>Feixiang Gong, Jingyi Lin, Chao Zhou, Zhongdong Wang, Songsong Chen, Junlong Zhu</i>                                                              |      |

### **Panel 1: Defense Measures and Support Technologies for Network Attacks in Power Cyber-physical Systems**

|                                                                                                                                        |      |
|----------------------------------------------------------------------------------------------------------------------------------------|------|
| Multi-stage Offensive and Defensive Game Method for FDIA on Power CPS .....                                                            | 4164 |
| <i>Xiaolin Yang, Hao Zhang, Haoxin Cheng, Chenyue Lu</i>                                                                               |      |
| Unified Modeling of Physical- Cyber -Logic -Attack -Protection for Digital Substation by Extension of IEC61850 Logic Space Model ..... | 4170 |
| <i>Jianmin Zhang, Hang Mu, Ji Xu, Yutao Qiu, Kangyi Li, Naizheng Jin</i>                                                               |      |
| Dynamic Clustering and Operation Evaluation of Renewable Energy Station.....                                                           | 4176 |
| <i>Junsong Yu, Heyan Huang, Yaohui Xiao, Weifeng Ding, Jie Li, Hanxuan Liu</i>                                                         |      |
| Application of Intelligent Optimized Adaptive Disturbance Rejection Control in Fuel Cell .....                                         | 4182 |
| <i>Weiming Li, Zhenzhen Zhou, Weifeng Ding, Yaohui Xiao, Junsong Yu, Hanxuan Liu</i>                                                   |      |
| Study and Verification of Covert Channels for Process Layer Network in Smart Substations .....                                         | 4188 |
| <i>Hang Mu, Jianmin Zhang, Ji Xu, Yutao Qiu, Kangyi Li, Naizheng Jin</i>                                                               |      |
| Resident Carbon Credit Incentive Decision-Making Method to Promote Valley Filling .....                                                | 4194 |
| <i>Tianao Zheng, Lu Chen, Zijie Wang, Wenrui Li, Sitao Lu, Hui Gao</i>                                                                 |      |
| Design and Research of Control Unit Based on Power Grid Harmonic Pollution Control.....                                                | 4200 |
| <i>Yaohui Xiao, Weifeng Ding, Weiming Li, Junsong Yu, Liwei Wang, Hanxuan Liu, Linjun Shi</i>                                          |      |

### **Panel 2: Resilience Assessment and Defense Mechanism of New Power Systems**

|                                                                                                                                    |      |
|------------------------------------------------------------------------------------------------------------------------------------|------|
| Data-Driven Parameter Estimation of Power Electronics Transformers Based on Koopman Operator .....                                 | 4205 |
| <i>Minhua Xie, Yuxi Liu, Huanjin Yao, Yang Liu</i>                                                                                 |      |
| Security Defense of AC Microgrids against False Data Injection Attacks based on Distributed Disturbance Observers...               | 4211 |
| <i>Kaihao Zou, Xingye Xu, Wei Du, Dingjie Lin, Qunjie Zhou, Kaishun Xiahou</i>                                                     |      |
| Resilience Assessment and Fault Restoration Method of Distribution Network Considering Secondary Faults of Typhoon Disasters ..... | 4218 |
| <i>Yiping Ji, Jian Zhou, Nan Feng, Tao Wang, Xueping Gu, Shaoyan Li</i>                                                            |      |
| Dynamic Security Evaluation Method for Power Systems Considering Cascading Failures .....                                          | 4224 |
| <i>Ren Liu, Xingye Xu, Wei Du, Kaishun Xiahou, Yihua Zhu, Dongxu Chang, Hengdao Guo</i>                                            |      |
| Research on Cooperative Control of Distributed Microgrid Groups Based on Improved Lookahead Algorithm.....                         | 4230 |
| <i>Yongjun Xia, Ping Xiong, Fan Xiao, Daojun Tan, Kan Cao</i>                                                                      |      |

### **Panel 3: Floating Offshore Wind Turbine and Island Multi-energy Complementary Technology**

|                                                                                                                                |      |
|--------------------------------------------------------------------------------------------------------------------------------|------|
| Topology Identification for Island Electric Power Systems Through Voltage Curves Similarity and Impedance-Based Distance ..... | 4237 |
| <i>Yuhang Meng, Shuai Fan, Chuang Li, Weifeng Liu, Haijun Shen, Guangyu He</i>                                                 |      |
| Real-Time Flexibility Quantification of the Natural Gas Networks for the Electric Power System .....                           | 4243 |
| <i>Guanxiong Yin, Bin Wang, Haotian Zhao, Hongbin Sun</i>                                                                      |      |
| Collaborative Optimization of Base Station Backup Battery Considering Communication Load .....                                 | 4250 |
| <i>Tianqing Yu, Jianzu Hu, Yuefeng Wang, Songxu Xin, Jiandong Liu, Haotian Zhao</i>                                            |      |

#### **Panel 4: Virtual Power Plant Construction and Operations**

|                                                                                                                 |      |
|-----------------------------------------------------------------------------------------------------------------|------|
| Enlightenment and Thinking of the Development of Virtual Power Plant .....                                      | 4256 |
| <i>Baiqiang Shen, Pengfei Lu, Lvbin Ma, Xiaochen Yang, Yichen Pan, Xiaoyuan Chen</i>                            |      |
| Resource Loss Detection Method for Fixed Power Virtual Power Plant Considering Spatio Temporal Correlation..... | 4263 |
| <i>Lei Li, Huaqiang Yan, Junda Ma, Yilong Li, Jialei Song, Yiheng Zhang</i>                                     |      |
| A Carbon Emission Flow Model for the Distribution System Considering Network Characteristics .....              | 4268 |
| <i>Changjiang Wang, Chengjin Ye, Qingsheng Li, Yu Zhang, Yongqing Zhu, Zhen Li</i>                              |      |
| Aggregation Mechanism between Virtual Power Plants and Distributed Energy Resources .....                       | 4273 |
| <i>Kexin Xu, Zuxin Li, Nan Chen, Xuanfu Ye, Li Yang</i>                                                         |      |
| Research on the Coordinated and Optimal Allocation Strategy of Power-Storage-Load in Virtual Power Plants ..... | 4281 |
| <i>Lan Deng, Ye Zhu, Chi Jiang, Bin Hu, Chunlei Yu, Shuyang Shen</i>                                            |      |

#### **Special Session 1: Local Energy Systems with Flexible Resources and Energy Transactions**

|                                                                                                                                                    |      |
|----------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Optimal Scheduling of Steelmaking Process Considering Multiple Electricity Bill Components .....                                                   | 4287 |
| <i>Pengfei Su, Yue Zhou</i>                                                                                                                        |      |
| A Decision-Making Model for Custodian Institutions to Participate in a Carbon Market Considering Risk Preferences and Investment Constraints ..... | 4292 |
| <i>Liyang Liu, Kun Wang, Gang Lu, Peng Xia, Fuqiang Zhang, Fushuan Wen</i>                                                                         |      |
| Bidding Strategy of Distributed Prosumers in Electricity Reserve Market Based on Information Gap Decision Theory.....                              | 4299 |
| <i>Yongqing Liu, Zhenkun Zeng, Lei Wan, Bochun Zhan, Qibin Huang, Zhen Wang, Jiajia Yang, Fushuan Wen</i>                                          |      |
| Load Forecasting of 110kV Power Transformer based on Customer Maximum Capacity Model .....                                                         | 4306 |
| <i>Zhen Mo, Mingxi Wang, Xing Fang, Chen Cheng</i>                                                                                                 |      |
| Evaluation Study of Deep Learning-based Models on Probabilistic Power Load Forecasting.....                                                        | 4312 |
| <i>Zhichen Ye, Yu He, Fengji Luo</i>                                                                                                               |      |
| Medium- and Long-Term Electricity Load Forecasting Based on ARIMA-GM-LSTM.....                                                                     | 4318 |
| <i>Chao Luo, Tian Ni, Lingyun Chen, Yi Kang, Shenpei Zhou, Hui Hou</i>                                                                             |      |
| Risk Evaluation of Minimum Design Temperature of Gas Insulation Switchgear.....                                                                    | 4325 |
| <i>Bin Wang, Sheng Su, Zhao Chen, Yuanyuan Tian, Huifang Yu</i>                                                                                    |      |
| Zonotope and Reinforcement Learning-based Aggregator Operation of Energy Community Resources with Water Pump .....                                 | 4331 |
| <i>Tianyun Xu, Tao Chen, Nuno Pinho da Silva, Yimu Fu, Hao Zhang, Yang Cao, Hao Yuan, Chao Xia</i>                                                 |      |
| A Chance-Constrained AGC Power Sharing Scheme Considering the SOC of BESSs .....                                                                   | 4336 |
| <i>Yuhui Miao, Shaohua Zhang, Shengqi Zhang, Jingwen Dong</i>                                                                                      |      |
| Uncertainty Management for Multiple Data Centers in Transactive Electricity Market: A Cloud Federation Approach....                                | 4343 |
| <i>Caishan Guo, Xiuzhuang Liang, Weiwei Chen, Wenhui Tang</i>                                                                                      |      |
| Coordinated Scheduling of Frequency Regulation Resources Based on the Coordination Coefficient.....                                                | 4349 |
| <i>Dezheng Liu, Jianxiang Qin, Long Yang, Hanxiang Wang, Ying Wang, Kaifeng Zhang</i>                                                              |      |

| The Impact of Disruptive Technologies on the Evolution of New Power Systems under the Double Carbon Targets.....                                 | 4605 |
| <i>XingDe Huang, WenQing Li, QiYu Lu, TianTian Chen, XiaoMan Qi, Ping Mei</i>                                                                    |      |
| Research on the Dynamic Power Distribution of One-Machine, Dual-gun Charging Pile .....                                                          | 4612 |
| <i>Xiaonan Chen, Ou Bai, Qiuchen Yun, Weijia Zheng, Xiaonan Song</i>                                                                             |      |
| Review on Carbon Measurement Techniques and Carbon Certification Systems.....                                                                    | 4617 |
| <i>Deng Xing, Wang Lin-yuan, Huang Di, Jin Xiang, Xue Gui-yuan</i>                                                                               |      |
| Analysis on the Importance of the Factors Affecting the Comprehensive Capacity of Power Selling Companies Based on Weight Calculation .....      | 4623 |
| <i>Yiru Chen, Shaowa Lin, Weiling Wu, Yangjia Lin, Xiuying Wu, Han Gao, Ying Su, Zhaoyang Wang</i>                                               |      |
| Non-invasive Power Load Identification Technology Based on MFCC and SVM .....                                                                    | 4628 |
| <i>He Yu, Yingchun Wang, Jun Li, Wei Wei, Yaojun Xu</i>                                                                                          |      |
| Cooperative Operation Strategy of Optical Storage Network Based on Cooperative and Non-cooperative Game.....                                     | 4634 |
| <i>Zheng Shi, Lu Yan, Jianan Liu, Xinhui Song, Xiaolong Lu</i>                                                                                   |      |
| Design and Implementation of Power Spot Market Boundary Data Management System Considering Data Approval and Intelligent Data Verification ..... | 4641 |
| <i>Jing Wu, Li Chang, Minjian Zhu, Bin Cao, XiaoYu Du, Yang Shen</i>                                                                             |      |
| Assessment of Emergency Control Strategy and Aided Decision Scheme for AC/DC Hybrid Power Systems .....                                          | 4648 |
| <i>Zheng Shi, Yao Wang, Yingying Hu, Jia Li, Ying Yang, Lu Yan, Xiaolong Lu</i>                                                                  |      |
| An Improved Wind Power Forecasting Framework Based on Seasonal Feature Selection and Temporal Convolutional Network .....                        | 4654 |
| <i>Lian Liu, Xuezhen Qin, Liang Tang, Yan Ma, Jie Shi, Yanni Zhang, Yuming Wang</i>                                                              |      |
| <b>Special Session 4: Coordination in Operating High-Penetration Renewable Power Systems</b>                                                     |      |
| Evaluation Strategy for the Complementary Characteristics of Renewable Generation at Sending and Load Demand at Receiving Ends .....             | 4661 |
| <i>Xu Tian, Yuanyuan Wang, Liantao Liu, Fei Liu, Fei Peng, Fuqiang Zhang, Junshu Feng, Shiwei Xia</i>                                            |      |
| Green Hydrogen Production and Consumption Method for Offshore wind Power Based on Electric Hydrogen Coupling .....                               | 4667 |
| <i>Dingfei Que, Jingwei Xue, Wenbin Lin, Xin Wei, Zhanghuang Zhang, Ping Huang</i>                                                               |      |
| Trans-Regional Dispatch of Large-Scale Wind and Solar Power Generation Base .....                                                                | 4673 |
| <i>Rongkang Zhao, Xizhen Xue, Haifeng Ye, Zili Xu, Zhi Li, Xiaomeng Ai</i>                                                                       |      |

|                                                                                                                                              |      |
|----------------------------------------------------------------------------------------------------------------------------------------------|------|
| Bidding Model for Shared Energy Storage Participation in Multi-market Considering Multi-timescale Demand .....                               | 4680 |
| <i>Shibo Wang, Yan Cheng, Weiwei Miao, Shumin Sun, Xinyu Yin, Xiaoyan Bian</i>                                                               |      |
| Condenser Configuration Method for Receiving-End Power Systems Considering Security and Stability Constraints .....                          | 4687 |
| <i>Xiaohu Zhang, Kanqin Zhuang, Ling Xu, Guoteng Wang, Ying Huang, Zheng Xu</i>                                                              |      |
| Multi-type Energy Storage System Operation Strategy Based on Grouping State of Charge Regulation.....                                        | 4692 |
| <i>Yuxiang Chu, Hejun Yang, Yinghao Ma, Lei Sun, Zhaochen Yang, Xinghua Xie</i>                                                              |      |
| Virtual Inertia Strategy of Doubly-Fed Induction Generator Participating in Power Grid Primary Frequency Modulation .....                    | 4698 |
| <i>Xuchen Yang, Junchao Ma, Chenxu Wang, Kuayu Wu, Longzhen Yu, Yiping Yu</i>                                                                |      |
| A Hierarchical Backtracking Search Algorithm with Heuristic Pruning for Transmission Maintenance .....                                       | 4705 |
| <i>Zhigang Xie, Junbo Zhang, Keng-Weng Lao</i>                                                                                               |      |
| Stochastic Distribution Network Reconfiguration Exploiting the Flexibilities of Data Center .....                                            | 4711 |
| <i>Xumin Duan, Weiye Zheng, Jizhong Zhu</i>                                                                                                  |      |
| Calculation Model of Firm Generation Capacity for Wind-Solar-Hydro Complementary Generation System with Hybrid Pumped Storage Stations ..... | 4718 |
| <i>Jianan Duan, Jun Xie, Chenhui Wu, Xu Zhang, Yanpei Song, Yuanhao Li</i>                                                                   |      |
| Research on a Rapid Active Power Control Method for Wind Farms Based on Dynamic Operating Points.....                                        | 4723 |
| <i>Qingguang Yu, Xin Yao, Xiaoyu Li, Leidong Yuan, Min Guo</i>                                                                               |      |
| An Intelligent Operational Reliability Assessment Approach Considering Sample Imbalance .....                                                | 4729 |
| <i>Maosheng Gao, Juan Yu, Salah Kamel, Zhifang Yang</i>                                                                                      |      |
| A Low Carbon Demand Response Approach via Road Tolls in Traffic-Power Coupled System.....                                                    | 4735 |
| <i>Zeyu Liang, Tao Qian, Qinran Hu, Zaijun Wu</i>                                                                                            |      |
| Real-time Wholesale Electricity Pricing for Power Systems with Energy Storage .....                                                          | 4741 |
| <i>Hnin Phyu Saung, Dongxiang Yan, Yue Chen</i>                                                                                              |      |
| Multi-Resource Joint Power Dispatch with Coordinated Consideration of Deep Peak and Frequency Regulation Requirements .....                  | 4747 |
| <i>Yuming Liu, Xiaoju Li, Dengfeng Li, Mincai Yang, Yawen Zheng, Mingxu Xiang</i>                                                            |      |
| A Model-Based Parameter Space in Monte Carlo Simulations for European Short-Term Adequacy Assessments .....                                  | 4754 |
| <i>Menghan Zhang, Yue Zhou, Zhifang Yang, Juan Yu, Wenyuan Li</i>                                                                            |      |
| Formation of Operating Reserve Component in Locational Marginal Prices Considering Controllability of Wind Power .....                       | 4761 |
| <i>Shuo Yin, Huixuan Li, Yang He, Sheng Liu, Mingxu Xiang</i>                                                                                |      |
| Consensus-based Coordination of Battery Energy Storage Systems for Frequency Regulation Service .....                                        | 4768 |
| <i>Hongyi Li, Hongxun Hui, Hongcai Zhang</i>                                                                                                 |      |
| An Intelligent Power Flow Violation Adjustment Method Based on Adversarial Process.....                                                      | 4774 |
| <i>Shiqi Duan, Juan Yu, Zhifang Yang, Maosheng Gao, Tao Chen, Guangde Dong</i>                                                               |      |
| Coordinated Dispatch of Flexible Resources and Thermal Generation Based on Variable Wind Power Consumption Region .....                      | 4780 |
| <i>Wujing Li, Zhiwei Wang, Xiangqing Hu, Wenzhuo Wang, Biao Su, Qiwen Zhang</i>                                                              |      |

|                                                                                                                                             |      |
|---------------------------------------------------------------------------------------------------------------------------------------------|------|
| Flexible Microgrids with Dynamic Boundaries for Voltage Volatility Reduction .....                                                          | 4786 |
| <i>Fengqi Lyu, Shunbo Lei, Yue Song, Gang Huang, Aichao Zhang, Yin Xu</i>                                                                   |      |
| A Frequency Limitation Controller Optimization Method for Power Grid with Multi-Region HVDC Considering Frequency Regulation Reserve .....  | 4792 |
| <i>Lingcong Meng, Hui Li, Chao Qin, Qichao Chen, Wei Chen, Fei Wang</i>                                                                     |      |
| Economic Analysis of Energy Storage System for Peak Shaving Considering Its Participation Sequence .....                                    | 4797 |
| <i>Zhaochen Yang, Hejun Yang, Yinghao Ma, Lei Sun, Yuxiang Chu, Xinghua Xie</i>                                                             |      |
| Sequential Coordination Method of Multiple HVDC Commutation Failures Based on Voltage Stiffness .....                                       | 4803 |
| <i>Le Zhao, Mengyao Zhang, Ling Xu, Guoteng Wang, Ying Huang, Zheng Xu</i>                                                                  |      |
| Static Voltage Stability Assessment of Distribution Grids with Massive Inverter Interfaced DGs Considering Transmission Grid Coupling ..... | 4809 |
| <i>Xinna Pan, Jiangang Lu, Chenhui Lin, Ruifeng Zhao, Bin Wang, Yue Dai, Wenchuan Wu, Hongbin Sun</i>                                       |      |
| <b>Special Session 5: Applications of Artificial Intelligence and Big Data Technologies in Smart Grids</b>                                  |      |
| A Classification Method for Electricity Users Based on the LightGBM Algorithm .....                                                         | 4815 |
| <i>Chengfei Qi, Yan Liu, Yachao Wang, Mengjian Dong</i>                                                                                     |      |
| Dynamic Load Shedding Model for CVaR-Based Reliability Evaluation of Power Systems with Wind Power Integration .....                        | 4820 |
| <i>Guo Chen, Jueyou Li, Yanqiao Zhou</i>                                                                                                    |      |
| Classification of Frequency Disturbance Event in Power Systems Considering Optimal PMU Placement .....                                      | 4826 |
| <i>Zhenglong Sun, Xiaoya Wang, Yoash Levron</i>                                                                                             |      |
| Adaptive Smoothing Optimization Method for Dynamic Load Shedding Based on CVaR under Photovoltaic Uncertainty .....                         | 4832 |
| <i>Yanqiao Zhou, Jueyou Li, Guo Chen</i>                                                                                                    |      |
| Deep Reinforcement Learning Applied in Distribution Network Control and Optimization .....                                                  | 4838 |
| <i>Xiao Han, Ye Li, Jian Li, Binwen Zhang, Zhicheng Ma</i>                                                                                  |      |
| Constructing Knowledge Graph for Electricity Keywords Based on Large Language Model .....                                                   | 4844 |
| <i>Honda Zhao, Wei Jiang, Jiewen Deng, Qinghua Ren, Li Zhang</i>                                                                            |      |
| Optimal Joint Bidding and Pricing of Electricity Retailers Using Multi-agent Deep Reinforcement Learning .....                              | 4850 |
| <i>Shankun Ye, Jixiang Lu, Hua Huang, Ke Wang, Hongsheng Xu</i>                                                                             |      |
| Thermal Fault Detection of Power Equipments with Low-Rank Tensor Decomposition and Guided Filter .....                                      | 4856 |
| <i>Zhihong Huang, Zuoyuan Jun</i>                                                                                                           |      |
| Deduction Simulation of Industrial Flexible Load Based on CEEMDAN-VMD-GRU .....                                                             | 4860 |
| <i>Bin Li, Fulong He, Fengqiao Wang, Dan Wu, Shiming Tian, Yuting Xu</i>                                                                    |      |
| Data Driven Electricity Theft Detection Based on Federated Learning .....                                                                   | 4865 |
| <i>Fujia Han, Xiaohui Wang, Yuyao Chen, Ji Qiao, Lifang Gao, Xiaopeng Xin</i>                                                               |      |
| Deep Reinforcement Learning for Community Battery Scheduling under Uncertainties of Load, PV Generation, and Energy Prices .....            | 4871 |
