## Contents

|   |     |
|---|-----|
| Assessment of the role of infrastructure in high share renewable energy systems<br>Jonas Schnidrig, Xiang Li, François Maréchal .....   | 1   |
| Field-test economic and ecological performance of Proton Exchange Membrane Fuel Cells (PEMFC) used in micro-combined heat and power residential applications (micro-CHP)<br>Nicolas Paulus, Vincent Lemort, Camila Davila .....   | 13  |
| Improving the application of Reinforcement Learning for load shifting in a cooling system through state-of-the-art algorithms and hyper-parameter optimization<br>Thomas Schreiber, Vincent Evenschor, Dirk Müller .....  | 25  |
| Emerging thermodynamic cycles and thermal power generation<br>Michel Moliere, Frédéric Geiger, Romain Privat, Jean-Noel Jaubert .....   | 37  |
| Optimizing Mixture Composition in Alternative Flow Sheets in Residential Heat Pumps<br>Christoph Höges, Valerius Venzik, Christian Vering, Dirk Müller .....  | 49  |
| Performance maximization of thermochemical energy storage reactors through topology optimization<br>Gabriele Humbert, Yulong Ding, Adriano Sciacovelli .....  | 61  |
| Assessment of the sustainability of various ways of hydrogen production and supply by applying LCA and exergy<br>Lydia Stougie, Hedzer van der Kooi, Rob Stikkelman .....   | 73  |
| Automated modeling of mode-based control algorithms in a hierarchical fuzzy logic controller described in fuzzy Petri nets<br>Xiaoye Cai, Xinling Li, Alexander Kümpel, Dirk Müller .....   | 85  |
| Feasibility study of green hydrogen production and export in Iran<br>Ali Kakavand, Saeed Sayadi, George Tsatsaronis, Ali Behbahaninia .....   | 97  |
| Nitrogen/Hydrogen as thermochemical energy storage material in NH <sub>3</sub> fed reversible solid oxide fuel cell system for electrical energy storage<br>Van Tien Giap, Yong Gyun Bae, Young Sang Kim, Dong Keun Lee, Thai Quyen Quach, Viet Tuan Anh Bui, Kook Young Ahn .....      | 113 |
| Multi-criteria optimisation of an industrial thermocline thermal energy storage<br>Diane Le Roux, Pierre Neveu, Régis Olivès .....  | 123 |
| Low-grade waste heat integration into an existing high-temperature district heating system at the research centre in Jülich, Germany<br>Jan Stock, André Xhonneux, Dirk Müller .....  | 137 |
| Remote ammonia production for the future energy demand of Belgium: Techno-economic optimization of local and remote ammonia production for Belgium under uncertainty<br>Kevin Verleysen, Diederik Coppitters, Alessandro Parente, Francesco Contino .....                               | 149 |
| Thermal Energy Storage (TES) application in an Italian District Heating (DH) network: A Computational Fluid Dynamic (CFD) analysis to assess the operating efficiency<br>Mosè Rossi, Sara Gremi, Lingkang Jin, Matteo Lorenzetti, Danilo Salvi, Alessia Arteconi, Gabriele Comodi ..... | 161 |
| Development of a multi-dimensional Key Performance Indicators' framework for the holistic performance assessment of Smart Grids<br>Maria Fotopoulou, Dimitrios Rakopoulos, Stefanos Petridis .....  | 173 |
| Using Process Change Analysis to assess heat pump performance in a changing biodiesel production plant<br>Brendon Raad, Marit Lieshout, Andrea Ramirez Ramirez, Lydia Stougie .....   | 185 |

|  |     |
|--|-----|
| Techno-Economic Evaluation of Reversible Organic Rankine Cycles in Geothermal Combined Heat and Power Plants<br>Florian Kaufmann, Christopher Schiffler, Christoph Wieland, Hartmut Spliethoff .....   | 197 |
| A filter-less LES model based on the local minimization of the entropy generation rate: model description<br>Enrico Sciubba, Federico Zullo .....  | 209 |
| Investigation on the influence of real-world weather and demand forecasts on the model predictive control of a hydrogen-battery energy storage system<br>Alexander Holtwerth, Jakob Fritz, André Xhonneux, Dirk Müller .....   | 221 |
| Methods to achieve PV cooling in building integrated photovoltaic (BIPV) systems: An experimental investigation<br>Rafaela Agathokleous, Soteris Kalogirou .....   | 233 |
| Comparative exergy assessment of residual biomass gasification routes for hydrogen and ammonia production<br>Gabriel Gomes Vargas, Daniel Flórez-Orrego, Silvio de Oliveira Junior .....   | 245 |
| Thermal Engineering Systems in Python (TESPy): The implementation and validation of the chemical exergy<br>Mathias Hofmann, Francesco Witte, Karim Shawky, Ilja Tuschy, George Tsatsaronis .....   | 257 |
| Optimal scheduling of energy and mass flows based on networked multi-carrier hubs formulation : a general framework<br>Mohamed Tahar Mabrouk, Mahdi Majidniya, Bruno Lacarriere .....  | 271 |
| Second Law Analysis of a Membrane Humidifier under Various Operating Conditions<br>Markus Pollak, Wilhelm Tegethoff, Jürgen Köhler .....   | 283 |
| Importing renewable energy to EU via hydrogen and ammonia vectors: levelized cost of energy assessment<br>Azd Zayoud, Diederik Coppitters, Hannes Laget, Véronique Dias, Hervé Jeanmart, Francesco Contino .....   | 295 |
| Evaluating the Effect of Using Representative Days for Approximated Model Predictive Control Applications in Heat Pump Systems<br>Laura Maier, Maxim Shamovich, Dominik Hering, Dirk Müller .....  | 305 |
| Potential of electric mobility as service to the grid in renewable energy hubs<br>Cédric Terrier, Luise Middelhaue, François Maréchal .....  | 317 |
| Targeting excess heat recovery in an oil refinery plant implementing large-scale carbon capture and power-to-hydrogen<br>Elin Svensson, Pontus Bokinge, Simon Harvey .....   | 329 |
| Optimal integration of different absorption chillers in geothermal trigeneration systems with Organic Rankine Cycles<br>Christopher Schiffler, Ludwig Irrgang, Florian Kaufmann, Carmen Martin Apolinario, Christoph Wieland, Hartmut Spliethoff .....               | 341 |
| Techno-economic analysis of Brayton concentrated solar power systems in the context of other power generation technologies<br>Judit García Ferrero, Rosa Pilar Merchán Corral, María Jesús Santos Sánchez, Alejandro Medina Domínguez, Antonio Calvo Hernández ..... | 353 |
| Quantification of costs and greenhouse gases emissions related to e-fuels production<br>Nicolas Campion, Sara Shapiro-Bengtson, Sebastian Franz, Marie Münster .....   | 365 |
| Towards near-zero Energy Buildings: lessons learnt from the RE-cognition project<br>Alessandro Colangelo, Elisa Guelpa, Andrea Lanzini, Vittorio Verda .....   | 373 |

|   |     |
|---|-----|
| Identification of critical raw materials and potential bottlenecks in vehicles through a thermodynamic approach<br>Ricardo Magdalena, Alicia Valero, Abel Ortego, Marta Iglesias .....  | 385 |
| Beyond metal prices: geological scarcity as a physical cost allocation criterion. The case of Rare Earth Element mining<br>Jorge Torrubia, Antonio Valero, Alicia Valero .....  | 397 |
| Thermo-mechanical energy storage options for long-duration storage – A techno-economic comparative assessment of established and novel concepts<br>Andrea Vecchi, Adriano Sciacovelli .....   | 409 |
| Exploitation of the hidden hydropower potential downstream a weir<br>Martina Cumerlato, Mosè Rossi, Jacopo Carlo Alberizzi, Maurizio Righetti, Massimiliano Renzi ....  | 421 |
| Computational and Experimental Study of Vortex Cooling Using CFD, 3-D PIV, and Liquid Crystals<br>Daisy Galeana, Mebrat Abebe, Asfaw Beyene .....   | 433 |
| Vortex cooling of a gas turbine blade: comparison of single and bidirectional swirl formation<br>Mebrat Abebe, Daisy Galeana, Asfaw Beyene .....  | 445 |
| Investigation of the Use of Steam-air Preheater to Increase the Overall Efficiency of Thermal Power Plant<br>Somchart Chantasriwan .....  | 457 |
| Performance analysis of a hydrogen-fueled PAFC triple system for high efficiency<br>Hye Rim Kim .....   | 467 |
| Estimating the local renewable potentials for the transformation of district heating systems<br>Merlin Sebastian Triebs, George Tsatsaronis .....   | 479 |
| Environmental assessment of electrification of food industry for Denmark and France<br>Yoann Jovet, Alexis Laurent, Nasrin Arjomand Kermani, Frédéric Lefevre, Brian Elmegaard, Marc Clause .....   | 491 |
| Design Methodology of a Radial Turbine for Series Hybrid Electric Vehicles<br>Joelle Najib, Maroun Nemer, Chakib Bouallou, Assaad Zoughaib .....  | 505 |
| Unleashing district cooling potential through design optimization<br>Manfredi Neri, Elisa Guelpa, Vittorio Verda .....  | 517 |
| Energy and exergy analysis of a pilot plant for the combined production of cooling and electricity from a low temperature heat source through an absorption process<br>Simone Braccio, Alessia Arteconi, Hai Trieu PHAN, Nicolas Tauveron, Nolwenn Le Pierrès ..... | 529 |
| Optimized Use of Polygeneration Plants in a Highly Coupled Energy System Model<br>Andreas Hanel, Marcel Dossow, Sebastian Fendt, Hartmut Spliethoff .....   | 541 |
| Enabling ultra-fast charging with 800V-battery architecture: balance between time spent at stations and charging infrastructure profitability<br>Anastasia Popiolek, Zlatina Dimitrova, Marc Petit, Philippe Dessante .....   | 553 |
| Effects of the decarbonization of district heating systems on future German electricity prices<br>Elisa Papadis, George Tsatsaronis .....   | 563 |
| Stochastic optimal design for large scale rainwater harvesting and detention systems<br>Qiao Yan Soh, Edward O'Dwyer, Nilay Shah, Salvador Acha .....   | 575 |
| Extreme events and climate change: How did wildfires and other stress events affect the social and policy aspects of the energy transition? A mass media article analysis<br>Panagiotis Varelas, Francesco Contino, Alessandro Parente .....                        | 587 |

|  |     |
|--|-----|
| Experiments and analytical verification studies on the evaluation of heat dissipation performance according to changes in the thermal properties of LED heat sinks<br>Ki-Yeol Shin, Jie Liu, Hyeokwoo Oh.....  | 599 |
| Energy and exergy analysis and thermodynamic optimization of a waste heat recovery trigeneration system based on ORC and ejector cooling cycle<br>Konstantinos Braimakis, Christos Xynos, Sotirios Karellas .....  | 609 |
| An Online Learning Approach for Data-Driven Model Predictive Control in Building Energy Systems<br>Phillip Stoffel, Max Berktold, Alexander Kümpel, Dirk Müller.....   | 621 |
| Exergo-economic and exergo-environmental analysis of a Hydrogen Storage System<br>Pietro Ungar, Claudio Zuffi, Guido Petri, Daniele Fiaschi, Giampaolo Manfrida, Lorenzo Talluri .....   | 633 |
| Life Cycle Assessment Applied to an ORC System Operating Under Two Modes: Evaluation of Two LCIA Methods<br>Ronelly De Souza, João Luiz M. Neto, Carlos Dos Santos, Mauro Reini.....   | 645 |
| Development of simplified models for the individuation of the proper exploitation method for African Geothermal resources<br>Claudio Zuffi, Pietro Ungar, Fiammetta Agostini, Tommaso Bigi, Irene Cappello, Alessandra Linari, Giampaolo Manfrida, Lorenzo Talluri, Daniele Fiaschi..... | 661 |
| The influence of HHO gas fuel addition on the efficiency and operation stability of spark ignition engine<br>Jacek Leyko, Kamil Slobinski, Jaroslaw Jaworski, Grzegorz Mitukiewicz, Damian Batory, Wissam Bou Nader .....  | 673 |
| Sourcing hydrogen for the production of sustainable aviation fuels<br>Giovanni Manente, Antonio Ficarella, Maria Grazia De Giorgi .....  | 683 |
| Unlocking Supply Temperature Reduction in existing District Heating infrastructures<br>Martina Capone, Elisa Guelpa, Vittorio Verda .....  | 695 |
| Exergy-based comparison of three wheat straw based biorefineries<br>René Kofler, Lasse R. Clausen.....   | 707 |
| A novel concept for maximizing the cooling capacity of an adsorption chiller via process time control<br>Mujahid Naseem, Mujahid Naseem, Namin Son .....   | 719 |
| Experimental study on differences in human body exergy balance between a person in radiant and convection heating/cooling rooms<br>Hideo ASADA.....  | 731 |
| Environomic Analysis of Different Hydrogen Production Routes<br>Xinyi Wei, Shivom Sharma, Ivan Kantor, Manuele Margni, François Maréchal, Jan Van Herle.....   | 743 |
| Analyzing the influence of temperature modeling in heat pump system optimization with mixed-integer linear programming<br>Hannah Krützfeldt, Christian Arpe, Dominik Hering, Dirk Müller .....   | 755 |
| Optimization analysis of a renewable-based multi-energy system for a tertiary building<br>Giulia Mancò, Elisa Guelpa, Vittorio Verda .....   | 767 |
| Refrigerant Charge Effect on a Booster Heat Pump and Temperature Profile Matching Analysis: an Experimental Study<br>Tingting Zhu, Jierong Liang, Yanjun Du, Martin Ryhl Kærn, Torben Ommen, Jan Eric Thorsen, Brian Elmegaard .....   | 779 |

|  |     |
|--|-----|
| Implementation of thermal network simulation in operation optimization of an energy system<br>Umberto Tesio, Elisa Guelpa, Vittorio Verda .....  | 791 |
| Optimal planning of renewables and storage systems based on meta-heuristic and optimal power<br>flow models<br>Sara Fakh, Mohamed Tahar Mabrouk, Mireille Batton-Hubert, Bruno Lacarrière .....  | 801 |
| A Nonlinear Optimization Method for the Topological Design of District Heating Systems<br>Jerry Lambert, Stephan Herrmann, Hartmut Spliethoff .....  | 813 |
| Prediction of heat pump evaporator fouling for predictive maintenance<br>Wiebke Meesenburg, José Joaquín Aguilera, René Kofler, Wiebke Brix Markussen, Brian<br>Elmegaard .....  | 825 |
| Multihorizon Forecasting and Operational Planning Method of Energy Storage Under a Demand<br>Response<br>Akira Yoshida, Yoshiharu Amano .....  | 837 |
| Environmental and technical advantages and bottlenecks of carbon dioxide capture and storage<br>from a thermodynamic perspective<br>Ali Akbar Eftekhari, Rouhi Farajzadeh .....  | 849 |
| The efficient exploitation of chemical energy in heat pumps<br>Aya Barakat, Silvia Lasala, Jean-Noël Jaubert .....   | 861 |
| Overcoming bottlenecks due to supply temperature reductions in existing district heating<br>Martina Capone, Elisa Guelpa, Vittorio Verda .....   | 873 |
| Integration of innovative and conventional renewable technologies in nearly Zero-Energy<br>Buildings<br>Vittorio Verda, Elisa Guelpa, Andrea Lanzini, Alessandro Colangelo, Marco Simonetti, Francesco<br>Neirotti, Ioannis Moschos, Nikos Katsaros, Giuseppe Mastandrea, Luigi D'Oriano, Ioannis<br>Kompougias, Michela Buzzetti, Claudio Del Pero, Alessandro Virtuani, Fabiana Lisco, Gianluca<br>Cattaneo, Matthieu Despeisse, Tommaso Morbiato, Luc Hamilton, Spyros Kiartzis, Radu Molvan,<br>Madalina Comes, Vivienne Kuh, Tim O'Callaghan, Jure Ratej, Dan Micu, Andrei Ceclan, Mihaela<br>Cretu ..... | 885 |
| Model Predictive Control approaches for optimal long-term operation of Ground Coupled Heat<br>Pump systems<br>Youssef Miftah, Nicolas Vasset, Yacine Gaoua, Matthieu Simon, Andrew Parry, Prasanna Amur<br>Varadarajan, Sylvain Chambon, Tejaswinee Darure .....   | 897 |
| Assessment of a data-driven model of a heat pump using synthetic data generated from a<br>physical dynamic model<br>Mohamed Tahar Mabrouk, Bruno Lacarrière, Anne-Geneviève Lemelle .....  | 909 |
| Assessment of Varying Coupling Levels between Electric & Thermal networks at District Level<br>using Co-Simulation and Model-predictive Control<br>Luca Rava, Audrey Wantier, Mathieu Vallée, Alain Ruby, Nicolas Lamaison .....   | 919 |
| Efficient exploration of Pareto-optimal designs of carbon capture units using surrogates models<br>Meire Ellen Gorete Ribeiro Domingos, Shivom Sharma, Daniel Flórez-Orrego, François<br>Maréchal, Moisés Teles dos Santos .....   | 931 |
| An evaluation of turbulence model suitability for use in Computational Fluid Dynamics of Wells<br>turbines in oscillating water column fluid flow conditions.<br>Zak Hawthorne, Peter Ryan, Thomas Dooley, Fergal O'Rourke .....   | 943 |
| The Influence of Thermochemical Energy Storages with CaO/Ca(OH) <sub>2</sub> on Future Industrial<br>Energy Systems with High Temperature Steam Demand<br>Gesa Backofen, Florian Kerscher, Stephan Gleis, Hartmut Spliethoff .....   | 955 |

|   |      |
|---|------|
| Classification of industrial thermal processes for the assessment of the electrification and flexibility potential<br>Chiara Magni, Alessia Arteconi, Sylvain Quoilin .....   | 965  |
| Sensitivity analysis to assess the robustness of model predictive control of a building heat demand<br>Joseph Brisson, Mathieu Vallée, Siao-Leu Phouratsama, Pierre Lemaire .....   | 977  |
| Community-based local energy markets for residential neighborhoods<br>Sarah Henn, Tim Adamek, Rita Streblow, Dirk Müller .....  | 989  |
| High temperature heat pumps applications for industrial separation and drying processes<br>Daniel Florez-Orrego, Eduardo Antonio Pina, Meire Ellen Ribeiro Domingos, Shivom Sharma, Maréchal François .....   | 1001 |
| Robust optimal multi-year modernization roadmaps for typical existing buildings<br>Jan Richarz, Dominik Hering, Dirk Müller .....   | 1019 |
| Energy and exergy assessment of renewable energy storage using iron as energy carrier<br>Jannik Neumann, Elisa Corbean, Frank Dammel, Stefan Ulbrich, Peter Stephan .....   | 1031 |
| Thermal Energy Storage System integrating into a PV facility<br>Alberto Benato, Ennio Gallo, Francesco De Vanna, Anna Stoppato .....  | 1043 |
| CFD investigation of a Venturi tube for wastewater treatment applications<br>Amedeo Scramoncin, Alberto Benato, Francesco De Vanna, Anna Stoppato .....   | 1055 |
| The introduction of a new exergy disaggregation approach and comparison with the recent thermoeconomic methodologies in an organic rankine cycle powered vapor compression refrigeration system<br>Rodrigo Guedes dos Santos, Atilio Barbosa Lourenço, Pedro Rosseto de Faria, Marcelo Aiolfi Barone, José Joaquim C. S. Santos ..... | 1065 |
| Application of Methanol with an Ignition Additive in a Heavy-duty Turbo-charged CI engine<br>Chong Cheng .....  | 1077 |
| Decentralized ICT integration in residential buildings<br>Dorsan Lepour, Jacopo Saracco, François Maréchal .....  | 1093 |
| Application of CFD methods in heat transfer analysis of adsorption cooling and desalination systems<br>Karolina Grabowska, Radomir Ščurek, Jaroslaw Krzywanski, Marcin Sosnowski, Anna Zylka, Anna Kulakowska, Dorian Skrobek, Wojciech Nowak .....   | 1105 |
| Thermodynamic assessment of Latin American cities applying exergetic efficiency<br>Ricardo Morel Hartmann, Luis Evelio Garci-Acevedo, Amir Roberto De Toni Jr. ....   | 1113 |
| Exergy assessment of soil fertility and erosion<br>Bárbara Palacino, Sonia Ascaso, Antonio Valero, Alicia Valero .....  | 1125 |
| Low Flammability Limits of Natural Refrigerant Mixtures: Theory vs Standards<br>Matteo Caramaschi, Laure Meljac, Stefano Poppi, Kasper Østergaard, Martin Kærn, Torben Ommen, Brian Elmegaard .....   | 1137 |
| Development of small scale ORC for low grade heat source utilization<br>Ryosuke Akimoto, Masaru Nakaiwa, Keigo Matsuda .....  | 1147 |
| Comparative analysis of two-phase expansion and sub-critical organic Rankine cycle systems for solar and geothermal applications<br>Nishith Babubhai Desai, Carlotta Tammone, Fredrik Haglind .....   | 1153 |

|  |      |
|--|------|
| A pseudo-analytical model based on the enthalpy approach for the simulation of packed-bed rock thermal energy storage systems<br>Maria E. Mondejar, Nishith Babubhai Desai, Elie Najim, Fredrik Haglind .....  | 1165 |
| Experimental Investigation of Rule-Based Control Strategies for Hybrid Heat Pump Systems Using the Smart Grid Ready Interface<br>Stephan Göbel, Christian Vering, Dirk Müller .....  | 1175 |
| Calibration of a charging time energy fraction model for melting experiments of a high temperature latent heat thermal energy storage system<br>Kenny Couvreur, Wim Beyne, Robin Tassenoy, Steven Lecompte, Michel De Paepe .....                                  | 1187 |
| The charging time energy fraction method for characterizing latent thermal energy storage heat exchangers<br>Wim Beyne, Steven Lecompte, Michel De Paepe .....   | 1199 |
| An optimization approach for plastic waste management policies in Switzerland<br>Rafael Castro-Amoedo, Yi Zhao, François Maréchal .....  | 1207 |
| Selection of nano-particulate material for improved passive cooling skylight performance.<br>Gopalakrishna Gangisetty, Ron Zevenhoven .....  | 1219 |
| Electricity Generation by Renewables – Required Infrastructure and Effects on Sustainability Goals<br>Efstathios Michaelides .....   | 1231 |
| Model-based analysis of a heat pump cascade system using seawater and ammonia as working fluids<br>Jonas Lundsted Poulsen, Andreas Schulte, Sven Försterling, Wiebke Meesenburg, José Joaquín Aguilera, Juergen Koehler, Brian Elmegaard, Benjamin Zühlsdorf ..... | 1243 |
| Direct sun radiation could cause overheating in large glazed buildings in winter season : A case study<br>Abdelatif Merabtine, Abdelhamid Kheiri, Salim Mokraoui .....   | 1255 |
| A stochastic programming optimization framework to design an energy system and face market stages<br>Gabriele Volpato, Enrico Dal Cin, Piero Danieli, Gianluca Carraro, Luigi De Giovanni, Giovanni Andreatta, Andrea Lazzaretto .....                             | 1267 |
| On the thermoeconomic modeling of waste cost allocation and diagnosis of malfunctions for environmental aspects assessment<br>Pedro Rosseto de Faria, César Torres, Antonio Valero, José Joaquim Conceição Soares Santos ...                                       | 1279 |
| Exergy design and energy storage: an experimental heating system for supply-demand decoupling<br>Valentina Bonetti, Nick Kelly .....   | 1291 |
| Simulation towards demonstration: A Digital-Twin for developing control concepts of an industrial-scale Rotation Heat Pump<br>Bernd Windholz, Andreas Sporr, Stephan Kling, Michael Laueremann, Andreas Längauer, Bernhard Adler .....                             | 1303 |
| Automating the data-driven predictive control design process for building thermal management<br>Edward O Dwyer, Paola Falugi, Eric Kerrigan, Nilay Shah .....  | 1315 |
| Energetic benefits and Life Cycle Assessment of a hybrid CSP-biomass power plant<br>Efisio Casti, Giorgio Cau, Alfonso Damiano, Emanuela Melis, Mario Petrollese .....   | 1325 |
| Environmental assessment of an industrial power-to-hydrogen-to-power system - towards decarbonization of existing natural gas fueled CHP plants<br>Despina Magiri-Skouloudi, Alexandros Macheras, Sotirios Karellas .....  | 1337 |

|   |      |
|---|------|
| Thermodynamic comparative analysis between an ejector cooling system and an absorption cooling system in order to improve the fermentation process of the sugar and ethanol production process<br>Antonio Gallego, Milagros Palacios-Berechea, Reynaldo Palacios-Berechec, Sílvia Nebra, Carlos Eduardo Rossell ..... | 1349 |
| CFD study of the thermal effects of increasing the share of refuse-derived fuel in a rotary cement kiln<br>Piotr Jozwiak, Aleksandra Kiedrzyńska, Jarosław Hercog .....   | 1361 |
| Sizing, Analysis and Comparison of two WHR Systems Integrated with a Large Internal Combustion Engine for Intake Air Conditioning<br>Bruno Muniz de Freitas Miotto, André Chun, Carla Cunha, João Luiz Donatelli, José Joaquim Santos .....   | 1369 |
| Full electrification opportunities of spray dryers in milk powder processes<br>Jierong Liang, Martin Andersen, Roger Solé, Lorenzo Bellemo, Riccardo Bergamini, Jonas Poulsen, Benjamin Zühlsdorf, Peter Schneider, Jonas Jensen, Wiebke Markussen, Brian Elmegaard .....   | 1383 |
| LCA and LCC framework for special purpose vehicles based on a case study of a mini-tractor for orchard operations<br>Mateusz Proniewicz, Karolina Petela, Andrzej Szlęk .....   | 1395 |
| The potential application of a magnetocaloric heat pump in ultra-low temperature district heating systems<br>Jierong Liang, Marvin Masche, Kurt Engelbrecht, Tingting Zhu, Brian Elmegaard, Christian Bahl ...  | 1407 |
| Optimization of PV installation angles for increased self-sufficiency in residential neighbourhoods<br>Qiuxian Li, Natasa Vulic, Kristina Orehounig .....   | 1419 |
| Electrification of industrial processes with low-to-medium temperature heat demand: Case study of pectin production<br>Morten Petersen, Nasrin Arjomand Kermani, Fabian Bühler, Brian Elmegaard, Niklas Mogensen, Fridolin Holm, Esben Jacobsen .....   | 1431 |
| CFD analysis of a premixed green e-fuel combustion with large eddy simulation: effects of the number of pilot fuel nozzle holes on auto-ignition<br>Arash Nemati, Jiun Cai Ong, Jens Honore Walther .....   | 1443 |
| A novel methodology and MILP formulation to account for Demand Side Flexibility potential in the scheduling of distributed energy systems<br>Andrea Bartolini, Gabriela Hug .....   | 1455 |
| Heat transfer augmentation in solar systems using multiple air jet impingement and porous surfaces<br>Flavia V. Barbosa, Sara G. Gören, Senhorinha F. C. F. Teixeira, José C. F. Teixeira .....   | 1467 |
| Thermochemical energy storage coupled with solar PV for increased renewable electricity generation: interplay between thermophysical behaviour and techno-economic performance<br>Robin Fisher, Valeria Palomba, Andrea Frazzica, Adriano Sciacovelli .....   | 1479 |
| Carbon Capture and Storage – A Thermodynamic Analysis<br>Efstathios Michaelides, Efstathios Michaelides .....   | 1493 |
| Robust integration of direct air capture in power-to-methane systems: techno-economic feasibility study under uncertainty<br>Diederik Coppitters, Lionel Dubois, Diane Thomas, Guy De Weireld, Francesco Contino .....  | 1505 |

|  |      |
|--|------|
| Solid oxide fuel cell – micro gas turbine (SOFC/MGT) hybrid power system: Techno-economic assessment and potential integration on Patmos Island<br>Konstantina Peloriadi, Dimitrios Fakis .....  | 1517 |
| Commissioning and numerical performance assessment of a hybrid heat pump system for an educational building<br>Katarina Simic, Annelies Scheirlinckx, Willem Faes, Michel De Paepe .....   | 1535 |
| Assessment of exhaust gas recirculation (EGR) in gas turbines: a thermodynamic approach<br>Assaad Zoughaib, Hachem Joe .....   | 1547 |
| Integration of High Temperature Heat Pump in a brewery<br>Rasmus Jelsbak Knudsen, Andreas Riis Christiansen, Jonas Kjær Jensen, Torben Schmidt Ommen, Wiebke Brix Markusse, Brian Elmegaard, Magnus Lyck Hansen, Fridolin Müller Holm.....   | 1555 |
| Levelized cost and carbone content of hydrogen produced by electrolysis<br>Assaad Zoughaib, Gaelle Khalil, Yara Daaboul, Maria Nicolas .....   | 1571 |
| An ORC–Unglazed Air collectors integration for hybrid distributed microgeneration<br>Diego Antonio Rodriguez Pastor, Ricardo Chacartegui, José Antonio Becerra Villanueva.....   | 1583 |
| Comparison of optimization-based operation strategies for a hydrogen-based district energy system<br>Tobias Beckhölter, Thomas Schreiber, Dirk Müller .....  | 1597 |
| Advanced Exergy Analysis: A Case Study of an Absorption Heat Transformer Using a Geothermal Heat Source<br>Christian M. Wolf, Rikke Cilius Pedersen, Jonas Kjær Jensen, Wiebke B. Markussen .....  | 1609 |
| Environmental assessment of biological CO <sub>2</sub> capture and utilization (Bio-CCU) applications for the production of platform chemicals from industrial waste gases<br>Despina Magiri-Skouloudi, Sotirios Karellas, Odysseas Kallis .....   | 1623 |
| Ecological, spatial and critical material footprints as limiting indicators of sustainability in a bioregion<br>Javier Felipe, Antonio Valero, Jorge Torrubia, Alicia Valero .....   | 1635 |
| A brief review on decarbonization and energy transition of Portuguese industry: renewable energies incorporation and efficiency measures<br>Ana C. Ferreira, João Silva, Senhorinha Teixeira, José C.F. Teixeira .....   | 1649 |
| Exact Solution for Heat Transfer Problem in the Entrance Region of Annuli Considering Constant Heat Flux on One Wall and Constant Temperature on Other Wall<br>Lütfullah Kuddusi, Yasemen Kuddusi .....  | 1661 |
| The Energy Penalty of Producing Hydrogen-Containing Fuels from Hydrogen<br>Ron Zevenhoven .....  | 1671 |
| An insight on PEM fuel cells ship propulsion systems waste heat recovery<br>Chiara Dall'Armi, Davide Pivetta, Rodolfo Taccani .....  | 1679 |
| A MILP multi-objective optimization approach for assessing the optimal decarbonization strategies of industrial port districts under different energy scenarios<br>Davide Pivetta, Gabriele Volpato, Gianluca Carraro, Chiara Dall'Armi, Luca Da Lio, Andrea Lazzaretto, Rodolfo Taccani ..... | 1691 |
| Cost Reductions in CO <sub>2</sub> Capture Systems through Systems Optimizations and Integration of Heat Pump Systems: A Case Study for a Power-Only Waste-to-Energy Plant<br>Ebbe Hauge Jensen, Christian Riber, Søren Jensen, Brian Elmegaard, Philip Loldrup Fosbøl .....                   | 1703 |

|  |      |
|--|------|
| Short-time Forecasting of Electric Energy Production for Housing Cooperative with a Grid Connected PV System<br>Jorge Solis, Mohammad Roeintan, Magnus Nilsson, Johan Ericson .....  | 1715 |
| How to use Excess Heat in Industry? - Conclusions from international networking within the IETS TCP<br>René Hofmann, Thore Berntsson .....   | 1725 |
| Industrial Heat Pumps: A Key Solution to Electrify Process Heat<br>Edward Rightor, Paul Scheihing, Riyaz Papar, Andrew Hoffmeister .....   | 1733 |
| A cost and environmental impact analysis of Ground Source Heat Pumps in European climates<br>Paul Christodoulides, Lazaros Aresti, Andreas Stassis, Christos Makarounas, Georgios Florides ...   | 1745 |
| Decarbonizing the food and beverage industry by electrification of heat - A systematic review of electrification technologies<br>Nasrin Arjomand Kermani, Fridolin Müller Holm, Brian Elmegaard .....  | 1757 |
| Upward flow boiling of R134a + R245fa equimolar mixture in plate finned heat exchanger<br>Pascal Tobaly, Ines Ben El Mekki, Marine Andrich, Marc Wagner, Florine Giraud, Brice Tremeac ...   | 1769 |
| Prospective study on the cost evolution for low-carbon technologies<br>Xiang Li, Matthieu Souttre, Jonas Schnidrig, Francois Marechal .....  | 1781 |
| Where is the money ? A decomposition of monetary flows behind fossil fuels?<br>Xiang Li, Jonas Schnidrig, Raphaël Briguet, Francois Marechal .....   | 1793 |
| Effects of utility steam temperature on the cost of steam systems in industry<br>Roger Padullés Solé, Martin Phil Andersen, Wiebke Brix Markussen, Brian Elmegaard, Jonas Kjær Jensen, Benjamin Zühlsdorf .....  | 1803 |
| <b>SPEED OF SOUND MEASUREMENTS FOR RENEWABLE ENERGY GASES</b><br>Alejandro Moreau, Yisel Pérez, José Juan Segovia, M. Carmen Martín, Xavier Paredes, Miguel A. Villamañán, David Vega-Maza .....   | 1815 |
| Economic potential of lowering supply temperatures when using industrial heat pumps<br>Martin Pihl Andersen, Roger Padullés Solé, Benjamin Benjamin Zühlsdorf, Brian Elmegaard, Wiebke Brix Markussen, Jonas Kjær Jensen .....   | 1821 |
| Optimization and estimation processes of the exergetic parameters for onion drying in a multi-stage semi-industrial continuous dryer: A Comparative assessment of RSM and ANFIS modeling<br>Iman Golpour, Mohammad Kaveh, J. Daniel Marcos, Ana Maria Blanco Marigorta ..... | 1833 |
| Thermodynamic analysis of two oxy-fuel combustion gas cycles<br>Rafael Pinho Furtado, Antonio Garrido Gallego, Milagros Cecilia Palacios-Bereche, Reynaldo Palacios-Bereche, Silvia Nebra .....  | 1845 |
| Pilot test of a novel heat pump system with integrated latent heat storage for flexible use of grid electricity<br>Michael Barton, Martin Ugi, Christian Schweigler .....  | 1857 |
| Comparative life cycle analysis of battery energy storage technologies for grid applications: Case study in China<br>Xiaoqu Han, Yanxin Li, Hongzhang Chang, Nana Chen, Xiaofan Huang, Xiaoping Tang, Junjie Yan   | 1869 |
| Modeling and analysis of refrigerated truck coupled with waste heat recovery system<br>Yu Yao, Yu Yao, Hua Tian, Xuan Wang, Jintao He, Xuanang Zhang, Gequn Shu .....  | 1881 |
| Day and Time Aggregations for Optimal Design of Energy Supply Systems with Storage Units by a Hierarchical MILP Method<br>Ryohei Yokoyama, Yuji Shinano, Tetsuya Wakui .....   | 1893 |

|   |      |
|---|------|
| Thermodynamic analysis driven by BIG-DATA: A Novel approach to the Extended Exergy Analysis (EEA) of Complex Systems - Methodology<br>Alfonso Biondi, Enrico Sciubba .....  | 1905 |
| A preliminary analysis of the effects of state-funded incentives on the primary resource use efficiency of the residential sector<br>Alfonso Biondi, Enrico Sciubba, Piermaria Caponi, Carlo Cecere .....   | 1915 |
| Building-mounted wind energy potential in Santo Domingo, the Dominican Republic, a contribution for resilient decarbonisation<br>Alexander Vallejo, Idalberto Herrera, Anders Malmquist .....   | 1927 |
| Evaluation of Robustness in Multiple Performance Criteria for Designing Energy Supply Systems Based on a Mixed-Integer Linear Model<br>Ryohei Yokoyama, Yuto Hiramatsu, Yuji Shinano, Tetsuya Wakui .....   | 1939 |
| Optimal Operation of a Heat Supply System in Consideration of Discrete and Nonlinear Characteristics Based on a Mixed-Integer Quadratic Model<br>Ryohei Yokoyama, Takumu Masuyama, Tetsuya Wakui .....  | 1951 |
| Exergy analysis of a sugarcane plant: A simple model and first approach to its exergy efficiency<br>Felipe Godoy Righetto, Matheus Leone Borges, Carlos Eduardo Keutenedjian Mady .....   | 1963 |
| Optimization-based scheduling of heat-integrated multipurpose batch plants using a discrete temperature grid<br>Hagen Seele, Frederik Steufmehl, Dörthe Hagedorn, Andreas Kämper, Christiane Reinert, Niklas Von der Aßen .....   | 1973 |
| Exergy Analysis Applied to Tumor Growth<br>Amanda Rocha da Silva, Silvio De Oliveira Junior .....   | 1985 |
| An Integrated Model for Simulating and Optimising Combined Hybrid Photovoltaic-Thermal (PV-T) and Photovoltaic Systems for Decentralised Rural Hot Water Provision and Electrification<br>Benedict Winchester, Gan Huang, Philip Sandwell, Jenny Nelson, Christos N. Markides ..... | 1997 |
| Economic analysis of Power-to-Gas plant based on optimal operation with PEM electrolysis cell<br>Masashi Tayama, Akira Yoshida, Yoshiharu Amano .....   | 2009 |
| Impact for CO2 Emission Reduction by Ice Storage Tank in District Cooling System Using Variable Renewable Energy<br>Yusuke Shiga, Akira Yoshida, Yoshiharu Amano .....  | 2021 |
| Acceleration trends in the Brazilian light-duty vehicle fleet - 1990-2020<br>Rafael Mosquim, Carlos Eduardo Mady, Fernando Fusco .....  | 2033 |
| Site specific optimised tidal current turbine blade design using improved and validated coupled Non-dominated Sorting Genetic Algorithm – Blade Element Momentum Theory<br>Eng Jet Yeo, David M. Kennedy, Fergal O'Rourke .....   | 2045 |
| An investigation of array configuration of tidal current turbines in RANS CFD using a hybrid BEM-AD method.<br>Chee Meng Pang .....   | 2057 |
| An Investigation of the Kinetics of Biomass Gasification in the Literature Using a Pre-Validated Model<br>Hamid Rashidi, Aidan Duffy, Wayne Doherty .....   | 2069 |
| Analysis of inter-community coordination strategies and their economic and environmental impact on energy communities<br>Josh Eichman, Cristina Corchero García .....   | 2081 |

|  |      |
|--|------|
| Thermodynamic analysis of ultra-efficient ammonia-fed SOFC system<br>Kalimuthu Selvam, Yosuke Komatsu, Anna Sciazko, Shozo Kaneko, Naoki Shikazono .....   | 2093 |
| Thermo-Economic Analysis and Optimization through Genetic Algorithm of a Dual-Loop<br>Regenerative Supercritical CO <sub>2</sub> Brayton Cycle/ORC System Coupled to the Main Diesel Engine<br>of a Bulk Carrier<br>Athanasios Vallis, Efthimios Pariotis, Christos Spandonidis, Elias Yfantis, Kiriakos Alexiou,<br>Dimitrios Rakopoulos..... | 2105 |
| Exergy-based analysis of heat pump using surplus heat from data centre for medium sized<br>district heating and CO <sub>2</sub> /propane-based mixtures<br>Volodymyr Voloshchuk, Paride Gullo, Eugene Nikiforovich, Volodymyr Sereda .....   | 2117 |
| Optimal Operation of Vapor-compression Type Air-conditioning System Based on Hierarchical<br>Utilization of Model Predictive Control and Multiple Feedback Controls<br>Tetsuya Wakui, Takuji Matsumoto, Ryohei Yokoyama .....  | 2129 |
| Analysis of the CHP cycle in a sugar industry with a milling capacity of 4,600 ton of cane per day<br>to maximize the electricity generation using a hybrid scheme Biomass-Solar as energy source.<br>Idalberto Herrera, Ariam Rojas, Anders Malmquist, Alexander Vallejo .....  | 2141 |
| A Clean Wood Heating System<br>Yousef Haseli .....   | 2149 |
| Theory of Allam Cycle<br>Yousef Haseli .....   | 2155 |
