2024 IEEE/ACM 46th International Conference on Software Engineering (ICSE) **ICSE 2024**

Table of Contents

Message from the ICSE 2024 General Co-Chairs	xxxvii
Message from the ICSE 2024 Program Co-Chairs	xli
Research Track Program Committee	xlvi
Artifact Evaluation Committee	liii
Research Track Area Chairs	lvi
Additional Reviewers	lvii

Keynotes

Challenges and Opportunities in Model Checking Large Scale Distributed Systems	1
<i>Rupak Majumdar (Max Planck Institute for Software Systems (MPI-SWS), Germany; Amazon Web Services, USA)</i>	
Software Engineering Research in a World with Generative Artificial Intelligence	3
<i>Martin Rinard (Massachusetts Institute of Technology)</i>	
Trustworthy by Design	8

AI&SE Autocoding for Program Repair and related concepts

Domain Knowledge Matters: Improving Prompts with Fix Templates for Repairing Python Type Errors	12
<i>Yun Peng (The Chinese University of Hong Kong), Shuzheng Gao (The Chinese University of Hong Kong), Cuiyun Gao (Harbin Institute of Technology, Shenzhen), Yintong Huo (The Chinese University of Hong Kong), and Michael Lyu (The Chinese University of Hong Kong)</i>	
Practical Program Repair via Preference-based Ensemble Strategy	25
<i>Wenkang Zhong (Nanjing University, China), Chuanyi Li (Nanjing University, China), Kui Liu (Huawei Software Engineering Application Technology Lab), Tongtong Xu (Huawei Software Engineering Application Technology Lab), Jidong Ge (Nanjing University, China), Tegawendé F. Bissyandé (University of Luxembourg), Bin Luo (Nanjing University, China), and Vincent Ng (University of Texas at Dallas, American)</i>	
Learning and Repair of Deep Reinforcement Learning Policies from Fuzz-Testing Data	38
<i>Martin Tappler (Graz University of Technology, Austria), Andrea Pferscher (Graz University of Technology, Austria), Bernhard K. Aichernig (Graz University of Technology, Austria), and Bettina Könighofer (Graz University of Technology, Austria)</i>	

BinAug: Enhancing Binary Similarity Analysis with Low-Cost Input Repairing	51
<i>Wai Kin Wong (The Hong Kong University of Science and Technology, Hong Kong SAR), Huaijin Wang (The Hong Kong University of Science and Technology, Hong Kong SAR), Zongjie Li (The Hong Kong University of Science and Technology, Hong Kong SAR), and Shuai Wang (The Hong Kong University of Science and Technology, Hong Kong SAR)</i>	
VeRe: Verification Guided Synthesis for Repairing Deep Neural Networks	64
<i>Jianan Ma (Hangzhou Dianzi University, China; Zhejiang University, China), Pengfei Yang (Institute of Software, CAS, China), Jingyi Wang (Zhejiang University, China; ZJU-Hangzhou Global Scientific and Technological Innovation Center, China), Youcheng Sun (University of Manchester, United Kingdom), Cheng-Chao Huang (Nanjing Institute of Software Technology, ISCAS, China), and Zhen Wang (Hangzhou Dianzi University, China)</i>	
RUNNER: Responsible UNfair NEuron Repair for Enhancing Deep Neural Network Fairness	77
<i>Li Tianlin (NTU), Cao Yue (NTU), Zhang Jian (NTU), Zhao Shiqian (NTU), Huang Yihao (NTU), Liu Aishan (Beihang University), Guo Qing (ASTAR), and Liu Yang (NTU)</i>	
ITER: Iterative Neural Repair for Multi-Location Patches	90
<i>He Ye (Carnegie Mellon University) and Martin Monperrus (KTH Royal Institute of Technology)</i>	

Applications of LLM and other AI technologies

EGFE: End-to-End Grouping of Fragmented Elements in UI Designs with Multimodal Learning	103
<i>Liuqing Chen (Zhejiang University, China), Yunnong Chen (Zhejiang University, China), Shuhong Xiao (Zhejiang University, China), Yaxuan Song (Zhejiang University, China), Lingyun Sun (Zhejiang University, China), Yankun Zhen (Alibaba Group, China), Tingting Zhou (Alibaba Group), and Yanfang Chang (Alibaba Group)</i>	
A Comprehensive Study of Learning-based Android Malware Detectors under Challenging Environments	115
<i>Cuiying Gao (Huazhong University of Science and Technology, China), Gaozhun Huang (Huazhong University of Science and Technology, China), Heng Li (Huazhong University of Science and Technology, China), Bang Wu (Huazhong University of Science and Technology, China), Yueming Wu (Nanyang Technological University, Singapore), and Wei Yuan (Huazhong University of Science and Technology, China)</i>	
Toward Automatically Completing GitHub Workflows	128
<i>Antonio Mastropaolo (Università della Svizzera Italiana, Switzerland), Fiorella Zampetti (University of Sannio, Italy), Gabriele Bavota (Università della Svizzera Italiana, Switzerland), and Massimiliano Di Penta (University of Sannio, Italy)</i>	

UniLog: Automatic Logging via LLM and In-Context Learning	140
<i>Junjielong Xu (The Chinese University of Hong Kong, Shenzhen), Ziang Cui (Southeast University), Yuan Zhao (Peking University), Xu Zhang (Microsoft), Shilin He (Microsoft), Pinjia He (The Chinese University of Hong Kong, Shenzhen), Liqun Li (Microsoft), Yu Kang (Microsoft), Qingwei Lin (Microsoft), Yingnong Dang (Microsoft), Saravan Rajmohan (Microsoft), and Dongmei Zhang (Microsoft)</i>	
Predicting Performance and Accuracy of Mixed-Precision Programs for Precision Tuning	152
<i>Yutong Wang (University of California, Davis, United States of America) and Cindy Rubio-González (University of California, Davis, United States of America)</i>	
Large Language Models for Test-Free Fault Localization	165
<i>Aidan Z.H. Yang (Carnegie Mellon University), Ruben Martins (Carnegie Mellon University), Claire Le Goues (Carnegie Mellon University), and Vincent J. Hellendoorn (Carnegie Mellon University)</i>	
Dataflow Analysis-Inspired Deep Learning for Efficient Vulnerability Detection	177
<i>Benjamin Steenhoek (Iowa State University, United States), Hongyang Gao (Iowa State University, United States), and Wei Le (Iowa State University, United States)</i>	

Analysis and Debugging

CrashTranslator: Automatically Reproducing Mobile Application Crashes Directly from Stack Trace	190
<i>Yuchao Huang (Institute of Software, Chinese Academy of Sciences), Junjie Wang (Institute of Software, Chinese Academy of Sciences), Zhe Liu (Institute of Software, Chinese Academy of Sciences), Yawen Wang (Institute of Software, Chinese Academy of Sciences), Song Wang (York University), Chunyang Chen (Monash University), Yuanzhe Hu (Institute of Software, Chinese Academy of Sciences), and Qing Wang (Institute of Software, Chinese Academy of Sciences)</i>	
Reorder Pointer Flow in Sound Concurrency Bug Prediction	203
<i>Yuqi Guo (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, and University of Chinese Academy of Sciences), Shihao Zhu (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, and University of Chinese Academy of Sciences), Yan Cai (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, and University of Chinese Academy of Sciences), Liang He (TCA, Institute of Software, Chinese Academy of Sciences, and University of Chinese Academy of Sciences), and Jian Zhang (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, and University of Chinese Academy of Sciences)</i>	
Object Graph Programming	216
<i>Aditya Thimmaiah (The University of Texas at Austin), Leonidas Lampropoulos (University of Maryland), Christopher J. Rossbach (The University of Texas at Austin), and Milos Gligoric (The University of Texas at Austin)</i>	

Semantic Analysis of Macro Usage for Portability	229
<i>Brent Pappas (University of Central Florida, United States) and Paul Gazzillo (University of Central Florida, United States)</i>	
NuzzleBug: Debugging Block-Based Programs in Scratch	241
<i>Adina Deiner (University of Passau) and Gordon Fraser (University of Passau)</i>	

Analytics

LogShrink: Effective Log Compression by Leveraging Commonality and Variability of Log Data....	254
<i>Xiaoyun Li (Sun Yat-sen University, China), Hongyu Zhang (Chongqing University, China), Van-Hoang Le (The University of Newcastle, Australia), and Pengfei Chen (Sun Yat-sen University, China)</i>	
Demystifying Compiler Unstable Feature Usage and Impacts in the Rust Ecosystem	266
<i>Chenghao Li (Zhejiang University, China), Yifei Wu (Zhejiang University, China), Wenbo Shen (Zhejiang University, China), Zichen Zhao (Zhejiang University, China), Rui Chang (Zhejiang University, China), Chengwei Liu (Nanyang Technological University, Singapore), Yang Liu (Nanyang Technological University, Singapore), and Kui Ren (Zhejiang University, China)</i>	
Resource Usage and Optimization Opportunities in Workflows of GitHub Actions	279
<i>Islem Bouzenia (University of Stuttgart) and Michael Pradel (University of Stuttgart)</i>	
Revealing Hidden Threats: An Empirical Study of Library Misuse in Smart Contracts	291
<i>Mingyuan Huang (Sun Yat-sen University, China), Jiachi Chen (Sun Yat-sen University), Zigui Jiang (Sun Yat-sen University), and Zibin Zheng (Sun Yat-sen University)</i>	
Fine-SE: Integrating Semantic Features and Expert Features for Software Effort Estimation	303
<i>Yue Li (Nanjing University, China), Zhong Ren (Nanjing University, China), Zhiqi Wang (Nanjing University, China), Lanxin Yang (Nanjing University, China), Liming Dong (Nanjing University, China), Chenxing Zhong (Nanjing University, China), and He Zhang (Nanjing University, China)</i>	

Dependability

Kind Controllers and Fast Heuristics for Non-Well-Separated GR(1) Specifications	315
<i>Ariel Gorenstein (Tel Aviv University, Israel), Shahar Maoz (Tel Aviv University, Israel), and Jan Oliver Ringert (Bauhaus University Weimar, Germany)</i>	
It's Not a Feature, It's a Bug: Fault-Tolerant Model Mining from Noisy Data	327
<i>Felix Wallner (Graz University of Technology, Austria), Bernhard K. Aichernig (Graz University of Technology, Austria), and Christian Burghard (AVL List GmbH, Austria)</i>	

Enabling Runtime Verification of Causal Discovery Algorithms with Automated Conditional Independence Reasoning	340
<i>Pingchuan Ma (The Hong Kong University of Science and Technology, Hong Kong SAR), Zhenlan Ji (The Hong Kong University of Science and Technology, Hong Kong SAR), Peisen Yao (Zhejiang University, China), Shuai Wang (The Hong Kong University of Science and Technology, Hong Kong SAR), and Kui Ren (Zhejiang University, China)</i>	

DNN and Language Models for Code

Modularizing while Training: A New Paradigm for Modularizing DNN Models	353
<i>Binhang Qi (Beihang University, China), Hailong Sun (Beihang University, China), Hongyu Zhang (Chongqing University, China), Ruobing Zhao (Beihang University, China), and Xiang Gao (Beihang University, China)</i>	
KnowLog: Knowledge Enhanced Pre-trained Language Model for Log Understanding	365
<i>Lipeng Ma (Fudan University, China), Weidong Yang (Fudan University, China), Bo Xu (Donghua University, China), Sihang Jiang (Fudan University, China), Ben Fei (Fudan University, China), Jiaqing Liang (Fudan University, China), Mingjie Zhou (Fudan University), and Yanghua Xiao (Fudan University, China)</i>	
FAIR: Flow Type-Aware Pre-Training of Compiler Intermediate Representations	378
<i>Changan Niu (State Key Laboratory for Novel Software Technology, Nanjing University), Chuanyi Li (State Key Laboratory for Novel Software Technology, Nanjing University), Vincent Ng (Human Language Technology Research Institute, University of Texas at Dallas), David Lo (School of Computing and Information Systems, Singapore Management University), and Bin Luo (State Key Laboratory for Novel Software Technology, Nanjing University)</i>	
Exploring the Potential of ChatGPT in Automated Code Refinement: An Empirical Study	390
<i>Qi Guo (Tianjin University), Junming Cao (Fudan University), Xiaofei Xie (Singapore Management University), Shangqing Liu (Nanyang Technological University), Xiaohong Li (Tianjin University), Bihuan Chen (Fudan University), and Xin Peng (Fudan University)</i>	
Deep Learning or Classical Machine Learning? An Empirical Study on Log-Based Anomaly Detection	403
<i>Boxi Yu (The Chinese University of Hong Kong, Shenzhen), Jiayi Yao (The Chinese University of Hong Kong, Shenzhen), Qiurai Fu (Huawei Cloud Computing Technologies CO., LTD), Zhiqing Zhong (The Chinese University of Hong Kong, Shenzhen), Haotian Xie (The Chinese University of Hong Kong, Shenzhen), Yaoliang Wu (Huawei Cloud Computing Technologies CO., LTD), Yuchi Ma (Huawei Cloud Computing Technologies CO., LTD), and Pinjia He (The Chinese University of Hong Kong, Shenzhen)</i>	
TRACED: Execution-aware Pre-training for Source Code	416
<i>Yangruibo Ding (Columbia University), Benjamin Steenhoek (Iowa State University), Kexin Pei (Columbia University), Gail Kaiser (Columbia University), Wei Le (Iowa State University), and Baishakhi Ray (Columbia University)</i>	

CoderEval: A Benchmark of Pragmatic Code Generation with Generative Pre-trained Models	428
<i>Hao Yu (Peking University), Bo Shen (Huawei Cloud Computing Technologies Co., Ltd.), Dezhi Ran (Peking University), Jiabin Zhang (Huawei Cloud Computing Technologies Co., Ltd.), Qi Zhang (Huawei Cloud Computing Technologies Co., Ltd.), Yuchi Ma (Huawei Cloud Computing Technologies Co., Ltd.), Guangtai Liang (Huawei Cloud Computing Technologies Co., Ltd.), Ying Li (Peking University), Qianxiang Wang (Huawei Cloud Computing Technologies Co., Ltd.), and Tao Xie (Peking University)</i>	
Inferring Data Preconditions from Deep Learning Models for Trustworthy Prediction in Deployment	440
<i>Shibbir Ahmed (Iowa State University, USA), Hongyang Gao (Iowa State University, USA), and Hriday Rajan (Iowa State University, USA)</i>	

Evolution

Large Language Models are Few-Shot Summarizers: Multi-Intent Comment Generation via In-Context Learning	453
<i>Mingyang Geng (National University of Defense Technology), Shangwen Wang (National University of Defense Technology), Dezun Dong (National University of Defense Technology), Haotian Wang (National University of Defense Technology), Ge Li (Peking University), Zhi Jin (Peking University), Xiaoguang Mao (National University of Defense Technology), and Xiangke Liao (National University of Defense Technology)</i>	
On Using GUI Interaction Data to Improve Text Retrieval-based Bug Localization	466
<i>Junayed Mahmud (University of Central Florida), Nadeeshan De Silva (William & Mary), Safwat Ali Khan (George Mason University), Seyed Hooman Mostafavi (George Mason University), S M Hasan Mansur (George Mason University), Oscar Chaparro (William & Mary), Andrian Marcus (George Mason University), and Kevin Moran (University of Central Florida)</i>	
DEMISTIFY: Identifying On-device Machine Learning Models Stealing and Reuse Vulnerabilities in Mobile Apps	479
<i>Pengcheng Ren (Shandong University, China), Chaoshun Zuo (Ohio State University, United States), Xiaofeng Liu (Shandong University, China), Wenrui Diao (Shandong University, China), Qingchuan Zhao (City University of Hong Kong, China), and Shanqing Guo (Shandong University, China)</i>	
How do Developers Talk about GitHub Actions? Evidence from Online Software Development Community	492
<i>Yang Zhang (National University of Defense Technology Changsha, China), Yiwen Wu (National University of Defense Technology Changsha, China), Tingting Chen (National University of Defense Technology Changsha, China), Tao Wang (National University of Defense Technology Changsha, China), Hui Liu (National University of Defense Technology Changsha, China), and Huaimin Wang (National University of Defense Technology Changsha, China)</i>	

Block-based Programming for Two-Armed Robots: A Comparative Study	505
<i>Felipe Fronchetti (Virginia Commonwealth University), Nico Ritschel (University of British Columbia), Logan Schorr (Virginia Commonwealth University), Chandler Barfield (Virginia Commonwealth University), Gabriella Chang (Virginia Commonwealth University), Rodrigo Spinola (Virginia Commonwealth University), Reid Holmes (University of British Columbia), and David C. Shepherd (Louisiana State University)</i>	
BOMs Away! Inside the Minds of Stakeholders: A Comprehensive Study of Bills of Materials for Software Systems	517
<i>Trevor Stalnaker (William & Mary, USA), Nathan Wintersgill (William & Mary, USA), Oscar Chaparro (William & Mary, USA), Massimiliano Di Penta (University of Sannio, Italy), Daniel German (University of Victoria, Canada), and Denys Poshyvanyk (William & Mary, USA)</i>	

Fuzzing and other test generation methods

EDEFuzz: A Web API Fuzzer for Excessive Data Exposures	530
<i>Lianglu Pan (The University of Melbourne, Australia), Shaanan Cohney (The University of Melbourne, Australia), Toby Murray (The University of Melbourne, Australia), and Van-Thuan Pham (The University of Melbourne, Australia)</i>	
Detecting Logic Bugs in Graph Database Management Systems via Injective and Surjective Graph Query Transformation	542
<i>Yuancheng Jiang (National University of Singapore), Jiahao Liu (National University of Singapore), Jinsheng Ba (National University of Singapore), Roland Hock Chuan Yap (National University of Singapore), Zhenkai Liang (National University of Singapore), and Manuel Rigger (National University of Singapore)</i>	
Do Automatic Test Generation Tools Generate Flaky Tests?	554
<i>Martin Gruber (BMW Group, Germany), Muhammad Firhard Roslan (University of Sheffield, United Kingdom), Owain Parry (University of Sheffield, United Kingdom), Fabian Scharnböck (University of Passau, Germany), Phil McMinn (University of Sheffield, United Kingdom), and Gordon Fraser (University of Passau, Germany)</i>	
ECFuzz: Effective Configuration Fuzzing for Large-Scale Systems	566
<i>Junqiang Li (University of Electronic Science and Technology of China), Senyi Li (University of Electronic Science and Technology of China), Keyao Li (University of Electronic Science and Technology of China), Falin Luo (University of Electronic Science and Technology of China), Hongfang Yu (University of Electronic Science and Technology of China), Shanshan Li (National University of Defense Technology), and Xiang Li (National Key Laboratory of Science and Technology on Information System Security)</i>	
Improving Testing Behavior by Gamifying IntelliJ	578
<i>Philipp Straubinger (University of Passau, Germany) and Gordon Fraser (University of Passau, Germany)</i>	

SCTrans: Constructing a Large Public Scenario Dataset for Simulation Testing of Autonomous Driving Systems	591
<i>Jiarun Dai (Fudan University, China), Bufan Gao (Fudan University, China), Mingyuan Luo (Fudan University, China), Zongan Huang (Fudan University, China), Zhongrui Li (Fudan University, China), Yuan Zhang (Fudan University, China), and Min Yang (Fudan University, China)</i>	

Human and Social Aspects, and Requirements

Co-Creation in Fully Remote Software Teams	604
<i>Victoria Jackson (University of California, Irvine), Rafael Prikladnicki (Pontificia Universidade do Rio Grande do Sul), and Andre van der Hoek (University of California, Irvine)</i>	
A Large-Scale Survey on the Usability of AI Programming Assistants: Successes and Challenges	616
<i>Jenny T. Liang (Carnegie Mellon University), Chenyang Yang (Carnegie Mellon University), and Brad A. Myers (Carnegie Mellon University)</i>	
How to Support ML End-User Programmers through a Conversational Agent	629
<i>Emily Arteaga Garcia (Oregon State University, USA), João Felipe Pimentel (Northern Arizona University, USA), Zixuan Feng (Oregon State University, USA), Marco Gerosa (Northern Arizona University, USA), Igor Steinmacher (Northern Arizona University, USA), and Anita Sarma (Oregon State University, USA)</i>	
Unveiling the Life Cycle of User Feedback: Best Practices from Software Practitioners	641
<i>Ze Shi Li (University of Victoria), Nowshin Nawar Arony (University of Victoria), Kezia Devathasan (University of Victoria), Manish Sihag (University of Victoria), Neil Ernst (University of Victoria), and Daniela Damian (University of Victoria)</i>	
Novelty Begets Popularity, But Curbs Participation - A Macroscopic View of the Python Open-Source Ecosystem	654
<i>Hongbo Fang (Carnegie Mellon University), Bogdan Vasilescu (Carnegie Mellon University), and James Herbsleb (Carnegie Mellon University)</i>	
Characterizing Software Maintenance Meetings: Information Shared, Discussion Outcomes, and Information Captured	665
<i>Adriana Meza Soria (University of California, Irvine), Taylor Lopez (University of California, Irvine), Negin Mashhadi (University of California, Irvine), Elizabeth Seero (Colorado College), Emily Evans (Colorado College), André van der Hoek (University of California, Irvine), and Janet Burge (Colorado College)</i>	
Predicting open source contributor turnover from value-related discussions: An analysis of GitHub issues	678
<i>Jack Jamieson (NTT Communication Science Labs), Naomi Yamashita (NTT Communication Science Labs), and Eureka Foong (Tokyo College, the University of Tokyo)</i>	

On the Helpfulness of Answering Developer Questions on Discord with Similar Conversations and Posts from the Past	691
<i>Alexander Lill (University of Zurich, Switzerland), André N. Meyer (University of Zurich, Switzerland), and Thomas Fritz (University of Zurich, Switzerland)</i>	

Security

Marco: A Stochastic Asynchronous Concolic Explorer	704
<i>Jie Hu (University of California Riverside), Yue Duan (Singapore Management University), and Heng Yin (University of California Riverside)</i>	
Smart Contract and DeFi Security Tools: Do They Meet the Needs of Practitioners?	716
<i>Stefanos Chaliasos (Imperial College London, United Kingdom), Marcos Antonios Charalambous (Imperial College London, United Kingdom), Liyi Zhou (Imperial College London, United Kingdom), Rafaila Galanopoulou (National and Kapodistrian University of Athens, Greece), Arthur Gervais (University College London, United Kingdom), Dimitris Mitropoulos (National and Kapodistrian University of Athens, Greece), and Benjamin Livshits (Imperial College London, United Kingdom)</i>	
DocFlow: Extracting Taint Specifications from Software Documentation	729
<i>Marcos Tileria (Royal Holloway University of London, United Kingdom), Jorge Blasco (Universidad Politécnica de Madrid, Spain), and Santanu Kumar Dash (Royal Holloway University of London, United Kingdom)</i>	
Toward Improved Deep Learning-based Vulnerability Detection	741
<i>Adriana Sejfia (University of Southern California), Satyaki Das (University of Southern California), Saad Shafiq (Johannes Kepler University), and Nenad Medvidović (University of Southern California)</i>	
Attention! Your Copied Data is Under Monitoring: A Systematic Study of Clipboard Usage in Android Apps	753
<i>Yongliang Chen (City University of Hong Kong), Ruoqin Tang (City University of Hong Kong), Chaoshun Zuo (The Ohio State University), Xiaokuan Zhang (George Mason University), Lei Xue (Sun Yat-Sen University), Xiapu Luo (The Hong Kong Polytechnic University), and Qingchuan Zhao (City University of Hong Kong)</i>	
PonziGuard: Detecting Ponzi Schemes on Ethereum with Contract Runtime Behavior Graph (CRBG)	766
<i>Ruichao Liang (Wuhan University, China), Jing Chen (Wuhan University, China), Kun He (Wuhan University, China), Yueming Wu (Nanyang Technological University, Singapore), Gelei Deng (Nanyang Technological University, Singapore), Ruiying Du (Wuhan University, China), and Cong Wu (Nanyang Technological University, Singapore)</i>	
FuzzSlice: Pruning False Positives in Static Analysis Warnings through Function-Level Fuzzing	778
<i>Aniruddhan Murali (University of Waterloo), Noble Saji Mathews (University of Waterloo), Mahmoud Alfadel (University of Waterloo), Meiyappan Nagappan (University of Waterloo), and Meng Xu (University of Waterloo)</i>	

LibvDiff: Library Version Difference Guided OSS Version Identification in Binaries	791
<i>Chaopeng Dong (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences, China), Siyuan Li (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences, China), Shouguo Yang (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences, China), Yang Xiao (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences, China), Yongpan Wang (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences, China), Hong Li (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences, China), Zhi Li (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences, China), and Limin Sun (Institute of Information Engineering, Chinese Academy of Sciences; School of Cyber Security, University of Chinese Academy of Sciences, China)</i>	

Testing with and for AI

Prompting is All You Need: Automated Android Bug Replay with Large Language Models	803
<i>Sidong Feng (Monash University) and Chunyang Chen (Monash University)</i>	
Towards Reliable AI: Adequacy Metrics for Ensuring the Quality of System-level Testing of Autonomous Vehicles	816
<i>Neelofar Neelofar (Monash University, Australia) and Aldeida Aleti (Monash University, Australia)</i>	
Learning-based Widget Matching for Migrating GUI Test Cases	828
<i>Yakun Zhang (Peking University), Wenjie Zhang (Peking University), Dezhi Ran (Peking University), Qihao Zhu (Peking University), Chengfeng Dou (Peking University), Dan Hao (Peking University), Tao Xie (Peking University), and Lu Zhang (Peking University)</i>	
Large Language Models are Edge-Case Generators: Crafting Unusual Programs for Fuzzing Deep Learning Libraries	841
<i>Yinlin Deng (University of Illinois Urbana-Champaign, USA), Chunqiu Steven Xia (University of Illinois Urbana-Champaign, USA), Chenyuan Yang (University of Illinois Urbana-Champaign, USA), Shizhuo Dylan Zhang (University of Illinois Urbana-Champaign, USA), Shujing Yang (University of Illinois Urbana-Champaign, USA), and Lingming Zhang (University of Illinois Urbana-Champaign, USA)</i>	
Deeply Reinforcing Android GUI Testing with Deep Reinforcement Learning	854
<i>Yuanhong Lan (Nanjing University, China), Yifei Lu (Nanjing University, China), Zhong Li (Nanjing University, China), Minxue Pan (Nanjing University, China), Wenhua Yang (Nanjing University of Aeronautics and Astronautics, China), Tian Zhang (Nanjing University, China), and Xuandong Li (Nanjing University, China)</i>	

AI&SE Code Models and Generated Code

Unveiling Memorization in Code Models	867
<i>Zhou Yang (School of Computing and Information Systems, Singapore Management University, Singapore), Zhipeng Zhao (Department of Computer Science, University of Copenhagen, Copenhagen, Denmark), Chenyu Wang (School of Computing and Information Systems, Singapore Management University, Singapore), Jieke Shi (School of Computing and Information Systems, Singapore Management University, Singapore), Dongsun Kim (School of Computer Science and Engineering, Kyungpook National University, Daegu, South Korea), Donggyun Han (Department of Computer Science, Royal Holloway, University of London, London, UK), and David Lo (School of Computing and Information Systems, Singapore Management University, Singapore)</i>	
Code Search Is All You Need? Improving Code Suggestions With Code Search	880
<i>Junkai Chen (Zhejiang University, China), Xing Hu (Zhejiang University, China), Zhenhao Li (Concordia University, Canada), Cuiyun Gao (Harbin Institute of Technology, China), Xin Xia (Zhejiang University, China), and David Lo (Singapore Management University, Singapore)</i>	
On Extracting Specialized Code Abilities from Large Language Models: A Feasibility Study	893
<i>Zongjie Li (The Hong Kong University of Science and Technology), Chaozheng Wang (The Chinese University of Hong Kong), Pingchuan Ma (The Hong Kong University of Science and Technology), Chaowei Liu (National University of Singapore), Shuai Wang (The Hong Kong University of Science and Technology), Daoyuan Wu (Nanyang Technological University), Cuiyun Gao (Harbin Institute of Technology), and Yang Liu (Nanyang Technological University)</i>	
When Neural Code Completion Models Size up the Situation: Attaining Cheaper and Faster Completion through Dynamic Model Inference	906
<i>Zhensu Sun (Beihang University, China), Xiaoning Du (Monash University, Australia), Fu Song (Institute of Software, Chinese Academy of Sciences, China), Shangwen Wang (National University of Defense Technology, China), and Li Li (Beihang University, China)</i>	
GrammarT5: Grammar-Integrated Pretrained Encoder-Decoder Neural Model for Code	918
<i>Qihao Zhu (Peking University), Qingyuan Liang (Peking University), Zeyu Sun (Chinese Academy of Sciences), Yingfei Xiong (Peking University), Lu Zhang (Peking University), and Shengyu Cheng (ZTE Corporation)</i>	
On Calibration of Pre-trained Code Models	931
<i>Zhenhao Zhou (Fudan University), Chaofeng Sha (Fudan University), and Xin Peng (Fudan University)</i>	
Traces of Memorisation in Large Language Models for Code	944
<i>Ali Al-Kaswan (Delft University of Technology), Maliheh Izadi (Delft University of Technology), and Arie Van Deursen (Delft University of Technology)</i>	

Language Models for Code Completion: A Practical Evaluation	956
<i>Maliheh Izadi (Delft University of Technology), Jonathan Katzy (Delft University of Technology), Tim van Dam (Delft University of Technology), Marc Otten (Delft University of Technology), Razvan Mihai Popescu (Delft University of Technology), and Arie van Deursen (Delft University of Technology)</i>	
Learning in the Wild: Towards Leveraging Unlabeled Data for Effectively Tuning Pre-trained Code Models	969
<i>Shuzheng Gao (The Chinese University of Hong Kong), Wenxin Mao (Harbin Institute of Technology), Cuiyun Gao (Harbin Institute of Technology), Li Li (Beihang university), Xing Hu (Zhejiang University), Xin Xia (Zhejiang University), and Michael Lyu (The Chinese University of Hong Kong)</i>	
Evaluating Large Language Models in Class-Level Code Generation	982
<i>Xueying Du (Fudan University), Mingwei Liu (Fudan University), Kaixin Wang (Fudan University), Hanlin Wang (Fudan University), Junwei Liu (Fudan University), Yixuan Chen (Fudan University), Jiayi Feng (Fudan University), Chaofeng Sha (Fudan University), Xin Peng (Fudan University), and Yiling Lou (Fudan University)</i>	
Lost in Translation: A Study of Bugs Introduced by Large Language Models while Translating Code	995
<i>Rangeet Pan (IBM Research), Ali Reza Ibrahimzada (University of Illinois Urbana-Champaign), Rahul Krishna (IBM Research), Divya Sankar (IBM Research), Lambert Pouguem Wassi (IBM Research), Michele Merler (IBM Research), Boris Sobolev (IBM Research), Raju Pavuluri (IBM Research), Saurabh Sinha (IBM Research), and Reyhaneh Jabbarvand (University of Illinois, Urbana-Champaign)</i>	

AI&SE Program Repair

Out of Context: How important is Local Context in Neural Program Repair?	1008
<i>Julian Aron Prenner (Free University of Bozen-Bolzano, Italy) and Romain Robbes (CNRS, Univ. Bordeaux, France)</i>	
Automated Program Repair, What Is It Good For? Not Absolutely Nothing!	1021
<i>Hadeel Eladawy (University of Massachusetts, USA), Claire Le Goues (Carnegie Mellon University, USA), and Yuriy Brun (University of Massachusetts, USA)</i>	
Rust-lancet: Automated Ownership-Rule-Violation Fixing with Behavior Preservation	1034
<i>Wenzhang Yang (University of Science and Technology of China, China), Linhai Song (Pennsylvania State University, USA), and Yinxing Xue (University of Science and Technology of China, China)</i>	
Exploring Experiences with Automated Program Repair in Practice	1047
<i>Fairuz Nawer Meem (George Mason University, USA), Justin Smith (Lafayette College, USA), and Brittany Johnson (George Mason University, USA)</i>	
PyTy: Repairing Static Type Errors in Python	1058
<i>Yiu Wai Chow (University of Stuttgart), Luca Di Grazia (University of Stuttgart), and Michael Pradel (University of Stuttgart)</i>	

Out of Sight, Out of Mind: Better Automatic Vulnerability Repair by Broadening Input Ranges and Sources	1071
<i>Xin Zhou (Singapore Management University, Singapore), Kisub Kim (Singapore Management University, Singapore), Bowen Xu (North Carolina State University, USA), DongGyun Han (Royal Holloway University of London, United Kingdom), and David Lo (Singapore Management University, Singapore)</i>	
Strengthening Supply Chain Security with Fine-grained Safe Patch Identification	1084
<i>Changhua Luo (The Chinese University of Hong Kong), Wei Meng (The Chinese University of Hong Kong), and Shuai Wang (HKUST)</i>	
Comprehensive Semantic Repair of Obsolete GUI Test Scripts for Mobile Applications	1096
<i>Shaoheng Cao (Nanjing University, China), Minxue Pan (Nanjing University, China), Yu Pei (The Hong Kong Polytechnic University, China), Wenhua Yang (Nanjing University of Aeronautics and Astronautics, China), Tian Zhang (Nanjing University, China), Linzhang Wang (Nanjing University, China), and Xuandong Li (Nanjing University, Nanjing)</i>	
Constraint Based Program Repair for Persistent Memory Bugs	1109
<i>Zunchen Huang (University of Southern California) and Chao Wang (University of Southern California)</i>	

AI&SE LLM and NN Applications and Other Aspects

Xpert: Empowering Incident Management with Query Recommendations via Large Language Models	1121
<i>Yuxuan Jiang (University of Michigan Ann-Arbor), Chaoyun Zhang (Microsoft), Shilin He (Microsoft), Zhihao Yang (Peking University), Minghua Ma (Microsoft), Si Qin (Microsoft), Yu Kang (Microsoft), Yingnong Dang (Microsoft), Saravan Rajmohan (Microsoft 365), Qingwei Lin (Microsoft), and Dongmei Zhang (Microsoft)</i>	
Tensor-Aware Energy Accounting	1134
<i>Timur Babakol (Binghamton University) and David Liu (Binghamton University)</i>	
Programming Assistant for Exception Handling with CodeBERT	1146
<i>Yuchen Cai (The University of Texas at Dallas, USA), Aashish Yadavally (The University of Texas at Dallas, USA), Abhishek Mishra (The University of Texas at Dallas, USA), Genesis Montejo (The University of Texas at Dallas, USA), and Tien Nguyen (The University of Texas at Dallas, USA)</i>	
An Empirical Study on Noisy Label Learning for Program Understanding	1159
<i>Wenhan Wang (Nanyang Technological University, Singapore), Yanzhou Li (Nanyang Technological University, Singapore), Anran Li (Nanyang Technological University, Singapore), Jian Zhang (Nanyang Technological University, Singapore), Wei Ma (Nanyang Technological University, Singapore), and Yang Liu (Nanyang Technological University, Singapore)</i>	

An Empirical Study on Low GPU Utilization of Deep Learning Jobs	1171
<i>Yanjie Gao (Microsoft Research), Yichen He (Microsoft Research), Xinze Li (Peking University), Bo Zhao (Microsoft Research), Haoxiang Lin (Microsoft Research), Yoyo Liang (Microsoft), Jing Zhong (Microsoft), Hongyu Zhang (Chongqing University), Jingzhou Wang (Tsinghua University), Yonghua Zeng (Microsoft), Keli Gui (Microsoft), Jie Tong (Microsoft), and Mao Yang (Microsoft Research)</i>	
Using an LLM to Help With Code Understanding	1184
<i>Daye Nam (Carnegie Mellon University, USA), Andrew Macvean (Google, USA), Vincent Hellendoorn (Carnegie Mellon University, USA), Bogdan Vasilescu (Carnegie Mellon University, USA), and Brad Myers (Carnegie Mellon University, USA)</i>	
Enhancing Exploratory Testing by Large Language Model and Knowledge Graph	1197
<i>Yanqi Su (The Australian National University, Australia), Dianshu Liao (Jiangxi Normal University, China), Zhenchang Xing (Data61, CSIRO & The Australian National University, Australia), Qing Huang (Jiangxi Normal University, China), Mulong Xie (Data61, CSIRO, Australia), Qinghua Lu (Data61, CSIRO, Australia), and Xiwei Xu (Data61, CSIRO, Australia)</i>	
LLMParser: An Exploratory Study on Using Large Language Models for Log Parsing	1209
<i>Zeyang Ma (Concordia University, Canada), An Ran Chen (University of Alberta, Canada), Dong Jae Kim (Concordia University, Canada), Tse-Hsun Chen (Concordia University, Canada), and Shaowei Wang (University of Manitoba, Canada)</i>	
Make LLM a Testing Expert: Bringing Human-like Interaction to Mobile GUI Testing via Functionality-aware Decisions	1222
<i>Zhe Liu (University of Chinese Academy of Sciences, Beijing, China; Institute of Software Chinese Academy of Sciences, Beijing, China), Chunyang Chen (Technical University of Munich), Junjie Wang (Institute of Software Chinese Academy of Sciences, Beijing, China), Mengzhuo Chen (Institute of Software, Chinese Academy of Sciences), Boyu Wu (University of Chinese Academy of Sciences, Beijing, China), Xing Che (Institute of Software, Chinese Academy of Sciences), Dandan Wang (Institute of Software, Chinese Academy of Sciences), and Qing Wang (Institute of Software, Chinese Academy of Sciences)</i>	

Analysis

RogueOne: Detecting Rogue Updates via Differential Data-flow Analysis Using Trust Domains ...	1235
<i>Raphael Sofaer (Columbia University), Yaniv David (Columbia University), Mingqing Kang (Johns Hopkins University), Jianjia Yu (Johns Hopkins University), Yinzhi Cao (Johns Hopkins University), Junfeng Yang (Columbia University), and Jason Nieh (Columbia University)</i>	

ACAV: A Framework for Automatic Causality Analysis in Autonomous Vehicle Accident Recordings	1248
<i>Huijia Sun (ShanghaiTech University, China), Christopher M. Poskitt (Singapore Management University), Yang Sun (Singapore Management University), Jun Sun (Singapore Management University), and Yuqi Chen (ShanghaiTech University, China)</i>	
Efficiently Trimming the Fat: Streamlining Software Dependencies with Java Reflection and Dependency Analysis	1261
<i>Xiaohu Song (Northeastern University, China), Ying Wang (Northeastern University, China), Xiao Cheng (Huawei Cloud Computing Technologies Co., Ltd. China), Guangtai Liang (Huawei Cloud Computing Technologies Co., Ltd. China), Wang Qianxiang (Huawei Cloud Computing Technologies Co., Ltd. China), and Zhiliang Zhu (Northeastern University, China)</i>	
Symbol-Specific Sparsification of Interprocedural Distributive Environment Problems	1273
<i>Kadiray Karakaya (Paderborn University, Germany) and Eric Bodden (Paderborn University, Germany)</i>	
LibAlchemy: A Two-Layer Persistent Summary Design for Taming Third-Party Libraries in Static Bug-Finding Systems	1285
<i>Rongxin Wu (Xiamen Key Laboratory of Intelligent Storage and Computing, School of Informatics, Xiamen University), Yuxuan He (Xiamen Key Laboratory of Intelligent Storage and Computing, School of Informatics, Xiamen University), Jiafeng Huang (Xiamen Key Laboratory of Intelligent Storage and Computing, School of Informatics, Xiamen University), Chengpeng Wang (The Hong Kong University of Science and Technology), Wensheng Tang (The Hong Kong University of Science and Technology), Qingkai Shi (State Key Laboratory for Novel Software Technology, Nanjing University), Xiao Xiao (Person), and Charles Zhang (The Hong Kong University of Science and Technology)</i>	
Is unsafe an Achilles' Heel? A Comprehensive Study of Safety Requirements in Unsafe Rust Programming	1298
<i>Mohan Cui (School of Computer Science, Fudan University, China), Shuran Sun (School of Computer Science, Fudan University, China), Hui Xu (School of Computer Science, Fudan University, China), and Yangfan Zhou (School of Computer Science, Fudan University, China)</i>	
Generating REST API Specifications through Static Analysis	1311
<i>Ruikai Huang (Georgia Institute of Technology), Manish Motwani (Georgia Institute of Technology), Idel Martinez (Georgia Institute of Technology), and Alessandro Orso (Georgia Institute of Technology)</i>	
A Framework For Inferring Properties of User-Defined Functions	1324
<i>Xinyu Liu (Georgia Institute of Technology), Joy Arulraj (Georgia Institute of Technology), and Alessandro Orso (Georgia Institute of Technology)</i>	
Precise Sparse Abstract Execution via Cross-Domain Interaction	1335
<i>Xiao Cheng (University of New South Wales), Jiawei Wang (University of New South Wales), and Yulei Sui (University of New South Wales)</i>	

Debugging

- Trace-based Multi-Dimensional Root Cause Localization of Performance Issues in
Microservice Systems 1347
*Chenxi Zhang (Fudan University, China), Zhen Dong (Fudan University,
China), Xin Peng (Fudan University, China), Bicheng Zhang (Fudan
University, China), and Miao Chen (Fudan University, China)*
- ReClues: Representing and indexing failures in parallel debugging with program variables 1359
*Yi Song (Wuhan University, China), Xihao Zhang (Wuhan University,
China), Xiaoyuan Xie (Wuhan University, China), Quanming Liu (Wuhan
University, China), Ruizhi Gao (Sonos Inc., USA), and Chenliang Xing
(Wuhan University, China)*
- PyAnalyzer: An Effective and Practical Approach for Dependency Extraction from Python Code.. 1372
*Wuxia Jin (Xi'an Jiaotong University), Shuo Xu (Xi'an Jiaotong
University), Dawei Chen (Xi'an Jiaotong University), Jiajun He (Xi'an
Jiaotong University), Dinghong Zhong (Xi'an Jiaotong University), Ming
Fan (Xi'an Jiaotong University), Hongxu Chen (Huawei Technologies Co.,
Ltd), Huijia Zhang (Huawei Technologies Co. Ltd), and Ting Liu (Xi'an
Jiaotong University)*
- Detecting Automatic Software Plagiarism via Token Sequence Normalization 1384
*Timur Sağlam (Karlsruhe Institute of Technology (KIT)), Moritz Brödel
(Karlsruhe Institute of Technology (KIT)), Larissa Schmid (Karlsruhe
Institute of Technology (KIT)), and Sebastian Hahner (Karlsruhe
Institute of Technology (KIT))*

Testing Foundations

- A First Look at the Inheritance-Induced Redundant Test Execution 1397
*Dong Jae Kim (Concordia University) and Tse-Hsun Chen (Concordia
University)*
- Hypertesting of Programs: Theoretical Foundation and Automated Test Generation 1409
*Michele Pasqua (University of Verona), Mariano Ceccato (University of
Verona), and Paolo Tonella (Università della Svizzera italiana)*
- Ripples of a Mutation — An Empirical Study of Propagation Effects in Mutation Testing 1421
*Hang Du (University of California, Irvine), Vijay Krishna Palepu
(Microsoft, Silicon Valley Campus), and James A. Jones (University of
California, Irvine)*
- Fast Deterministic Black-box Context-free Grammar Inference 1434
*Mohammad Rifat Arefin (University of Texas at Arlington, USA), Suraj
Shetiya (University of Texas at Arlington, USA), Zili Wang (Iowa State
University, USA), and Christoph Csallner (University of Texas at
Arlington, USA)*

Testing of AI systems

CIT4DNN: Generating Diverse and Rare Inputs for Neural Networks Using Latent Space Combinatorial Testing	1446
<i>Swaroop Dola (University of Virginia), Rory McDaniel (University of Virginia), Matthew Dwyer (University of Virginia), and Mary Lou Soffa (University of Virginia)</i>	
Knowledge Graph Driven Inference Testing for Question Answering Software	1459
<i>Jun Wang (State Key Laboratory for Novel Software Technology, Nanjing University, China), Yanhui Li (State Key Laboratory for Novel Software Technology, Nanjing University, China), Zhifei Chen (School of Computer Science and Engineering, Nanjing University of Science and Technology, China), Lin Chen (State Key Laboratory for Novel Software Technology, Nanjing University, China), Xiaofang Zhang (School of Computer Science and Technology, Soochow University, China), and Yuming Zhou (State Key Laboratory for Novel Software Technology, Nanjing University, China)</i>	
DeepSample: DNN sampling-based testing for operational accuracy assessment	1472
<i>Antonio Guerriero (Università degli Studi di Napoli Federico II), Roberto Pietrantuono (Università degli Studi di Napoli Federico II), and Stefano Russo (Università degli Studi di Napoli Federico II)</i>	
MAFT: Efficient Model-Agnostic Fairness Testing for Deep Neural Networks via Zero-Order Gradient Search	1484
<i>Zhaohui Wang (East China Normal University), Min Zhang (East China Normal University, Shanghai Key Laboratory of Trustworthy Computing), Jingran Yang (East China Normal University), Bojie Shao (East China Normal University), and Min Zhang (East China Normal University)</i>	

Fuzzing and Symbolic Execution

Concrete Constraint Guided Symbolic Execution	1496
<i>Yue Sun (Institute of Information Engineering, CAS; School of Cyber Security, UCAS, China), Guowei Yang (The University of Queensland, Australia), Shichao Lv (Institute of Information Engineering, CAS; School of Cyber Security, UCAS, China), Zhi Li (Institute of Information Engineering, CAS; School of Cyber Security, UCAS, China), and Limin Sun (Institute of Information Engineering, CAS; School of Cyber Security, UCAS, China)</i>	
SpecBCFuzz: Fuzzing LTL Solvers with Boundary Conditions	1508
<i>Luiz Carvalho (SnT, University of Luxembourg), Renzo Degiovanni (SnT, University of Luxembourg), Maxime Cordy (SnT, University of Luxembourg), Nazareno Aguirre (Universidad Nacional de Río Cuarto and CONICET), Yves Le Traon (SnT, University of Luxembourg), and Mike Papadakis (SnT, University of Luxembourg)</i>	
RPG: Rust Library Fuzzing with Pool-based Fuzz Target Generation and Generic Support	1521
<i>Zhiwu Xu (Shenzhen University, China), Bohao Wu (Shenzhen University, China), Cheng Wen (Xidian University, China), Bin Zhang (Shenzhen University, China), Shengchao Qin (Huawei, China), and Mengda He (Huawei, China)</i>	

Deep Combination of CDCL(T) and Local Search for Satisfiability Modulo Non-Linear Integer Arithmetic Theory	1534
<i>Xindi Zhang (Institute of Software, Chinese Academy of Sciences), Bohan Li (Institute of Software, Chinese Academy of Sciences), and Shaowei Cai (Institute of Software, Chinese Academy of Sciences)</i>	
Fuzz4All: Universal Fuzzing with Large Language Models	1547
<i>Chunqiu Steven Xia (UIUC), Matteo Paltenghi (University of Stuttgart), Jia Le Tian (UIUC), Michael Pradel (University of Stuttgart), and Lingming Zhang (UIUC)</i>	
Are We There Yet? Unraveling the State-of-the-Art Smart Contract Fuzzers	1560
<i>Shuohan Wu (The Hong Kong Polytechnic University), Zihao Li (The Hong Kong Polytechnic University), Luyi Yan (The Hong Kong Polytechnic University), Weimin Chen (The Hong Kong Polytechnic University), Muhui Jiang (The Hong Kong Polytechnic University), Chenxu Wang (Xi'an Jiaotong University, China), Xiapu Luo (The Hong Kong Polytechnic University), and Hao Zhou (The Hong Kong Polytechnic University)</i>	
Uncover the Premeditated Attacks: Detecting Exploitable Reentrancy Vulnerabilities by Identifying Attacker Contracts	1573
<i>Shuo Yang (Sun Yat-sen University), Jiachi Chen (Sun Yat-sen University), Mingyuan Huang (Sun Yat-sen University), Zibin Zheng (Sun Yat-sen University), and Yuan Huang (Sun Yat-sen University)</i>	
Crossover in Parametric Fuzzing	1585
<i>Katherine Hough (Northeastern University, United States) and Jonathan Bell (Northeastern University, United States)</i>	
Practical Non-Intrusive GUI Exploration Testing with Visual-based Robotic Arms	1597
<i>Shengcheng Yu (State Key Laboratory for Novel Software Technology, Nanjing University, China), Chunrong Fang (State Key Laboratory for Novel Software Technology, Nanjing University, China), Mingzhe Du (State Key Laboratory for Novel Software Technology, Nanjing University, China), Yuchen Ling (State Key Laboratory for Novel Software Technology, Nanjing University, China), Zhenyu Chen (State Key Laboratory for Novel Software Technology, Nanjing University, China), and Zhendong Su (ETH Zurich, Switzerland)</i>	
FuzzInMem: Fuzzing Programs via In-memory Structures	1610
<i>Xuwei Liu (Purdue University), Wei You (Renmin University of China), Yapeng Ye (Purdue University), Zhuo Zhang (Purdue University), Jianjun Huang (Renmin University of China), and Xiangyu Zhang (Purdue University)</i>	
Extrapolating Coverage Rate in Greybox Fuzzing	1623
<i>Danushka Liyanage (Monash University), Seongmin Lee (MPI-SP), Chakkrit Tantithamthavorn (Monash University), and Marcel Böhme (MPI-SP)</i>	
 Testing: Various Bug Types	
CERT: Finding Performance Issues in Database Systems Through the Lens of Cardinality Estimation	1635
<i>Jinsheng Ba (National University of Singapore, Singapore) and Manuel Rigger (National University of Singapore, Singapore)</i>	

Optimistic Prediction of Synchronization-Reversal Data Races	1648
<i>Zheng Shi (National University of Singapore), Umang Mathur (National University of Singapore), and Andreas Pavlogiannis (Aarhus University)</i>	
Mozi: Discovering DBMS Bugs via Configuration-Based Equivalent Transformation	1661
<i>Jie Liang (Tsinghua University), Zhiyong Wu (Tsinghua University), Jingzhou Fu (Tsinghua University), Mingzhe Wang (Tsinghua University), Chengnian Sun (University of Waterloo), and Yu Jiang (Tsinghua University)</i>	
FlakeSync: Automatically Repairing Async Flaky Tests	1673
<i>Shanto Rahman (The University of Texas at Austin, USA) and August Shi (The University of Texas at Austin, USA)</i>	
Testing the Limits: Unusual Text Inputs Generation for Mobile App Crash Detection with Large Language Model	1685
<i>Zhe Liu (University of Chinese Academy of Sciences, Beijing, China; Institute of Software Chinese Academy of Sciences, Beijing, China), Chunyang Chen (Technical University of Munich), Junjie Wang (Institute of Software Chinese Academy of Sciences, Beijing, China), Mengzhuo Chen (Institute of Software Chinese Academy of Sciences), Boyu Wu (University of Chinese Academy of Sciences, Beijing, China), Zhilin Tian (Pennsylvania State University), Yuekai Huang (University of Chinese Academy of Sciences, Beijing, China), Jun Hu (Institute of Software, Chinese Academy of Sciences), and Qing Wang (Institute of Software, Chinese Academy of Sciences)</i>	
Towards Finding Accounting Errors in Smart Contracts	1697
<i>Brian Zhang (Purdue University)</i>	
MultiTest: Physical-Aware Object Insertion for Testing Multi-sensor Fusion Perception Systems	1710
<i>Xinyu Gao (Nanjing University, China), Zhijie Wang (University of Alberta, Canada), Yang Feng (Nanjing University, China), Lei Ma (The University of Tokyo, Japan; University of Alberta, Canada), Zhenyu Chen (Nanjing University, China), and Baowen Xu (Nanjing University, China)</i>	
JLeaks: A Featured Resource Leak Repository Collected From Hundreds of Open-Source Java Projects	1723
<i>Tianyang Liu (Beijing Institute of Technology), Weixing Ji (Beijing Institute of Technology), Xiaohui Dong (Beijing Institute of Technology), Wuhuang Yao (Beijing Institute of Technology), Yizhuo Wang (Beijing Institute of Technology), Hui Liu (Beijing Institute of Technology), Haiyang Peng (Beijing Institute of Technology), and Yuxuan Wang (Beijing Institute of Technology)</i>	
S3C: Spatial Semantic Scene Coverage for Autonomous Vehicles	1736
<i>Trey Woodlief (University of Virginia, USA), Felipe Toledo (University of Virginia, USA), Sebastian Elbaum (University of Virginia, USA), and Matthew B. Dwyer (University of Virginia, USA)</i>	
FlashSyn: Flash Loan Attack Synthesis via Counter Example Driven Approximation	1749
<i>Zhiyang Chen (University of Toronto, Canada), Sidi Mohamed Beillahi (University of Toronto, Canada), and Fan Long (University of Toronto, Canada)</i>	

Testing Graph Database Systems via Equivalent Query Rewriting	1762
<i>Qiuyang Mang (The Chinese University of Hong Kong, Shenzhen), Aoyang Fang (The Chinese University of Hong Kong, Shenzhen), Boxi Yu (The Chinese University of Hong Kong, Shenzhen; Shenzhen Research Institute of Big Data), Hanfei Chen (The Chinese University of Hong Kong, Shenzhen), and Pinjia He (The Chinese University of Hong Kong, Shenzhen; Shenzhen Research Institute of Big Data)</i>	
ROSInfer: Statically Inferring Behavioral Component Models for ROS-based Robotics Systems	1774
<i>Tobias Dürschmid (Carnegie Mellon University), Christopher Timperley (Carnegie Mellon University), David Garlan (Carnegie Mellon University), and Claire Le Goues (Carnegie Mellon University)</i>	
Finding XPath Bugs in XML Document Processors via Differential Testing	1787
<i>Shuxin Li (Southern University of Science and Technology, China) and Manuel Rigger (National University of Singapore, Singapore)</i>	
Sedar: Obtaining High-Quality Seeds for DBMS Fuzzing via Cross-DBMS SQL Transfer	1799
<i>Jingzhou Fu (Tsinghua University), Jie Liang (Tsinghua University), Zhiyong Wu (Tsinghua University), and Yu Jiang (Tsinghua University)</i>	
Automatically Detecting Reflow Accessibility Issues in Responsive Web Pages	1811
<i>Paul T. Chiou (University of Southern California, USA), Robert Winn (University of Southern California, USA), Ali S. Alotaibi (University of Southern California, USA), and William G. J. Halfond (University of Southern California, USA)</i>	

AI&Security

Towards More Practical Automation of Vulnerability Assessment	1824
<i>Shengyi Pan (The State Key Laboratory of Blockchain and Data Security, Zhejiang University), Lingfeng Bao (The State Key Laboratory of Blockchain and Data Security, Zhejiang University), Jiayuan Zhou (Centre for Software Excellence, Huawei), Xing Hu (The State Key Laboratory of Blockchain and Data Security, Zhejiang University), Xin Xia (Huawei), and Shaping Li (The State Key Laboratory of Blockchain and Data Security, Zhejiang University)</i>	
VGX: Large-Scale Sample Generation for Boosting Learning-Based Software Vulnerability Analyses	1837
<i>Yu Nong (Washington State University), Richard Fang (Washington State University), Guangbei Yi (Washington State University), Kunsong Zhao (Hong Kong Polytechnic University), Xiapu Luo (Hong Kong Polytechnic University), Feng Chen (The University of Texas at Dallas), and Haipeng Cai (Washington State University)</i>	
MalCertain: Enhancing Deep Neural Network Based Android Malware Detection by Tackling Prediction Uncertainty	1850
<i>Haodong Li (Beijing University of Posts and Telecommunications, China), Guosheng Xu (Beijing University of Posts and Telecommunications, China), Liu Wang (Beijing University of Posts and Telecommunications, China), Xusheng Xiao (Arizona State University, USA), Xiapu Luo (The Hong Kong Polytechnic University, China), Guoai Xu (Harbin Institute of Technology, China), and Haoyu Wang (Huazhong University of Science and Technology, China)</i>	

Pre-training by Predicting Program Dependencies for Vulnerability Analysis Tasks	1863
<i>Zhongxin Liu (Zhejiang University, China), Zhijie Tang (Zhejiang University, China), Junwei Zhang (Zhejiang University, China), Xin Xia (Huawei, China), and Xiaohu Yang (Zhejiang University, China)</i>	
Investigating White-Box Attacks for On-Device Models	1876
<i>Mingyi Zhou (Monash University, Australia), Xiang Gao (Beihang University, China), Jing Wu (Monash University, Australia), Kui Liu (Huawei Software Engineering Application Technology Lab, China), Hailong Sun (Beihang University, China), and Li Li (Beihang University, China)</i>	
Towards Causal Deep Learning for Vulnerability Detection	1888
<i>Md Mahbubur Rahman (Iowa State University, USA), Ira Ceka (Columbia University, USA), Chengzhi Mao (Columbia University, USA), Saikat Chakraborty (Microsoft Research, USA), Baishakhi Ray (Columbia University, USA), and Wei Le (Iowa State University, USA)</i>	
MetaLog: Generalizable Cross-System Anomaly Detection from Logs with Meta-Learning	1899
<i>Chenyanguang Zhang (Tsinghua University, China), Tong Jia (Peking University, China), Guopeng Shen (Linkedsee Technology (China) Limited), Pinyan Zhu (Linkedsee Technology (China) Limited), and Ying Li (Peking University, China)</i>	
COCA: Improving and Explaining Graph Neural Network-Based Vulnerability Detection Systems	1911
<i>Sicong Cao (Yangzhou University), Xiaobing Sun (Yangzhou University), Xiaoxue Wu (Yangzhou University), David Lo (Singapore Management University), Lili Bo (Yangzhou University), Bin Li (Yangzhou University), and Wei Liu (Yangzhou University)</i>	
Improving Smart Contract Security with Contrastive Learning-based Vulnerability Detection	1924
<i>Yizhou Chen (Key Lab of HCST (PKU), MOE; School of Computer Science, Peking University), Zeyu Sun (Science & Technology on Integrated Information System Laboratory, Institute of Software, Chinese Academy of Sciences), Zhihao Gong (Key Lab of HCST (PKU), MOE; School of Computer Science, Peking University), and Dan Hao (Key Lab of HCST (PKU), MOE; School of Computer Science, Peking University)</i>	
On the Effectiveness of Function-Level Vulnerability Detectors for Inter-Procedural Vulnerabilities	1935
<i>Zhen Li (Huazhong University of Science and Technology, China), Ning Wang (Huazhong University of Science and Technology, China), Deqing Zou (Huazhong University of Science and Technology, China), Yating Li (Huazhong University of Science and Technology, China), Ruqian Zhang (Huazhong University of Science and Technology, China), Shouhuai Xu (University of Colorado Colorado Springs), Chao Zhang (Tsinghua University), and Hai Jin (Huazhong University of Science and Technology, China)</i>	

Security - Studies

A User-centered Security Evaluation of Copilot	1947
<i>Owura Asare (University of Waterloo), Meiyappan Nagappan (University of Waterloo), and N. Asokan (University of Waterloo)</i>	

An Empirical Study on Oculus Virtual Reality Applications: Security and Privacy Perspectives	1958
<i>Hanyang Guo (Hong Kong Baptist University, China; Sun Yat-sen University, China), Hong-Ning Dai (Hong Kong Baptist University, China), Xiapu Luo (The Hong Kong Polytechnic University, China), Zibin Zheng (Sun Yat-sen University, China), Gengyang Xu (Hong Kong Baptist University, China), and Fengliang He (Hong Kong Baptist University, China)</i>	
Fairness Improvement with Multiple Protected Attributes: How Far Are We?	1971
<i>Zhenpeng Chen (University College London, United Kingdom), Jie M. Zhang (King's College London, United Kingdom), Federica Sarro (University College London, United Kingdom), and Mark Harman (University College London, United Kingdom)</i>	
An Empirical Study of Data Disruption by Ransomware Attacks	1984
<i>Yiwei Hou (Tsinghua University, China), Lihua Guo (Tsinghua University, China), Chijin Zhou (Tsinghua University, China), Yiwen Xu (Tsinghua University, China), Zijing Yin (Tsinghua University, China), Shanshan Li (National University of Defense Technology, China), Chengnian Sun (Waterloo University, Canada), and Yu Jiang (Tsinghua University, China)</i>	
Identifying Affected Libraries and Their Ecosystems for Open Source Software Vulnerabilities	1996
<i>Susheng Wu (Fudan University, China), Wenyan Song (Fudan University, China), Kaifeng Huang (Fudan University, China), Bihuan Chen (Fudan University, China), and Xin Peng (Fudan University, China)</i>	
Understanding Transaction Bugs in Database Systems	2008
<i>Ziyu Cui (Institute of Software Chinese Academy of Sciences; University of Chinese Academy of Sciences), Wensheng Dou (Institute of Software Chinese Academy of Sciences; University of Chinese Academy of Sciences; University of Chinese Academy of Sciences Nanjing College; Nanjing Institute of Software Technology), Yu Gao (Institute of Software Chinese Academy of Sciences; University of Chinese Academy of Sciences), Dong Wang (Institute of Software Chinese Academy of Sciences; University of Chinese Academy of Sciences), Jiansen Song (Institute of Software Chinese Academy of Sciences; University of Chinese Academy of Sciences), Yingying Zheng (Institute of Software Chinese Academy of Sciences; University of Chinese Academy of Sciences), Tao Wang (Institute of Software Chinese Academy of Sciences; University of Chinese Academy of Sciences), Rui Yang (Institute of Software Chinese Academy of Sciences; University of Chinese Academy of Sciences), Kang Xu (University of Chinese Academy of Sciences Nanjing College; Nanjing Institute of Software Technology), Yixin Hu (Sun Yat-sen University), Jun Wei (Institute of Software Chinese Academy of Sciences; University of Chinese Academy of Sciences; University of Chinese Academy of Sciences Nanjing College; Nanjing Institute of Software Technology), and Tao Huang (Institute of Software Chinese Academy of Sciences; University of Chinese Academy of Sciences)</i>	

When Contracts Meets Crypto: Exploring Developers' Struggles with Ethereum Cryptographic APIs	2021
<i>Jiashuo Zhang (Peking University), Jiachi Chen (Sun Yat-sen University), Zhiyuan Wan (Zhejiang University), Ting Chen (University of Electronic Science and Technology of China), Jianbo Gao (Peking University), and Zhong Chen (Peking University)</i>	

Fuzzing and Vulnerability Detection

Curiosity-Driven Testing for Sequential Decision-Making Process	2034
<i>Junda He (Singapore Management University), Zhou Yang (Singapore Management University), Jieke Shi (Singapore Management University), Chengran Yang (Singapore Management University), Kisub Kim (Singapore Management University), Bowen Xu (North Carolina State University), Xin Zhou (Singapore Management University), and David Lo (Singapore Management University)</i>	
GPTScan: Detecting Logic Vulnerabilities in Smart Contracts by Combining GPT with Program Analysis	2048
<i>Yuqiang Sun (Nanyang Technological University), Daoyuan Wu (Nanyang Technological University), Yue Xue (Metatrust Labs), Han Liu (Shanghai Key Laboratory of Trustworthy Computing, East China Normal University), Haijun Wang (Xi'an Jiaotong University), Zhengzi Xu (Nanyang Technological University), Xiaofei Xie (Singapore Management University), and Yang Liu (Nanyang Technological University)</i>	
PS3: Precise Patch Presence Test based on Semantic Symbolic Signature	2061
<i>Qi Zhan (Zhejiang University, China), Xing Hu (Zhejiang University, China), Zhiyang Li (Zhejiang University, China), Xin Xia (Huawei, China), David Lo (Singapore Management University, Singapore), and Shanping Li (Zhejiang University, China)</i>	
PrettySmart: Detecting Permission Re-delegation Vulnerability for Token Behaviors in Smart Contracts	2073
<i>Zhijie Zhong (Sun Yat-sen University), Zibin Zheng (Sun Yat-sen University), Hong-Ning Dai (Hong Kong Baptist University), Qing Xue (Sun Yat-sen University), Junjia Chen (Sun Yat-sen University), and Yuhong Nan (Sun Yat-sen University)</i>	
Combining Structured Static Code Information and Dynamic Symbolic Traces for Software Vulnerability Prediction	2085
<i>Huanting Wang (Northwest University, China; University of Leeds, U.K.), Zhanyong Tang (Northwest University, China), Shin Hwei Tan (Concordia University, Canada), Jie Wang (Northwest University), Yuzhe Liu (Northwest University), Hejun Fang (NorthWest University), Chunwei Xia (University of Leeds), and Zheng Wang (University of Leeds)</i>	

SCVHunter: Smart Contract Vulnerability Detection Based on Heterogeneous Graph Attention Network	2098
<i>Feng Luo (University of Electronic Science and Technology of China), Ruijie Luo (University of Electronic Science and Technology of China), Ting Chen (University of Electronic Science and Technology of China), Ao Qiao (University of Electronic Science and Technology of China), Zheyuan He (University of Electronic Science and Technology of China), Shuwei Song (University of Electronic Science and Technology of China), Yu Jiang (Tsinghua university), and Sixing Li (University of Electronic Science and Technology of China)</i>	

Safeguarding DeFi Smart Contracts against Oracle Deviations	2111
<i>Xun Deng (University of Toronto), Sidi Mohamed Beillahi (University of Toronto), Cyrus Minwalla (Bank of Canada), Han Du (Bank of Canada), Andreas Veneris (University of Toronto), and Fan Long (University of Toronto)</i>	

Static Detection Techniques

MalwareTotal: Multi-Faceted and Sequence-Aware Bypass Tactics against Static Malware Detection	2123
<i>Shuai He (Huazhong University of Science and Technology, China), Cai Fu (Huazhong University of Science and Technology, China), Hong Hu (Pennsylvania State University, USA), Jiahe Chen (Huazhong University of Science and Technology, China), Jianqiang Lv (Huazhong University of Science and Technology, China), and Shuai Jiang (Huazhong University of Science and Technology, China)</i>	

Semantic-Enhanced Static Vulnerability Detection in Baseband Firmware	2135
<i>Yiming Liu (Institute of Information Engineering at Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Cen Zhang (Nanyang Technological University, Singapore), Feng Li (Institute of Information Engineering at Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Yeting Li (Institute of Information Engineering at Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Jianhua Zhou (Institute of Information Engineering at Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Jian Wang (Institute of Information Engineering at Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Lanlan Zhan (Institute of Information Engineering at Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Yang Liu (Nanyang Technological University, Singapore), and Wei Huo (Institute of Information Engineering at Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)</i>	

CSChecker: Revisiting GDPR and CCPA Compliance of Cookie Banners on the Web	2147
<i>Mingxue Zhang (The State Key Laboratory of Blockchain and Data Security, Zhejiang University), Wei Meng (The Chinese University of Hong Kong), You Zhou (The State Key Laboratory of Blockchain and Data Security, Zhejiang University), and Kui Ren (The State Key Laboratory of Blockchain and Data Security, Zhejiang University)</i>	

Raisin: Identifying Rare Sensitive Functions for Bug Detection	2159
<i>Jianjun Huang (School of Information, Renmin University of China, Beijing, China), Jianglei Nie (School of Information, Renmin University of China, Beijing, China), Yuanjun Gong (School of Information, Renmin University of China, Beijing, China), Wei You (School of Information, Renmin University of China, Beijing, China), Bin Liang (School of Information, Renmin University of China, Beijing, China), and Pan Bian (Huawei Technologies CO., LTD., Beijing, China)</i>	

Dependability and Formal Methods

REDriver: Runtime Enforcement for Autonomous Vehicles	2171
<i>Yang Sun (Singapore Management University, Singapore), Christopher M. Poskitt (Singapore Management University, Singapore), Xiaodong Zhang (Xidian University), and Jun Sun (Singapore Management University, Singapore)</i>	
Scalable Relational Analysis via Relational Bound Propagation	2183
<i>Clay Stevens (Iowa State University, USA) and Hamid Bagheri (University of Nebraska-Lincoln, USA)</i>	
Translation Validation for JIT Compiler in the V8 JavaScript Engine	2195
<i>Seungwan Kwon (KAIST, Korea), Jaeseong Kwon (KAIST, Korea), Wooseok Kang (KAIST, Korea), Juneyoung Lee (Amazon, USA), and Kihong Heo (KAIST, Korea)</i>	
Verifying Declarative Smart Contracts	2207
<i>Haoxian Chen (ShanghaiTech University), Lan Lu (University of Pennsylvania), Brendan Massey (University of Pennsylvania), Yuepeng Wang (Simon Fraser University), and Boon Thau Loo (University of Pennsylvania)</i>	

Generative AI studies

ChatGPT Incorrectness Detection in Software Reviews	2219
<i>Minaoar Hossain Tanzil (University of Calgary, Canada), Junaed Younus Khan (University of Calgary, Canada), and Gias Uddin (York University, Canada)</i>	
ChatGPT-Resistant Screening Instrument for Identifying Non-Programmers	2231
<i>Raphael Serafini (Ruhr-University Bochum, Germany), Clemens Otto (Ruhr-University Bochum, Germany), Stefan Albert Horstmann (Ruhr-University Bochum, Germany), and Alena Naiakshina (Ruhr-University Bochum, Germany)</i>	
Uncovering the Causes of Emotions in Software Developer Communication Using Zero-shot LLMs.....	2244
<i>Mia Mohammad Imran (Virginia Commonwealth University), Preetha Chatterjee (Drexel University), and Kostadin Damevski (Virginia Commonwealth University)</i>	

Development in Times of Hype: How Freelancers Explore Generative AI?	2257
<i>Mateusz Dolata (University of Zurich, Switzerland), Norbert Lange (Entschleunigung Norbert Lange, Germany), and Gerhard Schwabe (University of Zurich, Switzerland)</i>	
How Far Are We? The Triumphs and Trials of Generative AI in Learning Software Engineering ..	2270
<i>Rudrajit Choudhuri (Oregon State University), Dylan Liu (Oregon State University), Igor Steinmacher (Northern Arizona University), Marco Gerosa (Northern Arizona University), and Anita Sarma (Oregon State University)</i>	

Human and Social - Core

Breaking the Flow: A Study of Interruptions During Software Engineering Activities	2283
<i>Yimeng Ma (Duke University, USA), Yu Huang (Vanderbilt University, USA), and Kevin Leach (Vanderbilt University, USA)</i>	
Supporting Web-Based API Searches in the IDE Using Signatures	2295
<i>Nick C. Bradley (The University of British Columbia), Thomas Fritz (University of Zurich), and Reid Holmes (The University of British Columbia)</i>	
Property-Based Testing in Practice	2307
<i>Harrison Goldstein (University of Pennsylvania, USA), Joseph W. Cutler (University of Pennsylvania, USA), Daniel Dickstein (Jane Street, USA), Benjamin C. Pierce (University of Pennsylvania, USA), and Andrew Head (University of Pennsylvania, USA)</i>	
Causal Relationships and Programming Outcomes: A Transcranial Magnetic Stimulation Experiment	2320
<i>Hammad Ahmad (University of Michigan, USA), Madeline Endres (University of Michigan, USA), Kaia Newman (University of Michigan, USA), Priscila Santiesteban (University of Michigan, USA), Emma Shedden (University of Michigan, USA), and Westley Weimer (University of Michigan, USA)</i>	
GenderMag Improves Discoverability in the Field, Especially for Women	2333
<i>Emerson Murphy-Hill (Google), Alberto Elizondo (Google), Ambar Murillo (Google), Marian Harbach (Google), Bogdan Vasilescu (Google), Delphine Carlson (Google), and Florian Dessloch (Google)</i>	
Unraveling the Drivers of Sense of Belonging in Software Delivery Teams: Insights from a Large-Scale Survey	2345
<i>Bianca Trinkenreich (Northern Arizona University, USA), Marco Aurelio Gerosa (Northern Arizona University), and Igor Steinmacher (Northern Arizona University)</i>	
“My GitHub Sponsors profile is live!” Investigating the Impact of Twitter/X Mentions on GitHub Sponsors	2357
<i>Youmei Fan (Nara Institute of Science and Technology, Japan), Tao Xiao (Nara Institute of Science and Technology, Japan), Hideaki Hata (Shinshu University, Japan), Christoph Treude (University of Melbourne, Australia), and Kenichi Matsumoto (Nara Institute of Science and Technology, Japan)</i>	

A Theory of Scientific Programming Efficacy	2369
<i>Elizaveta Pertseva (Stanford University), Melinda Chang (Canyon Crest Academy), Ullia Zaman (University of California Irvine), and Michael Coblenz (University of California San Diego)</i>	
High Expectations: An Observational Study of Programming and Cannabis Intoxication	2381
<i>Wenxin He (University of Michigan), Manasvi Parikh (University of Michigan), Westley Weimer (University of Michigan), and Madeline Endres (University of Michigan)</i>	
Mining Pull Requests to Detect Process Anomalies in Open Source Software Development	2393
<i>Bohan Liu (State Key Laboratory of Novel Software Technology, Software Institute, Nanjing University), He Zhang (State Key Laboratory of Novel Software Technology, Software Institute, Nanjing University), Weigang Ma (State Key Laboratory of Novel Software Technology, Software Institute, Nanjing University), Hongyu Kuang (State Key Laboratory of Novel Software Technology, Software Institute, Nanjing University), Yi Yang (State Key Laboratory of Novel Software Technology, Software Institute, Nanjing University), Jinwei Xu (State Key Laboratory of Novel Software Technology, Software Institute, Nanjing University), Shan Gao (Huawei Technologies Co., Ltd.), and Jian Gao (Huawei Technologies Co., Ltd.)</i>	
How Are Paid and Volunteer Open Source Developers Different? A Study of the Rust Project	2406
<i>Yuxia Zhang (Beijing Institute of Technology, China), Mian Qin (Beijing Institute of Technology, China), Klaas-Jan Stol (University College Cork and Lero, Ireland), Minghui Zhou (Peking University, China), and Hui Liu (Beijing Institute of Technology, China)</i>	
Barriers for Students During Code Change Comprehension	2419
<i>Justin A Middleton (North Carolina State University), John-Paul Ore (North Carolina State University), and Kathryn Stolee (North Carolina State University)</i>	
“I tend to view ads almost like a pestilence”: On the Accessibility Implications of Mobile Ads for Blind Users	2432
<i>Ziyao He (University of California, Irvine, USA), Syed Fatiul Huq (University of California, Irvine, USA), and Sam Malek (University of California, Irvine, USA)</i>	

Analytics and AI

DeepLSH: Deep Locality-Sensitive Hash Learning for Fast and Efficient Near-Duplicate Crash Report Detection	2445
<i>Youcef Remil (Infologic R&D, INSA Lyon), Anes Bendimerad (Infologic R&D), Romain Mathonat (Infologic R&D), Chedy Raissi (Riot Games), and Mehdi Kaytoue (Infologic R&D)</i>	
DivLog: Log Parsing with Prompt Enhanced In-Context Learning	2457
<i>Junjielong Xu (The Chinese University of Hong Kong, Shenzhen), Ruichun Yang (The Chinese University of Hong Kong, Shenzhen), Yintong Huo (The Chinese University of Hong Kong), Chengyu Zhang (ETH Zurich), and Pinjia He (The Chinese University of Hong Kong, Shenzhen)</i>	

Where is it? Tracing the Vulnerability-relevant Files from Vulnerability Reports	2469
<i>Jiamou Sun (CSIRO, Australia), Jieshan Chen (CSIRO, Australia), Zhenchang Xing (CSIRO, Australia & Australian National University, Australia), Qinghua Lu (CSIRO, Australia), Xiwei Xu (CSIRO, Australia), and Liming Zhu (CSIRO & University of New South Wales, Australia)</i>	
Demystifying and Detecting Misuses of Deep Learning APIs	2482
<i>Moshi Wei (York University, Canada), Nima Shiri Harzevili (York University, Canada), YueKai Huang (Chinese Academy of Sciences, China), Jinqiu Yang (Concordia University, Canada), Junjie Wang (Chinese Academy of Sciences, China), and Song Wang (York University, Canada)</i>	

Analytics - II

Less is More? An Empirical Study on Configuration Issues in Python PyPI Ecosystem	2494
<i>Yun Peng (The Chinese University of Hong Kong, Hong Kong), Ruida Hu (Harbin Institute of Technology, Shenzhen), Ruoke Wang (Harbin Institute of Technology, Shenzhen), Cuiyun Gao (Harbin Institute of Technology, Shenzhen), Shuqing Li (The Chinese University of Hong Kong), and Michael R. Lyu (The Chinese University of Hong Kong)</i>	
Data-Driven Evidence-Based Syntactic Sugar Design	2506
<i>David OBrien (Iowa State University, USA), Robert Dyer (University of Nebraska-Lincoln, USA), Tien Nguyen (University of Texas at Dallas, USA), and Hriday Rajan (Iowa State University, USA)</i>	
Revisiting Android App Categorization	2518
<i>Marco Alecci (SnT, University of Luxembourg), Jordan Samhi (CISPA Helmholtz Center for Information Security Saarbrücken), Tegawendé F. Bissyandé (SnT, University of Luxembourg), and Jacques Klein (SnT, University of Luxembourg)</i>	
Are Your Requests Your True Needs? Checking Excessive Data Collection in VPA Apps	2530
<i>Fuman Xie (The University of Queensland, Australia), Chuan Yan (The University of Queensland, Australia), Mark Huasong Meng (Institute for Infocomm Research, A*STAR, Singapore), Shaoming Teng (The University of Queensland, Australia), Yanjun Zhang (Deakin University, Australia), and Guangdong Bai (The University of Queensland)</i>	
MiniMon: Minimizing Android Applications with Intelligent Monitoring-Based Debloating	2542
<i>Jiakun Liu (Singapore Management University), Zicheng Zhang (Singapore Management University), Xing Hu (Zhejiang University), Ferdian Thung (Singapore Management University), Shahar Maoz (Tel Aviv University), Debin Gao (Singapore Management University), Eran Toch (Tel Aviv University), Zhipeng Zhao (Singapore Management University), and David Lo (Singapore Management University)</i>	
Shedding Light on Software Engineering-specific Metaphors and Idioms	2555
<i>Mia Mohammad Imran (Virginia Commonwealth University), Preetha Chatterjee (Drexel University), and Kostadin Damevski (Virginia Commonwealth University)</i>	
Empirical Study of the Docker Smells Impact on the Image Size	2568
<i>Thomas Durieux (TU Delft)</i>	

MotorEase: Automated Detection of Motor Impairment Accessibility Issues in Mobile App UIs ... 2580
Arun Krishna Vajjala (George Mason University), SM Hasan Mansur (George Mason University), Justin Jose (South Lakes High School), and Kevin Moran (University of Central Florida)

Analytics - Cross-cutting with Other Areas

An Exploratory Investigation of Log Anomalies in Unmanned Aerial Vehicles 2593
Dinghua Wang (University of Technology Sydney), Shuqing Li (The Chinese University of Hong Kong), Guanping Xiao (Nanjing University of Aeronautics and Astronautics), Yepang Liu (Southern University of Science and Technology), Yulei Sui (University of New South Wales), Pinjia He (Chinese University of Hong Kong(Shenzhen)), and Michael R. Lyu (The Chinese University of Hong Kong)

ModuleGuard: Understanding and Detecting Module Conflicts in Python Ecosystem 2606
Ruofan Zhu (Zhejiang University, China), Xingyu Wang (Zhejiang University, China), Chengwei Liu (Nanyang Technological University, Singapore), Zhengzi Xu (Nanyang Technological University, Singapore), Wenbo Shen (Zhejiang University, China), Rui Chang (Zhejiang University, China), and Yang Liu (Nanyang Technological University, Singapore)

Empirical Analysis of Vulnerabilities Life Cycle in Golang Ecosystem 2618
Jinchang Hu (Army Engineering University of PLA), Lyuye Zhang (Continental-NTU Corporate Lab, Nanyang Technological University), Chengwei Liu (School of Computer Science and Engineering, Nanyang Technological University), Sen Yang (Academy of Military Science), Song Huang (College of Command and Control Engineering, Army Engineering University of PLA), and Yang Liu (School of Computer Science and Engineering, Nanyang Technological University)

Requirements

ReFAIR: Toward a Context-Aware Recommender for Fairness Requirements Engineering 2631
Carmine Ferrara (University of Salerno, Italy), Francesco Casillo (University of Salerno, Italy), Carmine Gravino (University of Salerno, Italy), Andrea De Lucia (University of Salerno, Italy), and Fabio Palomba (University of Salerno, Italy)

Analyzing and Debugging Normative Requirements via Satisfiability Checking 2643
Nick Feng (University of Toronto), Lina Marsso (University of Toronto), Sinem Gertir Yaman (University of York), Beverley Townsend (University of York), Yesugen Baatartogtokh (Smith College), Reem Ayad (University of Toronto), Victória Oldemburgo de Mello (University of Toronto), Isobel Standen (University of York), Ioannis Stefanakos (University of York), Calum Imrie (University of York), Genaina Nunes Rodrigues (University of Brasilia), Ana Cavalcanti (University of York), Radu Calinescu (University of York), and Marsha Chechik (University of Toronto)

Recovering Trace Links Between Software Documentation And Code	2655
<i>Jan Keim (Karlsruhe Institute of Technology, Germany), Sophie Corallo (Karlsruhe Institute of Technology, Germany), Dominik Fuchß (Karlsruhe Institute of Technology, Germany), Tobias Hey (Karlsruhe Institute of Technology, Germany), Tobias Telge (Karlsruhe Institute of Technology, Germany), and Anne Koziolok (Karlsruhe Institute of Technology, Germany)</i>	
TRIAD: Automated Traceability Recovery based on Biterm-enhanced Deduction of Transitive Links among Artifacts	2668
<i>Hui Gao (Nanjing University, China), Hongyu Kuang (Nanjing University, China), Wesley K. G. Assunção (North Carolina State University, USA), Christoph Mayr-Dorn (Johannes Kepler University, Austria), Guoping Rong (Nanjing University, China), He Zhang (Nanjing University, China), Xiaoxing Ma (Nanjing University, China), and Alexander Egyed (Johannes Kepler University, Austria)</i>	
 Evolution and AI	
Prism: Decomposing Program Semantics for Code Clone Detection through Compilation	2681
<i>Haoran Li (Nankai University), Siqian Wang (Nankai University), Weihong Quan (Nankai University), Xiaoli Gong (Nankai University), Huayou Su (National University of Defense Technology), and Jin Zhang (Nankai University)</i>	
Evaluating Code Summarization Techniques: A New Metric and an Empirical Characterization ..	2694
<i>Antonio Mastropaolo (Università della Svizzera italiana, Switzerland), Matteo Cimiselli (Università della Svizzera italiana, Switzerland), Massimiliano Di Penta (University of Sannio, Italy), and Gabriele Bavota (Università della Svizzera italiana, Switzerland)</i>	
Are Prompt Engineering and TODO Comments Friends or Foes? An Evaluation on GitHub Copilot	2707
<i>David OBrien (Iowa State University, USA), Sumon Biswas (Carnegie Mellon University, USA), Sayem Intiaz (Iowa State University, USA), Rabe Abdalkareem (Omar Al-Mukhtar University, Libya), Emad Shihab (Concordia University, Canada), and Hriday Rajan (Iowa State University, USA)</i>	
Automatic Semantic Augmentation of Language Model Prompts (for Code Summarization)	2720
<i>Toufique Ahmed (University of California, Davis), Kunal Suresh Pai (University of California, Davis), Premkumar Devanbu (University of California, Davis), and Earl T. Barr (University College London & Google Brain)</i>	
DSFM: Enhancing Functional Code Clone Detection with Deep Subtree Interactions	2733
<i>Zhiwei Xu (Tsinghua University), Shaohua Qiang (Tsinghua University), Dinghong Song (Tsinghua University), Min Zhou (Tsinghua University), Hai Wan (Tsinghua University), Xibin Zhao (Tsinghua University), Ping Luo (Tsinghua University), and Hongyu Zhang (Chongqing University)</i>	

Machine Learning is All You Need: A Simple Token-based Approach for Effective Code Clone Detection	2745
<i>Siyue Feng (Huazhong University of Science and Technology, China), Wenqi Suo (Huazhong University of Science and Technology, China), Yueming Wu (Nanyang Technological University, Singapore), Deqing Zou (Huazhong University of Science and Technology, China), Yang Liu (Nanyang Technological University, Singapore), and Hai Jin (Huazhong University of Science and Technology, China)</i>	

Program Binaries - Evolvability

Cross-Inlining Binary Function Similarity Detection	2758
<i>Ang Jia (Xi'an Jiaotong University, China), Ming Fan (Xi'an Jiaotong University, China), Xi Xu (Xi'an Jiaotong University, China), Wuxia Jin (Xi'an Jiaotong University, China), Haijun Wang (Xi'an Jiaotong University, China), and Ting Liu (Xi'an Jiaotong University, China)</i>	
BinaryAI: Binary Software Composition Analysis via Intelligent Binary Source Code Matching....	2771
<i>Ling Jiang (Southern University of Science and Technology), Junwen An (Southern University of Science and Technology), Huihui Huang (Southern University of Science and Technology), Qiyi Tang (Tencent Security Keen Lab), Sen Nie (Tencent Security Keen Lab), and Shi Wu (Tencent Security Keen Lab)</i>	
PPT4J: Patch Presence Test for Java Binaries	2784
<i>Zhiyuan Pan (Zhejiang University, China), Xing Hu (Zhejiang University, China), Xin Xia (Huawei, China), Xian Zhan (The Hong Kong Polytechnic University, China), David Lo (Singapore Management University, Singapore), and Xiaohu Yang (Zhejiang University, China)</i>	

Evolution - II

Compiler-directed Migrating API Callsite of Client Code	2796
<i>Hao Zhong (Shanghai Jiao Tong University) and Na Meng (Virginia Polytechnic Institute and State University)</i>	
Hard to Read and Understand Pythonic Idioms? DeIdiom and Explain Them in Non-Idiomatic Equivalent Code	2808
<i>Zejun Zhang (Australian National University & CSIRO's Data61, Australia), Zhenchang Xing (CSIRO's Data61 & Australian National University, Australia), Dehai Zhao (CSIRO's Data61, Australia), Qinghua Lu (CSIRO's Data61), Xiwei Xu (CSIRO's Data61, Australia), and Liming Zhu (CSIRO's Data61, Australia)</i>	
Exploiting Library Vulnerability via Migration Based Automating Test Generation	2820
<i>Zirui Chen (Zhejiang University, China), Xing Hu (Zhejiang University, China), Xin Xia (Huawei, China), Yi Gao (Zhejiang University, China), Tongtong Xu (Huawei, China), David Lo (Singapore Management University, Singapore), and Xiaohu Yang (Zhejiang University, China)</i>	

MUT: Human-in-the-Loop Unit Test Migration	2832
<i>Yi Gao (The State Key Laboratory of Blockchain and Data Security, Zhejiang University), Xing Hu (The State Key Laboratory of Blockchain and Data Security, Zhejiang University), Tongtong Xu (Huawei), Xia Xin (Huawei), David Lo (School of Computing and Information Systems, Singapore Management University), and Xiaohu Yang (The State Key Laboratory of Blockchain and Data Security, Zhejiang University)</i>	
Streamlining Java Programming: Uncovering Well-Formed Idioms with IdioMine	2844
<i>Yanming Yang (Zhejiang University, China), Xing Hu (Zhejiang University, China), Xin Xia (Zhejiang University, China), David Lo (Singapore Management University, Singapore), and Xiaohu Yang (Zhejiang University, China)</i>	
Fine-grained, accurate, and scalable source differencing	2856
<i>Jean-Rémy Falleri (Univ. Bordeaux, CNRS, Bordeaux INP, LaBRI, UMR 5800, Institut Universitaire de France) and Matias Martinez (Universitat Politècnica de Catalunya)</i>	
Semantic GUI Scene Learning and Video Alignment for Detecting Duplicate Video-based Bug Reports	2868
<i>Yanfu Yan (William & Mary), Nathan Cooper (William & Mary), Oscar Chaparro (William & Mary), Kevin Moran (University of Central Florida), and Denys Poshyvanyk (William & Mary)</i>	
The Classics Never Go Out of Style: An Empirical Study of Downgrades from the Bazel Build Technology	2881
<i>Mahmoud Alfadel (University of Waterloo) and Shane McIntosh (University of Waterloo)</i>	
Scaling Code Pattern Inference with Interactive What-If Analysis	2893
<i>Hong Jin Kang (University of California, Los Angeles), Kevin Wang (University of California, Los Angeles), and Miryung Kim (University of California, Los Angeles)</i>	
Context-Aware Name Recommendation for Field Renaming	2905
<i>chun hao dong (Beijing Institute of Technology), Yanjie Jiang (Peking University), Niu Nan (University of Cincinnati United States), Yuxia Zhang (Beijing Institute of Technology), and Hui Liu (Beijing Institute of Technology)</i>	
CNEPS: A Precise Approach for Examining Dependencies among Third-Party C/C++ Open-Source Components	2918
<i>Yoonjong Na (Korea University), Seunghoon Woo (Korea University), Joomyeong Lee (Korea University), and Heejo Lee (Korea University)</i>	
A Study on the Pythonic Functional Constructs' Understandability	2930
<i>Cyrine Zid (Polytechnique Montréal, Canada), Fiorella Zampetti (University of Sannio, Italy), Giuliano Antoniol (Polytechnique Montréal, Canada), and Massimiliano Di Penta (University of Sannio, Italy)</i>
