2023 International Conference on Computer Simulation and Modeling, Information Security (CSMIS)

CSMIS 2023

Table of Contents

Message from the General Chair ..... **xix**

2023 International Conference on Computer Simulation and Modeling, Information Security

Optimization Simulation of Information Transmission of Internet of Things Nodes Based on Constraint Clustering Algorithm 1
Xian Luo (Information & Communication Branch of Hubei epc, China), Ronghao Yang (Information & Communication Branch of Hubei epc, China), Weijing Yao (Information & Communication Branch of Hubei epc, China), Jundong Huang (Information & Communication Branch of Hubei epc, China), and Chen Yang (Information & Communication Branch of Hubei epc, China)

Assessment of Urban Drainage Capacity and Flood Risk Based on Computing Simulation 7
Chuanjun Tang (Beijing Capital International Airport Co., Ltd., China), Hanlin Wang (Beijing Capital International Airport Co., Ltd., China), Te Hou (Beijing Capital International Airport Co., Ltd., China), Gaoxiang Ren (Beijing Capital International Airport Co., Ltd., China), Zhipeng Liu (Beijing Capital International Airport Co., Ltd., China), Shoudong Wang (ZhengYuan Geomatics Group Co., Ltd., China), Wei Cai (ZhengYuan Geomatics Group Co., Ltd., China), Bin Xiao (ZhengYuan Geomatics Group Co., Ltd., China), and Yanbiao Wang (ZhengYuan Geomatics Group Co., Ltd., China)

Design of Network Security Storage Algorithm Based on Markov Model 13
Xiaolu Zhang (Information Center of Guangdong Power Grid Co. Ltd, China), Wuqiang Shen (Information Center of Guangdong Power Grid Co. Ltd, China), and Lei Cui (Information Center of Guangdong Power Grid Co. Ltd, China)

Analysis and Verification of Control Principle of Aspheric Numerical Control Molding Machine Tool 18
Xin Hao (Changchun Institute of Electronic Science and Technology, China) and Cuihong Wu (Changchun Institute of Electronic Science and Technology, China)

Optimal Design of Communication Digital Twin System Architecture Based on Neural Network Model 24
Lei Li (Information & Communication Branch of State Grid Hubei Electric Power Company, China), Yixi Wang (Information & Communication Branch of State Grid Hubei Electric Power Company, China), Shengwei Wang (Information & Communication Branch of State Grid Hubei Electric Power Company, China), Yuxuan Ye (Information & Communication Branch of State Grid Hubei Electric Power Company, China), and Yujie Zhang (Information & Communication Branch of State Grid Hubei Electric Power Company, China)

Construction of Hub Engineering Evaluation System Based on Intelligent Algorithms 30
Liqin Hu (Chengdu Neusoft University, China) and Hong Liu (Chengdu University of Technology, China)

Security Attack Detection Method Combining Side Channel with Fault Injection 37
Wuqiang Shen (Guangdong Power Grid Company Limited; China Southern Power Grid, China), Lei Cui (Guangdong Power Grid Company Limited, China; China Southern Power Grid, China), Guiquan Shen (Guangdong Power Grid Company Limited, China; China Southern Power Grid, China), and Xiaolu Zhang (Guangdong Power Grid Company Limited, China; China Southern Power Grid, China)

The Application of Parallel Algorithm Technology for Watershed Terrain Analysis Based on DEM 43
Na Zhang (Wuhan Institute of Design and Sciences, China)

Color Transfer Algorithm of Interior Design Based on 3D Virtual Vision and Interactive Design 49
Xiuliang Xi (Shenyang Jianzhu University, China) and Linna Liu (Shenyang Jianzhu University, China)

GBDT-Based Aircraft System Detection and Warning Model 53
Bing Liu (North China University of Science and Technology, China), Ruize Zhang (North China University of Science and Technology, China), Qixin Liu (North China University of Science and Technology, China), Zihao Xin (North China University of Science and Technology, China), Dehui Xu (North China University of Science and Technology, China), and Zhigang Di (North China University of Science and Technology, China)

Integration of Civil Engineering Intelligent Building Data System Based on BIM Technology 61
Tao Liu (Qingdao University of Technology, China) and Xiaohui Wen (Qingdao University of Technology, China)

Intelligent Music Wireless Signal Multi-Feature Evaluation System Based on ABE Algorithm 66
Dajun Zeng (Jiangxi Science and Technology Normal University, China)

Research on Automobile Sales Forecasting Model Based on Data Mining and Cloud Computing 71
Fan Yang (Guangdong University of Science& Technology, China)

Network Intrusion Detection and Dynamic Defense Method Based on Unsupervised Machine Learning 75
Qiong Wang (Southern Power Grid Digital Grid Group Information and Communication Technology Co., Ltd, China), Ming Xie (Southern Power Grid Digital Grid Group Information and Communication Technology Co., Ltd, China), Zepei Wu (Southern Power Grid Digital Grid Group Information and Communication Technology Co., Ltd, China), and Dongmei Yang (Southern Power Grid Digital Grid Group Information and Communication Technology Co., Ltd, China)

Software Design of Clinical Symptoms Diagnosis Model of Digestive Tract Diseases Based on Decision Tree 81
Yongde Cai (Yongchang Town Central Health Center, China)

Operation Technology of Unmanned Mining Robot for Coal Mine Based on Intelligent Control Technology 86
Chunpeng Li (Zhengzhou Coal Mining Machinery Intelligent Control Technology Innovation Center Co, Ltd., China) and Xingfu Zhang (Zhengzhou Coal Mining Machinery Intelligent Control Technology Innovation Center Co, Ltd., China)

Research on Fuzzy Control Algorithm of Civil Engineering Structure Vibration Based on BIM Technology 92
Yuyan Wang (Shanxi College of Applied Science and Technology, China)

Synchronous Multimedia Courseware Production System Based on Deep Learning and Intelligent Computing 97
Yi Jiang (Kunming University, China)

Research on the Optimization of Style Generation Module of Digital Clothing Design System Based on Semantic Analysis 103
Yuhan Gao (Sichuan Normal University, China) and Shasha Lin (Sichuan Normal University, China)

Optimization of Unstructured Text Data Processing Task Unloading for Smart Grid 107
Dong Wang (Information&Telecommunication Company of State Grid Gansu Electric Power Company, China), Ning Liu (Information&Telecommunication Company of State Grid Gansu Electric Power Company, China), Mingjie Yang (Information&Telecommunication Company of State Grid Gansu Electric Power Company, China), and Shuhan Zhao (Information&Telecommunication Company of State Grid Gansu Electric Power Company, China)

Computer Intelligent Composing Model Based on Characteristic Melody Mining 113
Chenfei Jia (Changzhi University, China)

Optimized Configuration and Carbon Emission Scheduling of Power Grid Based on Particle Swarm Optimization 117
Tianxiang Sun (North China Electric Power University, China), Yu He (North China Electric Power University, China), Songtao Liu (North China Electric Power University, China), Xuan Cai (Electric Power Research Institute, State Grid Hubei Electric Power Co .Ltd., China), and Zihan Qu (Electric Power Research Institute, State Grid Hubei Electric Power Co .Ltd., China)

Security Risk Control Algorithm of Financial Accounting System Based on Service-Oriented Architecture 122
Le Li (Henan Polytechnic Institute, China)

Language Application in Social Networking Activities Based on Embedded Computing 126
Ying Yang (Organization Department of Party Committee, Chengdu Polytechnic, China) and Rui Ma (Chengdu University of Traditional Chinese Medicine, China)

Optimization of Cultural Tourism Route Based on Digital Media and Ant Colony Algorithm 132
Yueping Zhuang (Xiamen University Tan Kah Kee College, China)

Simulation Application of Internet of Things and Cloud Computing Technology in Precision Dynamic Engineering Measurement Technology 137
Peixiao Lin (Guangdong Polytechnic of Science and Technology, China)

Design of Safety Monitoring and Early Warning Algorithm Based on Markov Model 143
Haibo Fang (The Second Construction Limited Company of China Construction Eighth Engineering Division, China) and Chenghang Wei (The Second Construction Limited Company of China Construction Eighth Engineering Division, China)

Systematic Financial Risk Assessment of Commercial Banks Based on Complex Network Model ... 147
Wenfang Feng (Lanzhou University of Technology, China) and Xingyu Liu (Lanzhou University of Technology, China)

Design of Comprehensive Automatic Control Algorithm for Voltage and Reactive Power of Substation Based on Fuzzy Neural Network 152
Kailin Zhu (Zhengzhou University, China) and Jian Zhang (Zhengzhou University, China)

Research on Student Classroom Behavior Recognition Based on Computer Vision 157
Meng'en Qin (Henan University, China)

Optimized Simulation Design of DDS Signal Generator Based on FPGA 163
Runguo Zheng (Beijing Royal School, China)

Rational Planning and Design of Urban Building Spatial Layout Based on Laser Point Cloud Algorithm 168
Huijuan Wang (Chongqing Metropolitan College of Science and Technology, China), Zhufang Shi (Chongqing Metropolitan College of Science and Technology, China), and Yanzhao Chen (Chongqing Branch, China West China Engineering Design and Construction Co., Ltd., China)

Design of Real Time Display Algorithm for Naked Eye 3D Images Based on Binocular Vision 174
Wenmin Wang (China Mobile Online Service Co., Ltd., China), Chunya Li (China Mobile Group Design Institute Co., Ltd, China), Jianhua Yang (China Communications Construction Group Design Institute Co., Ltd, China), Sihai Song (China Communications Construction Group Design Institute Co., Ltd, China), and Ming Cheng (China Mobile Online Service Co., Ltd., China)

Research on Financial Market Risk Management Mechanism Based on Copula Model and MATLAB Software Analysis 180
Yuyue Cong (Xi'an Eurasia University; Xidian University, China)

Simulation of Mechatronics Integrated Control Path Constraint Model Based on Grey Clustering 185
Bo Chen (Harbin Huade University, China), Yan Sun (Harbin Huade University, China), Yongbin Li (Harbin Huade University, China), and Mingjia Zhou (Harbin Huade University, China)

Design and Optimization Methods of Tourism Information System Based on Artificial Intelligence and Machine Learning 191
Shi Yang (Guangdong University of Education, China), Hai Lin (Guangdong University of Education, China), Siyuan Yang (Xiamen University Tan Kah Kee College, China), and Chaoran Tong (Guangzhou University, China)

Research on Structural Model Optimization Simulation of Magnetic Bearing Based on Deep Learning 197
Yongbin Li (Harbin Huade University, China), Mingjia Zhou (Harbin Huade University, China), Bo Chen (Harbin Huade University, China), and Yan Sun (Harbin Huade University, China)

Research on Simulation Experiment of UAV Crossing Fire Circle Based on AirSim 203
Huangkai Xue (Beijing Institute of Technology, China) and Zongxiu Shi (Beijing Institute of Technology, China)

Design of Soil Moisture Monitoring System Based on Fuzzy Control Algorithm 210
Yu Lu (Southwest Forestry University, China) and Yanxia Wang (Southwest Forestry University, China)

GIS-Based Meteorological Disaster Risk Assessment for Rice in Northeast China in the Context of Big Data 216
Lina Hu (Heilongjiang University of Technology, China), Mingjie Chen (Heilongjiang University of Technology, China), Xianwei Meng (Heilongjiang University of Technology, China), Hongbo Chu (Heilongjiang University of Technology, China), and Hexin Wang (Heilongjiang University of Technology, China)

Research on Cross-Modal Person re-ID Technology Based on Fusion of Multimodal Data 223
Eryantuo Ma (Capital Normal University, China), Jun Li (Capital Normal University, China), Zhiping Shi (Capital Normal University, China), and Na Jiang (Capital Normal University, China)

Application of Artificial Intelligence in Network Security and Network Defense 228
Xiuping Chen (Jiangxi Vocational Technical College of Industry & Trade, China)

Design of Mechatronics Automatic Control System Based on Improved Genetic Algorithm 233
Yan Sun (Harbin Huade University, China), Yongbin Li (Harbin Huade University, China), Mingjia Zhou (Harbin Huade University, China), and Bo Chen (Harbin Huade University, China)

Application of CRM Oriented Data Mining Algorithm in Power Marketing 238
Guangzeng Zhang (Anyang Vocational and Technology College, China)

Design of Road Panoramic Virtual Reality Simulation System Based on Genetic Algorithm and Virtual Reality 244
Haili Wang (Shandong Vocational College of Information Technology, China) and Deshui Sun (Shandong Vocational College of Information Technology, China)

Research on Intelligent Prediction Method of Engineering Cost System Based on SVM Algorithm 249
Yu Lei (Xi'an Eurasia University, China), Lu Zhang (Xi'an Eurasia University, China), and Lei Zhang (Xi'an Eurasia University, China)

Research on the Application of Artificial Intelligence Painting in Digital Media Illustration Design 254
Chuncheng Yu (Hubei University of Technology School of Art and Design, China)

Simulation Calculation of Seismic Performance of Raw Soil Composite wall Structure Based on Fuzzy Control Algorithm 259
Bairu Lu (Xi'an Eurasia University, China), Kun Zhang (Xi'an Shiyou University, China), and Zengfei Liang (Xi'an Eurasia University, China)

Simulation of Hydraulic Control Model of Underwater Manipulator Based on Improved Genetic Algorithm 264
Mingjia Zhou (Harbin Huade University, China), Bo Chen (Harbin Huade University, China), Yan Sun (Harbin Huade University, China), and Yongbin Li (Harbin Huade University, China)

Evaluation of the Application Effect of Building Comfort Ventilation System Based on the Internet of Things 269
Changmao Cai (Yunnan College of Business Management, China)

Research on Image Scene Classification Using Lightweight Convolutional Neural Networks Based on Fusion Attention Mechanism 275
Duanyun Chen (State Grid FuJian Electric Power CO. LTD, China), Jun Chen (Fuzhou University, China), Jiayi Han (Fuzhou University, China), Suyan Su (State Grid Fujian Xiamen Electric Power Supply Company, China), and Shu Lin (State Grid Fujian Xiamen Electric Power Supply Company, China)

Application of 3D Visualization Technology in the Design of Building Construction Models 281
Kaiqin Shi (Yunnan College of Business Management, China)

Simulation of Online Marketing Supply Chain Decision Model Based on Decision Tree Algorithm 287
Meiling Liu (Liaoning Agricultural Technical College, China), Hongyan Fu (Liaoning Agricultural Technical College, China), and Yue Zou (Liaoning Agricultural Technical College, China)

Design of Accounting Information System Based on CART Decision Tree Algorithm 293
Zhi Li (Shandong Institute of Commerce and Technology, China) and Zhongying Yang (Shandong Institute of Commerce and Technology, China)

Simulation of Social Network Information Retrieval and Classification Model Based on Graph Neural Network Algorithm 299
Jiayi Zhou (Shandong University of Technology, China)

A Multi-Robot Rapid Calibration Method for Electric Network Pole Number Plates for Spraying Operations 305
Zhenhong Zhu (State Grid Zhejiang Electric Power Co., Ltd. Yuyao Power Supply Company, China) and Wenjian Liu (State Grid Zhejiang Electric Power Co., Ltd. Yuyao Power Supply Company, China)

Simulation of Data Processing Model of Optical Fiber Sensor for Dynamic Monitoring of Mineral Resources Reserves 310
Guanglong Tian (Military Civil Integration Geological Survey Center of China Geological Survey Bureau, China), Licheng Quan (Military Civil Integration Geological Survey Center of China Geological Survey Bureau, China), Jian Cheng (Military Civil Integration Geological Survey Center of China Geological Survey Bureau, China), and Yuru Wang (Qingdao Yunjingtong Technology Co., Ltd., China)

Design of English Assisted Learning System Based on Deep Learning and Data Analysis Techniques 315
Yanhui Jing (Lanzhou Resources & Environment VOC-TECH University, China)

Short-Term Power Grid Planning Decision Model Based on Fuzzy Clustering Algorithm 320
Yan Zhang (State Grid Xinjiang Electric Power Co, LTd, China), Ya Zuo (State Grid Xinjiang Electric Power Co, LTd, China), Xiang Yin (State Grid Xinjiang Electric Power Co, LTd, China), Feihu Zhuang (State grid changji electric power supply company, China), and Zhiyu Zhang (State grid changji electric power supply company, China)

Prediction of Converter Valve Cooling Capacity Based on Multidimensional Time Series Data 326
Tuteng Chen (Kunming Bureau of China Southern Power Grid EHV Transmission Company, China), Hao Sun (Kunming Bureau of China Southern Power Grid EHV Transmission Company, China), and Shaosen Li (Kunming Bureau of China Southern Power Grid EHV Transmission Company, China)

Design of Personalized Recommendation Model for Precision Marketing Based on Collaborative Filtering Algorithm 332
Yuanyuan Li (Jiangxi Institute of Applied Science and Technology, China)

Application of Multi-Objective Genetic Algorithm in Ceramic Image Segmentation Technology 337
Aiting Pan (Shantou University, China)

Research on Digital Integrated Platform of Spacecraft Complex Structure Automatic Manufacturing Based on Artificial Intelligence Algorithm 343
Guobao Dai (Beijing Satellite Manufacturing Limited Company, China), Aijun Xu (Beijing Satellite Manufacturing Limited Company, China), Xiaojun Tang (Beijing Satellite Manufacturing Limited Company, China), and Haiyue Li (Beijing Satellite Manufacturing Limited Company, China)

Research on the Development Evaluation of Green Financial System Based on Big Data 349
Tingting Xie (Aba Teachers University, China)

Research on User Interface Design of New Energy Vehicles Based on Speech Recognition Algorithm 354
Xin Jing (Hubei Three Gorges Polytechnic, China)

Application and Innovation of Automated Vision System in Intelligent Assembly of Aircraft Panels 359
Wei Zhang (Nanjing Vocational College of Information Technology, China), Donglin Zhang (Nanjing Vocational College of Information Technology, China), Yan Xuan (Nanjing Vocational College of Information Technology, China), Yueqin Zhang (Nanjing Vocational College of Information Technology, China), and Zilong Xu (Nanjing Vocational College of Information Technology, China)

Simulation of Automatic Control Model for Wind Power Generation System Grid Connection Based on PLC Optimization Control Algorithm 364
Hui Liu (Hubei Business College, China)

Research on Display of Stock Trading Reversal Points and Abnormal Points Based on Hurst Model 370
Jiayue Xin (Capital University of Economics and Business, China)

Design of Auto-Assisted Autopilot System Based on Machine Learning Algorithm and Computer Vision 376
Maoyong Li (Zibo Technician College, China)

Computer Program Control System Based on Fluid Simulation Technology 382
Zefei Yan (Shanghai University, China)

Simulation of Software Engineering Resource Allocation Optimization Model Based on Deep Learning 387
Ping Xu (Taishan University, China)

Research on Segmentation Technology of Process Image Based on Segmentation Algorithm 392
Zhao Huang (Beijing Institute of Fashion Technology, China)

Simulation of Optimal Allocation Model of Quantum Communication Resources Based on Grey Clustering Algorithm 399
Yong Zhang (Wuhan Qingchuan University, China)

Applications Research of Deep Learning in Super-Resolution Reconstruction of Medical Image..... 405
Xu Xu (Xinjiang University, China)

Research on Radar Clutter Suppression and Target Extraction Algorithm Based on Generative Adversarial Networks 411
Hao Zhou (Nanjing Marine Radar Institute, China), Qingqing Song (Nanjing Marine Radar Institute, China), Shujun Xu (Nanjing Marine Radar Institute, China), and Ying Tang (Nanjing Marine Radar Institute, China)

Indoor Positioning Evacuation Device in Large Buildings Based On UWB Technology 417
Huaijian Liang (Shenyang University of Aerospace University, China), Danhong Chen (Shenyang University of Aerospace University, China), Tianyu Yi (Shenyang University of Aerospace University, China), and Shiyi Zhou (Shenyang University of Aerospace University, China)

Design of Fuzzy Vehicle Scheduling Algorithm for Logistics Distribution Based on Improved Ant Colony Algorithm 423
Jingjing Yang (Hubei Three Gorges Polytechnic, China)

Automotive Engine Fault Diagnosis System Based on Information Fusion Technology 428
Shujiao Yang (Liaoning Vocational University of Technology, China)

Simulation Research on User Electricity Consumption Feature Model Based on Data Mining Algorithms 434
Qian Ma (State Grid Xinjiang Electric Power Co, LTd, China), Tianyu Chen (State Grid Xinjiang Electric Power Co, LTd, China), Xia Yang (State Grid Xinjiang Electric Power Co, LTd, China), Xu Zhu (State Grid Xinjiang Electric Power Co, LTd, China), and Tao Wang (State Grid Xinjiang Electric Power Co, LTd, China)

Design of Laboratory Intelligent Monitoring System Based on ZigBee Technology 440
Lu Gao (Bohai University, China)

Research Analysis and Optimization Suggestions on Smooth Transportation of Baggage Handling System 445
Xiang Gao (The Civil Aviation Chengdu Logistics Technology Co., Ltd., The Second Research Institute of Civil Aviation Administration of China, China), Lina Tang (Chongqing Jiangbei International Airport Expansion Command, China), and Bin Wu (The Civil Aviation Chengdu Logistics Technology Co., Ltd., The Second Research Institute of Civil Aviation Administration of China, China)

Design of Optimization Model and System Architecture for Container Multimodal Transport 452
Wei Zhang (Bohai University, China) and Wei Song (Bohai University, China)

Research on Addressing Problem Based on Optimal Parking Model 458
Yuan Gao (Northeastern University at Qinhuangdao, China), Junfei Huang (Northeastern University at Qinhuangdao, China), and Xin Lv (Northeastern University at Qinhuangdao, China)

Analysis of Network Information Security Technologies in the Digital Intelligent Security Strategy 465
Yingshi Feng (Jinan University, China)

Analysis of the Integration of Computer Network Security and Big Data Technology 471
Lei Zhan (Tianjin University of Technology, China)

Construction and Application of Prediction Model for Fast Estimation of Aerodynamic Optical Effects Based on ISSA-BP Algorithm 476
Jiabao Jia (High School Attached to Shandong Normal University, China)

Information Security Protection Method for Computer Networks Considering Big Data Clustering Algorithm 481
Yapeng Han (Tianjin University of Technology, China)

Design of Hydrogen Energy Production and Storage System Based on Computer Simulation and Optimization 486
Yuhao Yang (AISSU, China)

Geometry Problem Solving Based on Deep Learning 493
Xiyin Zeng (South China Normal University, China)

Design of Enterprise Financial and Economic Risk Early Warning System Based on Machine Learning Algorithms 497
Hanjun Li (Wenhua College, China) and Donghong Zhang (Wenhua College, China)

Risk Identification Management of IT Projects Based on Java Technology Platform 503
Cunwei Zhao (Polytechnic University of Catalonia, Spain)

Digital Media Art Virtual Image Construction System Based on AI Intelligent Technology 508
Xianyi Ye (Xihua University, China)

Short-Term Wind Velocity Forecast Based on Two-Stage Disassemble Strategy 514
Peilong Guan (Guangdong University of Technology, China)

Analysis of Laboratory Management Platform Construction Supported by Apriori Algorithm 518
Xiangyu Wang (Mianyang City College, China)

Software Informatization Security Platform in Big Data Environment 523
Cunwei Zhao (Polytechnic University of Catalonia, Spain)

Construction of Intelligent Financial Decision Support System Based on Computer 529
Bing Han (Zhanjiang University of Science and Technology; West Guangdong Digital Intelligent Accounting Development Research Center, China)

Research on Glass Composition Classification Model Based on Random Forest and System Clustering 535
Shiwei Xiong (Jiangsu University of Science and Technology, China), Minhui Song (Jiangsu University of Science and Technology, China), and Tianyu Shi (Jiangsu University of Science and Technology, China)

Research on Intelligent Network Deception Technology for Attack Trapping 542
Hang Yi (Beijing Aerospace Wanyuan Technology Co, Ltd, China), Ruliang Lin (Beijing Aerospace Wanyuan Technology Co, Ltd, China), Hongru Song (Beijing Aerospace Wanyuan Technology Co, Ltd, China), Lizhu Wang (Beijing Aerospace Wanyuan Technology Co, Ltd, China), Huiping Zhou (Beijing Aerospace Wanyuan Technology Co, Ltd, China), and Longhui Qi (Beijing Aerospace Wanyuan Technology Co, Ltd, China)

Research on Modeling and Simulation of Pedestrian Street Motion Based on Fuzzy Inference and Path Selection 547
Wei Wang (People's Public Security University of China, China) and Junyu Li (People's Public Security University of China, China)

Research on Attack Trapping Methods for Multi-Stage Infiltration Attacks 556
Lu Hou (Beijing Aerospace Wanyuan Technology Co, Ltd, China), Jie Han (Beijing Aerospace Wanyuan Technology Co, Ltd, China), Bin Yang (Beijing Aerospace Wanyuan Technology Co, Ltd, China), Yaoyao Guo (Beijing Aerospace Wanyuan Technology Co, Ltd, China), Xiaonan Wang (Beijing Aerospace Wanyuan Technology Co, Ltd, China), and Gelixue Yang (Beijing Aerospace Wanyuan Technology Co, Ltd, China)

Mesoscopic Parameter Calibration of Granite Particles Based on Neural Network and Discrete Element Triaxial Numerical Simulation Test 561
Lewen Zhang (Shandong University, China), Hao Deng (Shandong University, China), Zhilei Song (Shandong University, China), and Wenhu Wang (Shandong University, China)

Digital Graphic Technology of Electrical Circuits in Transformer Station Based on Wireless Intelligent Network 566
Yuankai Li (Limited Company of Shenzhen Power Supply Bureau, China) and Di Wang (Limited Company of Shenzhen Power Supply Bureau, China)

Blockchain Technology for Security Issues and Challenges in IOT 572
Zhengping Ruan (Aostar Information Technologies Co., Ltd., China)

Design Research on Information System of Intelligent Escort Based on Deep Learning 581
Zixuan Ji (Quanzhou University of Information Engineering, Slippery Rock University of Pennsylvania, China)

Kinematic Analysis of a Jumping Robot Based on the Jumping Mechanism 586
Yong Li (Hulunbuir Vocational Technical College, China), Beixuan Lyu (Hulunbuir Vocational Technical College, China), and Shugang Zhang (Hulunbuir Vocational Technical College, China)

Implementation of Malicious Encrypted Traffic Identification System Based on Transport Layer Behavior Characteristics 590
Kai Cheng (Central China Branch of State Grid Corporation of China, China), Tao Liu (Central China Branch of State Grid Corporation of China, China), Luming Li (State Grid Jiangxi Electric Power Co., Ltd. Information Communication Branch, China), Rixuan Qiu (State Grid Jiangxi Electric Power Co., Ltd. Information Communication Branch, China), Zhan Wu (Central China Branch of State Grid Corporation of China, China), Qiang Wang (Central China Branch of State Grid Corporation of China, China), Liang Liang (Central China Branch of State Grid Corporation of China, China), Mu Ren (Central China Branch of State Grid Corporation of China, China), and Chaonan Qin (Hubei Huazhong Electric Power Technology Development Co., Ltd, China)

Research on Personnel Evacuation Problem Based on Cellular Automata Model 597
Yan Li (Shandong University of Science and Technology, China)

Research on Agrometeorological Monitoring System Based on Wireless Sensor Network 603
Yunfeng Duan (LanZhou Resources & Environment Voc-Tech University, China)

Study on Optimal Damping Coefficient of Wave Energy Device Based on Single Objective Optimization Model 607
Chengwei Yang (Dalian Maritime University, China), Yule Ding (Dalian Maritime University, China), and Naizhi He (Dalian Maritime University, China)

Storage and Retrieval of Water Conservancy Remote Sensing Data in Cloud Computing Environment 614
Dan Wang (Guangdong Polytechnic of Water Resources and Electric Engineering, China), Zichen Li (Guangdong Polytechnic of Water Resources and Electric Engineering, China), and Jiangyue Liu (Urumqi Vocational University, China)

Design of Maximum Power of wave Energy Based on Differential Equation 621
Yi Zhang (Donghua University, China), Qiulin Lu (Donghua University, China), and Qingxiang Li (Donghua University, China)

Exploration on Data Mining Algorithms for University Information Systems Based on Big Data Environment 626
Chunhua Cai (Mudanjiang Normal University, China)

Optimization Design of Underwater Vehicle Based on TRIZ Theory 633
Yang Zhou (Northeastern University, China), Yichen Chu (Northeastern University, China), Yahui Wang (Northeastern University, China), Yunan Zhong (Northeastern University, China), Mingzheng Bao (Northeastern University, China), and Mingxu Ma (Northeastern University, China)

Optimization Model and Algorithm for Fresh Agricultural Products Supply Chain Management Based on the Internet of Things and Big Data 637
Yunfei Xu (Shandong Guonong Logistics Technology Co. Ltd., China), Xianjun Wang (Shandong Institute of Commerce and Technology, China), and Huaizhi Yu (Shandong Institute of Commerce and Technology, China)

Customer Churn Prediction Based on Interpretable Machine Learning Algorithms in Telecom Industry 644
Liwen Ou (New York University, USA)

Design and Improvement of Recommendation System Based on Spark Framework 648
Haoyi Wu (Harbin Institute of Technology (Weihai), China)

Future Job Stability Prediction Based on Multiple Machine Learning Algorithms 654
Yihan Wang (Monash University, Australia)

Research on Quality Control Algorithm of Power Grid Big Data Based on Artificial Intelligence 659
Bowen Sun (State Grid Xinjiang Electric Power Co., LTD. Information and Telecommunication Company, China), Liu Yang (State Grid Xinjiang Electric Power Co., LTD. Information and Telecommunication Company, China), Tao Wang (State Grid Xinjiang Electric Power Co., LTD. Information and Telecommunication Company, China), Jiangtao Guo (State Grid Xinjiang Electric Power Co., LTD. Information and Telecommunication Company, China), and Hong Li (State Grid Xinjiang Electric Power Co., LTD. Information and Telecommunication Company, China)

Research on Intelligent Construction Prefabricated Building Modeling System Based on Computer Big Data Technology 666
Lixian Wei (Nanning College of Technology, China)

Enhancement of VR Movie Experience Effect Based on Collaborative Filtering Algorithm 671
Chen Lan (Northwest Normal University, China) and Ruxuan Zhou (Northwest Normal University, China)

Research on Urban Green Public Building Form Design Based on Computer Artificial Intelligence 676
Wenjing Li (Chongqing Metropolitan College of Science and Technology, China) and Panpan Jiang (China Merchants Chongqing Transportation Research and Design Institute Co., Ltd., China)

Co-Simulation of Metal Structure of Bridge Crane Based on Adams & Simulink 681
Huang Yanyun (Chongqing Special Equipment Inspection and Research Institute; Key Laboratory of Electromechanical Equipment Security in Western Complex Environment for State Market Regulation, China), Qiu Yongjun (Chongqing Special Equipment Inspection and Research Institute; Key Laboratory of Electromechanical Equipment Security in Western Complex Environment for State Market Regulation, China), Zhang Lei (Chongqing Special Equipment Inspection and Research Institute; Key Laboratory of Electromechanical Equipment Security in Western Complex Environment for State Market Regulation, China), Kang Ligui (Chongqing Special Equipment Inspection and Research Institute; Key Laboratory of Electromechanical Equipment Security in Western Complex Environment for State Market Regulation, China), Yuan Jingjie (Chongqing Special Equipment Inspection and Research Institute; Key Laboratory of Electromechanical Equipment Security in Western Complex Environment for State Market Regulation, China), Huang Song (Chongqing Special Equipment Inspection and Research Institute; Key Laboratory of Electromechanical Equipment Security in Western Complex Environment for State Market Regulation, China), and Yang Heng (Taiyuan University of Science and Technology, China)

Research on Data-Intensive Computing of High Energy Physics Experiments Based on Cloud Computing Technology 690
Fang Li (Qingdao Institute of Technology, China)

Co-Simulation of Running Mechanism System of Bridge Crane Based on Electromechanical Coupling Model 695
Huang Yanyun (Chongqing Special Equipment Inspection and Research Institute; Key Laboratory of Electromechanical Equipment Security in Western Complex Environment for State Market Regulation, China), Qiu Yongjun (Chongqing Special Equipment Inspection and Research Institute; Key Laboratory of Electromechanical Equipment Security in Western Complex Environment for State Market Regulation, China), Zhang Lei (Chongqing Special Equipment Inspection and Research Institute; Key Laboratory of Electromechanical Equipment Security in Western Complex Environment for State Market Regulation, China), Kang Ligui (Chongqing Special Equipment Inspection and Research Institute; Key Laboratory of Electromechanical Equipment Security in Western Complex Environment for State Market Regulation, China), Yuan Jingjie (Chongqing Special Equipment Inspection and Research Institute; Key Laboratory of Electromechanical Equipment Security in Western Complex Environment for State Market Regulation, China), Huang Song (Chongqing Special Equipment Inspection and Research Institute, China; Key Laboratory of Electromechanical Equipment Security in Western Complex Environment for State Market Regulation, China), and Yang Heng (Taiyuan University of Science and Technology, China)

Fault Diagnosis and Prediction of Power System Based on Convolutional Neural Network 701
Pengzhou Chen (Southeast University, China)

Research on Key Technologies of Big Data Platform for Operation and Maintenance of Cockpit Based on Neural Network 705
Gaofeng Shen (State Grid Jlangsu Economic Research Institute, China), Min Zhang (State Grid Jlangsu Economic Research Institute, China), Xuanjun Zong (State Grid Jlangsu Economic Research Institute, China), Sheng Zou (State Grid Jlangsu Economic Research Institute, China), and Xiang Fang (State Grid Jlangsu Economic Research Institute, China)

Research on Unmanned Warehouse Scene Monitoring Method Based on Improved YOLO V5s 710
Jun Zhang (Nari Technology Nanjing Control Systems Co., Ltd., China), Dongliang Wang (Nari Technology Nanjing Control Systems Co., Ltd., China), Chuanyi Liu (Nari Technology Nanjing Control Systems Co., Ltd., China), and Junxing Wu (Nari Technology Nanjing Control Systems Co., Ltd., China)

Research on Power Grid Disaster Prediction and Early Warning Model Based on BP Neural Network 715
Hongwei Song (State Grid Tianshui Power Supply Company, China), JiangLong Nie (State Grid Gansu Electric Power Company, China), Liping Wang (State Grid Gansu Electric Power Company, China), Liang Tan (State Grid Tianshui Power Supply Company, China), and Gong Chen (State Grid Tianshui Power Supply Company, China)

Optimization of Data Asset Management and Sharing in Yantian Power Supply Bureau Based on Blockchain Smart Contracts 720
Hongshan Yang (Shenzhen Power Supply Co., Ltd., China), Chong Zhang (Shenzhen Power Supply Co., Ltd., China), Kai Zhu (Shenzhen Power Supply Co., Ltd., China), Zhanhua Huang (Shenzhen Power Supply Co., Ltd., China), Minghui Hu (Eptc (Beijing) Electric Power Research Institute, China), and Yuhang Ou (Eptc (Beijing) Electric Power Research Institute, China)

Author Index **727**
