2023 19th International Conference on Mobility, Sensing and Networking (MSN)

MSN 2023

Table of Contents

Message from the General Chairs ..... **xxiv**
Message from the Program Chairs ..... **xxv**
Organizing Committee ..... **xxvii**
Technical Program Committee ..... **xxviii**
Sponsors ..... **xxxiii**
Keynotes ..... **xxxiv**
SoftIoT 2023 Workshop ..... **xxxviii**
NMIC 2023 Workshop ..... **xl**
AI2OT 20223 Workshop ..... **xli**
MetaSCN 2023 Workshop ..... **xlii**

Part I: MSN 2023 Main Conference

Track 1: Mobile & Wireless Sensing and Networking

Session 1: Sensing, Monitoring, and Tracking Systems

MMHeart: An Efficient Heartbeat Monitoring System Based on MIMO mmWave Radar 1
Linqing Gui (Nanjing University of Posts and Telecommunications, China), Ling Deng (Nanjing University of Posts and Telecommunications, China), Cheng Peng (Nanjing University of Posts and Telecommunications, China), Hui Cai (Nanjing University of Posts and Telecommunications, China), Biyun Sheng (Nanjing University of Posts and Telecommunications, China), Zhengxin Guo (Nanjing University of Posts and Telecommunications, China), and Fu Xiao (Nanjing University of Posts and Telecommunications, China)

Effi-MAOT: A Communication-Efficient Multi-Camera Active Object Tracking 9
Maolong Yin (Northwestern Polytechnical University, China), Zhuo Sun (Northwestern Polytechnical University, China), Bin Guo (Northwestern Polytechnical University, China), and Zhiwen Yu (Northwestern Polytechnical University, China)

LiDAR Based Cooperative Sensing in Vehicular Edge Computing 17
Luyao Jiang (Chongqing university, China), Kai Liu (Chongqing university, China), Chunhui Liu (Chongqing university, China), Hualing Ren (Chongqing university, China), Guozhi Yan (Chongqing university, China), Feiyu Jin (Chongqing university, China), and Songtao Guo (Chongqing university, China)

PAssTrack: Practical and Accurate Passive Human Tracking System Using Commodity Wi-Fi 24
Boxiao Zhang (University of Science and Technology of China, China), Panlong Yang (Nanjing University of Information and Science Technology, China), Yubo Yan (University of Science and Technology of China, China), Xin He (Nanjing University of Information and Science Technology, China), and Weiwei Jiang (Nanjing University of Information and Science Technology, China)

LoCount: Long-distance Crowd Counting Based on LoRa Signal 32
Sihan Ma (Nanjing University of Aeronautics and Astronautics, China), Xiangmao Chang (Nanjing University of Aeronautics and Astronautics, China), Yifang Zhang (Nanjing University of Aeronautics and Astronautics, China), and Lele Zheng (Nanjing University of Aeronautics and Astronautics, China)

Session 2: Crowd Sensing and Mobile Computing

Age-of-Information Driven Mobile Crowdsensing in Wireless Edge Computing 40
Shan Su (Northwestern Polytechnical University, China), Haixing Xu (Northwestern Polytechnical University, China), Liang Wang (Northwestern Polytechnical University, China), Bin Guo (Northwestern Polytechnical University, China), and Zhiwen Yu (Northwestern Polytechnical University, China)

GRAIM: Game and Reverse Auction Based Incentive Mechanism in Mobile Crowd Sensing 48
Guisong Yang (University of Shanghai for Science and Technology, China), Jinwei Wu (University of Shanghai for Science and Technology, China), Jiacai Li (University of Shanghai for Science and Technology, China), Xingyu He (University of Shanghai for Science and Technology, China), Yunhuai Liu (Peking University, China), and Fanglei Sun (ShanghaiTech University, China)

WiFi-based Device-free Passive Multi-targets Localization Using Multi-Label Learning .....N/A
Xinping Rao (Jiangxi Normal University, China), Lianghuang Huang (Jiangxi Normal University, China), Yugen Yi (Jiangxi Normal University, China), and Min Yu (Jiangxi Normal University, China)

An Energy-Efficient Smartphone Positioning Scheme by Fusing WiFi, GPS and PDR 64
Yankan Yang (Inner Mongolia University, China) and Baoqi Huang (Inner Mongolia University, China)

Impact of Feature Selection and CIR Window Length on NLoS Classification for UWB Systems 72
Elisei Ember (Pro2Future GmbH, Austria; Graz University of Technology, Austria), Jesus Pestana (Pro2Future GmbH, Austria), Michael Krisper (Pro2Future GmbH, Austria; Graz University of Technology, Austria), Michael Stocker (Graz University of Technology, Austria), Kay Roemer (Graz University of Technology, Austria), Carlo Alberto Boano (Graz University of Technology, Austria), and Pablo Corbalán Pelegrín (NXP Semiconductors Austria GmbH & Co KG, Austria)

Session 3: Networking Protocols and Optimization

Software-Defined Collaborative Scheduling of Computing and Network Resources 81
Bo Wang (Beijing University of Posts and Telecommunications, China), Zihui Luo (Beijing University of Posts and Telecommunications, China), Xiaolong Zheng (Beijing University of Posts and Telecommunications, China), Liang Liu (Beijing University of Posts and Telecommunications, China), and Huadong Ma (Beijing University of Posts and Telecommunications, China)

TSFCC: The Two-Stage Fast Congestion Control Algorithm Based on Software Defined Networking 89
Hongxiang Wang (Nanjing University of Science and Technology, China), Yifei Lu (Nanjing University of Science and Technology, China), and Zhen Wang (Nanjing University of Science and Technology, China)

An Adaptive MAC Protocol for Energy Harvesting Wireless Sensor Networks in Harsh Environment 97
Fei Gao (Inner Mongolia University, China), Wuyungerile Li (Inner Mongolia University, China), Nisuna Bao (Inner Mongolia University, China), and Bing Jia (Inner Mongolia University, China)

Dynamic Power Control Method Based on Stacked SRU Network Combined with NoisyNet DQN for CRN 105
Lei Wang (Guangdong University of Technology, P. R. China), Yonghua Wang (Guangdong University of Technology, P. R. China), and Bingfeng Zheng (Guangdong University of Technology, P. R. China)

Deep Reinforcement Learning Based Channel Allocation for Channel Bonding Wi-Fi Networks 113
Yan Zhong (Xiamen university, China), Hao Chen (Xiamen university, China), Wei Liu (Xiamen university, China), LiZhao You (Xiamen university, China), Taotao Wang (Shenzhen University, China), and Liqun Fu (Xiamen university, China)

Session 4: UAV and Satellite Network

Handover Probability in 3D Mobile UAV Cellular Networks 120
Siyuan Zhou (Hohai University, China), Xiaojing Liu (Hohai University, China), Bin Tang (Hohai University, China), and Guoping Tan (Hohai University, China)

Secure Ultra-reliable and Low Latency Communication in NOMA-UAV Networks 127
Xiao Zhao (Qufu Normal University, China), Kan Yu (Macau University of Science and Technology, China), Dong Li (Macau University of Science and Technology, China), Xiaowu Liu (Qufu Normal University, China), and Chuanwen Luo (Beijing Forestry University, China)

An Interference Mitigation Strategy for LEO Satellite Systems based on Adaptive Beamforming with Sidelobe Suppression 135
Huadong Guo (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Weiqing Huang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Wen Wang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Jinglong Guo (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Zhaohua Qiu (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)

Handover Analysis with Spatially Correlated Blockage Model 143
Siyuan Zhou (Hohai University, China), Xiaofan Yu (Hohai University, China), Bin Tang (Hohai University, China), and Zhihao Qu (Hohai University, China)

Distributed Cooperative Search Algorithm with Information Screening 151
Chengliang Wang (Chongqing University, China) and Jiayi He (Chongqing University, China)

Track 2: Edge Computing, IoT and Digital Twins

Session 1: Federated Learning

Toward Quality-Aware Reverse Auction-Based Incentive Mechanism for Federated Learning 159
Jialing Ni (Zhejiang Normal University), Pan Qi (Wuhan University of Science and Technology), and Jianfeng Lu (Wuhan University of Science and Technology)

Heterogeneity-Aware Federated Learning with Adaptive Local Epoch Size in Edge Computing 167
Wenying Yao (Shanghai University), Tong Liu (Shanghai University), Yangguang Cui (Shanghai University), and Yanmin Zhu (Shanghai Jiao Tong University)

Communication Efficient Personalized Federated Learning via Hierarchical Clustering and Layer-wise Aggregation 175
Mingchang Shuang (Nanjing University of Aeronautics and Astronautics, China), Zhe Zhang (Nanjing University of Aeronautics and Astronautics, China), and Yanchao Zhao (Nanjing University of Aeronautics and Astronautics, China)

The Improved Data Aggregation Scheme for Wireless Sensor Networks Based on Robust Chinese Remainder Theorem 183
Jinxin Zhang (University of Science and Technology of China, China) and Fuyou Miao (University of Science and Technology of China, China)

Session 2: Edge Computing

EKDF: An Ensemble Knowledge Distillation Framework for Robust Collaborative Inference on Heterogeneous Edge Devices 191
Shangrui Wu (Hong Kong Baptist University, Hong Kong; BNU-HKBU United International College (UIC), China), Yupeng Li (Department of Interactive Media, Hong Kong Baptist University, Hong Kong), Yang Xu (Hunan University, China), Qin Liu (Hunan University, China), Weijia Jia (Beijing Normal University, China; Department of Interactive Media, Hong Kong Baptist University, Hong Kong), and Tian Wang (Beijing Normal University, China; Department of Interactive Media, Hong Kong Baptist University, Hong Kong)

A Meta Reinforcement Learning-Based Scheme for Adaptive Service Placement in Edge Computing 199
Jianfeng Rao (Shanghai University, China), Tong Liu (Shanghai University, China), Yangguang Cui (Shanghai University, China), and Yanmin Zhu (Shanghai Jiao Tong University, China)

Lyapunov-Based Computation Rate Maximization for Wireless Powered Edge Computing 207
Senlei Bao (Zhejiang University of Technology), Shubin Zhang (Zhejiang University of Technology), Kaikai Chi (Zhejiang University of Technology), Xiaolong Chen (JinHua Polytechnic), and Wei Gao (China Information and Communication Technology Mobile Communication Equipment Co., Ltd\. (CICTM))

ECADA: An Edge Computing Assisted Delay-Aware Anomaly Detection Scheme for ICS 215
Chao Sang (Shanghai Jiao Tong University, China), Jianhua Li (Shanghai Jiao Tong University, China), Jun Wu (Shanghai Jiao Tong University, China; Waseda University, Japan), and Wu Yang (Harbin Engineering University, China)

A Method for Person Re-Identification and Trajectory Tracking in Cross-Device Edge Environments 223
Jian An (Xi'an Jiaotong University, China), Yunxiang Zhao (Xi'an Jiaotong University, China), Feifei Wang (Henan Jiaoyuan Engineering Technology Group Co., LTD, China), Xin He (School of Software, Henan University, China), and Xiaolin Gui (Xi'an Jiaotong University, China)

Session 3: Task Offloading

Joint Task Scheduling and Container Image Caching in Edge Computing 230
Fangyi Mou (BNU-HKBU United International College, China; Beijing Normal University, China), Zhiqing Tang (Beijing Normal University, China; Yunnan Key Laboratory of Software Engineering, China), Jiong Lou (Shanghai Jiao Tong University, China), Jianxiong Guo (BNU-HKBU United International College, China; Beijing Normal University, China), Wenhua Wang (Beijing Normal University, China), and Tian Wang (BNU-HKBU United International College, China; Beijing Normal University, China)

QoS Aware Resource Management in Mobile Edge Computing for Emerging Artificial Intelligence (AI) Applications 238
Zimo Ma (Nanyang Technological University, Singapore) and Jun Zhao (Nanyang Technological University, Singapore)

Deep Reinforcement Learning for QoE-Aware Offloading in Space-Terrestrial Integrated Networks 246
Xia Deng (Guangzhou University, China), Guole Lin (Guangzhou University, China), Le Chang (Guangdong University of Technology, China), and Fei Tong (Southeast University, China)

ROIAdaptor: Adaptive Task Offloading of ROI-Encoded Videos for Edge Video Analytics 254
Zhenxuan Xu (Southeast university, China), Xiaolin Guo (Southeast university, China), Zhaowu Huang (Southeast university, China), Shucun Fu (Southeast university, China), and Fang Dong (Southeast university, China)

Dynamic Content Cache Strategy Based on Content Prediction in the Internet of Vehicles 262
Shujuan Tian (Hunan International Scientific and Technological Cooperation Base of Intelligent Network, Xiangtan University, China), Song Zou (Guangdong Baiyun University, China), Yi Tan (Hunan International Scientific and Technological Cooperation Base of Intelligent Network, Xiangtan University, China), Dongsu Shen (Hunan International Scientific and Technological Cooperation Base of Intelligent Network, Xiangtan University, China), and Yanchun Li (Hunan International Scientific and Technological Cooperation Base of Intelligent Network, Xiangtan University, China)

Session 4: IoT and Digital Twins

DPG-DT: Differentially Private Generative Digital Twin for Imbalanced Learning in Industrial IoT 270
Siyuan Li (Shanghai Jiao Tong University, China; Shanghai Key Laboratory of Integrated Administration Technologies for Information Security, China), Xi Lin (Shanghai Jiao Tong University, China; Shanghai Key Laboratory of Integrated Administration Technologies for Information Security, China), Gaolei Li (Shanghai Jiao Tong University, China; Shanghai Key Laboratory of Integrated Administration Technologies for Information Security, China), Lixing Chen (Shanghai Jiao Tong University, China; Shanghai Key Laboratory of Integrated Administration Technologies for Information Security, China), Siyi Liao (China United Network Communication Co., Ltd), Jing Wang (Shanghai Jiao Tong University, China; Shanghai Key Laboratory of Integrated Administration Technologies for Information Security, China), and Jianhua Li (Shanghai Jiao Tong University, China; Shanghai Key Laboratory of Integrated Administration Technologies for Information Security, China)

Reinforcement Learning Based Friendly Jamming for Digital Twins Against Active Eavesdropping 277
Kunze Li (Xiamen University, China), Yuxiao Ren (Xiamen University, China), Zhiping Lin (Xiamen University, China), and Liang Xiao (Xiamen University, China)

ACORN: Adaptive Compression-Reconstruction for Video Services in 5G-U Industrial IoT 285
Jiale Lei (Department of Computer Science and Engineering, Shanghai Jiao Tong University, China), Peihao Yang (Yunnan Dali Research Institute of Shanghai Jiao Tong University, China), Linghe Kong (Department of Computer Science and Engineering, Shanghai Jiao Tong University, China), Yehan Ma (Department of Computer Science and Engineering, Shanghai Jiao Tong University, China), Xingjian Lu (East China Normal University, China), Deyu Lin (Department of Computer Science and Engineering, Shanghai Jiao Tong University, China), Guihai Chen (Department of Computer Science and Engineering, Shanghai Jiao Tong University, China), and E Zhao (Aerospace Technology Holding Group Co., Ltd, China)

Accurate Deep Learning Inference Latency Prediction over Dynamic Running Mobile Devices 293
Junquan Fan (University of Science and Technology of China, China), Jiahui Hou (University of Science and Technology of China, China), and Xiangyang Li (University of Science and Technology of China, China)

Mobile User Pairing Scheme in NOMA-Enabled Backscatter Communication Networks 301
Tingpei Huang (China University of Petroleum East China, China), Shiyu Guo (China University of Petroleum East China, China), Hu Zhu (China University of Petroleum East China, China), Jianhang Liu (China University of Petroleum East China, China), and Shibao Li (China University of Petroleum East China, China)

Track 3: Security, Privacy, Trust, and Blockchain

Session 1: Watermarking and Fingerprinting

Adaptive Robust Watermarking for Color Images 309
Bingling Luo (Sichuan University, China), Hongxia Wang (Sichuan University, China), Fei Zhang (Sichuan University, China), Jinghong Xia (Sichuan University, China), and Heng Wang (Sichuan University, China)

Living in the Past: Analyzing BLE IoT Devices Based on Mobile Companion Apps in Old Versions 317
Jianqi Du (Shandong University, China), Zidong Zhang (Shandong University, China), Fenghao Xu (Southeast University, China; The Chinese University of Hong Kong, China), and Wenrui Diao (Shandong University, China)

MASA: Measurement and Analysis of MAC Address Randomization with Sniffer Array 325
Yu Yu (Southeast University, China), Yulian Pan (Southeast University, China), Wenjia Wu (Southeast University, China), and Ming Yang (Southeast University, China)

Web Fingerprint Defense with Timing-assistant Traffic Burst Shaping 333
Bo Chen (Anhui University of Technology, China; Anhui Province Key Laboratory of Digital Twin Technology in Metallurgical Industry, China), Chen Yang (Anhui University of Technology, China; Anhui Engineering Research Center for Intelligent Applications and Security of Industrial Internet, China), Can Wang (Anhui University of Technology, China; Anhui Province Key Laboratory of Digital Twin Technology in Metallurgical Industry, China), and Xuangou Wu (Anhui University of Technology, China; Anhui Province Key Laboratory of Digital Twin Technology in Metallurgical Industry, China)

Session 2: Defense

Crossfire Attack Defense Method Based on Virtual Topology 341
Lei Guo (University of Jinan, China), Shan Jing (University of Jinan, China), Liang Wei (Jiangsu Future Networks Innovation Institute, China), and Chuan Zhao (Quan Cheng Laboratory, China)

ShuffleCAN: Enabling Moving Target Defense for Attack Mitigation on Automotive CAN 351
Huiping Qian (Nanjing University of Aeronautics and Astronautics, China), Hao Han (Nanjing University of Aeronautics and Astronautics, China), Xiaojun Zhu (Nanjing University of Aeronautics and Astronautics, China), and Fengyuan Xu (Nanjing University, China)

A Lightweight Zone Authentication Scheme with Auto-Refreshing Pseudonyms for C-V2X 359
Xijie Ba (Southwest University, Chongqing, China), Jiaqi Yang (Southwest University, Chongqing, China), and Cong Ma (Southwest University, Chongqing, China)

An Improved Capsule Network for DGA Domain Detection 367
Hongyu Yang (Civil Aviation University of China, China), Tao Zhang (Civil Aviation University of China, China), Ze Hu (Civil Aviation University of China, China), Liang Zhang (The University of Arizona, USA), and Xiang Cheng (Yangzhou University, China)

A Novel Permission Filtering Approach for Android Malware Detection and Malware Family Classification 374
Jiyun Yang (Chongqing University, China), Can Gui (Chongqing University, China), Zhibo Zhang (Chongqing University, China), and Wanli Liu (Chongqing University, China)

Session 3: Anomaly Detection

CNN-PSO-KELM: A Deep Learning Intrusion Detection Model for Imbalanced IoT Data 382
Fei Lv (Institute of Information Engineering, Chinese Academy of Sciences, China), Rongkang Sun (Shenyang Aerospace University, China), Hangyu Wang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Meng Zhang (Shenyang Aerospace University, China), Shuaizong Si (Institute of Information Engineering, Chinese Academy of Sciences, China), Zhe Bu (Institute of Security, China Academy of Information and Communications Technology, China), Chengsheng Zhou (Institute of Security, China Academy of Information and Communications Technology, China), and Limin Sun (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)

Robust Intrusion Detection for Industrial IoT 390
Huaishuo Ren (Tianjin University of Technology, China), Liangyi Gong (Computer Network Information Center, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China; Henan University Of Economics And Law, China), Xiuliang Mo (Tianjin University of Technology, China), Lanqi Yang (University of Chinese Academy of Sciences, China), and Zuwei Yin (Henan University Of Economics And Law, China)

Communication-Efficient Federated Learning for Network Traffic Anomaly Detection 398
Xiao Cui (Ministry of Education, Shandong Computer Science Center (National Supercomputer Center in Jinan), Qilu University of Technology (Shandong Academy of Sciences), China), Xiaohui Han (Shandong Fundamental Research Center for Computer Science, China; Ministry of Education, Shandong Computer Science Center (National Supercomputer Center in Jinan), Qilu University of Technology (Shandong Academy of Sciences), China; Quancheng Provincial Laboratory, China), Guangqi Liu (Ministry of Education, Shandong Computer Science Center (National Supercomputer Center in Jinan), Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), Wenbo Zuo (Ministry of Education, Shandong Computer Science Center (National Supercomputer Center in Jinan), Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), and Zhiwen Wang (Ministry of Education, Shandong Computer Science Center (National Supercomputer Center in Jinan), Qilu University of Technology (Shandong Academy of Sciences), China)

SWDNet: Stealth Web Shell Detection Technology Based on Triplet Network 406
Jinli Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Feng Dai (Institute of Information Engineering, Chinese Academy of Sciences, China), Yaqin Cao (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Ru Tan (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Xiang Cui (Zhongguancun Laboratory, China), and Qixu Liu (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)

Arrow: Capture the Inaudible Attacker in 3D Space via Smart-speaker 415
Zhenfei Zhang (Anhui University, China), Ping Li (Anhui University, China), Biaokai Zhu (Shanxi Police College, China), Tao Wu (National University of Defense Technology, China), Panlong Yang (University of Science and Technology of China, China), and Zhao Lv (Anhui University, China)

Session 4: Privacy

Optimizing Privacy-Accuracy Trade-off in DP-FL via Significant Gradient Perturbation 423
Benteng Zhang (Hohai University, China), Yingchi Mao (Key Laboratory of Water Big Data Technology of Ministry of Water Resources, Hohai University, China), Zijian Tu (Hohai University, China), Xiaoming He (Hohai University, China), Ping Ping (Key Laboratory of Water Big Data Technology of Ministry of Water Resources, Hohai University, China), and Jie Wu (Center for Networked Computing, Temple University, USA)

EPT: Enhancing User Transparency for Confidential Smart Contract 431
Juan Du (Zhejiang University of Technology, China), Zhicheng Xu (Zhejiang University of Technology, China), Duanyang Liu (Zhejiang University of Technology, China), Xiaoli Zhang (Zhejiang University of Technology, China), and Hongbing Cheng (Zhejiang University of Technology, China)

A Non-Intrusive and Real-Time Data Provenance Method for DDS Systems 439
Siyi Wei (Southeast University, China), Jinbin Tu (Southeast University, China), and Yun Wang (Southeast University, China)

A Lightweight Privacy-Preserving Data Sharing Scheme Supporting Intelligent Pricing in Smart Grid 447
Xinyang Li (Guilin University of Electronic Technology, China), Yujue Wang (Hangzhou Innovation Institute of Beihang University, China), Yong Ding (Guilin University of Electronic Technology, China; Institute of Cyberspace Technology, HKCT Institute for Higher Education, China), Yijie Zhou (Guangxi Radio and Television, China), Changsong Yang (Guilin University of Electronic Technology, China), and Zhenwei Guo (Hangzhou Innovation Institute of Beihang University, China)

Adaptive and Efficient Participant Selection in Vertical Federated Learning 455
Jiahui Huang (University of Science and Technology of China, China), Lan Zhang (University of Science of Technology of China, China; Institute of Dataspace, Hefei Comprehensive National Science Center, China), Anran Li (University of Science and Technology of China, China), Haoran Cheng (University of Science and Technology of China, China), Jiexin Xu (China Merchants Bank, China), and Hongmei Song (China Merchants Bank, China)

Session 5: Network Security

Supvirus: A Scenario-Oriented Feature Poisoning Attack Approach in SplitFed Learning 463
Yuxin Zhao (University of Science and Technology of China, China), Guangyu Wu (University of Science and Technology of China, China), Jiahui Hou (University of Science and Technology of China, China), and Xiang-Yang Li (University of Science and Technology of China, China)

Data Poisoning Attack Based on Privacy Reasoning and Countermeasure in Federated Learning ... 472
Jiguang Lv (Harbin Engineering University, China), Shuchun Xu (Harbin Engineering University, China), Yi Ling (Harbin Engineering University, China), Dapeng Man (Harbin Engineering University, China), Shuai Han (Harbin Engineering University, China), and Wu Yang (Harbin Engineering University, China)

Efficient Side-Channel Attack through Balanced Labels Compression and Variational Autoencoder 480
Nengfu Cai (Beihang University, China), Zhiqin Yang (Beihang University, China), Shuhai Wang (Shijiazhuang Railway University, China), Yanling Jiang (Beihang University, China), Mingsheng Liu (Shijiazhuang Institute of Railway Technology, China), and Gang Li (Zhongke Zidong Information Technology (Beijing) Co. Ltd, China)

LDfuzz: A Directed Greybox Fuzzer for Solidity Smart Contract 488
Jiangtao Liao (Fujian Normal University), Huidan Hu (Fujian Normal University; Fujian Zhong Xin Network Security Information Technology Co., LTD), Keke Huang (Fujian Normal University), Huasong Jin (Fujian Zhong Xin Network Security Information Technology Co., LTD), and Changlu Lin (Fujian Normal University; Guilin University of Electronic Technology, China)

BypTalker: An Adaptive Adversarial Example Attack to Bypass Prefilter-enabled Speaker Recognition 496
Qianniu Chen (Zhejiang University, China), Kang Fu (Zhejiang University, China), Li Lu (Zhejiang University, China), Meng Chen (Zhejiang University, China), Zhongjie Ba (Zhejiang University, China), Lin Feng (Zhejiang University), and Kui Ren (Zhejiang University, China)

Track 4: Big Data and AI

Session 1: Federated Learning

FedSG: Subgraph Federated Learning on Multiple Non-IID Graphs 504
Yingcheng Wang (Chongqing University, China), Songtao Guo (Chongqing University, China), and Dewen Qiao (Chongqing University, China)

A Straggler-resilient Federated Learning Framework for Non-IID Data Based on Harmonic Coding 512
Weiheng Tang (Sun Yat-sen University, China), Lin Chen (Sun Yat-sen University, China), and Xu Chen (Sun Yat-sen University, China)

Two-way Delayed Updates with Model Similarity in Communication-Efficient Federated Learning 520
Yingchi Mao (Hohai University, China), Zibo Wang (Hohai University, China), Jun Wu (Hohai University, China), Lijuan Shen (Hohai University, China), Shufang Xu (Hohai University, China), and Jie Wu (Temple University, USA)

Decentralized Subgoal Tree Search for Multiagent Planning without Priors or Communication 528
Qian Che (Southeast University, China), Yixuan Li (Southeast University, China), Ziyao Peng (Southeast University, China), Wanyuan Wang (Southeast University, China), and Yichuan Jiang (Southeast University, China)

Session 2: Big Data

A Hypernetwork-Based Personalized Federated Learning Framework for Encrypted Traffic Classification 536
Yichen Wei (Southeast Univertsity, China), Guang Cheng (Southeast Univertsity, China), Tian Qin (Southeast Univertsity, China), and Zihan Chen (Southeast Univertsity, China)

FedCME: Client Matching and Classifier Exchanging to Handle Data Heterogeneity in Federated Learning 544
Jun Nie (Sun Yat-sen University), Danyang Xiao (Sun Yat-sen University), Lei Yang (South China University of Technology), and Weigang Wu (Sun Yat-sen University)

CFPA: Cognitive Federated Partial Adaptation for Effective Personalization 553
Xiaohui Wei (Jilin University, China), Didi Jiao (Jilin University, China), Shiyu Tong (Jilin University, China), Zijian Li (Dalian Maritime University, China), Chenghao Ren (Jilin University, China), and Hengshan Yue (Jilin University, China)

Communication-Efficient Personalized Federated Learning on Non-IID Data 562
Xiangqian Li (Qufu normal university, China), Chunmei Ma (Qufu normal university, China), Baogui Huang (Qufu normal university, China), and Guangshun Li (Qufu normal university, China)

MDP: Model Decomposition and Parallelization of Vision Transformer for Distributed Edge Inference 570
Weiyan Wang (Hong Kong University of Science and Technology), Yiming Zhang (Xiamen University), Yilun Jin (Hong Kong University of Science and Technology), Han Tian (Hong Kong University of Science and Technology), and Li Chen (Zhongguancun Lab.)

Session 3: Deep Learning

Secure Mutual Learning with Low Interactions for Deep Model Training 579
Wenxing Zhu (East China Normal University, China) and Xiangxue Li (East China Normal University, China)

TSTR: A Real-Time RGB-Thermal Semantic Segmentation Model with Multimodal Fusion Transformers 588
Guoqiang Zhao (Wuhan Textile University, China), Xiaoyun Yan (Wuhan Textile University, China), Aodie Cui (Wuhan Textile University, China), Chang Hu (Wuhan Textile University, China), Jiaqi Bao (Wuhan Textile University, China), and Junjie Huang (Wuhan Textile University, China)

A Well-Designed Regularization Scheme for Latent Factorization of High-Dimensional and Incomplete Water-Quality Tensors from Sensor Networks 596
Xuke Wu (Chongqing University of Posts and Telecommunications, China), Lan Wang (Chongqing University of Posts and Telecommunications, China), Mingjiang Xie (Chinese Academy of Sciences, China), and Kun Shan (Chinese Academy of Sciences, China)

Multi-Stage Vehicle Dispatch for Community Group-Buying Logistics via Deep Reinforcement Learning 604
Lingyi Xu (Southeast University), Xingyuan Liang (Southeast University), Xiaolei Zhou (National University of Defense Technology), and Tian He (Southeast University; JD Logistics)

Lipreading using Joint Preception Temporal Convolutional Network 612
Xihui Li (Northeastern University, China), Zhenhua Tan (Northeastern University, China), Ziwei Cheng (Northeastern University, China), and Xiaoer Wu (Northeastern University, China)

Track 5: Systems, Tools and Testbed

Session 1: Systems, Tools and Testbed

A Scheduling Optimization Mechanism Combining Q-learning and Genetic Algorithm 620
Xue Wang (Northeastern University, China), Xingwei Wang (Northeastern University, China), Jie Jia (Northeastern University, China), Xijia Lu (Northeastern University, China), and Min Huang (Northeastern University, China)

RLink: Accelerate On-Device Deep Reinforcement Learning with Inference Knowledge at the Edge 628
Tianyu Zeng (Sun Yat-sen University, China), Xiaoxi Zhang (Sun Yat-sen University, China), Daipeng Feng (Sun Yat-sen University, China), Jingpu Duan (Southern University of Science and Technology, China; Department of Communications, Peng Cheng Laboratory, China), Zhi Zhou (Sun Yat-sen University, China), and Xu Chen (Sun Yat-sen University, China)

DeepSpectrum: A Deep-Learning-Based Spectrum Identification for Wireless Signals 636
Jiongkun Su (Shenzhen University, China), Junmei Yao (Shenzhen University, China), Ruitao Xie (Shenzhen University, China), and Kaishun Wu (Shenzhen University, China)

FedIR: Learning Invariant Representations from Heterogeneous Data in Federated Learning 644
Xi Zheng (Beijing Normal University, China), Hongcheng Xie (The Hong Kong Polytechnic University, China), Yu Guo (Beijing Normal University, China), and Rongfang Bie (Beijing Normal University, China)

Harnessing Edge Computing Resources for Accelerating Industrial Tasks 652
Tao Xing (Northwestern Polytechnical University, China), Helei Cui (Northwestern Polytechnical University, China), Yaxing Chen (Northwestern Polytechnical University, China), Zihui Luo (Beijing University of Posts and Telecommunications, China), Bin Guo (Northwestern Polytechnical University, China), Zhiwen Yu (Northwestern Polytechnical University, China), Xiaobing Guo (Lenovo Research, China), and Yirong Ma (Beijing Tellhow Intelligent Engineering CO., LTD, China)

Track 6: Smart Cities, Metaverse and Applications

Session 1: Advanced Applications

Incentive Mechanism Based on Double Auction for Federated Learning in Satellite Edge Clouds 660
Qiufen Xia (Dalian University of Technology, China), Zhou Xu (Dalian University of Technology, China), and Zhuangze Hou (Dalian University of Technology, China)

Auction-Based Dynamic Resource Allocation in Social Metaverse 669
Nan Liu (Xi'an Jiaotong University, China), Tom H. Luan (Xi'an Jiaotong University, China), Yuntao Wang (Xi'an Jiaotong University, China), Yiliang Liu (Xi'an Jiaotong University, China), and Zhou Su (Xi'an Jiaotong University, China)

B^{3}A: Bokeh Based Backdoor Attack with Feature Restrictions 677
Junjian Li (China University Of Petroleum, P. R. China), Honglong Chen (China University Of Petroleum, P. R. China), Yudong Gao (China University Of Petroleum, P. R. China), Kai Lin (China University Of Petroleum, P. R. China), and Yuping Liu (China University Of Petroleum, P. R. China)

Minimal Substitution-Based Label Propagation for Anomalous Blockchain Detection 685
Ranran Wang (University of Electronic Science and Technology of China, China), Zhaokang Zhang (University of Electronic Science and Technology of China, China), Yiran Wang (University of Electronic Science and Technology of China, China), and Yin Zhang (University of Electronic Science and Technology of China, China)

Session 2: Smart City

Improved LSTM Algorithm for WBGT Index Prediction in Smart Cities 693
Kai Ding (Dongguan University of Technology, China; Guangdong Laboratory of Artificial Intelligence and Digital Economy (SZ), China), Yidu Huang (Dongguan University of Technology, China), Ming Tao (Dongguan University of Technology, China), Renping Xie (Dongguan University of Technology, China), Xueqiang Li (Dongguan University of Technology, China), and Shuling Yang (Dongguan University of Technology, China)

A Group-oriented Authentication Scheme for IoT Devices in 5G Networks 699
Qili Guo (Xi'an University of Posts and Telecommunications, China), Chengzhe Lai (Xi'an University of Posts and Telecommunications, China), Haoyan Ma (Xi'an University of Posts and Telecommunications, China), and Dong Zheng (Xi'an University of Posts and Telecommunications, China)

Edge Servers on Wheels: Deployment and Route Planning of Mobile Servers for Internet of Vehicles 707
Zhihai Tang (Guangdong University of Technology, China), Aiwen Huang (Guangdong University of Technology, China), Yonghua Wang (Guangdong University of Technology, China), Le Chang (Guangdong University of Technology, China), and Tian Wang (Institute of Artificial Intelligence and Future Networks, Beijing Normal University, China)

Smart Card Auto-Selection Using GPS and WiFi Fingerprints for Smartphones 714
Xingying Wang (Wuhan University, China), Linwen Zhang (Wuhan University, China), Hang Tu (Wuhan University, China), Qin Liu (Wuhan University, China), and Man Zhou (Huazhong University of Science and Technology, China)

A Spatio-Temporal Tree and Gauss Convolutional Network for Traffic Flow Forecasting 722
Zhaobin Ma (Qingdao University, China), Zhiqiang Lv (Qingdao University, China), Jianbo Li (Qingdao University, China), and Fengqian Xia (Qingdao University, China)

Part II: MSN 2023 Co-Located Workshops

The Fifth International Workshop on Network Softwarization Techniques for IoT Application (SoftIoT 2023)

Collaborative Service Placement and Request Scheduling in Mobile Edge Networks 730
Bin Tang (Anhui Polytechnic University, China), Nuo Yu (Anhui Polytechnic University, China), Fen Han (Anhui Polytechnic University, China), Jiakai Gong (Anhui Polytechnic University, China), and Yuan Ge (Anhui Polytechnic University, China)

Comparing Different Neural Network Models on Subway Traffic Volume Forecast 736
Yanfei Jiang (Xian Rail Transit Group Co. Ltd, China), Lian Wen (Griffith University, Australia), Shaoyang Zhang (Chang'an University, China), and Yongli Liu (Chang'an University, China)

Similarity-aware Contract Design for Multi-task Federated Learning in Vehicular Networks 744
Bo Xu (Jiangsu Key Laboratory of Wireless Communications, Nanjing University of Posts and Telecommunications, China), Haitao Zhao (Jiangsu Key Laboratory of Wireless Communications, Nanjing University of Posts and Telecommunications, China), Haiguang Lai (Nanjing Konwei Communication Technology Co., Ltd, China), and Xiaozhen Lu (Nanjing University of Aeronautics and Astronautics, China)

AI-Based 3D UAV Coverage Deployment for Internet of Vehicles in the Complex Mountain Environment 750
Pengfei Du (Xihua university, China), Tingyue Xiao (Xihua University, China), Ziyue Liu (Xihua University, China), and Chaojin Qing (Xihua University, China)

Performance Analysis of Multi-RIS Aided Communication Under Weibull Fading 756
Longze Li (Nanjing University of Posts and Telecommunications, China), Haitao Zhao (Nanjing University of Posts and Telecommunications, China), Wenxue Sun (Nanjing University of Posts and Telecommunications, China), Zhuoran Xu (Nanjing University of Posts and Telecommunications, China), Yihang Jia (Nanjing University of Posts and Telecommunications, China), and Shuyi Ma (Nanjing University of Posts and Telecommunications, China)

HAMF: Highly Adaptable Multi-graph Fusion for Cross-domain Graphs 762
Jie Li (Northwestern Polytechnical University), Jiaqi Liu (Northwestern Polytechnical University), and Bin Guo (Northwestern Polytechnical University)

Blueberry Flower Detection Algorithm Based on Improved YOLOv8 768
Rongli Gai (Dalian University, China), Huatian Zhang (Dalian University, China), Zhibin Guo (Dalian University, China), Xiangzhou Kong (Dalian University, China), and Shan Qin (Dalian Modern Agricultural Production Development Service Center, China)

An Indoor Positioning Method Based on Quadratic Space Judgment 774
Yuxi Wang (Jiangsu Second Normal University, China), Wanyu Song (Tieto China Co., China), Zheng Zhang (Nanjing University of Posts and Telecommunications, China), Longze Li (Nanjing University of Posts and Telecommunications, China), and Yiyang Ni (Nanjing University of Posts and Telecommunications, China)

Trace6: A Practical Threatener Traceback Model in IPv6 Network 780
Chaoqiang Yang (Zhengzhou University, China), Liancheng Zhang (National Digital Switching System Engineering and Technological Research Center, China), Yi Guo (National Digital Switching System Engineering and Technological Research Center, China), Wenhao Xia (Zhengzhou University, China), Ming Hu (Zhengzhou University, China), and Jichang Wang (Zhengzhou University, China)

Virtual Target Based Multi-agent Surrounding Approach 786
Weiping Zhu (Wuhan University, P. R. China), Haoyang Li (Wuhan University, P. R. China), Ning Ding (Wuhan University, P. R. China), Yukang Chen (Wuhan University, P. R. China), Yufei Sun (Wuhan University, P. R. China), Chao Ma (Wuhan University, P. R. China), and Wei Li (Jiangnan University, P. R. China)

The Fifth International Workshop on Network Meets Intelligent Computations (NMIC 2023)

Enhancing Intersection Signal Control: Distributional Double Dueling Deep Q-learning Network with Priority Experience Replay and NoisyNet Approach 794
Yue He (Chang'an university, China), Chen Mu (Chang'an university, China), and Yu Sun (Chang'an university, China)

A Greedy Algorithm-Based Approach for Dynamic Carpooling Matching and Route Selection in Ride-hailing 800
Yu Sun (Chang'an university, China), Chen Mu (Chang'an university, China), Jing Sun (Chang'an university, China), and Yue He (Chang'an university, China)

Evolution-Driven Deep Meta-Learning Algorithm for Multi-Objective Combinatorial Optimization ..... N/A
Jiajun Chen (South China University of Technology, China)

A Weakly Supervised Learning Framework for Parkinson's Disease Assessment Using Wearable Sensor 813
Ziheng Li (Yunnan University, China), Xiyang Peng (University of Sheffield, UK), Yuting Zhao (Yunnan University, China), Xulong Wang (University of Sheffield, UK), Yun Yang (Yunnan University, China), and Po Yang (University of Sheffield, UK)

A Lightweight Method for Android Malware Classification Based on Teacher Assistant Distillation 819
Junwei Tang (Wuhan Textile University), Qiaosen Pi (Wuhan Textile University), Jin Huang (Wuhan Textile University), Ruhan He (Wuhan Textile University), Tao Peng (Wuhan Textile University), and Wenlong Tian (Nanyang Technological University, Singapore; University of South China, China)

The Fourth International Workshop on Artificial Intelligence Applications in Internet of Things (AI2OT)

Maximizing Throughput in Unmanned Surface Vehicle Relay System under Jamming Attacks 825
Heng Zhang (Jiangsu Ocean University, China), Lei Wu (Jiangsu Ocean University, China), Zhemin Sun (Jiangsu Ocean University, China), Zhikai Zhang (Jiangsu Ocean University, China), Ming Li (Jiangsu Ocean University, China), Hongran Li (Jiangsu Ocean University, China), and Jian Zhang (Jiangsu Ocean University, China)

An Efficient Skip Link-Based Traffic Prediction Algorithm with Multi-Scale Feature Extraction 831
Chaoqun Liu (Nanjing University of Science and Technology, China), Xuanpeng Li (Southeast University, China), Guangyu Li (Nanjing University of Science and Technology, China), and Chen Gong (Nanjing University of Science and Technology, China)

SemiGest: Recognizing Hand Gestures via Visible Light Sensing with Fewer Labels 837
Jifei Zhu (Sichuan University, China), Ziwei Liu (Sichuan University, China), Yimao Sun (Sichuan University, China), and Yanbing Yang (Sichuan University, China)

Multi-Level ACE-Based IoT Knowledge Sharing for Personalized Privacy-Preserving Federated Learning 843
Jing Wang (Shanghai Jiao Tong University, China; Shanghai Key Laboratory of Integrated Administration Technologies for Information Security, China), Xi Lin (Shanghai Jiao Tong University, China; Shanghai Key Laboratory of Integrated Administration Technologies for Information Security, China), Jun Wu (Shanghai Jiao Tong University, China; Shanghai Key Laboratory of Integrated Administration Technologies for Information Security, China), Qinghua Mao (Shanghai Jiao Tong University, China; Shanghai Key Laboratory of Integrated Administration Technologies for Information Security, China), Bei Pei (The Third Research Institute of The Ministry of Public Security, China), Jianhua Li (Shanghai Jiao Tong University, China; Shanghai Key Laboratory of Integrated Administration Technologies for Information Security, China), Suchang Guo (No.30 Institute of CETC, China), and Baitao Zhang (Tsinghua University, China)

The First International Workshop on Metaverse-Based Sensing, Computing, and Networking (MetaSCN)

Joint Client Selection and Training Optimization for Energy-Efficient Federated Learning 849
Kang Yan (National University of Defense Technology, China), Nina Shu (National University of Defense Technology, China), Tao Wu (National University of Defense Technology, China), Chunsheng Liu (National University of Defense Technology, China), Jun Huang (National University of Defense Technology, China), and Jingbo Yu (National University of Defense Technology, China)

Both Sides Needed: A Two-Dimensional Measurement Study of Email Security Based on SPF and DMARC 855
Han Zhang (Shanghai Jiao Tong University, China), LiBo Chen (Shanghai Jiao Tong University, China), Ming Liu (Shanghai Jiao Tong University, China), Yong Shi (Shanghai Jiao Tong University, China), Songyang Wu (The Third Research Institute of Ministry of Public Security Shanghai Jiao Tong University, China), and Zhi Xue (Shanghai Jiao Tong University, China)

A Novel Data Aggregation Scheme for Wireless Sensor Networks Based on Residue Number System with Nonpairwise-Prime Moduli 862
Jinxin Zhang (University of Science and Technology of China, China) and Fuyou Miao (University of Science and Technology of China, China)

Identifying Fine-Grained Douyin User Behaviors via Analyzing Encrypted Network Traffic 868
Yuhang Shan (Southeast University, China), Guang Cheng (Southeast University, China), and Zihan Chen (Southeast University, China)

Do Non-competing Data Intermediaries Matter? A Property Rights Perspective 876
Cheng Chi (China Academy of Information and Communications Technology, China), Wenqu Chen (China Academy of Information and Communications Technology, China), and Jinqiu He (Central University of Finance and Economics, China)

Author Index **883**
