2024 10th International Symposium on System Security, Safety, and Reliability (ISSSR) ISSSR 2024

Table of Contents

Message from the Symposium Chairs	xvi
Organizing Committee	xviii
Steering Committee	xix
Program Committee	xx
Keynote Speaker I	xxii
Executive Panel	xxiii
Keynote Speaker II	xxv

Reliability Model and Prediction I

The Reliability and Credibility Evaluation of OBDM Subsystem by the Layered Dynamic Fault Tree Model	1
<i>Mingliang Wang (Innovation Academy for Microsatellites of Chinese Academy of Sciences, China; Shanghai Engineering Center for Microsatellites, China; University of Chinese Academy of Sciences, China), Minhua Shi (Innovation Academy for Microsatellites of Chinese Academy of Sciences, China; Shanghai Engineering Center for Microsatellites, China; University of Chinese Academy of Sciences, China), Liang Chang (Innovation Academy for Microsatellites of Chinese Academy of Sciences, China; Shanghai Engineering Center for Microsatellites, China; University of Chinese Academy of Sciences, China), Shuoyang Fan (Innovation Academy for Microsatellites of Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Zhijian You (Innovation Academy for Microsatellites of Chinese Academy of Sciences, China; Shanghai Engineering Center for Microsatellites, China)</i>	
Research on the on-Orbit Reliability Prediction Method of SiC MOSFET	7
<i>Yang Yang (AVIC China Aero-polytechnology Establishment, China), Shukai Guan (Beihang University, China), Shimin Hong (Beihang University, China), Bo Wan (Beihang University, China), and Guicui Fu (Beihang University, China)</i>	
A Study of Overall Least Squares Estimation Based on the Weibull Distribution	14
<i>Yubin Zheng (Key Laboratory of CNC Equipment Reliability, Ministry of Education), Qi Cheng (Jilin University, China), Yingzhi Zhang (Key Laboratory of CNC Equipment Reliability, Ministry of Education), Dehai Zang (Jilin University, China), and Jingyue Zhang (Jilin University, China)</i>	

Fault Period Identification of Repairable Systems Based on the Model of Dual Weibull Distribution	20
<i>Yingzhi Zhang (Jilin University, China), Xihui Cheng (Jilin University, China), Fang Yang (FAW Group R&D Institute, China), Jintong Liu (Jilin University, China), and Siwei Liu (Jilin University, China)</i>	
Degradation Dynamics Based Reliability Assessment of Unmanned Ground Vehicles	29
<i>Zirui Zhang (Beihang University, China), Dan Xu (Beihang University, China), and Huan Wang (Overall Design Institute of Hubei Aerospace Technology Research Institute, China)</i>	

Reliability Model and Prediction II

Evaluation Method of Residual Life of Extended Stored Electronic Components Based on Electrical Parameter Degradation	38
<i>Yu Qiao (Beihang University, China), Xiaoyan Zheng (Innovation Academy for Microsatellites of Academy of Sciences, China), Sujuan Zhang (Beihang University, China), Dongdong Zhang (Innovation Academy for Microsatellites of Academy of Sciences, China), and Shuai Cui (Innovation Academy for Microsatellites of Academy of Sciences, China)</i>	
Quantile-Quantile Plot of Folded-Normal Distribution and its Applications in Reliability and Quality Modeling	44
<i>Renyan Jiang (Wenzhou University, China), Pei Li (Wenzhou University, China), and Kunpeng Zhang (Wenzhou University, China)</i>	
A Reliability-Based Design Optimization Method with Probabilistic-Interval Hybrid Reliability Model and Adaptive Kriging Model	51
<i>Xiang Ding (Nanchang Hangkong University, China), Ling Zhou (Nanchang Hangkong University, China), Liang Qiao (Nanchang Hangkong University, China), Xuechen Liu (Nanchang Hangkong University, China), and Xiaoshu He (Nanchang Hangkong University, China)</i>	
Remaining Useful Life Estimation of the Ultrasonic Motor Based on A Novel Exponential-Type Model and An Adaptive Particle Filter	57
<i>Yuanyuan Liu (China Electronics Technology Group Corporation, China) and Taichun Qin (Beijing Institute of Spacecraft Environment Engineering, China)</i>	

Safety Analysis

A Safety Analysis Method Based on Model Checking	61
<i>Shujie Pang (China Aero-Poly technology Establishment, China), Zhi Bian (China Aero-Poly technology Establishment, China), Zhe Zhang (China Aero-Poly technology Establishment, China), Lihua Meng (China Aero-Poly technology Establishment, China), and Jian Jiao (Beihang University, China)</i>	

The Safety Consideration in Civil Aircraft Communication and Navigation System Development....	66
<i>Ze Chen (COMAC Shanghai Aircraft Design & Research Institute, China), Jie Liang (COMAC Shanghai Aircraft Design & Research Institute, China), Xiaogang Lu (COMAC Shanghai Aircraft Design & Research Institute, China), and Zhiming Zheng (COMAC Shanghai Aircraft Design & Research Institute, China)</i>	
A Study on the Evaluation Technology of Human-Machine Interaction System Safety Considering the Comprehensive Impact of Time Pressure and Scenario Fusion Control Transformation	74
<i>Kanglun Liu (China Astronautics Standards Institute, China), Xiaopeng Li (China Astronautics Standards Institute, China), Liming Ren (China Astronautics Standards Institute, China), and Shanshan Zhang (China Astronautics Standards Institute, China)</i>	

Security, Privacy, and Anomaly Analysis

Secure Searchable Encryption Based on Local Differential Privacy	83
<i>Xiaoyan Liang (Beijing University of Technology, China; Software Technology and Network Security Lab, China), Jingsha He (Beijing University of Technology, China; Software Technology and Network Security Lab, China), and Nafei Zhu (Beijing University of Technology, China; Software Technology and Network Security Lab, China)</i>	
A Privacy Leak Detection Mechanism Based on Service Binding	92
<i>Boyang Wang (Jiangsu Key Laboratory of Big Data Security & Intelligent Processing, China), Jinling He (State Grid Jiangsu Electric Power Company Limited, China), Yuanhan Du (State Grid Jiangsu Electric Power Company Limited, China), Ming Tang (State Grid Jiangsu Electric Power Company Limited, China), and Xiaolong Xu (Nanjing University of Posts and Telecommunications, Nanjing, China)</i>	
PH-CNN for PE Malware Classification by Means of Enhanced Images	104
<i>Hongjiao Li (Shanghai University of Electric Power, China), Jiabei Wu (Shanghai University of Electric Power, China), and Fan Gu (Nanjing NARI Information and Communication Technology Co., Ltd, China)</i>	
AIFed: Anomaly-Resilient and Imbalance-Aware Federated Learning	110
<i>Yi Su (University of Warwick, United Kingdom) and Ligang He (University of Warwick, United Kingdom)</i>	
A New Scheme for Abnormal Data Transmission Behavior Detection with Network-Wide Perspective	122
<i>Weikang Xiao (Sun Yat-sen University, China) and Yi Xie (Sun Yat-sen University, China)</i>	

Machine Learning and Applications

Analysis of Airworthiness Requirements for Application of Machine Learning in Airborne Systems	134
<i>Zan Ma (Civil Aviation University of China, China), Tongjie Zhang (Civil Aviation University of China, China), Zhiming Zheng (Shanghai Aircraft Design & Research Institute, China), Kelin Zhong (Shanghai Aircraft Design & Research Institute, China), and Yanting Zhang (Civil Aviation University of China, China)</i>	
Construction of Space Environmental Warning Model for ESD Anomalies in High Orbit Spacecraft	143
<i>Yuxin Zhao (Beijing Institute of Spacecraft Environmental Engineering, China), Xiaoning Yang (Beijing Institute of Spacecraft Environmental Engineering, China), Yenan Liu (Beijing Institute of Spacecraft Environmental Engineering, China), Yuming Liu (Beijing Institute of Spacecraft Environmental Engineering, China), and Yanlin Xu (Beijing Institute of Spacecraft Environmental Engineering, China)</i>	
A Comprehensive Review of Learning-Based Fuzz Testing Techniques	150
<i>Hao Cheng (China University of Geosciences, China), Dongcheng Li (California State Polytechnic University, USA), Man Zhao (China University of Geosciences, China), Hui Li (China University of Geosciences, China), and W. Eric Wong (University of Texas at Dallas, USA)</i>	

Deep Learning

Extended LSTM Model Based Satellite Positioning Error Estimation Method	162
<i>Ruihua Liu (Civil aviation University of China, China), Zhiyang Liu (Civil aviation University of China, China), Zan Ma (Civil aviation University of China, China), Zhiming Zheng (COMAC Shanghai Aircraft Design & Research Institute, China), and Kelin Zhong (COMAC Shanghai Aircraft Design & Research Institute, China)</i>	
Research on Reliability Metrics for Deep Learning Visual Algorithms	170
<i>Yuanxin Li (Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Guang Yang (Institute of Software Chinese Academy of Sciences, China), Pengqi Wang (Institute of Software Chinese Academy of Sciences, China), Zhili Zhang (Institute of Software Chinese Academy of Sciences, China), and Lingzhong Meng (Institute of Software Chinese Academy of Sciences, China)</i>	
Lightweight Deep Learning Method Based on Group Convolution: Detecting DDoS Attacks in IoT Environments	181
<i>Shuanglong Yan (Hubei University of Technology, China), Hongmu Han (Hubei University of Technology, China), Xinhua Dong (Hubei University of Technology, China), and Zhigang Xu (Hubei University of Technology, China)</i>	
Research on Multi-Agent Path Planning Algorithm Based on Large Language Model	190
<i>Lian Liu (Dalan Naval Academy, China) and Peng Cui (Dalian Naval Academy, China)</i>	

Deep Learning for Real-Time Object Detection

Foreign Object Detection Method in Transmission Lines Based on Improved YOLOv8n	196
<i>Xu Wang (China Electric Power Research Institute, China), Xiwen Chen (China Electric Power Research Institute, China), Haibin Chen (State Grid Shanghai Electric Power Research Institute, China), Yi Cao (State Grid Shanghai Electric Power Research Institute, China), and Jun Zhang (China Electric Power Research Institute, China)</i>	
Risky Behavior Detection Under Electrical Pole Based on Improved YOLOv8	201
<i>Bing Lu (China Electric Power Research Institute, China), Jun Zhang (China Electric Power Research Institute, China), Haibin Chen (State Grid Shanghai Electric Power Research Institute, China), Tao Tong (State Grid Shanghai Electric Power Research Institute, China), and Miao Jin (China Electric Power Research Institute, China)</i>	
Safety Detection Method for Work at Height Based on Improved YOLOv8	206
<i>Miao Jin (China Electric Power Research Institute, China), Chunyang Jiang (China Electric Power Research Institute, China), Yanli Zhang (Metering Center of State Grid Jibei Power Co., Ltd., China), Zhenyu Jiang (Metering Center of State Grid Jibei Power Co., Ltd., China), and Wei Guo (Metering Center of State Grid Jibei Power Co., Ltd., China)</i>	
Feature Weight Masked Low-Frequency Object Detection Attack Method	211
<i>Long Yuan (Hangzhou Normal University, China; Key Laboratory of Cryptography of Zhejiang Province, China), Zhipeng Lv (Hangzhou Normal University, China; Key Laboratory of Cryptography of Zhejiang Province, China), Xiumei Li (Hangzhou Normal University, China; Key Laboratory of Cryptography of Zhejiang Province, China), Maoqun Yao (Hangzhou Normal University, China; Key Laboratory of Cryptography of Zhejiang Province, China), and Junmei Sun (Hangzhou Normal University, China; Key Laboratory of Cryptography of Zhejiang Province, China)</i>	
An Electric Grid Sign Detection Method Based on the Improved YOLOv8n	220
<i>Miao Jin (China Electric Power Research Institute, China), Xiwen Chen (China Electric Power Research Institute, China), Yanli Zhang (Metering Center of State Grid Jibei Power Co., Ltd., China), Shuai Gao (Metering Center of State Grid Jibei Power Co., Ltd., China), and Jun Zhang (China Electric Power Research Institute, China)</i>	

Testing and Evaluation

A Testing and Evaluation Framework for the Quality of DNN Models	224
<i>Guang Yang (Institute of Software Chinese Academy of Sciences, China), Zhiwen Li (Institute of Software Chinese Academy of Sciences, China), Pengqi Wang (Institute of Software Chinese Academy of Sciences, China), Yuan Shi (Institute of Software Chinese Academy of Sciences, China), and Lingzhong Meng (Institute of Software Chinese Academy of Sciences, China)</i>	

A Survey on Test Input Selection and Prioritization for Deep Neural Networks	232
<i>Shengrong Wang (China University of Geosciences, China), Dongcheng Li (California State Polytechnic University, USA), Hui Li (China University of Geosciences, China), Man Zhao (China University of Geosciences, China), and W. Eric Wong (University of Texas at Dallas, USA)</i>	
A Coverage-Oriented Fuzzing Test Method for Embedded Firmware	244
<i>Wansheng Yang (Institute of Computer Application China Academy of Engineering Physics, China), Hairu Luo (Institute of Computer Application China Academy of Engineering Physics, China), Chi Hu (Institute of Computer Application China Academy of Engineering Physics, China), and Fengjiao He (Institute of Computer Application China Academy of Engineering Physics, China)</i>	

Advanced Algorithms and Techniques

API Completion Recommendation Algorithm Based on Programming Site Context	251
<i>Jun Chen (Xiamen University of Technology, China), Lei Xiao (Xiamen University of Technology, China), and Yuxiang Shen (Xiamen University of Technology, China)</i>	
GNEA: A Novel GCN-Based Network Embedding Algorithm for Semantic Social Network	258
<i>Jinbo Zhao (Nanjing University of Posts and Telecommunications, China), Jinling He (State Grid Jiangsu Electric Power Company Limited, China), Yuanhan Du (State Grid Jiangsu Electric Power Company Limited, China), Ming Tang (State Grid Jiangsu Electric Power Company Limited, China), and Xiaolong Xu (Nanjing University of Posts and Telecommunications, China)</i>	
FBOD: An Outlier Detection Algorithm Based on Data Features Suitable for Processing Large-Scale Datasets on Distributed Platforms	267
<i>Jinbo Zhao (Jiangsu Key Laboratory of Big Data Security & Intelligent Processing, China), Jinling He (State Grid Jiangsu Electric Power Company Limited, China), Hu Song (State Grid Jiangsu Electric Power Company Limited, China), Xinyun Cheng (State Grid Jiangsu Electric Power Company Limited, China), and Xiaolong Xu (Nanjing University of Posts and Telecommunications, China)</i>	

Modeling and Simulation

Review on the Construction Methods of Naval Warfare Simulation Model	277
<i>Xingqian Zhao (Dalian Naval Academy, China) and Xingjun Chen (Dalian Naval Academy, China)</i>	

Simulation Analysis of Interference Assembly Impact on Electro-hydraulic Servo Valve Armature Components	283
<i>Qinglei Guo (Beijing Institute of Spacecraft Environment Engineering, China), Dongxing Tao (Beijing Institute of Spacecraft Environment Engineering, China), Shouwen Liu (Beijing Institute of Spacecraft Environment Engineering, China), Shuai Li (Beijing Institute of Spacecraft Environment Engineering, China), and Shaoming Kang (Beihang University, China)</i>	
Fatigue Testing and Simulation of Hi-Lock Bolted Single Shear Lap Joints	291
<i>Lei Wang (Northeastern University, China), Ruijin Zhang (Northeastern University, China), Wenxue Qian (Northeastern University, China), Jun Li (Northeastern University, China), and Jia Li (Northeastern University, China)</i>	
Global Sensitivity Analysis of Binary Response Model Based on Shapley Value	303
<i>Jiacheng Li (National University of Defense Technology, China) and Zhijun Cheng (National University of Defense Technology, China)</i>	
Fuzzy Performance Modeling and Analysis of SaaS Software Using Possibility Theory	310
<i>Xiaojian Liu (Beijing University of Technology, China), Yangyang Zhang (China Electronics Standardization Institute, China), Qiang Han (North Minzu University, China), and Wen Gu (Beijing University of Technology, China)</i>	

Application of Modeling

Research on Thermal-Fluid-Structure Coupling in the Valve Plate Pair of an Axial Piston Pump	317
<i>Ao Zhou (Beijing University of Posts and Telecommunications, China) and Lei Han (Beijing University of Posts and Telecommunications, China)</i>	
MRC: A Lightweight and Efficient Module for Capturing Motion Relationships	327
<i>Xinpeng Ji (Beijing University of Posts and Telecommunications, China) and Lei Han (Beijing University of Posts and Telecommunications, China)</i>	
Research on Static and Dynamic Performance of Machine Tool Spindle System Based on Finite Element Method	336
<i>Ruijin Zhang (Northeastern University, China), Youzhi Pei (Northeastern University, China), Liang Zhang (Genertec Shenyang Machie Tool, China), Wenxue Qian (Northeastern University, China), and Baoxu Li (Northeastern University, China)</i>	
Research on Modeling Method of Warfighter Behavior Characteristics for Information Processing Tasks	341
<i>Junfeng Nie (Dalian Naval Academy, China)</i>	

Optimization and Decision Making I

Application of Productization Technology in Optimizing Satellite Resources	348
<i>Hongwu Xu (China Academy of Aerospace standardization and Product Assurance, China), Fengxi Chen (China Academy of Aerospace standardization and Product Assurance, China), Yuming Yin (China Academy of Aerospace standardization and Product Assurance, China), and Rui Zhang (China Academy of Aerospace standardization and Product Assurance, China)</i>	
Optimization of Logistics Management System Based on Genetic Algorithm	353
<i>Yiliang Lai (Yiliang (Xiamen) Technology Co., Ltd., China), Lubin Peng (Xiamen HuLiang Technology Co., Ltd., China), Longquan Luo (Xiamen Zhonglian Century Co., Ltd., China), Haidong Hu (Xiamen Tianyun Hengsheng Intelligent Technology Co., Ltd., China), and Xiaozhu Xie (Xiamen University of Technology, China)</i>	
Massive Service Convergence and Communication Delay Optimization Strategy for New Power System	358
<i>Mengxi Zhang (State Grid Economic and Technological Research Institute, China), Guangxiang Jin (State Grid Economic and Technological Research Institute, China), Jiangsheng Li (State Grid Economic and Technological Research Institute, China), Min Liu (State Grid Economic and Technological Research Institute, China), and Yufei Shi (State Grid Economic and Technological Research Institute, China)</i>	
Joint Optimization of Learning and Project Abandonment Decisions	363
<i>Qingan Qiu (Beijing Institute of Technology, China)</i>	
Optimization of Sensor Layout for Climate and Environmental Factors Based on Grey Correlation Degree	371
<i>Guiwen Yang (Beihang University, China), Li Jia (China Academy of Launch Vehicle Technology, China), Yanan Zhang (National Space Science Center. CAS, China), Wenshu Xie (China Academy of Launch Vehicle Technology, China), and Meilin Wen (Beihang University, China)</i>	

Optimization and Decision Making II

Optimization of Random Vibration Conditions Based on Equivalent Acceleration Fatigue Damage	377
<i>Jialin Wu (Shanghai Academy of Spaceflight Technology, China), Xinjun Long (Aerospace System Engineering Shanghai, China; Shanghai Key Laboratory of Spacecraft Mechanism, China), Juan Wang (Shanghai Academy of Spaceflight Technology, China), Song Wu (Aerospace System Engineering Shanghai, China; Fudan University, China), and Yuzhen Zhao (Aerospace System Engineering Shanghai, China)</i>	
Improved Raft Consensus Algorithm Based on NSGA-II and K-Means++	383
<i>Sijia Yang (Nanchang Hangkong University, China), Pengliu Tan (Nanchang Hangkong University, China), and Haowei Fu (Nanchang Hangkong University, China)</i>	
Approximate Triple Modular Redundancy Design Method Based on MOEA/D Algorithm	391
<i>Jiacheng Chen (Shanghai University of Electric Power, China) and Zhen Wang (Shanghai University of Electric Power, China)</i>	

Target Selection for Shore Firepower Support Based on Entropy Weight and TOPSIS Method	397
<i>Rui Li (Dalian Naval Academy) and Yuxuan Yan (Dalian Naval Academy)</i>	
A Method of Deducing the Adjustable Capacity of Demand Side Resource Pool Based on SARIMA	401
<i>Feixiang Gong (Beijing Key Laboratory of Demand-Side Multi-Energy Complementary Optimization and Supply-Demand Interaction Technology, China), Haoxiang Cao (North China Electric Power University, China), Songsong Chen (Beijing Key Laboratory of Demand-Side Multi-Energy Complementary Optimization and Supply-Demand Interaction Technology, China), Changqing Xu (State Grid Henan Economic Research Institute, China), and Bin Li (North China Electric Power University, China)</i>	
Research on Transaction Review Method for Real-Time Market Power Purchase Decision-Making under Agency Power Purchase Business	405
<i>Junchao Ran (Beijing NARI-EPRI Power Utilization Technology Co., Ltd., China), Xiaotian Wang (State Grid Hebei Marketing Service Center, China), Chuang Liu (State Grid Hebei Marketing Service Center, China), Ping Chen (State Grid Hebei Marketing Service Center, China), and Junlong Zhu (Beijing NARI-EPRI Power Utilization Technology Co., Ltd., China)</i>	

Control Systems, Decision Support System, and Policy

Iterative Learning Control with Extended State Observer for PMSM Speed Regulation under Aperiodic Disturbances	409
<i>Kailin Chen (Huaqiao University, China), Guandi Wang (Huaqiao University, China), Tingping Lei (Huaqiao University, China), and Yanzheng Zhu (Shandong University of Science and Technology, China)</i>	
Research on Adaptive Robust Control of Lifting Robotic Arm Based on Backstepping	416
<i>Teng Gao (Beijing University of Posts and Telecommunications, China) and Lei Han (Beijing University of Posts and Telecommunications, China)</i>	
A Decision Support System Architecture for Intelligent Driven Unmanned Aerial Vehicles Maritime Search and Rescue	424
<i>Yuxuan Yan (Dalian Naval Academy, China), Xingjun Chen (Dalian Naval Academy, China), Mingwei Shi (Dalian Naval Academy, China), and Rui Li (Dalian Naval Academy, China)</i>	
Specification and Enforcement of Activity Dependency Policies using XACML	429
<i>Tanjila Mawla (Tennessee Technological University, USA), Maanak Gupta (Tennessee Technological University, USA), and Ravi Sandhu (University of Texas at San Antonio, USA)</i>	

Advancement in Technologies

A Sequential Experimental Design Method Based on Binary Response Prediction	441
<i>Zichen Wang (National University of Defense Technology, China), Zhengqiang Pan (National University of Defense Technology, China), Taihe Yi (National University of Defense Technology, China), Guang Jin (National University of Defense Technology, China), and Yanlin Wang (National University of Defense Technology, China)</i>	

Study on Impact Reduction of Honeycomb Core Exposed Platform Based on Flexible Bag Damper under Initiating Explosive Environment	452
<i>Dike Hu (Fudan University, China; Aerospace System Engineering Shanghai, China), Yan Lin (Aerospace System Engineering Shanghai, China), Zijie Huang (Xiamen University, China), Wangqiang Xiao (Xiamen University, China), and Guoan Tang (Fudan University, China)</i>	
Source Code Representation Approach Based on Multi-Head Attention	459
<i>Lei Xiao (Xiamen University of Technology, China), Hao Zhong (Xiamen University of Technology, China), Yiliang Lai (Yilang (Xiamen) Technology Co. Ltd, China), Xinyang Lin (Xiamen Zhonglian Century Co. Ltd, China), and Hanghai Shi (Xiamen University of Technology, China)</i>	
Revolutionizing Truck Navigation with Advanced GIS Data and Hybrid Route Calculation	468
<i>Chih-Wei Hsu (The University of Texas at Dallas, USA), W. Eric Wong (The University of Texas at Dallas, USA), Ioan Angelov (Infogation Corporation, USA), Dave Marsh (Cedar Electronics Corporation, USA), and Kent Pu (Infogation Corporation, China)</i>	

Fault Localization and Detection

Systematic Analysis of Learning-Based Software Fault Localization	478
<i>Ya Zou (China University of Geosciences, China), Hui Li (China University of Geosciences, China), Dongcheng Li (California State Polytechnic University, USA), Man Zhao (China University of Geosciences, China), and Zizhao Chen (University of Texas at Dallas, USA)</i>	
Enhancing Fault Detection in Power Load Management Systems: A Neural Network Approach with Seq2Seq-CNN-LSTM Models	490
<i>Meiling Feng (North China Electric Power University, China), Shuyang Wang (China Electric Power Research Institute, China), Haoyang Yu (State Grid Yichun Electric Power Supply Company, China), Qiang Guo (State Grid Changyi Electric Power Supply Company, China), and Bin Li (North China Electric Power University, China)</i>	
A Failure Detection Method Based on SVM Model for Solar Power Generation Equipment	495
<i>Longyun Qi (NARI Group Corporation (State Grid Electric Power Research Institute), China; Nanjing NARI Information and Communication Technology Co. Ltd., China), Xingshen Wei (NARI Group Corporation (State Grid Electric Power Research Institute), China; Nanjing NARI Information and Communication Technology Co. Ltd., China), Weiping Zhu (State Grid Jiangsu Electric Power Co., Ltd., China), Jian Zhou (NARI Group Corporation (State Grid Electric Power Research Institute), China; Nanjing NARI Information and Communication Technology Co. Ltd., China), and Yongjian Cao (NARI Group Corporation (State Grid Electric Power Research Institute), China; Nanjing NARI Information and Communication Technology Co. Ltd., China)</i>	

Optimizing Fault Detection in Electric Power Load Management Systems: A Reinforcement Learning Approach for Prioritized Test Case Selection	502
<i>Meiling Feng (North China Electric Power University, China), Ke Chen (China Electric Power Research Institute, China), Qiang Guo (State Grid Changyi Electric Power Supply Company, China), Tao Meng (State Grid Lanzhou Power Supply Company, China), and Bin Li (North China Electric Power University, China)</i>	

Fault Diagnosis and Propagation

Swash-Plate Bearing Fault Diagnosis Method Based on Improved One Dimensional Convolutional Neural Network	506
<i>Tianyang Xiong (China Helicopter Research and Development Institute, China), Xinmin Li (China Helicopter Research and Development Institute, China), Xianhui Zhang (China Helicopter Research and Development Institute, China), and Xiaoqiang Jin (China Helicopter Research and Development Institute, China)</i>	
Rolling Bearing Fault Diagnosis of Helicopter Reducer Based on Condition Indicators	512
<i>Zhilong Yuan (China Helicopter Research and Development Institute, China) and Xiaoqiang Jin (China Helicopter Research and Development Institute, China)</i>	
A Novel Propagation Model of Single Event Effect Soft Error in FPGA Based on Cellular Automata	518
<i>Yanbo Yang (Beihang University, China), Bo Wan (Beihang University, China), Zhiqiang Chen (China Electronics Corporation, China), Shukai Guan (Beihang University, China), and Guicui Fu (Beihang University, China)</i>	

Fast Abstract

Research on Trustworthy Software Testing Techniques Based on Large Models	524
<i>Qiang Han (North Minzu University, China), Zijie Shi (Beijing University of Posts and Telecommunications, China), and Zhenyu Zhao (Beijing University of Posts and Telecommunications, China)</i>	
A Vulnerability Accessibility Analysis Framework for Software Supply Chain	526
<i>Lei Xiao (Xiamen University of Technology, China), Zhenyu Gao (Xiamen University of Technology, China), Qizhen Xu (Xiamen University of Technology, China), Le Chang (Software Security Company, China), and Shunzhi Zhu (Xiamen University of Technology, China)</i>	
The Approach of Web Services Parameter Mutation Operators Based on the Rules Model	528
<i>Zhao Yang (Jiangsu Automation Research Insititute, China)</i>
