# TABLE OF CONTENTS

|                                                                                                                                                                        |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Transverse Flux Permanent Magnet Machines State of the Art and Design Procedure for Direct Drive Wind Turbines .....                                                   | 1  |
| <i>Maryam Salehi, Aghil Ghaheri, Alireza Omid, Ahmad Darabi, Mohammad Hoseintabar Marzebali, Madhav Manjrekar</i>                                                      |    |
| A Novel Approach in Evaluating Battery Charger Controller Design with Nonlinear PID Controller for an Extendable CHIL Setup .....                                      | 7  |
| <i>Shervin Salehi Rad, Micheal Muhlbaier, Oleg Fishman, Javad Chevinly, Elias Nadi, Hua Zhang, Fei Lu</i>                                                              |    |
| Model Design for Evaluating Oscillating Voltage Characteristic in Hybrid-Switch T-Type Converter Considering Parasitics .....                                          | 12 |
| <i>Amir Babaki, Mohammad Sadegh Golsorkhi, Thomas Ebel, Nicklas Christensen, Stefan Behrendt, Jesco Beyer</i>                                                          |    |
| Optimization Methods of Axial Flux Machines Using 2D Finite Element Analysis .....                                                                                     | 18 |
| <i>Ahmed Shoeb, Sainan Xue, Dheeraj Bobba, Vedanadam Mudumbai Acharya</i>                                                                                              |    |
| A Dual Energy Management for Hybrid Electric Vehicles.....                                                                                                             | 23 |
| <i>Laxman Timilsina, Okan Ciftci, Ali Moghassemi, Elutunji Buraimoh, Sm Imrat Rahman, Phani Kumar Chamarthi, Gokhan Ozkan, Behnaz Papari, Christopher S. Edrington</i> |    |
| Smart Reconfigurable Battery Packs with Scalable AI Based Cell Balancing .....                                                                                         | 29 |
| <i>Yuqin Weng, Cristinel Ababei</i>                                                                                                                                    |    |
| Comparative Analysis of Doubly Salient Electrical Machines.....                                                                                                        | 35 |
| <i>Maryam Salehi, Chandra Sekhar Goli, Madhav Manjrekar</i>                                                                                                            |    |
| In-Slot Cooling Enabled Heavy Rare-Earth Free High Power Density Electric Motor for EV Application .....                                                               | 41 |
| <i>Amitav Tikadar, Yogendra Joshi, Satish Kumar</i>                                                                                                                    |    |
| Design and Development of H-AUV for Shallow Water Applications.....                                                                                                    | 49 |
| <i>Shakeera Shaik, Sudarshan Madeswaran, Palaniappan Manickavasagam, Hrishikesh Venkataraman</i>                                                                       |    |
| Thermal Integration of a High Power Polyphase Inductive Coil Assembly .....                                                                                            | 54 |
| <i>Andrew Foote, Erdem Asa, Omer Onar</i>                                                                                                                              |    |
| Thermal Analysis of a Polypropylene Capacitor for Resonant Tuning Networks in WPT Applications.....                                                                    | 59 |
| <i>Ahmet Aktas, Himel Barua, Erdem Asa, Omer C. Onar</i>                                                                                                               |    |
| Accurate Surface Temperature Monitoring of Lithium-Ion Batteries.....                                                                                                  | 64 |
| <i>Mahyar J. Koshkouei, Nessa Fereshteh Saniee, Anup Barai</i>                                                                                                         |    |
| Mitigating Space Charge Injection and Accumulation Using Electrets in Low Pressures .....                                                                              | 69 |
| <i>Pradip Chandra Saha, Omar Faruqe, Asif Muhammad Juberi, Chanyeop Park</i>                                                                                           |    |
| A Novel AI-Powered Technique for Ontario License Plate Recognition.....                                                                                                | 74 |
| <i>Yujie Hu, Ryan Ahmed, Saeid Habibi</i>                                                                                                                              |    |

|                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| AI-Based Control and Optimization Algorithm for Synthesis of Electrified Drives .....                                                              | 80  |
| <i>Axel Sturm, Michele Inglese, Roman Henze, Ferit Küçükay</i>                                                                                     |     |
| SiO <sub>2</sub> /Si <sub>3</sub> N <sub>4</sub> Electret Incorporated AlN Substrates for Partial Discharge Mitigated WBG Power Electronics .....  | 86  |
| <i>Asif Muhammad Juberi, Pradip Chandra Saha, Omar Faruqe, Chanyeop Park</i>                                                                       |     |
| Reliable Fault-Tolerant Distributed Control for Traction IPMSM in Electric Vehicle/Hybrid Electric Vehicle .....                                   | 92  |
| <i>Laxman Timilsina, Payam R. Badr, Ali Arsalan, Gokhan Ozkan, Behnaz Papari, Christopher S. Edrington</i>                                         |     |
| Design of a Switched Reluctance Motor for an Elevator Application .....                                                                            | 98  |
| <i>Shreyas B. Shah, Maaz Khalid, Berker Bilgin</i>                                                                                                 |     |
| A Camera-LiDAR Fusion Framework for Traffic Monitoring .....                                                                                       | 104 |
| <i>Adrian Sochaniwsky, Yixin Huangfu, Saeid Habibi, Martin Von Mohrenschildt, Ryan Ahmed, Mymoon Bhuiyan, Kyle Wyndham-West, Carlos Vidal</i>      |     |
| Mitigating Partial Discharge in Motor Winding Under Steep Voltage Pulses .....                                                                     | 110 |
| <i>Omar Faruqe, Pradip Chandra Saha, Asif Muhammad Juberi, Chanyeop Park</i>                                                                       |     |
| Numerical Modelling and Control of Electric Two-Wheeler Battery Thermal Management System with Thermoelectric Coolers .....                        | 115 |
| <i>Sankhadeep Bhattacharyya, Truong Dinh, Andrew McGordon</i>                                                                                      |     |
| Impact of Synthesized ICE on Hybrid Drive Efficiency and Operation Behaviour .....                                                                 | 121 |
| <i>Axel Sturm, Roman Henze, Ferit Küçükay, Carsten Wolgast, Peter Eilts</i>                                                                        |     |
| Quantifying the Cold-Weather State-Of-Power Benefits Enabled by Multi-Chemistry EV Battery Pack .....                                              | 127 |
| <i>Cheng Feng Wang, Olivier Trescases</i>                                                                                                          |     |
| Design Optimization of a Multi-Level Converter Supercapacitor System for Electrochemical Impedance Spectroscopy in EV Fast-Charging Stations ..... | 132 |
| <i>Avram Kachura, Mohammad Shawkat Zaman, Olivier Trescases</i>                                                                                    |     |
| Physics-Informed Data-Enabled Predictive Control for Regulating Mixed Traffic Flows .....                                                          | 138 |
| <i>Dongjun Li, Haoxuan Dong, Ziyu Song</i>                                                                                                         |     |
| Development and Validation of Buoyancy Based Depth Control for Micro AUVs .....                                                                    | 144 |
| <i>Manchala Shivamani, M Sudarshan, Vbn Jyothi, A Vadivelan, Hrishikesh Venkataraman</i>                                                           |     |
| Mission Profile-Based Operation Strategies to Improve the Reliability of an ANPC Inverter in Future Electrified Aircraft Propulsion Systems .....  | 149 |
| <i>Yongtao Cao, Hongchang Lyu, Axel Mertens</i>                                                                                                    |     |
| Analytic Selectivity Evaluation of Vehicular Electronic Fuses' Wire Protection Algorithms .....                                                    | 157 |
| <i>Christoph Mayer, Martin Baumann, Hans-Georg Herzog</i>                                                                                          |     |
| Fast Triggering Time Determination of a Vehicular Electronic Fuse's Wire Protection Algorithm .....                                                | 163 |
| <i>Christoph Mayer, Martin Baumann, Hans-Georg Herzog</i>                                                                                          |     |
| 4kV/400A/1.6MW Wireless Coupled Solid-State Circuit Breaker with Modular Active Voltage Clamping and Resonant Current Injection Circuits .....     | 169 |
| <i>Shuyan Zhao, Reza Kheirollahi, Yao Wang, Liang Du, Hua Zhang, Fei Lu</i>                                                                        |     |

|                                                                                                                                                           |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Optimal Battery Thermal Management During and Prior to Fast Charging Using Dynamic Programming.....                                                       | 177 |
| <i>Lukas Acker, Engelbert Trunner, Peter Hofmann</i>                                                                                                      |     |
| Load Torque Estimation for Efficient Operation of PMSM-Based Electrified Powertrain .....                                                                 | 185 |
| <i>Ahmad Hussain Safder, Athar Hanif, Qadeer Ahmed</i>                                                                                                    |     |
| Influence of Machine Parameter Variation on Quantified PSOE in Feedforward Controlled PMSM.....                                                           | 191 |
| <i>Ujala A. Maha Gamage, Sandun S. Kuruppu</i>                                                                                                            |     |
| A Study on the Performance Improvement of Axial Flux Permanent Magnet Machines Based on Stator Slot Design with Semi-Closed Slots Or Magnetic Wedges..... | 197 |
| <i>Jangho Yun, Brandon Grainger, Paul Ohodnicki</i>                                                                                                       |     |
| A Comprehensive Analysis of Electromagnetic NVH in Electric Powertrain .....                                                                              | 203 |
| <i>Zhenhua Huang, Anthony Tsoulfaidis, Marcel Schmädicke, Dapu Zhang, Greg Fialek, Joe Wimmer</i>                                                         |     |
