Table of Content

Preface	8
Scientific & Organising Committee	9
List of Sponsors and Exhibitors	10
Keynote Lectures	11
Session Plan	13
Full Papers	27
Engineering in an emergency	28
Engineers and climate action: are we rising to the challenge?	37
Low carbon technologies to be challenged in the supply chain of concrete structures	46
In plain sight?	54
The effect of horizontal loads caused by rapidly rising river water on the bearing capacity of masonry arch bridges	59
Efforts of Seismic Retrofit: The Future Challenge of Innoshima Bridge Beyond 40 Years of Service	67
Global Trends in Bridge Collapse Incidents in 2023: an Analysis of Regional Patterns and Causative Factors	75
Masonry arch bridges in the 21st century	83
Construction and Testing of a CFRP-prestressed Railway Bridge Prototype	90
Ethical challenges and greenwashing - challenges for structural engineers	99
Data-driven and Production-oriented Tendering Design using Artificial Intelligence	107
Specimen Design and Advanced Material Testing for 3D Printing Concretes	115
Shifting the Density Discourse: the Future of Soft Density	124
Carbon emissions, net zero, lifespan and circularity interaction strategies	133
Inspection and retrofitting of Danube bridge - Ruse-Giurgiu - challenges and innovative approaches	139
Proposal for cable replacement method incorporating arch structure in aging cable-stayed bridges	148
Unified Explanation of Cracks for Long-Span Prestressed Concrete Box Girder Bridge Using Spatial Lattice Grid Model	156
Evaluation of the behaviour of old beam-plate bridges	165
Structural Assessment of the M6 Bromford Viaduct Against Ground Movements	173
Rehabilitation of the Outeiro Bridge with emergency strengthening of the superstructure damaged by barges impact	182
Development and validation of a train-bridge interaction model	190
Towards Cyber-Secure and Hazard-Resilient Smart Civil Structures	199
Effect of Initial Web Out-of-Flatness Imperfections on the Shear Strength of Low-Frequency Sinusoidal Plate Girders	208
Developing computational design techniques to meet the increasing demand for more complex and sustainable bridges in Southeast Asia.	218

IABSE Symposium Manchester 2024
Construction's Role for a World in Emergency

Additively Constructed Seismically Protected System for Bridge Infrastructure	227
The New Pooley Bridge - Reconnecting a Community	235
Nonlinear aerostatic stability of a curved 275-m span suspension footbridge between Spain and Portugal	243
Time-dependent analysis of long-span prestressed concrete bridges considering nonlinear creep behaviour.....	252
Design and Construction of an Arch Bridge over Railway Line no. 132 in Poland using BIM Tools	260
Fatigue Design of Van Brienenoord Bridge Deck	268
Adaptive pathways for critical infrastructure resilience	277
The Transpennine Route Upgrade & Project West 3	286
The Legacy of the Past: Geotechnical challenges from coal mining impacting major rail infrastructure	294
Transpennine Route Upgrade - Huddersfield Viaduct	302
Baker Viaduct: On Track to Better - The Design of a New Railway Viaduct for the 21st Century	311
Estimation of Construction Year of Medium to Long Road Bridges in Zambia using Satellite Imagery	319
Fatigue life prediction of orthotropic steel decks based on Phase Field model	328
Renewing Short-Span Existing Bridge Decks with CFRP Tendons for Durability	336
Inspection and complete rehabilitation of the Langebro Bridge in Copenhagen with focus on sustainable solutions	345
Strengthening of a Curved and Skew Supported Prestressed Hollow Box Girder	354
Microcracks assessment during unloading for structural elements reuse	361
Damage characterisation using Sentinel-1 images: Case study of bridges in Ukraine	367
Structural assessment of corbels and half-joints in existing bridges	376
Evaluation on a load-carrying capacity of the stiffened plates subjected to biaxial forces considering the local buckling of the longitudinal ribs	385
Load Transfer Mechanism of Single-sided frictional joints with high strength countersunk head bolts	393
Influence of CO ₂ Emission Pricing on the Degree of Reuse in Building Projects	402
Effect of Topology Optimization Parameters on Additively Manufactured Space Frame Nodes	409
Development of cold-bonded lightweight concrete aggregates using biowaste	419
Properties of Cementitious Materials with Reclaimed Cement	428
Lateral stiffness design and optimization for over-track residential towers in metro depots	435
Bracklinn Falls Footbridge: Efficient Modular Design	443
Life-cycle analysis of the Colne Valley Viaduct being delivered by the Align JV as Part of HS2 Phase One in the UK	451
A low carbon bridge over the River Thames, London, UK	460
How to design a low carbon bridge?	469
Thame Valley Viaduct: carbon efficient DfMA viaduct for HS2	478
Investigation into the cause of cracks and the opportunity to refurbish steel Vierendeel railway bridges	486
A Case Study on the Analysis and Rehabilitation of an Existing Through Arch Truss Bridge	493
River Lea Crossing Refurbishment & Strengthening: A case study for refurbishment of an historic bridge	500
Hidden defects risk assessment at the Humber Bridge	509
Composite Effects Between Steel Girder and Orthotropic Steel Deck Connected by Shear Force Transferring Members During Deck Replacement Work	518
Numerical Study on Square Large Sectional Concrete-Filled Steel Tubular Columns with Separating Cross Steel Plate	527

IABSE Symposium Manchester 2024
Construction's Role for a World in Emergency

Variable stiffness and damping components for semi-active vibration control and inflatable rigidization	534
Extradosed Bridge Part of the Third Ring Road of Mecca - Conceptual Design	543
Cody Dock Rolling Bridge: infrastructure and place	551
Design of Whitegates to Athlone Castle Pedestrian, Cycle Bridge	560
Two-dimensional transient thermal analysis of drilled-pile wall exposed to extreme temperatures and discussion on frost mitigation methods	573
A New Method for Calculating the Shear Stiffness of RC Beams with Web Diagonal Cracks	581
Predicting Fractures in Reinforcing Steel Bars: A Low Cycle Fatigue CNN Approach	587
Ultimate Shear Strength of Welded Stainless and Carbon Steel Girders	596
Streamlining a Transitional Shelter Design: A DFMA-Driven Approach for Efficient Design and Assembly	604
Assessing the carbon footprint of bridges and a strategy to deliver carbon reductions	613
As bridge engineers, are we designing efficient structures?	622
A broadened approach to the environmental assessment in bridge design	631
Reuse of cast-in-place concrete slabs in new structures	639
Sustainable concrete used in the Uithoornlijn project	647
System reliability accounting for corrosion-induced degradation over time	655
Bristol Temple Meads Railway Station roof refurbishment project	664
Assessment of strength and stiffness properties of wood in existing structure	673
Shear reinforcement of Steel I-beams using CFRP composites	681
Seismic Evaluation and Rehabilitation of Steel Structures in the United States	690
Creating an extra floor space to an iconic building in the centre of London	698
Reconstruction of a Ukrainian road bridge by use of 3D printed minimass™ beams	706
Fast, interactive digital design tools to inform decision making in bridge design	715
Application of Carbon Fibre Reinforced Polymer Cable in Extradosed Bridge	724
The client's point of view on the realisation of a geopolymers concrete bridge with recycled concrete aggregates	730
Topology Optimization Based Additive Construction for Sustainability	738
Pile type selection and design of permanent-temporary synthesis structures for underground urban complexes in soft soil foundation site	745
Additive Manufacturing Techniques for Repairable Braced Frames	753
Data-driven corrosion risk assessment for structures using ISO 9223	762
Preliminary tests for application of carbon nanotubes and bacillus sphericus bacteria in self-healing cement mortars	769
Methodology of a predictive tool for corrosion prediction and risk-based maintenance in reinforced concrete structures	775
Selection and Design of Integrated Coating Systems for Structural Components of All Steel Residential Towers	783
Electric Curing of Conductive Concrete for Cold Weather.....	789
Tensile strength of column-pile joints when using anchor plates	798
Strain Distributions for Shotcrete Failure in Hard Rock Tunnels	806
An Anti-corrosion Method for Concrete Slab with Cathodic Protection	814
Enhancing Root-Deck Crack Detection in Orthotropic Steel Decks through Numerical Investigation of Eddy Current Techniques	822
Patch Plate Strengthening of Steel Box Member by Frictional High-Strength Bolts/Studs	831
Effect of column studs on column-pile joints in buildings without underground beams	840
Experimental study on the bond-slip relationship between concrete and deformed rebar embedded in grouted corrugated duct	848
Sustainability as a key design factor from the structure conception stage	855
Deep reinforcement learning algorithm based optimization method for the multiple storey braced steel frame structure under global stiffness constraints	864

IABSE Symposium Manchester 2024
Construction's Role for a World in Emergency

Experimental study and finite element analysis on seismic behavior of flat vertical-diaphragm stiffened concrete-filled SHS column joints	871
Advancements in Shear Resistance Prediction for Concrete Beams: A New Shear Model	879
Overturning of Freestanding Cylindrical Structures under Pulse-like Ground Motions	887
Evaluation of Resilience in Displacement Restrain Brace with initial story stiffness and Buckling Restrained Brace	896
Heating and Thermal Conductivity Effect Inside High Damping Rubber Bearing at Low Temperature	904
Vibration design and dynamic testing for long cantilever composite floors equipped with vibration rods in office tower	913
Fabrication's role in a world in emergency: reducing environmental impact by collaboration ...	922
Analysing embodied carbon for rural trail bridges in East Africa	929
Load Bearing Behavior of 3D Printed Prestressed Segmental Concrete Girders	938
Super-Low-Carbon Footbridge Design	947
Sustainability and Beauty in Bridge Design	955
Humber Bridge side span rocker bearings replacement	964
Strategies for Saving the Existing Infrastructure in Germany	972
From the Drone to the BIM-Model - A Method for Creating As-Is Models in Bridge Construction for the Use Case of Digital Bridge Inspection	980
Strengthening of the A52 Clifton Stage 2 bridge in Nottingham	988
Management of Corrosion Damage in Locked Coil Cables of the Galecopper Bridge: Case Study, Detection, Assessment, and Strengthening	997
Tests of stainless steel circular tubular stub columns with seawater sea-sand concrete infill	1006
Analysis and design of steel structures equipped with pressure-adjustment fluid viscous dampers for wind-and-seismic double-excitation vibration mitigation	1015
Unlocking Modularity Benefits with the Use of Precast Segmental Technology	1025
FLOW Bridge - A modular FRP footbridge designed through an innovative procurement process	1034
Novel engineering solutions for incremental launching of bridges on low-friction materials: case studies of Nowra and Sydney Gateway bridges in Australia	1043
Potential of the structural application of GFRP bars as an alternative reinforcement for recycled aggregate concrete slabs	1051
Sensitivity Analysis and Optimization of Coupling Trusses under Earthquake Stiffness Constraints for Multi-Core Supertall Buildings	1058
Selection and design of wind and earthquake double-excitation vibration mitigation system using fluid viscous dampers for steel residential towers	1067
Optimising material use and pedestrian comfort in the design of a hybrid steel-FRP bridge	1077
New Precast Concrete Segmental High-Speed Railway Bridges from Lianyungang to Xuzhou: Donghai Viaduct and Daxu Viaduct	1083
Resource-efficient Excavation Pit Design and Construction with the Integration of Existing Structures	1433
Flo:Re - A new floor system made of reused concrete and steel elements	1092
The use of modular construction and component-based design to minimise waste and maximise efficiencies	1100
Nonlinear analysis of flat slab-column connections with openings close to the column reinforced with HPFRC under punching shear stress	1108
Sensitivity analysis of controlling indices and structural optimization for reinforced concrete shearwall residential towers	1118
Sensitivity analysis on the statistical parameters of the fatigue factors for fatigue reliability evaluation	1127

IABSE Symposium Manchester 2024
Construction's Role for a World in Emergency

Bridge Rehabilitation with Thermal Spray Zinc Coatings	1134
ElevArch® Masonry arch bridge jacking technique to save historic structures	1140
Neural Network Dynamic Metamodels for a Highly Detailed Cable-Stayed Bridge Finite Element Model	1149
Weldability and post-welding fatigue strength of older railway bridges	1158
Experimental Study of Compressive Strength of CFRP Reinforced Steel Columns	1165
Experimental and numerical study on the seismic performance of irregularly concrete-filled steel tube column to steel beam joints with inner semi-diaphragm	1173
Experimental bending tests on filler beam section with SFRC	1182
Suitability of EN 1317 crash test parameters for determining accidental loads on bridges	1189
Rehabilitation of the flood damaged Mhlali River Bridge and adaptation for improved resilience to extreme weather events	1198
An Experimental Study of Self-anchored Combined CFRP Cables	1206
A new era of a more durable and reliable segmental post-tensioned construction	1212
Design and detailing of durable and sustainable Post-Tensioning structures with polymer ducts according to fib bulletin no. 75	1218
A Finnish Case Study of U-Trough Underpasses in high water table conditions for Gravity vs Anchored Structural System	1225
Shake Table Studies of Precast Bridge Columns with a Novel UHPC Connection	1234
Chain reaction failure analysis for tied arch bridges considering cable corrosion	1243
Effects of material properties on slipping behavior in high-strength bolted frictional GFRP joints	1251
Interdisciplinary data collection for empirical community-level recovery modelling	1260
Productivity increase in the design and construction of bridges	1268
Soho Loop Cantilever Footbridge	1277
Re-use of wind turbine steel towers for pedestrian bridges	1285
Design and construction of the flyover in the intermodal ferry terminal in Świnoujście	1295
Optimization Process of Railway Segmental Bridges Constructed by Balanced Cantilever Method	1303
Teaching Reuse of Existing Structures at the University of Sheffield	1310
Challenging prior decisions relating to existing bridges	1316
Sustainable salvation of deficient RC bridges by means of the UHPFRC Technology	1325
M5 Exe and Exminster Viaducts - Strengthening and Safeguarding	1332
Extended linear finite element calculation of a 70-years old prestressed concrete viaduct	1340
Climate Resilience of Long-Span Bridges through Early Stage Aerodynamic and Climate Consulting	1348
Bridge hangers as cruciform sections - Advantages and behaviour under wind loading	1358
Design of the Bataan-Cavite Interlink Bridge (BCIB) Project in The Philippines	1366
Structural configuration of negative bending moment zone in continuous MVFT girder bridge	1375
Ship impact loads on construction pits of bridges	1383
Stainless steel as a structural material in the drive toward net-zero bridges	1390
Advanced steel solutions for a sustainable and economic bridge infrastructure	1399
Environmentally conscious structural design and material selection of short-span bridges	1407
The impact on structural embodied carbon of using loads obtained from wind tunnel testing vs code based loads	1415
Probabilistic modelling of building stock properties for urban mining	1424
Author Index	1444
