Table of Contents

Message from the FORGE 2024 Chairs ..... **viii**
Organizing Committee ..... **ix**
Program Committee ..... **x**

Foundation Models for Software Quality Assurance

Deep Multiple Assertions Generation 1
Hailong Wang (Zhejiang University, China), Tongtong Xu (Huawei, China), and Bei Wang (Huawei, China)

MeTMaP: Metamorphic Testing for Detecting False Vector Matching Problems in LLM Augmented Generation 12
Guanyu Wang (Beijing University of Posts and Telecommunications), Yuekang Li (University of New South Wales), Yi Liu (Nanyang Technological University), Gelei Deng (Nanyang Technological University), Tianlin Li (Nanyang Technological University), Guosheng Xu (Beijing University of Posts and Telecommunications), Yang Liu (Nanyang Technological University), Haoyu Wang (Huazhong University of Science and Technology), and Kailong Wang (Huazhong University of Science and Technology)

Planning to Guide LLM for Code Coverage Prediction 24
Hridya Dhulipala (The University of Texas at Dallas, USA), Aashish Yadavally (The University of Texas at Dallas, USA), and Tien Nguyen (The University of Texas at Dallas, USA)

The Emergence of Large Language Models in Static Analysis: A First Look through Micro-benchmarks 35
Ashwin Prasad Shivarpatna Venkatesh (Heinz Nixdorf Institut, Paderborn University), Samkutty Sabu (Paderborn University), Amir M. Mir (Delft University of Technology), Sofia Reis (INESC-ID and IST, University of Lisbon), and Eric Bodden (Heinz Nixdorf Institut & Fraunhofer IEM, Paderborn University)

Reality Bites: Assessing the Realism of Driving Scenarios with Large Language Models 40
Jiahui Wu (Simula Research Laboratory and University of Oslo, Norway), Chengjie Lu (Simula Research Laboratory and University of Oslo, Norway), Aitor Arrieta (Mondragon University, Spain), Tao Yue (Beihang University, China), and Shaukat Ali (Simula Research Laboratory, Norway)

Assessing the Impact of GPT-4 Turbo in Generating Defeaters for Assurance Cases 52
Kimya Khakzad Shahandashti (York University), Mithila Sivakumar (York University), Mohammad Mahdi Mohajer (York University), Alvine Boaye Belle (York University), Song Wang (York University), and Timothy C. Lethbridge (University of Ottawa)

Properties of Foundation Models

Exploring the Impact of the Output Format on the Evaluation of Large Language Models for Code Translation 57
Marcos Macedo (Queen's University), Yuan Tian (Queen's University), Filipe R. Cogo (Centre for Software Excellence, Huawei Canada), and Bram Adams (Queen's University)

Is Attention All You Need? Toward a Conceptual Model for Social Awareness in Large Language Models 69
Gianmario Voria (University of Salerno, Italy), Gemma Catolino (University of Salerno, Italy), and Fabio Palomba (University of Salerno, Italy)

An Exploratory Investigation into Code License Infringements in Large Language Model Training Datasets 74
Jonathan Katzy (Delft University of Technology), Răzvan-Mihai Popescu (Delft University of Technology), Arie van Deursen (Delft University of Technology), and Maliheh Izadi (Delft University of Technology)

Foundation Models for Code and Documentation Generation

Fine Tuning Large Language Model for Secure Code Generation 86
Junjie Li (Concordia University, Canada), Aseem Sangalay (Delhi Technological University, India), Cheng Cheng (Concordia University, Canada), Yuan Tian (Queen's University, Canada), and Jinqiu Yang (Concordia University, Canada)

Investigating the Performance of Language Models for Completing Code in Functional Programming Languages: a Haskell Case Study 91
Tim van Dam (Delft University of Technology), Frank van der Heijden (Delft University of Technology), Philippe de Bekker (Delft University of Technology), Berend Nieuwschepen (Delft University of Technology), Marc Otten (Delft University of Technology), and Maliheh Izadi (Delft University of Technology)

On Evaluating the Efficiency of Source Code Generated by LLMs 103
Changan Niu (State Key Laboratory for Novel Software Technology, Nanjing University), Ting Zhang (School of Computing and Information Systems, Singapore Management University), Chuanyi Li (State Key Laboratory for Novel Software Technology, Nanjing University), Bin Luo (State Key Laboratory for Novel Software Technology, Nanjing University), and Vincent Ng (Human Language Technology Research Institute, University of Texas at Dallas)

PathOCL: Path-Based Prompt Augmentation for OCL Generation with GPT-4 108
Seif Abukhalaf (Polytechnique Montréal, Canada), Mohammad Hamdaqa (Polytechnique Montréal, Canada), and Foutse Khomh (Polytechnique Montréal, Canada)

Creative and Correct: Requesting Diverse Code Solutions from AI Foundation Models 119
Scott Blyth (Monash University), Markus Wagner (Monash University), and Christoph Treude (Singapore Management University)

Commit Message Generation via ChatGPT: How Far Are We? 124
Yifan Wu (Peking University, China), Ying Li (Peking University, China), and Siyu Yu (The Chinese University of Hong Kong, Shenzhen (CUHK-Shenzhen), China)

Author Index **131**
