Volume 12925
Part One of Two Parts

Proceedings of SPIE, 1605-7422, V. 12925

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Medical Imaging 2024: Physics of Medical Imaging*, edited by Rebecca Fahrig, John M. Sabol, Ke Li, Proc. of SPIE 12925, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xiii *Conference Committee*

Part One

PHOTON COUNTING IMAGING

12925 02 **Optimal weighting strategies for maximizing contrast-to-noise ratio in photon counting CT images** [12925-1]

12925 03 **Physics-based modeling of energy threshold induced spectral inconsistency and its adaptive correction scheme for photon-counting CT** [12925-2]

12925 04 **Performance assessment of photon counting versus energy integrated CT: concordance of in vivo and phantom measurements** [12925-3]

12925 05 **MACE CT reconstruction for modular material decomposition from energy resolving photon-counting data** [12925-4]

APPLICATIONS OF MACHINE LEARNING

12925 06 **May denoising remove structures? How to reconstruct invariances of CT denoising algorithms** [12925-5]

12925 07 **Deep-learning-based motion artifact reduction for photon-counting spectral cardiac CT** [12925-6]

12925 08 **Evaluation of data uncertainty for deep-learning-based CT noise reduction using ensemble patient data and a virtual imaging trial framework** [12925-7]

ADVANCES IN DETECTOR DESIGN AND CHARACTERIZATION

12925 0B **Experimental evaluation of a micron-resolution CT detector** [12925-10]

12925 0C **Activating the interpixel septa of scintillator-photodiode detectors using an x-ray fluorescent reflector material** [12925-11]

12925 0E **CASYMIR: a generalized cascaded linear system model implementation for x-ray detectors** [12925-13]

12925 0F **Reconstruction with an alternating aperture, photon counting detector** [12925-14]

PHASE CONTRAST AND PRECLINICAL IMAGING

12925 0G **Advancing x-ray dark-field imaging for human-scale applications: helical CT and surview imaging** [12925-15]

12925 0H **Non-prewhitening observer applied on grating-based and grating-less phase-contrast imaging: a simulation study** [12925-16]

12925 0I **X-ray diffraction imaging of glioblastoma and ductal carcinoma in-situ** [12925-17]

12925 0J **Advancing preclinical micro-photon counting CT perfusion imaging: from phantom experiments to in vivo applications** [12925-18]

12925 0K **Kidney stone compositional analysis and identification using a benchtop high-resolution multi-modal x-ray phase-contrast micro-CT imaging system** [12925-19]

12925 0L **Cramér-Rao lower bound in the context of spectral x-ray imaging with propagation-based phase contrast** [12925-20]

MAMMOGRAPHY AND BREAST IMAGING

12925 0M **An accretion approach to glandularity estimation in digital breast tomosynthesis** [12925-21]

12925 0N **Improved isotropic resolution and small detail detectability in a digital breast tomosynthesis system with flying focal spot technology** [12925-22]

12925 0O **Hybrid thick-slice reconstruction in wide-angle DBT for optimal micro-calcification and mass perceptibility** [12925-23]

12925 0P **Exploring the effect of observer task in evaluating performance of FFDM with in silico modeling** [12925-24]

12925 0Q **Breast shape-specific subtraction for improved contrast-enhanced mammography imaging** [12925-25]

ANGIOGRAPHY AND RADIOGRAPHY

12925 0R **Anti-correlated noise reduction in triple-energy, photon-counting x-ray angiography** [12925-26]

12925 0S **A CT system-free approach for brain CT perfusion assessment: temporal perfusion index estimation** [12925-27]

12925 0T **X-ray source array optimization for mobile chest tomosynthesis** [12925-28]

12925 0U **Design optimization of a triple-layer flat-panel detector for three-material decomposition** [12925-29]

12925 0V **Denoising x-ray images with deep learning: impact of spatially correlated noise** [12925-30]

NUCLEAR MEDICINE AND DENTAL IMAGING

12925 12 **WIN-PDQ: a Wiener-estimator-based projection-domain quantitative SPECT method that accounts for intra-regional uptake heterogeneity** [12925-32]

12925 13 **Unsupervised-learning material decomposition for dual-energy CT with image-domain data fidelity** [12925-33]

12925 14 **Neural attenuation fields for metal artifact reduction in dental CT** [12925-35]

12925 15 **Development of a true 14.8um pixel resolution intraoral sensors for dental x-ray imaging** [12925-36]

CT RECONSTRUCTION AND IMAGE QUALITY

12925 16 **Fourier diffusion for sparse CT reconstruction** [12925-37]

12925 17 **Patient-specific NEQ(f): automatic local and global determination of spatial-frequency-dependent SNR and task performance in clinical CT** [12925-38]

12925 18 **An alternative Bayesian reconstruction of sparse-view CT by optimizing deep learning parameters** [12925-39]

12925 19 **Diffusion posterior sampling for nonlinear CT reconstruction** [12925-40]

12925 1A **Retrospective tube current modulation optimization of individualized organ-level CT dose and image quality** [12925-41]

CBCT DEVELOPMENT AND RECONSTRUCTION

12925 1B **Multi-source semi-stationary CT for brain imaging: development and assessment of a prototype system and image formation algorithms** [12925-42]

12925 1C **Dual-energy CBCT by spectral filtration of a dual-focus CNT x-ray source** [12925-43]

12925 1D **Motion-compensated 4DCT reconstruction from single-beat cardiac CT scans using convolutional networks** [12925-44]

12925 1E **One-shot estimation of epistemic uncertainty in deep learning image formation with application to high-quality cone-beam CT reconstruction** [12925-46]

CT CLINICAL APPLICATIONS

12925 1H **Development and application of a virtual imaging trial framework for longitudinal quantification of emphysema in CT** [12925-48]

12925 1I **Uncertainty estimation and reduction in deep learning-based projection domain cardiac phase estimation** [12925-49]

12925 1J **Personalized, scout-based dose estimation for prospective optimization of CT tube current modulation** [12925-50]

12925 1K **Hybrid spectral CT system with clinical rapid kVp-switching x-ray tube and dual-layer detector for improved iodine quantification (Physics of Medical Imaging Student Paper Award)** [12925-51]

12925 1L **Denoising pediatric cardiac photon-counting CT data using volumetric vision transformers and unpaired training data** [12925-52]

PHYSICAL AND VIRTUAL PHANTOM DEVELOPMENT

12925 1M **Printing anthropomorphic multi-energy CT phantoms for spectral imaging with office laser printers** [12925-53]

12925 1N **Synthesizing heterogeneous lung lesions for virtual imaging trials** [12925-54]

12925 1O **Lifelike PixelPrint phantoms for assessing clinical image quality and dose reduction capabilities of a deep learning CT reconstruction algorithm** [12925-55]

12925 1P **Using simulated breast lesions based on Perlin noise for evaluation of lesion segmentation** [12925-56]

12925 1Q **Random walk small intestine models for virtual patient populations** [12925-57]

JOINT SESSION WITH CONFERENCES 12925 AND 12928

12925 1R **Thermometry mapping during CT-guided thermal ablations: sensitivity and clinical feasibility using spectral CT** [12925-58]

12925 1S **A study on the influence of radiation dose on device tracking accuracy during continuous-sweep limited angle fluoroscopy** [12925-59]

12925 1T **FEM deformable liver registration to facilitate CBCT guided histotripsy** [12925-60]

POSTER SESSION: CT

12925 1U **Patient-specific data augmentation method to improve the training efficiency of convolutional neural network for metal artifact reduction with a single patient dental CT volume** [12925-61]

12925 1V **A method to generate patient CT noise for deep learning network training** [12925-62]

12925 1W **A challenge for high-speed and high-resolution CT for extremities with clinical feasibility** [12925-63]

12925 1X **Genuine "one-stop-shop" stress myocardial CT perfusion: taking full advantage of a 320-row CT imaging system** [12925-64]

12925 1Y **Enhancing personalized contrast injection in computed tomography: clinical validation of a machine learning algorithm for accurate fat-free mass estimation** [12925-65]

12925 1Z **Wavelet domain-based deep residual learning for metal artifact reduction in computed tomography** [12925-66]

12925 20 **An iterative reconstruction network for incomplete projections of static CT** [12925-67]

12925 21 **Automatic tuning of CT imaging parameters with reinforcement learning** [12925-68]

12925 22 **Feasibility of data-driven scatter correction method in a triple-source CT** [12925-69]

12925 23 **Dual-domain fusion network for metal artifact reduction in CT** [12925-70]

12925 24 **SGM-based sparsity reconstruction under non-standard geometry of robotic CT** [12925-71]

12925 25 **Jacobian analysis in deep learning CT denoising networks** [12925-72]

12925 26 **An investigation of correlation between external surrogate signal and internal motion according to respiratory irregularity** [12925-73]

12925 27 **PixelPrint: generating patient-specific phantoms for spectral CT using dual filament 3D printing** [12925-74]

12925 28 **Enhanced CT simulation using realistic vascular flow dynamics** [12925-75]

12925 29 **Sensitivity analysis of dual-energy computed tomography multi-triplet material decomposition** [12925-76]

12925 2B **Improved coronary artery calcium (CAC) detection in conventional CT with deep-learning image de-blurring** [12925-78]

12925 2C **Impact of deep-learning CT image denoising on the accuracy of radiomics parameter estimation** [12925-79]

Part Two

12925 2D **Validating a simulation tool for use with patient data for evaluation of advanced CT reconstruction** [12925-80]

12925 2E **Rotating projection-based localizer radiograph: enable sparse sampling for dose-saving and scan speed enhancement with transformer combined CNN** [12925-81]

12925 2F **Virtual NLST: towards replicating national lung screening trial** [12925-82]

12925 2G **Metal artifact reduction in CT using unsupervised sinogram manifold learning** [12925-83]

12925 2H **Multi-channel reconstruction (MCR) toolkit v2.0: open-source Python-based tools for x-ray CT reconstruction** [12925-84]

12925 2I **Local motion detection, characterization, and quantification for x-ray CT** [12925-85]

12925 2K **Image texture aided spectral CT material decomposition** [12925-88]

POSTER SESSION: PHOTON COUNTING IMAGING

12925 2L **Spectral correction of photon-counting detectors in contrast-enhanced spectral mammography using a light-weight convolutional neural network** [12925-105]

12925 2M **Applicability of high tube voltage imaging to achieve accurate quantitative images when applying photon counting detectors to general radiography** [12925-106]

12925 2N **Dual-source photon-counting CT: impact of residual cross-scatter on quantitative spectral results** [12925-107]

12925 2O **Spectral photon-counting CT for quantification of iodized oil in mouse tumors** [12925-108]

12925 2P **Proton-stopping power ratio prediction using photon-counting computed tomography and deep learning** [12925-110]

12925 2Q **Learned high-resolution cardiac CT imaging from ultra-high-resolution PCD-CT** [12925-111]

12925 2R **Improving stenosis assessment in energy integrating detector CT via learned monoenergetic imaging capability** [12925-112]

12925 2S **Deep grid inpainting for photon-counting CT detectors** [12925-113]

12925 2T **Iodine K-edge imaging in photon counting CT through multiple two-basis decompositions and deep learning** [12925-114]

12925 2U **A comparative study on the utility and choice parameters of photon-counting CT for bone quantification** [12925-115]

12925 2V **An acquisition-based approach for high-fidelity infilling of photon-counting x-ray detector pixel gaps** [12925-116]

12925 2W **Comparison of energy-integrating detectors and photon-counting detectors for MV-kV dual-energy imaging on a tomographic therapy system** [12925-117]

12925 2Y **Deep learning models for rapid denoising of 5D cardiac photon-counting micro-CT images** [12925-119]

12925 30 **Dose-efficient characterization of coronary artery plaques with a prototype CdZnTe-based photon-counting CT scanner** [12925-121]

12925 31 **A generic model of semiconductor-based photon-counting detectors for spectral CT** [12925-122]

12925 32 **Boundary artifact reduction in projection-based material decomposition using cluster analysis in Timepix3 detector** [12925-123]

POSTER SESSION: DETECTORS

12925 33 **A direct Monte Carlo method for the performance assessment of pixelized detectors** [12925-124]

12925 34 **Novel high-stopping power scintillators for medical applications** [12925-125]

12925 36 **Investigation of correction and decomposition algorithms in bedside x-ray imaging simulating a multi-layer flat panel detector** [12925-127]

12925 37 **An alloyed a-Se-Te indirect flat panel imager for improved performance in a dual-layer x-ray detector** [12925-128]

12925 38 **Enhancing temporal performance of a-Se detectors using a low-temperature hole-blocking bilayer design** [12925-129]

POSTER SESSION: CBCT

12925 39 **Utilizing U-Net architectures with auxiliary information for scatter correction in CBCT across different field-of-view settings** [12925-89]

12925 3A **Diffusion model-based single-scan dual-energy cone-beam CT using primary beam splitting** [12925-90]

12925 3B **Improving the accuracy of bone mineral density using a multisource CBCT** [12925-91]

12925 3C **3D metal segmentation from few x-ray images for metal artifact avoidance** [12925-92]

12925 3F **Multisource cone beam computed tomography using a carbon nanotube x-ray source array** [12925-95]

12925 3G **Deep learning-based dose estimation in cone-beam computed tomography** [12925-96]

12925 3H **Real-time dynamic 3D CBCT reconstruction from two projections using latent information of past time steps** [12925-97]

12925 3I **A metal artifacts reducing method in dental cone-beam CT by utilizing intra-oral scan data** [12925-98]

12925 3J **Motion correction algorithm for cone-beam computed tomography** [12925-99]

12925 3K **Investigation on substantial asymmetry of HU value in dental cone-beam CT with offset detector** [12925-100]

12925 3L **Effect of scatter suppression with 2D antiscatter grids in photon counting compact CBCT** [12925-101]

12925 3M **Deep learning-based enhancement of ultra-low-dose cone-beam CT image using simulated data** [12925-102]

12925 3N **Optimizing proton stopping power ratio prediction with dual-energy cone-beam CT using the Cramér-Rao lower bound** [12925-103]

12925 3O **Unsupervised medical image generation for dental imaging: super-resolution of synthetic panoramic x-ray images with CycleGAN** [12925-104]

POSTER SESSION: PHASE CONTRAST IMAGING

12925 3P **Phase and dark field tomography with structured illumination** [12925-130]

12925 3Q **Towards a high-resolution volumetric x-ray diffraction imaging system for biospecimen** [12925-131]

12925 3R **Single-mask phase imaging micro-computed tomography with multi-contrast images and single-shot per projection angle** [12925-132]

POSTER SESSION: X-RAY AND ANGIOGRAPHY

12925 3T **Synthesizing high-resolution dual-energy radiographs from coronary artery calcium CT images** [12925-134]

12925 3U **Comparison of model-based iterative vs non-iterative 3D device reconstruction for continuous-sweep limited-angle fluoroscopy** [12925-135]

12925 3V **Enhancing texture detail recovery in low-dose x-ray fluoroscopic images with a multi-frame deep learning framework** [12925-136]

12925 3X **Noise gate: a physics-driven control method for deep learning denoising in x-ray imaging** [12925-138]

12925 3Y **In-silico analysis of curve fitting in angiographic parametric imaging in intracranial aneurysms to reduce patient and interventionalist-induced errors** [12925-139]

12925 3Z **Fluoroscopic procedure-room scatter-dose reduction using a region-of-Interest (ROI) attenuator** [12925-140]

12925 40 **Dynamic x-ray flux modulation of inverse-geometry CT** [12925-141]

12925 41 **Deep learning-based algorithm to segment pediatric and adult lungs from dynamic chest radiography images using virtual patient datasets** [12925-142]

12925 42 **Innovative CNT x-ray source-based 3D hemispherical multi-beam tomosynthesis for medical imaging** [12925-143]

12925 43 **Prospective cardiac gated stationary computed tomography enabled by carbon nanotube x-ray: a phantom study** [12925-144]

12925 44 **Robustness of spectral digital subtraction angiography to patient motion** [12925-145]

12925 45 **Reliability evaluation of a digital pulse-driven 160kV carbon nanotube-based x-ray source for cell irradiation** [12925-146]

POSTER SESSION: MAMMOGRAPHY

12925 46 **Deep orthogonal multimodality fusion for prediction of axillary lymph node status after neoadjuvant chemotherapy** [12925-147]

12925 47 **In-line spectroscopy for the quantification of iodine in a breast perfusion phantom for dynamic contrast-enhanced dedicated breast CT imaging validation (Physics of Medical Imaging Poster Presentation Award)** [12925-148]

12925 48 **Representation of complex mammary parenchyma texture in tomosynthesis using simplex noise simulations** [12925-149]

POSTER SESSION: NON-IONIZING IMAGING

12925 49 **Nonlinear gradient field estimation in diffusion MRI tensor simulation** [12925-150]

12925 4A **Bayesian Cramér-Rao bound optimization of the illumination pattern in quantitative photoacoustic computed tomography** [12925-151]

12925 4B **CT synthesis using CycleGAN with Swin transformer for magnetic resonance imaging guided radiotherapy** [12925-152]

12925 4C **Effects of MRI parameters on the shifted apparent diffusion coefficient in an abdominal phantom** [12925-153]

12925 4D **WAVE-UNET: wavelength-based image reconstruction method using attention UNET for OCT images** [12925-154]

12925 4E **Fast and accurate MEG source localization using deep learning** [12925-155]

12925 4F **A multimodal, mechanically accurate breast phantom for mimicking compression-induced tumor hemodynamics with optical and x-ray imaging** [12925-156]

POSTER SESSION: NUCLEAR MEDICINE IMAGING

12925 4H **Using xenon-doped liquid argon scintillation for total-body, TOF-PET** [12925-158]

12925 4I **Scatter and tail correction for SPECT scanners with CdZnTe detectors** [12925-159]

12925 4J **Direct reconstruction of PET images via tuned CNNs demonstrates shortcomings in common image quality metrics** [12925-160]

12925 4K **Harnessing quantum entanglement for enhanced accuracy in a prototype CZT PET system: a GATE simulation study** [12925-161]

12925 4L **Enhanced performance characteristics of digital PET for small feature detection relative to non-digital PET** [12925-162]

POSTER SESSION: MACHINE LEARNING

12925 4N **Bridging physics and deep learning: an autoencoder-based approach for non-invasive estimation of prostate tissue composition** [12925-164]

12925 4O **MBURegNet: an unsupervised model-based deep unrolling registration network for deformable image registration in dual-energy CT** [12925-165]

12925 4P **Iodine map synthesis from non-contrast CT using diffusion model** [12925-166]

DIGITAL POSTER SESSION

12925 4R **Dynamic PET image reconstruction using deep physiology prior** [12925-31]

12925 4S **Deep dual-domain-based framework for PET image reconstruction** [12925-34]
