Volume 12928

Proceedings of SPIE, 1605-7422, V. 12928

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Medical Imaging 2024: Image-Guided Procedures, Robotic Interventions, and Modeling*, edited by Jeffrey H. Siewerdsen, Maryam E. Rettmann, Proc. of SPIE 12928, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

ROBOTIC ASSISTANCE

12928 03 **Probe positioning for robot-assisted intraoperative ultrasound imaging using deep reinforcement learning** [12928-1]

12928 04 **A surgical navigation framework for image-guided transoral robotic surgery** [12928-2]

12928 05 **MRI-compatible robot for intracerebral hemorrhage evacuation: sheep brain phantom study** [12928-3]

12928 06 **SAMSNeRF: segment anything model (SAM) guides dynamic surgical scene reconstruction by neural radiance field (NeRF)** [12928-4]

MOVING TARGETS

12928 07 **Physical replication and validation of mathematical mitral valve models** [12928-5]

12928 08 **Design of coronary artery phantom using polyvinyl alcohol cryogel for optical coherence tomography imaging in Kawasaki disease** [12928-6]

12928 09 **Motion-compensated OCT imaging of laryngeal tissue** [12928-7]

12928 0A **Motion artifact classification for quality assessment of cochlear implant postoperative CT images** [12928-8]

12928 0B **Self-supervised monocular depth and ego-motion estimation for CT-bronchoscopy fusion** [12928-9]

TRACKING AND LOCALIZATION

12928 0C **Image guidance system for breast conserving surgery with integrated stereo camera monitoring and deformable correction** [12928-10]

12928 0D **Guiding endovascular catheters using electromagnetic tracking and path-based registration for brain aneurysm treatment** [12928-11]

12928 0E **An augmented reality and high-speed optical tracking system for laparoscopic surgery** [12928-12]

12928 0F **Preliminary assessment of a convolutional neural network for localization of a radioactive source with a hand-held gamma detector (Image-Guided Procedures, Robotic Interventions, and Modeling Student Paper Award)** [12928-13]

12928 0G **Towards optimal camera positioning for navigated surgery applications based on RGBD data** [12928-14]

SURGICAL DATA SCIENCE/VIDEO ANALYSIS

12928 0I **Dual-camera laparoscopic imaging with super-resolution reconstruction for intraoperative hyperspectral image guidance** [12928-16]

12928 0J **Dense surface reconstruction using a learning-based monocular vSLAM model for laparoscopic surgery** [12928-17]

12928 0K **AVA: automated viewability analysis for ureteroscopic intrarenal surgery** [12928-18]

12928 0L **WS-SfMLearner: self-supervised monocular depth and ego-motion estimation on surgical videos with unknown camera parameters** [12928-19]

NEUROSURGERY/NEUROTOLOGY

12928 0M **End-to-end 3D neuroendoscopic video reconstruction for robot-assisted ventriculostomy** [12928-20]

12928 0N **Intraoperative stereovision cortical surface segmentation using fast segment anything model** [12928-21]

12928 0O **Joint MR to CT synthesis and segmentation for MR-only pediatric brain radiation therapy planning** [12928-22]

12928 0Q **An adaptable model for estimating patient-specific electrical properties of the implanted cochlea** [12928-24]

JOINT SESSION WITH CONFERENCES 12928 AND 12932

12928 0R **Real-time vasculature segmentation during laparoscopic liver resection using attention-enriched U-Net model in intraoperative ultrasound videos** [12928-25]

12928 0S **Percutaneous nephrostomy needle guidance using real-time 3D anatomical visualization with live ultrasound segmentation** [12928-26]

12928 0T **Design and evaluation of an educational device for ultrasound-guided interventional procedures** [12928-27]

IMAGE SEGMENTATION/REGISTRATION

12928 0V **Optimal hyperparameter selection in deformable image registration using information criterion and band-limited modal reconstruction** [12928-29]

12928 0W **GhostMorph: a computationally efficient model for deformable inter-subject registration** [12928-30]

12928 0X **Deep evidential uncertainty estimation in joint synthesis and registration of MRI and cone-beam CT images** [12928-31]

12928 0Y **Automatic auditory nerve fiber localization using geodesic paths** [12928-32]

SPINE / ORTHOPAEDIC SURGERY

12928 0Z **Augmented reality guidance for rib fracture surgery: a feasibility study** [12928-33]

12928 10 **Intraoperative tracked ultrasound imaging for resolving deformations during spine surgery** [12928-34]

12928 11 **3D volume reconstruction for pediatric scoliosis evaluation using motion-tracked ultrasound** [12928-35]

12928 12 **Adaptive loss engine for x-ray segmentation (ALEXS) for scoliosis intervention: assess digital segmentation and angle approximation** [12928-36]

12928 13 **Surgical process modeling of image-guided spine surgery** [12928-37]

DEEP IMAGE ANALYSIS FOR IMAGE-GUIDED INTERVENTIONS

12928 14 **Optimal strategies for modeling anatomy in a hybrid intelligence framework for auto-segmentation of organs** [12928-38]

12928 15 **Benchmarking image transformers for prostate cancer detection from ultrasound data** [12928-39]

12928 16 **Self-supervised monocular pose and depth estimation for wireless capsule endoscopy with transformers** [12928-40]

12928 17 **Intraoperative MRI-guided cervical cancer brachytherapy with automatic tissue segmentation using dual convolution-transformer network and real-time needle tracking (Image-Guided Procedures, Robotic Interventions, and Modeling Early-Career Investigator Award)** [12928-41]

12928 18 **Segmentation of the facial nerve using a weakly supervised GAN** [12928-42]

NOVEL IMAGING AND VISUALIZATION

12928 1A **Photoacoustic image guidance for laser tonsil ablation: approach and initial results** [12928-44]

12928 1B **Synchronization and analysis of multimodal bronchoscopic airway exams for early lung cancer detection** [12928-45]

12928 1C **Analysis of the dynamic architecture of the thorax and abdomen in pediatric patients with thoracic insufficiency syndrome (TIS) via dynamic MRI** [12928-46]

12928 1D **A fast and interactive augmented reality system for PET/CT-guided intervention of neuroblastoma** [12928-47]

INTERVENTIONAL RADIOLOGY

12928 1E **Modular 3D-printed liver tumour phantom for modelling embolization procedures** [12928-48]

12928 1F **Image reconstruction and tissue separation modeling with XFEM for surgical visualization and guidance** [12928-49]

12928 1G **An augmented reality-guided biopsy system using a high-speed motion tracking and real-time registration platform** [12928-50]

12928 1H **Prediction model for local tumor progression following microwave ablation treatment of early-stage lung cancer** [12928-51]

12928 1I **Metal artifact reduction for CT-guided interventional oncology procedures (MARIO): demonstration of a deep learning-based approach for metal artifact reduction for cryoablation procedures** [12928-52]

JOINT SESSION WITH CONFERENCES 12925 AND 12928

12928 1J **Enhancing MR-guided laser interstitial thermal therapy planning using U-Net: a data-driven approach for predicting MR thermometry images** [12928-53]

POSTER SESSION

12928 1M **Enabling rapid and high-quality 3D scene reconstruction in cystoscopy through neural radiance fields** [12928-56]

12928 1N **Using attention-based convolutional auto-encoders for catheter path reconstruction in ultrasound images** [12928-57]

12928 1O **TensorRT-based surgical instrument detection assessment for deep learning on edge computing** [12928-58]

12928 1P **Automatic procedure planning for radial-probe endobronchial ultrasound** [12928-59]

12928 1Q **Toward requirement-based performance in data-driven image analysis algorithms for robotic applications** [12928-60]

12928 1R **An assistive photo capture system for pre- and post-operative analysis of facial reconstructive surgeries** [12928-61]

12928 1S **Source-detector trajectory optimization for customized CBCT field of view extension using simulated annealing algorithm** [12928-62]

12928 1T **Simulation study of minimally invasive surgical scenes and their effect on hand-held stereovision driven level-wise registration techniques** [12928-63]

12928 1U **Towards an augmented reality system supporting nail implantation for tibial fractures** [12928-64]

12928 1V **Evaluating unsupervised optical flow for keypoint tracking in laparoscopic videos** [12928-66]

12928 1W **Segmentation of spinal computed tomography to produce biomechanically accurate patient-specific surgical models** [12928-67]

12928 1Y **Eye tracking for tele-robotic surgery: a comparative evaluation of head-worn solutions** [12928-69]

12928 1Z **Large MRI specimen submersion phantom design** [12928-70]

12928 20 **Quantification of changes in regional diaphragmatic motion and shape due to surgery via free-breathing dynamic MRI in pediatric patients with thoracic insufficiency syndrome** [12928-71]

12928 21 **Providing automatic formative feedback along surgical skill assessment** [12928-72]

12928 22 **Surface-based volumetric image reconstruction for image-guided procedures using a data-driven framework** [12928-73]

12928 24 **Risk prediction of stereotactic-body-radiotherapy-induced vertebral compression fracture using multi-modal deep learning network** [12928-75]

12928 25 **Smart line detection and histogram-based approach to robust freehand ultrasound calibration** [12928-76]

12928 26 **Adaptive octree cube refinement depending on grasping position for deformable organ models** [12928-77]

12928 27 **Exploring optical flow inclusion into nnU-Net framework for surgical instrument segmentation** [12928-78]

12928 28 **Novel method to improve feature extraction in MR for model-based image updating in image-guided neurosurgery** [12928-79]

12928 29 **In-silico CT lung phantom generated from finite-element mesh** [12928-80]

12928 2A **Comprehensive examination of personalized microwave ablation: exploring the effects of blood perfusion rate and metabolic heat on treatment responses** [12928-81]

12928 2B **Comparative analysis of non-rigid registration techniques for liver surface registration** [12928-82]

12928 2C **Auditory nerve fiber localization using a weakly supervised non-rigid registration U-Net (Image-Guided Procedures, Robotic Interventions, and Modeling Poster Award)** [12928-83]

12928 2D **A comparison of onboard and offboard user interfaces for handheld robots** [12928-85]

12928 2F **Automating creation of high-fidelity holographic hand animations for surgical skills training using mixed reality headsets** [12928-87]

12928 2G **A robust system for capture and archival of high-definition stereoendoscopic video** [12928-88]

12928 2H **3D conditional GAN with transfer learning for pediatric MR to CT image synthesis combining adult and pediatric patient data** [12928-89]

12928 2I **Monocular microscope to CT registration using pose estimation of the incus for augmented reality cochlear implant surgery** [12928-90]

12928 2J **Initial implementation of robot-integrated specimen imaging in transoral robotic surgery** [12928-91]

12928 2K **Using artificial intelligence to classify point-of-care ultrasound images** [12928-92]

DIGITAL POSTER SESSION

12928 2L **Asymmetric edge-aware transformers for monocular endoscopic depth estimation** [12928-65]
