Volume 12929

Proceedings of SPIE, 1605-7422, V. 12929

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Medical Imaging 2024: Image Perception, Observer Performance, and Technology Assessment*, edited by Claudia R. Mello-Thoms, Yan Chen, Proc. of SPIE 12929, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

BREAST I

12929 03 **Artificial intelligence can improve cancer detection in a double reading screening mammography scenario** [12929-2]

12929 04 **CNN-based transfer learning with 10-fold cross-validation: a novel approach for customized education of mammography training** [12929-3]

12929 05 **Deep learning analysis of breast arterial calcifications: a study on predicting cardiovascular disease in women** [12929-4]

12929 06 **Ordering mammograms for improved mammography screening performance** [12929-6]

OBSERVER PERFORMANCE

12929 07 **Modeling human observer detection for varying data acquisition in undersampled MRI for two-alternative forced choice (2-AFC) and forced localization tasks** [12929-7]

12929 08 **Radiologists' performance in diagnosing silicosis on high-resolution computed tomography (HRCT) scans: an online platform** [12929-9]

12929 09 **Comparing multiple-target search performance and the satisfaction of search effect between 2D and segmented-3D search** [12929-10]

12929 0A **Recognition of radiological decision errors from eye movement during chest x-ray readings** [12929-11]

MODEL OBSERVERS

12929 0B **A hybrid CNN-Swin Transformer network as deep learning model observer to predict human observer performance in 2AFC trial** [12929-12]

12929 0C **Adaptive learning approach to improve generalization performance of a domain-aware CNN-based ideal model observer** [12929-13]

12929 0D **Addition of a threshold mechanism to model observers for medical image quality assessment** [12929-14]

12929 0E **Investigation of different model observers for including signal-detectability in the training of CNNs for CT image reconstruction** [12929-15]

12929 0F **Computed tomography optimization using a volumetric channelized Hotelling observer approach for energy integrating and photon-counting CT scanners** [12929-16]

JOINT SESSION WITH CONFERENCES 12927 AND 12929

12929 0G **Sequestration of imaging studies in MIDRC: using load factor to minimize algorithm performance overestimation and image reuse** [12929-17]

12929 0H **Ambient-Pix2PixGAN for translating medical images from noisy data** [12929-18]

BREAST II

12929 0J **Predicting the gist of breast cancer on a screening mammogram using global radiomic features** [12929-20]

12929 0K **Contrast enhanced mammography (CEM): is experience necessary? an inter and intra-reader agreement study for lesion classification and breast density** [12929-21]

12929 0L **Cancer-rates in completion-time defined batches of screening DBT images** [12929-23]

12929 0M **Exploring varied time intervals on diagnostic performances of radiologists and trainees via test sets** [12929-24]

TECHNOLOGY ASSESSMENT AND STATISTICS

12929 0N **Unsupervised deep learning for the matching of vascular anatomy in multiple digital subtraction angiograms** [12929-25]

12929 0O **Can patient-specific acquisition protocol improve performance on defect detection task in myocardial perfusion SPECT?** [12929-26]

12929 0P **Use of equivalent relative utility to evaluate artificial intelligence-based rule-out devices** [12929-27]

12929 0Q **An alternative parameterization for the binormal ROC curve, with applications to sizing and simulation studies** [12929-28]

12929 0R **A bivariate binormal model for modelling double reading of screening mammograms** [12929-29]

TECHNOLOGY ASSESSMENT II

12929 0S **Understanding the generalizability of a convolutional neural network-based model observer for breast tomosynthesis images with different volume glandular fractions** [12929-30]

12929 0T **3D echocardiogram visualization: a new method based on focus + context** [12929-31]

12929 0U **SkinSAM: adapting the segmentation anything model for skin cancer segmentation** [12929-32]

12929 0V **Image texture-based classification methods to mimic perceptual models of search and localization in medical images** [12929-34]

12929 0W **How accurately can quantitative imaging methods be ranked without ground truth: an upper bound on no-gold-standard evaluation** [12929-35]

POSTER SESSION

12929 0X **Stimulus design for 3D-CSF measurements and evaluation of its impact on the human visual system** [12929-36]

12929 0Y **Structured radiology report text analysis using natural language processing for automatic billing** [12929-37]

12929 0Z **A foveated channelized Hotelling observer model extended to anatomical liver CT images (Image Perception, Observer Performance, and Technology Assessment Poster Award)** [12929-38]

12929 10 **Computer vision-based guidance tool for correct radiographic hand positioning** [12929-39]

12929 11 **Analysis of uncertainty in accuracy of the reference segmentation of ultrasound images of breast tumors** [12929-40]

12929 13 **AmbientCycleGAN for establishing interpretable stochastic object models based on mathematical phantoms and medical imaging measurements** [12929-42]

12929 14 **Modeling decision making in breast cancer screening using deep learning: usability of a Gabor convolutional layer** [12929-43]

12929 16 **Deep learning-based auto-segmentation of paraganglioma for growth monitoring** [12929-45]

DIGITAL POSTER SESSION

12929 17 **The performance of breast screening readers in a specificity-focused test set-based assessment scheme in a national breast screening program** [12929-5]
