SPIE

Volume 12945

Proceedings of SPIE 0277-786X, V. 12945

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Electroactive Polymer Actuators and Devices (EAPAD) XXVI*, edited by John D. Madden, Proc. of SPIE 12945, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

EAPS: REACHING FOR HIGH PERFORMANCE

- 12945 02 **Resonance-optimized dielectric elastomer pump demonstrator: a dynamic systems approach (Invited Paper)** [12945-3]
- 12945 03 **Design and manufacturing of high-strain P(VDF-TrFE-CTFE) actuators** [12945-4]

ARTIFICIAL MUSCLE AND THE BODY

- 12945 04 **Characterizing the response of piezoelectric-polymer composite haptic actuators and their interaction with skin** [12945-9]
- 12945 05 **An artificial urinary sphincter based on dielectric elastomer technology** [12945-6]
- 12945 06 **In vitro testing of an artificial muscle for the treatment of incontinence** [12945-7]
- 12945 07 **Rotary haptic device solutions using a conical dielectric elastomer actuator** [12945-10]

EAP-IN-ACTION DEMONSTRATION SESSION

- 12945 08 **Tactile fingertips and synthetic muscle in robotics for human-like grip** [12945-205]

EAP FOR SOFT ROBOTICS

- 12945 09 **Self-sensing investigation of a dielectric elastomer actuator array** [12945-14]
- 12945 0A **Development and experimental evaluation of a compact 3D bending module actuated by rolled dielectric elastomer actuators** [12945-15]

MATERIALS, FABRICATION, AND CHARACTERIZATION I

- 12945 0B **Thermoplastic-polymer-based negative stiffness biasing mechanism for high stroke dielectric elastomer actuator systems** [12945-18]

- 12945 0C **Influence of stretch-dependent permittivity on power generation output of dielectric elastomer** [12945-19]
- 12945 0D **Yield increase of DE actuators using novel repair process** [12945-21]

IONIC AND THERMAL ACTUATORS

- 12945 0E **Comparative study of the influence of the ionic coatings on the performances of air-operating coiled carbon nanotubes yarn actuators (Invited Paper)** [12945-22]
- 12945 0F **On the time response properties predicted from the exact transfer function of a multiphysics model of IPMC sensors** [12945-23]
- 12945 0G **Dynamic/static ionic composite sensor** [12945-25]

MATERIALS, FABRICATION, AND CHARACTERIZATION II

- 12945 0H **Highly anisotropic carbon fiber electrodes for DEAs and their dynamic non-monotonic conductive properties** [12945-26]
- 12945 0I **Fully inkjet-printed dielectric elastomer actuators** [12945-27]
- 12945 0J **Frequency response of fiber reinforced DEAs** [12945-28]
- 12945 0K **Multilayer dielectric elastomer actuators: processing and characterization in an out-of-plane actuator configuration** [12945-29]
- 12945 0L **Selective laser-cutting for sheet-to-sheet manufacturing process of dielectric elastomer transducers** [12945-30]
- 12945 0M **Transparent stretchable compliant electrodes for hydrophobic substrates using PEDOT:PSS/PDMS composite ink** [12945-50]

SIMULATION

- 12945 0N **Finite element modeling and numerical investigation of the effects of miniaturization on the performance of dielectric elastomer actuators** [12945-31]
- 12945 0O **Unveiling design criteria of hollow fibers dielectric elastomer actuators: a computational and experimental study** [12945-33]

SENSORS AND STRAIN

- 12945 0P **Deformation mapping in dielectric elastomer actuators using electrical impedance tomography** [12945-35]
- 12945 0Q **Influence of stacking on the stability of a multi-layer capacitive dielectric elastomer sensor for strain detection** [12945-36]
- 12945 0R **Shielded fringe field compression sensors for open ocean applications** [12945-37]
- 12945 0S **Printed stretchable dielectric sensor grids for pressure monitoring in orthopedics** [12945-38]
- 12945 0T **Electromechanical characterization of piezoresistive carbon-elastomer composites** [12945-39]

POSTER SESSION

- 12945 0U **Carbon based printed electrodes for DEAs: study of pad, inkjet, and stencil printing** [12945-43]
- 12945 0V **Inversing the actuation cycle of dielectric elastomer actuators for a facial prosthesis** [12945-44]
- 12945 0W **Dielectric elastomer actuator with electro adhesion for a vibration excitation of a conductive structure** [12945-45]
- 12945 0X **Impact of moisture absorption on the performance of a polyurethane-based dielectric elastomer actuator** [12945-47]
- 12945 0Y **Advancing dielectric elastomers in soft robotics: project BROADCAST's multidisciplinary approach** [12945-49]
- 12945 0Z **A novel method for developing a tube-shaped IPMC actuator** [12945-52]
