SPIE

Volume 12989

Proceedings of SPIE 0277-786X, V. 12989

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Third International Conference on Intelligent Traffic Systems and Smart City (ITSSC 2023)*, edited by Wei Shangguan, Jianqing Wu, Proc. of SPIE 12989, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Conference Committees</i>
ix	<i>Introduction</i>

INTELLIGENT LOGISTICS AND TRANSPORTATION RISK MEASUREMENT AND CONTROL

12989 02	Leveraging graph convolution and multi-channel neural networks for accurate and robust spatio-temporal traffic flow prediction [12989-25]
12989 03	Research on the optimization of Jingdong fresh food logistics distribution path based on electric logistics vehicle [12989-15]
12989 04	Research on demand prediction and distribution of emergency materials under large flood disasters [12989-46]
12989 05	Autonomous driving expected functional safety hazard identification method based on the Mealy state machine [12989-19]
12989 06	Research on obstacle avoidance path planning method for unmanned vehicles [12989-47]
12989 07	The electric cold chain logistics vehicle routing problem with time windows for battery swap mode considering customer satisfaction [12989-41]
12989 08	Research on side-to-rear ADAS functional test and evaluation technology for two-wheeler target [12989-37]
12989 09	Discussion on station layout design of intercity/metropolitan railway CTCS2+ATO system [12989-33]
12989 0A	Short-time passenger flow prediction of new urban rail transit based on graph convolutional neural network [12989-18]
12989 0B	Navigation safety evaluation of offshore wind farm waterway based on variation coefficient cloud matter element model [12989-5]
12989 0C	Research on the vulnerability of container terminals under the new development pattern of double circulation [12989-23]
12989 0D	Allocation model and algorithm for multiple container areas at U-automated container terminal [12989-22]
12989 0E	Research on lane-changing decision model with driving style based on XGBoost [12989-9]
12989 0F	Research on path planning of ship avoiding typhoon based on improved artificial potential field method [12989-8]

- 12989 OG **A multi-agent reinforcement learning-based method for multiple electric vehicles charging scheduling** [12989-17]
- 12989 OH **Joint optimization of timetabling and strategies for mixed buses considering fuel life cycle carbon emissions** [12989-2]
- 12989 OI **Driver behavior monitoring system for explosive transport** [12989-42]
- 12989 OJ **Identification of ship navigation risk areas and route optimization under complex weather conditions** [12989-45]
- 12989 OK **Collaborative distribution path optimization for multi-vehicles and multi-drones in the cold chain** [12989-40]
- 12989 OL **Analysis of passenger flow changes during urban rail transit emergencies based on big data** [12989-36]
- 12989 OM **Operational risk of aid to navigation based on ANP** [12989-24]
- 12989 ON **Research on the calculation method of delay value for intelligent connected passenger vehicles** [12989-48]
- 12989 OO **Research on driver distraction degree in multi-scene operating conditions based on eye movement technology** [12989-21]

SMART CITY AND DIGITAL INFORMATION MANAGEMENT

- 12989 OP **Economic benefits models for different types of new energy vehicles** [12989-11]
- 12989 OQ **Research on structure of sunken mobile catenary suitable for railway power supply loading lines** [12989-39]
- 12989 OR **Study on the label generation model of power suppliers' bad behavior based on supervised machine learning** [12989-34]
- 12989 OS **Research on power enterprise supplier evaluation based on portrait technology** [12989-35]
- 12989 OT **Simulation study on the influence of interval time on the reliability of train diagram** [12989-4]
- 12989 OU **Analysis of human factors in ship grounding accidents based on Bayesian networks** [12989-28]
- 12989 OV **A-YOLO: small target vehicle detection based on improved YOLOv5** [12989-30]
- 12989 OW **Research on construction guide by dynamic compaction under complex foundation condition base on digital equipment** [12989-20]
- 12989 OX **Research on intelligent vehicle object detection algorithm based on DC-YOLOv8s** [12989-26]

- 12989 0Y **Modeling and stability analysis of car following model for connected autonomous driving**
[12989-50]
- 12989 0Z **Risk early warning method of ship anchor dragging based on simulation experiments**
[12989-29]
- 12989 10 **Analysis of the distribution and causes of global maritime accidents** [12989-3]
- 12989 11 **A comprehensive survey of existing approaches for close parallel runway landing operations:
toward identifying the optimal method** [12989-43]
- 12989 12 **Design of active disturbance suppression algorithm for two-axis monitoring of smart city**
[12989-10]
- 12989 13 **Research on site selection of China Railway Express assembly center** [12989-38]
- 12989 14 **College student activity attendance management system design based on Internet of Things
and deep learning technology** [12989-32]
- 12989 15 **Build an automated deformation monitoring system for cableway supports** [12989-14]
- 12989 16 **The impact of electric vehicle scale on grid load: analysis based on the load peak-valley
difference minimization model** [12989-44]
- 12989 17 **Multi-scale fusion clustering algorithm for urban travel features** [12989-6]
- 12989 18 **Research on security evaluation method for around view monitoring system with active safety
warning function** [12989-51]
- 12989 19 **Smart street lights based on artificial intelligence** [12989-16]
