Volume 12994

Proceedings of SPIE 0277-786X, V. 12994

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Terahertz Photonics III*, edited by Mona Jarrahi, Sascha Preu, Dmitry Turchinovich, Proc. of SPIE 12994, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

BASIC SCIENCE

- 12994 01 **THz helicity mapping towards coherent control of chiral low-energy excitations (Invited Paper)** [12994-1]
- 12994 02 **THz pulse shape control via laser chirp and wavelength dispersion** [12994-4]

DEVICES

- 12994 03 **THz harmonic generation in graphene/metamaterial active modulators** [12994-9]
- 12994 04 **Comparative analysis between FSO and bidirectional fiber transmission links for Sub-THz transceiver design compatible for future 6G networks** [12994-10]

SOURCES

- 12994 05 **High conversion efficiency photonic THz mixers based on iron-doped InGaAs embedded in a plasmonic microcavity** [12994-15]
- 12994 06 **Theoretical investigation of harmonic frequency comb formation dynamics in defect-engineered THz quantum cascade lasers** [12994-16]
- 12994 07 **Comb flatness dependence for orthogonally sampled high bandwidth signals** [12994-17]
- 12994 08 **Reflective diffraction grating operating around 3,3 THz for space applications** [12994-43]

BIOLOGICAL APPLICATIONS

- 12994 09 **THz metamaterial biodetection platform for label-free, sensitive and selective DNA-, protein- or supermolecular-based biomarker analysis (Invited Paper)** [12994-19]
- 12994 0A **High-frequency terahertz waves regulate the dynamic network of mitochondria in neuropathic pain model of mice** [12994-22]

SPECTROSCOPY

12994 0B **Terahertz conductivity of polymer electrolytes (Invited Paper)** [12994-24]

SPECTROSCOPY AND APPLICATIONS

12994 0C **Dielectric silicon slot-waveguides for far-infrared THz-spectroscopy (Invited Paper)** [12994-28]

12994 0D **Long-wave infrared and terahertz spectroscopy based on organic nonlinear crystals pumped at telecommunication wavelengths (Invited Paper)** [12994-30]

JOINT SESSION: TERAHERTZ IMAGING

12994 0E **Terahertz optical setups using spatial filtering methods to image low-absorbing samples (Invited Paper)** [12994-31]

12994 0F **Computational terahertz imaging via spatio-temporal emissivity modulation** [12994-32]

12994 0G **Terahertz imaging using C-shaped metallic metasurface-based optics** [12994-33]

POSTER SESSION

12994 0H **Implementation of THz confocal imaging based on super-oscillating lens, Fibonacci lens and transmissive convex lens** [12994-40]

12994 0I **Detection of real-time hidden metallic object using prototype THz radar system for public security and defense application** [12994-41]

12994 0J **Application of terahertz metamaterials for low-concentration sensing of premium explosives like RDX and TNT** [12994-42]

12994 0K **Modulating THz polarization through laser chirp and wavelength dispersion** [12994-44]

DIGITAL POSTER SESSION

12994 0L **The concept of the terahertz generator based on an array of double-walled carbon nanotubes with a direct current pump** [12994-36]
