Volume 13001

Proceedings of SPIE 0277-786X, V. 13001

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Specialty Optical Fibres VIII*, edited by Kyriacos Kalli, Pavel Peterka, Christian-Alexander Bunge, Proc. of SPIE 13001, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

JOINT SESSION: TWO-MICRON FIBER SOURCES

13001 02 **2- μ m laser beam quality improved by matched pedestal passive and active fibers** [13001-1]

SPECIALTY FIBERS FOR FIBER LASERS

13001 03 **Controlling the transmission bandwidth of anti-resonant hollow-core fibers** [13001-5]

13001 04 **An investigation on thermal splicing of ZBLAN optical fiber** [13001-7]

SENSORS AND TELECOMMUNICATION DEVICES BASED ON OPTICAL FIBERS

13001 05 **Distributed fiber optic sensing for monitoring of underground facilities (Invited Paper)** [13001-14]

13001 06 **High temperature fibers for data transmission and sensing (Invited Paper)** [13001-15]

13001 07 **Lab-around-fiber for biomarkers detection of antimicrobial resistance** [13001-16]

13001 08 **Environmental sensor based on optical-resonance-enhancement in a MoS₂ printed D-shaped single-mode fiber** [13001-17]

13001 09 **All-fiber spectrometer based on coreless fiber** [13001-18]

FIBER GRATINGS AND OPTICAL FIBER COMPONENTS

13001 0A **Latest achievements on polymer optical fiber sensors and NP-doped optical fibers (Invited Paper)** [13001-19]

- 13001 0B **Hybrid optical fibre grating for label-free biodetection** [13001-20]
- 13001 0C **Corrugated long-period grating for strain, displacement and temperature sensor applications**
[13001-21]
- 13001 0D **FBG inscription and interrogation in polypropylene coreless waveguides** [13001-23]

MODELLING AND TESTING OF SPECIALTY FIBERS AND COMPONENTS

- 13001 0E **Particle manipulation using optical nanofibers** [13001-26]

OPTICAL FIBERS FOR BIOMEDICAL APPLICATIONS

- 13001 0F **Highly sensitive plasmonic sensors and biosensors realized via modified specialty optical fibers (Invited Paper)** [13001-29]
- 13001 0G **OFDR-based navigation system for minimally invasive cochlear implantation** [13001-30]
- 13001 0H **Integration of plasmonic structures on multimode optical fibers for advanced endoscopic systems: fabrication, characterization, and spatially resolved SERS** [13001-31]
- 13001 0I **Fiber optic pH sensors for in-situ planetary exploration** [13001-32]

POSTER SESSION

- 13001 0J **Design and measurement of fiber optic VLC transmitter based on POF** [13001-36]
- 13001 0K **New approach for speed and direction measurement by fiber optic sensor** [13001-37]
- 13001 0L **Research on the polymeric fiber-tip Fabry-Perot cavity with high reflective mirror manufactured by the two-photon polymerization method** [13001-44]
- 13001 0M **Experimental investigation of optical fiber Fabry-Perot resonators: resonance enhancement through reflective coatings and concave mirrors** [13001-45]

DIGITAL POSTER SESSION

- 13001 0N **Raman lasing in multimode graded-index fiber with mode-selective dielectric mirror on its end face** [13001-41]
