**Volume 13015**

Proceedings of SPIE 0277-786X, V. 13015

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photosensitive Materials and their Applications III*, edited by Robert R. McLeod, Inmaculada Pascual Villalobos, Yasuo Tomita, Proc. of SPIE 13015, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510673489

ISBN: 9781510673496 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

---

**SESSION 1** **IN MEMORIAM: A TRIBUTE TO PROF. JOHN T. SHERIDAN**

---

13015 03 **Volumetric speckles: examination of the 3D form of speckles in free space and Fourier transforming systems** [13015-2]

---

**SESSION 2** **PHOTOPOLYMER MATERIALS AND APPLICATIONS I**

---

13015 06 **Shrinkage effects in holographic couplers for see-through applications recorded in photopolymers** [13015-5]

13015 08 **Sensitivity-enhancing modified photopolymer of PQ/PMMA** [13015-7]

13015 09 **A standardized NIR sensitized Bayfol HX film** [13015-8]

---

**SESSION 3** **AZOPOLYMER AND SOL-GEL MATERIALS**

---

13015 0D **Investigation of the UV-resistance of photopolymerisable glass for space applications** [13015-12]

13015 0E **Color effects based on resonant waveguide grating embedded in a luminescent sol-gel layer** [13015-13]

---

**SESSION 4** **METASURFACES AND NOVEL APPLICATIONS**

---

13015 0F **Vanadium dioxide-based active metasurfaces: a nanophotonics platform for manipulating light via control of Mie and quasi-bound states in the continuum resonances (Invited Paper)** [13015-14]

13015 0G **Hierarchical metal-organic frameworks: a new paradigm in nonlinear optics and data processing** [13015-15]

13015 0H **High-performance piezophototronic devices based on zinc oxide nanostructured thin films synthesized by physical vapour deposition** [13015-16]

13015 0I **Hybrid oxide-chalcogenide thin film cavity for passive thermal adaptive radiation** [13015-17]

---

**SESSION 5      FLAT OPTICS AND IMAGING**

---

13015 OM      **Advanced 3D imaging: a volume holography-based approach to multi-point laser scanning confocal microscopy** [13015-21]

---

**SESSION 6      PHOTOPOLYMER MATERIALS AND APPLICATIONS II**

---

13015 OO      **Photosensitive materials for neutron optics (Invited Paper)** [13015-23]

13015 OP      **Developing novel holographic optomechanical sensing platform for application in volatile organic compounds detection** [13015-24]

13015 OQ      **Towards sustainable solar energy: optimization of a holographic concentrator in a green photopolymer** [13015-25]

13015 OR      **Optical fabrication of micro-patterned photopolymer surfaces for application in sensing** [13015-26]

13015 OS      **Direct laser patterning of new cellulose-based photopolymer** [13015-27]

13015 OT      **Photopolymer material durability and safety in holographic diffusers for visual applications** [13015-28]

13015 OU      **Panchromatic recording of nanocomposite holographic gratings with large refractive index modulation amplitudes** [13015-29]

13015 OV      **Thermal effects on the VOC-sensitive polydimethylsiloxane holographic gratings** [13015-52]

---

**SESSION 7      LIQUID CRYSTALS AND PHOTOREFRACTIVE MATERIALS**

---

13015 OW      **Rigorous estimation of the LC director distribution and its influence on light propagation in LC-based optical devices (Invited Paper)** [13015-30]

13015 OX      **Preparation of fast-response photorefractive liquid crystals and their application to coaxial optical laser ultrasonics (Invited Paper)** [13015-31]

13015 OY      **Analysis on the presence of out-of-plane LC components on PA-LCoS devices due to crosstalk and fringing fields** [13015-32]

13015 OZ      **Higher orders enhancement in gratings produced by a vertically aligned LCoS** [13015-33]

---

**SESSION 8      GRAPHENES AND QUANTUM DOTS**

---

13015 11      **Surface engineering of ZnO nanocrystals with conjugated polyelectrolytes tethering different counterions for inverted PeLEDs** [13015-35]

- 13015 12 **Up-conversion photoluminescence in graphene quantum dots** [13015-36]
- 13015 13 **Potential broadband photodetector concept based on three-dimensional graphene foam** [13015-37]
- 13015 14 **Improvement of photoemission performance of graphene/metal van der Waals heterojunction photocathode** [13015-38]

---

**POSTER SESSION**

---

- 13015 15 **Analysis of the recording of multifocal lenses in photopolymers for intraocular applications** [13015-39]
- 13015 16 **Estimation of characteristic parameters of holographic volume gratings based on machine learning** [13015-40]
- 13015 17 **Chromatic selectivity study in Bayfol HX200 multiplexed-reflection holograms in multilayer systems** [13015-41]
- 13015 18 **Study of the composition of the incubator solutions used for the storage of unslanted transmission holograms in photohydrogels** [13015-42]
- 13015 19 **Evaluation of sunflower seed priming with gamma-aminobutyric acid-capped silver nanoparticles produced by the photoreduction method (Best Student Paper Award)** [13015-43]
- 13015 1A **Review of recording materials in holographic lenses for solar energy applications** [13015-44]
- 13015 1C **Optical modulator based on 2D metal-organic framework single crystal with light driven anisotropy** [13015-46]
- 13015 1D **From grayscale towards multi-color laser printing inside non-linear metal-organic framework microcrystals** [13015-47]
