Volume 13019

Proceedings of SPIE 0277-786X, V. 13019

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Design and Engineering IX*, edited by Thierry Lépine, James Babington, Herbert Gross, Proc. of SPIE 13019, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

OPTOMECHANICAL DESIGN I

- 13019 03 **From design to manufacture: What could go wrong?** [13019-1]
- 13019 04 **STOP analysis for a low-orbit telescope with the STAR module in Ansys Zemax OpticStudio**
[13019-3]
- 13019 05 **Stray light analysis for the SurfCam** [13019-72]
- 13019 06 **Compact high-resolution LWIR optical system for the MORERA mission: final configuration**
(Invited Paper) [13019-5]

MODELLING AND SIMULATION I

- 13019 09 **Fermat meets PanDao: cost-efficient lens design (Invited Paper)** [13019-6]
- 13019 0A **A new method for glass substitution in optical design based on sensitivity analysis** [13019-7]
- 13019 0B **MAVIS: optical distortions of the NGS WFS channel and their impact on the plate scale variation**
during tracking [13019-8]
- 13019 0C **Design and virtual validation of CMOS image sensor camera** [13019-9]

TOLERANCING + MANUFACTURE

- 13019 0D **Optical tolerances analysis methodology using realistic optomechanical models**
(Invited Paper) [13019-10]
- 13019 0E **Comparison of tolerancing simulations and as-built optical performance in a precision optical**
system [13019-11]
- 13019 0F **Optical design progression of earth observing telescope** [13019-12]
- 13019 0G **Defining and tolerancing freeform surfaces for manufacturing** [13019-13]

13019 OH **Pseudo random Monte Carlo tolerancing for correlated optical systems** [13019-15]

STRAY LIGHT

13019 OI **Ghost reflection simulation, analysis, and correction in a multispectral imaging system**
[13019-16]

13019 OK **Automating system-level stray light analysis with Ansys Optics** [13019-18]

13019 OL **Methodology and results of straylight analysis for LSTM instrument (Invited Paper)** [13019-19]

MODELLING AND SIMULATION II

13019 OM **Principal component analysis of refractive index spaces: a model-free approach to color analysis and color correction (Invited Paper)** [13019-20]

13019 ON **The zone decomposition modelling approach to multi-order diffractive surfaces in lens design**
[13019-21]

13019 OO **Design of maskless micro-optical automotive low-beam** [13019-22]

13019 OP **Simulation of the impact of propagation through optical fluids and turbulent flow on optical system performance** [13019-23]

13019 OQ **A new approach to chromatic variations of Seidel coefficients** [13019-91]

FREEFORM OPTICS I

13019 OR **Optimization of a freeform TMA with a differential ray tracer with NURBS capabilities (Invited Paper)** [13019-24]

13019 OS **Apodized transparent photon sieves with bevelled holes for presbyopia correction** [13019-25]

13019 OT **Optical design of a freeform Offner spectrometer enabling a very large field of view** [13019-90]

13019 OU **Cubesat multispectral space-based imaging spectrometer enhancing climate change monitoring** [13019-27]

13019 OV **Fast and wide field off-axis three-mirror optical system design with curved detector for planetary exploration** [13019-28]

OPTOMECHANICAL DESIGN AND META-COMPONENTS

- 13019 0W **Optical design of a compact spectrometer for space applications: depolarizers analysis**
[13019-29]
- 13019 0X **Design and characterization of metasurfaces for LiDAR applications** [13019-30]

INSTRUMENTATION

- 13019 13 **Active optics bench for the co-alignment of LSTM VIS & NIR focal planes** [13019-62]

OPTICAL INSTRUMENTATION I

- 13019 17 **A miniaturized tuneable light source using a piezo-actuated Fabry-Pérot interferometer**
[13019-36]
- 13019 18 **Sentinel 4: a geostationary imaging UVN spectrometer for air quality monitoring: optical alignment of the Instrument Flight Model 2** [13019-37]
- 13019 19 **Optical software-assisted design and optimization of Bessel beam systems for applications to laser materials processing** [13019-38]

MODELLING AND SIMULATION III

- 13019 1A **Realizing 'first time right' designs of imaging systems using off-the-shelf lenses** [13019-39]
- 13019 1B **Focused Narcissus evaluation in a MWIR zoom system** [13019-40]
- 13019 1C **Towards integrated thermo-opto-mechanical analysis** [13019-41]
- 13019 1D **Performing STOP analysis on high power lasers: understanding complex systems through a physics-based co-simulation workflow** [13019-42]
- 13019 1E **Optical characterization of wood properties using the tracheid effect** [13019-43]
- 13019 1F **MMX Infrared Spectrometer's optical architecture** [13019-44]

OPTICAL INSTRUMENTATION II

- 13019 1G **Journey through time: optics of yesterday and today through Charles Féry's spectrophotometer**
[13019-45]

13019 1I **Exploring the unique chromatic properties of multi-material gradient-index optics** [13019-47]

MODELLING AND SIMULATION IV

13019 1K **The importance of pupil imaging for distortion correction in zoom lenses
(Invited Paper, Best Student Paper Award)** [13019-50]

13019 1M **Optical system design considering drift and jitter vibration impacts on performances** [13019-54]

FREEFORM OPTICS AND OPTICAL INSTRUMENTATION

13019 1O **Custom freeform optics for LiDAR applications: from design to fabrication** [13019-55]

13019 1P **Optimal freeform correctability for prism spectrometer system design with mixed ray-tracing
method** [13019-56]

13019 1Q **First order solution generation for reflective dual-conjugate zoom systems** [13019-58]

13019 1R **Design of a freeform, wide field of view, high angular resolution four-mirrors system working in
the visible and near-infrared spectrum** [13019-59]

13019 1S **HARMONI at ELT: pre-optics optical design at FDR** [13019-61]

13019 1T **Optical design of compact high resolution Raman spectrometer for interplanetary mission**
[13019-63]

POSTER SESSION

13019 1U **Tolerancing and design-for-manufacture in the catadioptric telescope for remote sensing
instrument** [13019-64]

13019 1X **Multifocal binary Gabor zone plates** [13019-67]

13019 1Y **Design of a MWIR continuous zoom lens using high-definition detector and optimization for
practical applications** [13019-68]

13019 1Z **A novel dual direction polygon scanner for surface cleaning** [13019-69]

13019 2I **Design, manufacturing, and testing of a compact annular telescope** [13019-73]

13019 24 **Miniaturized fluorescence measurement system with novel dichroic beam splitter cubes with 3
by 3 by 3 cubic millimeters and special optical direction-selective filters** [13019-79]

13019 28 **Fast camera design options for a panoramic integral field spectrograph [13019-83]**

DIGITAL POSTER SESSION

13019 2E **Slide scanning stage: a modular, low-cost, portable, and precise solution for sample analysis in hematology [13019-14]**

13019 2F **Aberration-corrected lens design in the ultraviolet-visible regime [13019-78]**
