

PROCEEDINGS OF SPIE

Advanced Photon Counting Techniques XVIII

Mark A. Itzler
Joshua C. Bienfang
K. Alex McIntosh
Editors

23–25 April 2024
National Harbor, Maryland, United States

Sponsored and Published by
SPIE

Volume 13025

Proceedings of SPIE 0277-786X, V. 13025

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Photon Counting Techniques XVIII*, edited by Mark A. Itzler, Joshua C. Bienfang, K. Alex McIntosh, Proc. of SPIE 13025, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 SINGLE-PHOTON DETECTION

13025 02 **Afterpulsing in 1550nm Geiger-mode avalanche photodiode focal plane arrays** [13025-2]

13025 03 **High sensitivity InGaAs/AlGaAsSb avalanche photodiode with fast overload recovery and high damage threshold** [13025-4]

SESSION 2 SUPERCONDUCTING SINGLE-PHOTON DETECTORS

13025 04 **New frontiers for commercial SNSPDs (Invited Paper)** [13025-6]

13025 05 **Progress in the realization of multi-channels waveguide-integrated photon number resolving detectors (Invited Paper)** [13025-7]

13025 06 **Trap-integrated superconducting nanowire single-photon detectors for trapped-ion qubit state readout (Invited Paper)** [13025-8]

SESSION 3 PHOTON-COUNTING IMAGING TECHNIQUES

13025 07 **Multichannel-GaAsP-photomultiplier-based fiber bundle ISM-STED microscope** [13025-12]

SESSION 4 SINGLE-PHOTON COMMUNICATIONS

13025 08 **Photon-counting for deep space optical communications (Invited Paper)** [13025-13]

SESSION 5 SINGLE-PHOTON SOURCES

13025 09 **Temperature-insensitive source for entangled time-frequency quantum photonic states (Invited Paper)** [13025-17]

13025 0A **Atomic vapor quantum memory for on-demand semiconductor single photon sources (Invited Paper)** [13025-18]

13025 0B **Advances in entangled-photon sources and single-photon avalanche diodes for quantum technologies in the SWIR** [13025-19]

DIGITAL POSTER SESSION

13025 0C **Fractal superconducting nanowire single-photon detectors and their applications in polarimetric imaging (Invited Paper)** [13025-9]
