SPIE

Volume 13027

Proceedings of SPIE 0277-786X, V. 13027

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Energy Harvesting and Storage: Materials, Devices, and Applications XIV*, edited by Peter Bermel, Naresh C. Das, Zunaid Omair, Proc. of SPIE 13027, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 ENERGY HARVESTING AND STORAGE I

- 13027 02 **Examining stability in organo-halide perovskite solar cells (Invited Paper)** [13027-1]
- 13027 03 **Energy harvesting using HgCdTe devices** [13027-4]
- 13027 04 **Bipolar electrochem graphene microsupercaps** [13027-5]

SESSION 2 ENERGY HARVESTING AND STORAGE II

- 13027 05 **Fuel cell supported tactical energy network study** [13027-8]
- 13027 06 **A perspective on multi-source energy harvesting technology using piezoelectric and thermoelectric materials** [13027-9]
- 13027 07 **Theoretical investigation on harvesting thermal energy beyond the visible spectrum in Ta-doped monolayer MoS₂** [13027-10]

POSTER SESSION

- 13027 08 **Beyond conventional predictions: unfolding the ensemble Kalman filter's publications in renewable energy** [13027-18]
- 13027 09 **Stability of perovskite solar cells through in-use device testing** [13027-30]

DIGITAL POSTER SESSION

- 13027 0A **Optimization of capacitive deionization electrode features and materials using artificial-intelligence-based modeling** [13027-17]
