SPIE

Volume 13029

Proceedings of SPIE 0277-786X, V. 13029

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Laser Technology for Defense and Security XIX*, edited by Mark Dubinskii, Rita D. Peterson, Proc. of SPIE 13029, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 SEMICONDUCTOR LASERS

13029 02 **Robust high-power single-mode semiconductor optical amplifiers at 1550nm for free space optical communications** [13029-4]

SESSION 2 LASER TECHNIQUES AND APPLICATIONS

13029 03 **Large-scale monolithic lens arrays for coherent beam combination** [13029-7]

SESSION 3 DEVELOPMENT OF NOVEL LASER MATERIALS AND COMPONENTS

13029 04 **Challenges in fabricating laser fibers with reduced thermo-optic coefficients** [13029-13]

SESSION 4 ADVANCED LASER DESIGNS AND UNDERLYING PHYSICS

13029 05 **Self Q-switched Nd, Cr:YAG transparent ceramics** [13029-20]

DIGITAL POSTER SESSION

13029 06 **Fiber lasers in focus: bibliometric analysis of a growing field** [13029-10]
