SPIE

Volume 13032

Proceedings of SPIE 0277-786X, V. 13032

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Algorithms for Synthetic Aperture Radar Imagery XXXI*, edited by Edmund Zelnio, Frederick D. Garber, Proc. of SPIE 13032, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

3D RECONSTRUCTION

- 13032 02 **Application of digital beamforming phase calibration techniques in multi-pass interferometric SAR for improved height mapping** [13032-1]
- 13032 03 **Three-dimensional spherical SAR template and feature recognition** [13032-2]
- 13032 05 **Empirical analysis of target responses for understanding SAR to EO translations** [13032-5]
- 13032 06 **Analysis of the impact of SSIM parameterization for SAR to EO translation networks** [13032-6]
- 13032 07 **Interferometric spatial filter for 3D synthetic aperture radar via back-projection image formation** [13032-7]
- 13032 08 **Efficient high resolution 3D SAR imaging via super-resolution spectral estimation methods** [13032-9]

ADVANCED RADAR PROCESSING

- 13032 09 **Morphology and refocus of fast-moving exo-clutter targets in synthetic aperture radar imagery** [13032-10]
- 13032 0A **Boot-strapping methods for improved SAR-GMTI** [13032-11]
- 13032 0B **Efficient and accurate approximation of super-resolution spectral estimation methods for SAR imaging** [13032-12]
- 13032 0C **Leveraging structural information for enhanced coherent change detection** [13032-13]
- 13032 0D **A generalized gamma copula model for high resolution polarimetric SAR change detection** [13032-36]

AUTOMATIC TARGET RECOGNITION PERFORMANCE UNDERSTANDING

13032 0E **Operating condition sampling strategies for evaluating ATR performance** [13032-14]

13032 0F **Classifier models for SAR ATR performance prediction** [13032-15]

AUTOMATIC TARGET RECOGNITION ALGORITHMS I

13032 0I **Using foundational models to bridge the synthetic-measured gap** [13032-18]

13032 0J **Learning to fuse with side information for multi-sensor ATR** [13032-19]

13032 0K **Adversarial physics-based augmentations for robust training using synthetic data** [13032-20]

13032 0L **Synthetic SAR data domain randomization for unseen SAR ATR** [13032-21]

13032 0M **Using colorization to bridge the synthetic-measured gap** [13032-22]

13032 0N **Out-of-distribution detection for SAR imagery using ATR systems** [13032-23]

13032 0O **Graph contrastive learning based adversarial training for SAR image classification** [13032-24]

13032 0P **Hybrid generative and contrastive approaches to the synthetic-measured gap** [13032-25]

AUTOMATIC TARGET RECOGNITION ALGORITHMS II

13032 0Q **Implicit coding of scatterer height and other anisotropic behaviors in colorized SAR imagery** [13032-26]

13032 0R **SAR image quantization strategies for improved human/machine interpretability** [13032-27]

13032 0W **Calibrated confidences and prediction sets for open set SAR ATR** [13032-32]

13032 0X **Graph pretraining approach to utilize synthetic data for SAR ATR** [13032-35]
