SPIE

Volume 13034

Proceedings of SPIE 0277-786X, V. 13034

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Real-Time Image Processing and Deep Learning 2024*, edited by Nasser Kehtarnavaz, Mukul V. Shirvaikar, Proc. of SPIE 13034, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

REAL-TIME DEEP LEARNING I

13034 02 **Multi-reward optimization using genetic algorithms for edge AI** [13034-3]

13034 03 **A deep learning-based template matching through other field of view infrared image pair for real-time mixed reality** [13034-4]

REAL-TIME METHODS AND ALGORITHMS I

13034 04 **End-to-end system for real-time bidirectional holographic communication** [13034-5]

13034 05 **Color image denoising: a hybrid approach for mixed Gaussian and impulsive noise** [13034-6]

13034 06 **Coupling deep and handcrafted features to assess smile genuineness** [13034-7]

13034 07 **Efficient and consistent zero-shot video generation with diffusion models** [13034-8]

REAL-TIME DEEP LEARNING II

13034 08 **Comparison of deep generative models for real-time generation of synthesized defective wafer maps** [13034-9]

13034 09 **BSMO: enhancing multitask learning through batch swapping optimization** [13034-10]

13034 0A **Edge deployed satellite image classification with TinEViT a X-Cube-AI compatible efficient vision transformer** [13034-11]

13034 0B **A design space exploration framework for deployment of resource-constrained deep neural networks** [13034-12]

REAL-TIME METHODS AND ALGORITHMS II

13034 0C **IoT-enabled unmanned traffic management system with dynamic vision-based drone detection for sense and avoid coordination** [13034-13]

13034 0D **Exploring action recognition in endoscopy video datasets** [13034-14]

13034 0E **Integrating image-based LLMs on edge-devices for underwater robotics** [13034-15]

13034 0F **Age-based clustering of seagrass blades using AI models** [13034-16]

REAL-TIME METHODS AND ALGORITHMS III

13034 0H **Layered convolutional neural networks for multi-class image classification** [13034-18]

POSTER SESSION

13034 0J **Eyeball tracking in closed eyes from shadows** [13034-21]

13034 0K **CAEN: efficient adversarial robustness with categorized ensemble of networks** [13034-22]

13034 0L **Improving real-time security screening** [13034-24]

13034 0M **Learning optimum binary color filter arrays for demosaicing with neural networks** [13034-25]

DIGITAL POSTER SESSION

13034 0O **Charting the rise of ONNX in swift image processing: a publications exploration** [13034-23]
