SPIE

Volume 13042

Proceedings of SPIE 0277-786X, V. 13042

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Optics for Imaging Applications: UV through LWIR IX*, edited by Jay N. Vizgaitis, Peter L. Marasco, Jasbinder S. Sanghera, Proc. of SPIE 13042, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 METAMATERIALS

- 13042 02 **Sb₂S₃ nanostructured dynamic optical metasurfaces** [13042-2]
- 13042 03 **Metasurface hybrid lens physical modeling** [13042-3]
- 13042 04 **Transmission enhancement via metasurfaces with tunable waveband performance by dewetting and seeded masking** [13042-4]

SESSION 2 MACHINE LEARNING FOR OPTICS

- 13042 05 **Addressing multi-scale challenges in metasurface design with differentiable far-field propagation** [13042-5]
- 13042 06 **Time-series neural networks to predict electromagnetic wave propagation** [13042-6]
- 13042 07 **Cooperative optimization of neural-network-based diffraction simulations and benchtop spatial light modulators** [13042-8]

SESSION 3 OPTICS FOR SYSTEMS

- 13042 08 **First-order calculation of optical cross-section (OCS) based on the Lagrange invariant** [13042-24]
- 13042 09 **Development and testing of a ruggedized compact VNIR-SWIR hyperspectral imager for remote sensing** [13042-13]

SESSION 4 FABRICATION AND COATINGS

- 13042 0B **Theoretical principles and design practices for edge filters and coatings** [13042-15]

SESSION 5 ADVANCED OPTICAL MATERIALS

13042 0C **Sulfur-rich infrared transmitting polymer fibers** [13042-19]

13042 0D **GRIN materials for LWIR applications** [13042-20]

13042 0E **Application and testing of SupremEX 640XA and AyontEX 13 for mirrors and precision structures**
[13042-21]

DIGITAL POSTER SESSION

13042 0F **The scientific footprint of SWIR detectors** [13042-23]
