SPIE

Volume 13043

Proceedings of SPIE 0277-786X, V. 13043

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Anomaly Detection and Imaging with X-Rays (ADIX) IX*, edited by Amit Ashok, Joel A. Greenberg, Michael E. Gehm, Proc. of SPIE 13043, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 SYSTEMS DESIGN

- 13043 02 **Detection of concealed threats in homeland security environments (Keynote Paper)** [13043-1]
- 13043 03 **Spectrum optimization for x-ray dual-mode imager comprising radiography and coherent scatter** [13043-2]

SESSION 2 ALGORITHMS I

- 13043 06 **Improved reconstruction and classification performance in a hybrid CT+XRD explosives detection system** [13043-5]
- 13043 07 **Unsupervised denoising for spectral CT images using a U-Net with block-based training** [13043-6]

SESSION 3 SYNTHETIC DATA AND MATERIALS

- 13043 0C **Integrating synthetic data validation and quality benchmarks into a continuous integration/continuous delivery (CI/CD) data-generation pipeline (Invited Paper)** [13043-11]
- 13043 0D **Development of tunable semi-solid explosive simulants using a parametric model** [13043-13]

SESSION 4 PHASE/SCATTER SYSTEMS

- 13043 0E **X-ray backscatter imaging: a new deployable form factor for defence and security applications** [13043-14]
- 13043 0F **Spectrally responsive edge-illumination x-ray phase contrast imaging (XPCI)** [13043-15]
- 13043 0G **Development of a high-energy x-ray diffraction system for determining materials' signatures relevant to transportation security** [13043-16]
- 13043 0H **Further development of asymmetric illumination x-ray differential phase contrast imaging** [13043-17]

- 13043 OI **High-resolution x-ray diffraction imaging in a tabletop system** [13043-18]
- 13043 OJ **Ghost imaging to see internal structure of a biological object with x-ray-based speckle illumination** [13043-19]

SESSION 5 ALGORITHMS II

- 13043 OK **Generation of imagery-derived texture features for material discrimination** [13043-20]
- 13043 OL **Towards efficient diagnostics: refining vision transformers for medical image multi-label classification** [13043-21]
- 13043 OM **3D effective atomic number estimation for x-ray security inspection systems** [13043-22]
