

PROCEEDINGS OF SPIE

Optical Waveguide and Laser Sensors III

**Robert A. Lieberman
Glen A. Sanders
Michael P. Buric**
Editors

**22–24 April 2024
National Harbor, Maryland, United States**

Sponsored and Published by
SPIE

Volume 13044

Proceedings of SPIE 0277-786X, V. 13044

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Waveguide and Laser Sensors III*, edited by Robert A. Lieberman, Glen A. Sanders, Michael P. Buric, Proc. of SPIE 13044, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 SENSOR SYSTEMS AND INTERROGATOR OPTIMIZATION

- 13044 02 **Ultra-long-distance BOTDA sensor system employing hybrid amplification and advanced noise reduction technique** [13044-1]
- 13044 04 **Multicore fiber optic gyro** [13044-3]

SESSION 2 SENSORS FOR EXTREME ENVIRONMENTS

- 13044 07 **Distributed sapphire fiber sensors for steel-making industrial applications (Invited Paper)**
[13044-6]
- 13044 08 **Development of an immersion fiber optic Raman probe for real-time analysis of molten materials** [13044-7]
- 13044 09 **Enhancing aluminum casting efficiency through real-time optical fiber sensor monitoring at the metal-mold interface** [13044-8]
- 13044 0A **Distributed fiber optic sensors for applications in electric arc furnaces** [13044-9]
- 13044 0B **Overpressure sensing through acousto-optics: a comparison between a self-mixing interferometer and an all-fiber Michelson interferometer** [13044-10]
- 13044 0C **Polymer chirped fiber Bragg grating for more sensitive shock velocity measurements** [13044-11]

SESSION 3 EXOTIC GUIDED WAVE SENSORS

- 13044 0E **Online monitoring of hydrogen processing using hollow-core waveguide-based Raman spectroscopy** [13044-13]
- 13044 0F **Highly cascaded first-order fiber Bragg gratings in highly multimode optical fibers for distributed temperature sensing under harsh environment conditions** [13044-14]
- 13044 0G **Optical fiber specklegram sensor for water leak detection and localization** [13044-15]

- 13044 OH **Dopant segregation in single-crystal optical fiber grown via the laser-heated pedestal growth technique** [13044-16]
- 13044 OI **Feasibility of distributed temperature sensing using an enhanced scattering fiber** [13044-17]

SESSION 4 SENSORS FOR INFRASTRUCTURE MONITORING I

- 13044 OJ **Investigation of data augmentation techniques for ultrasonic acoustic fiber sensing signals in guided wave-based pipeline damage detection (Invited Paper)** [13044-18]
- 13044 OK **Petroleum product pipeline monitoring by optical frequency domain reflectometry** [13044-19]
- 13044 OL **Calcined polyethyleneimine-coated optical fibers for distributed pH monitoring at high pressures and temperatures** [13044-20]
- 13044 OM **Numerical modeling of cylindrical non-axisymmetric elastic waves for damage detection using fiber optic sensors** [13044-21]

SESSION 5 SENSORS FOR INFRASTRUCTURE MONITORING II

- 13044 ON **Distributed optical fiber sensor systems: application to natural gas pipeline monitoring (Invited Paper)** [13044-22]
- 13044 OO **Pipeline damage detection using multimode fiber optic acoustic sensor and ultrasonic guided waves** [13044-23]
- 13044 OP **Multimode interference-based fiber optic sensors using single mode/no-core/single mode (SNS) configuration** [13044-24]
- 13044 OQ **Multi-parameter optical fiber sensing of humidity, CH₄, CO₂, and corrosion** [13044-25]

SESSION 6 SENSORS FOR ENERGY APPLICATIONS

- 13044 OR **Dynamic response of magnetic fluid-cladded MMI fiber optic sensor optimized for fourth self-imaging spectral response (Invited Paper)** [13044-26]
- 13044 OS **Development of low-cost fiber optic temperature sensing interrogators for Li-ion battery thermal monitoring** [13044-27]
- 13044 OT **Fiber-based distributed hydrogen measurement at high temperatures** [13044-28]
- 13044 OV **Deep learning-assisted automated detection of gas influx signature in wellbore using distributed acoustic sensor data** [13044-30]
