Volume 13047

Proceedings of SPIE 0277-786X, V. 13047

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Thermosense: Thermal Infrared Applications XLVI*, edited by Fernando López, Nicolas P. Avdelidis, Giovanni Ferrarini, Proc. of SPIE 13047, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

ARTIFICIAL INTELLIGENCE AND NDE4.0 IN IRT I

13047 0D **Effect of lock-in thermography test parameters on classifying defects in CFRP by means of a convolutive neural network** [13047-38]

13047 0E **Synthetic visible-IR images pairs generation for multi-spectral NDT using flying spot thermography and deep learning (Thermosense Best Student Paper)** [13047-3]

13047 0F **A few-shot learning approach for the segmentation of subsurface defects in thermography images of concrete structures** [13047-4]

ARTIFICIAL INTELLIGENCE AND NDE4.0 IN IRT II

13047 0G **Surface moisture detection using thermal imaging and computer vision** [13047-6]

13047 0H **Bond thickness estimation in composite structures using multiple inspection techniques** [13047-7]

DRONE AND AIRBORNE THERMOGRAPHY: ROBOTICS

13047 0K **Heat source selection for drone-based active-infrared thermography** [13047-9]

HYPERSPECTRAL AND MULTISPECTRAL IMAGERY

13047 0M **Multispectral and hyperspectral infrared imaging for plastic waste sorting and recycling** [13047-11]

IR NDT APPLICATIONS I

13047 0P **Inspection of short surface cracks by inductive thermography and by computer tomography** [13047-15]

13047 0Q **Crack characterization in manganese steel using a µ-bolometer camera and an air-cooled inductor** [13047-16]

13047 0R **Preliminary procedure for the assessment of probeless friction stir spot welds (P-FSSW) in dissimilar aluminum alloys by long pulsed laser thermography** [13047-17]

13047 0T **Estimating thermal properties of coatings by using multi-frequency lock-in thermography** [13047-25]

KEYNOTE SESSION

13047 0U **Three-dimensional thermophotonic super-resolution imaging with biomedical and NDI applications by spatiotemporal diffusion-reversal methods (Keynote Paper)** [13047-1]

ADDITIVE MANUFACTURING

13047 0V **In-line monitoring of the fused filament fabrication additive manufacturing process for fibre-reinforced composites** [13047-19]

13047 0W **Advanced NDT inspection approach for aircraft composite panels** [13047-20]

13047 0X **Near-infrared in-situ measurements for the detection of keyhole porosity in autogenous Ti-6Al-4V welds** [13047-21]

IR NDT APPLICATIONS II

13047 0Z **Scanning inductive and line laser thermography for surface crack detection and characterization in railway rails** [13047-23]

13047 10 **Periodic projection of a random spatial pattern for the assessment of the in-plane thermal diffusivity** [13047-24]

13047 12 **Flash energy and duration issues in active thermography** [13047-27]

AEROSPACE APPLICATIONS

13047 15 **Evaluation of aircraft wheel and brake temperatures based on infrared thermographic imaging** [13047-31]

13047 16 **Thermal inspection of low emissivity surfaces using a pulsed light emitting diodes (PLED) heat source** [13047-32]

POSTER SESSION

13047 17 **Active thermography non-destructive inspection of a damaged artwork with a complex shape** [13047-33]

13047 18 **Non-destructive evaluation of 3D-printed fibre-reinforced composite materials mechanical behaviour** [13047-35]

13047 19 **Semantic segmentation of defects in infrastructures through multi-modal images** [13047-36]
