**Volume 13050**

Proceedings of SPIE 0277-786X, V. 13050

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Polarization: Measurement, Analysis, and Remote Sensing XVI*, edited by David B. Chenault, Meredith K. Kupinski, Bradley M. Ratliff, Proc. of SPIE 13050, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## **SESSION 1 UNDERSTANDING POLARIMETRIC INSTRUMENTS**

---

- 13050 02 **Angle of polarization confidence metric for polarization imaging** [13050-1]
- 13050 03 **Experimental comparison of 2×2 and 2×4 patterned microgrid polarimetric imaging cameras** [13050-2]
- 13050 04 **Micropolarizer array demosaicking and denoising** [13050-3]
- 13050 05 **Sub-percent characterization and polarimetric performance analysis of commercial micropolarizer array detectors** [13050-4]
- 13050 06 **Developing a robust thermal polarized calibration source** [13050-5]

---

## **SESSION 2 POLARIMETRIC REMOTE SENSING**

---

- 13050 07 **SkyPole: a geolocation algorithm based on polarized vision without using astronomical ephemerides** [13050-6]
- 13050 09 **Optimal estimation of aerosol properties using all-sky polarimetry** [13050-8]
- 13050 0B **Multispectral polarimetric separability of urban materials** [13050-10]

---

## **SESSION 3 POLARIMETRIC MEASUREMENTS**

---

- 13050 0C **Comparison of spectral polarimetric instruments in varied environments** [13050-11]
- 13050 0D **Polarimetric inspection of flax composite material reinforcements** [13050-12]
- 13050 0F **Birefringence measurements of crystal quartz, magnesium fluoride, and synthetic sapphire** [13050-14]

**SESSION 4    OPTICAL SYSTEM CONCEPTS**

---

13050 OG    **Liquid crystal polarization rotators for the miniaturized absolute magnetometer (MAM) of the NanoMagSat space mission** [13050-16]

13050 OH    **Liquid crystal devices for compact optical space instruments** [13050-17]

**SESSION 5    EXPLOITING POLARIZATION**

---

13050 OJ    **Disambiguation of surface normals using single-view Mueller shape-from-polarization**  
[13050-19]

13050 OK    **Illuminating depth: polarimetric time-of-flight sensing with single-photon counting imager**  
[13050-20]

**POSTER SESSION**

---

13050 OL    **High-speed polarization fiber sensors optimized for security purposes** [13050-21]

**DIGITAL POSTER SESSION**

---

13050 OM    **The rise of the polarimetric Kalman filter: a bibliometric study on its growing significance**  
[13050-22]
