

PROCEEDINGS OF SPIE

***Autonomous Systems: Sensors,
Processing, and Security for
Ground, Air, Sea, and Space
Vehicles and Infrastructure 2024***

**Michael C. Dudzik
Stephen M. Jameson
Theresa J. Axenson**
Editors

**22–24 April 2024
National Harbor, Maryland, United States**

Sponsored and Published by
SPIE

Volume 13052

Proceedings of SPIE 0277-786X, V. 13052

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIEDigitalLibrary.org](https://spiedigitallibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Autonomous Systems: Sensors, Processing, and Security for Ground, Air, Sea, and Space Vehicles and Infrastructure 2024*, edited by Michael C. Dudzik, Stephen M. Jameson, Theresa J. Axenson, Proc. of SPIE 13052, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

NOVEL ALGORITHMIC TECHNIQUES FOR CONTROL OF AUTONOMOUS SYSTEMS

13052 03 **Evaluate the performance of attention DDPG-based adaptive cruise control system in all weather conditions** [13052-13]

NOVEL SENSING APPLICATIONS FOR AUTONOMOUS SYSTEMS

13052 04 **Vehicle detection using drone-mounted optically pumped magnetometers** [13052-16]

13052 05 **Enhancing cyber-physical systems (CPS) robustness through sensor-pair health indicator** [13052-2]

13052 06 **Accelerated Hough transform-based tree diameter extraction from LiDAR point cloud data** [13052-6]

13052 07 **Enhancing autonomous navigation: acoustic tomography through synthetic data modeling** [13052-15]

ROBUST CONTROL APPROACHES FOR AUTONOMOUS SYSTEMS

13052 0A **Developing robust autonomous vehicles with ROS** [13052-19]

13052 0B **Aerospace digital twins: examining applications of digital twin technology to unmanned aerial vehicles and satellites** [13052-5]

13052 0C **Current sensor fingerprint for real-time failure detection and transceiver identification in autonomous systems controlled by artificial intelligence (AI)** [13052-1]

13052 0D **Adaptive image compression for vehicular ad hoc networks: a discrete wavelet transform low-low subband (DWT-LL), singular value decomposition (SVD), and linear programming (LP) approach for vehicle density sensing-based compression** [13052-20]

SENSING, PROCESSING, AND SAFETY FOR UNMANNED GROUND VEHICLES I: JOINT SESSION WITH CONFERENCES 13052 AND 13055

13052 0F **Comparing performance of robot operating system (ROS) mapping algorithms in the presence of degraded or obscured depth sensors** [13052-8]

**SENSING, PROCESSING, AND SAFETY FOR UNMANNED GROUND VEHICLES III: JOINT SESSION WITH
CONFERENCES 13052 AND 13055**

- 13052 OG **CNN-based end-to-end learning for lane centering** [13052-10]
- 13052 OH **Multirobot navigation using improved RRT*-SMART with digital twin technology** [13052-17]
- 13052 OJ **Traffic light recognition and V2I communications of an autonomous vehicle with the traffic light
for effective intersection navigation using YOLOv8 and MAVS simulation** [13052-9]

POSTER SESSION

- 13052 OK **Investigation into deep learning methods for in-the-wild applications** [13052-24]

DIGITAL POSTER SESSION

- 13052 OL **Path planning for a UGV using Salp Swarm Algorithm** [13052-18]
