SPIE

Volume 13055

Proceedings of SPIE 0277-786X, V. 13055

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Unmanned Systems Technology XXVI*, edited by Hoa G. Nguyen, Paul L. Muench, Robert Diltz, Proc. of SPIE 13055, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

SENSING, PROCESSING, AND SAFETY FOR UNMANNED GROUND VEHICLES I: JOINT SESSION WITH CONFERENCES 13052 AND 13055

13055 02 **Robot operating system 2 navigation stack in action: automating a Caterpillar 621G for pavement testing** [13055-1]

SENSING, PROCESSING, AND SAFETY FOR UNMANNED GROUND VEHICLES II: JOINT SESSION WITH CONFERENCES 13052 AND 13055

13055 03 **The NATURE autonomy stack: an open-source stack for off-road navigation** [13055-2]

13055 04 **Autonomous tractor for delivery of biocementation agent** [13055-3]

BIO-INSPIRED SYSTEMS

13055 07 **Centroid-based cell decomposition robot path planning algorithm integrated with a bio-inspired approach** [13055-9]

13055 08 **Synergizing graph-based methods with biologically inspired algorithms for enhanced robot path planning efficiency** [13055-10]

13055 09 **Autonomous unmanned systems: traversing the bibliometric terrain of genetic algorithm-based path planning** [13055-8]

AI/ML AND UNMANNED SYSTEMS: JOINT SESSION WITH CONFERENCES 13051 AND 13055

13055 0A **The cultivation of autonomous strategic coordination systems** [13055-11]

13055 0B **Transfer learning for adaptable autonomy** [13055-12]

MULTI-AGENT SYSTEMS

13055 0C **Dynamic, decentralized task allocation for UAS swarms** [13055-13]

13055 0D **Multi-robot path planning using potential field-based simulated annealing approach** [13055-14]

13055 0E **Gravitational-inspired wayfinding for drone swarms: a conceptual path planning method** [13055-15]

13055 0F **Drone-hosted autonomous radio mesh activity: biological inspired swarming at scale (DHARMA-BLISS)** [13055-16]

SENSING AND CONTROL

13055 0G **Earthling logic for intelligent control** [13055-17]

13055 0H **Asymptotic distribution theory for stochastic control** [13055-18]

13055 0I **Automatic segmentation using knowledge distillation with ensemble models (ASKDEM)** [13055-19]

COMMUNICATIONS AND COMPUTING TECHNOLOGY

13055 0J **Enabling multi-radio and cognitive radio technologies with named-data networking for better ad-hoc networking** [13055-22]

13055 0K **Operationalize DNA technology for U.S. defense** [13055-24]

13055 0L **Edge processing for frequency identification on drone-deployed structural health monitoring sensor nodes** [13055-25]

13055 0M **Evaluating robot operating system's capabilities across distributed containerized systems** [13055-26]

POSTER SESSION

13055 0N **Earthling reasoning for intelligent systems** [13055-27]

13055 0O **Swarm UAVs for area mapping in GPS-denied locations** [13055-28]

DIGITAL POSTER SESSION

13055 0P **The application of sliding innovation filter as estimation strategy applied to a UAV** [13055-20]

13055 0Q **Parameter estimation of an unmanned aerial vehicle using dandelion algorithm** [13055-21]

13055 0R **Mobility prediction for re-routing strategy in drone networks** [13055-23]
