**Volume 13056**

Proceedings of SPIE 0277-786X, V. 13056

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Chemical, Biological, Radiological, Nuclear, and Explosives (CBRNE) Sensing XXV*, edited by Jason A. Guicheteau, Christopher R. Howle, Tanya L. Myers, Proc. of SPIE 13056, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

---

## CBRNE TRACE ANALYSIS

---

- 13056 04 **Trace explosive detection and identification signature characterization studies using deep-UV fluorescence and Raman spectroscopy** [13056-2]
- 13056 05 **Laser-based infrared sensor for fast and non-contact detection and identification of forensic traces in crime scene investigations** [13056-3]
- 13056 06 **Multimodal approach for chemical and biological substance screening** [13056-4]

---

## INTEGRATED PHOTONIC SENSING

---

- 13056 08 **Waveguide-enhanced Raman spectroscopy of trace vapors with fiber-attached photonic integrated circuits** [13056-6]

---

## CHEMICAL HAZARD SENSING I

---

- 13056 0C **Fast broadband QCL-based chemical detection: an optical alternative for road surface reconnaissance** [13056-10]
- 13056 0D **One-handed UV Raman sensor for standoff trace detection now a reality** [13056-11]
- 13056 0F **Hand-portable trace chemical detector** [13056-13]

---

## BIOLOGICAL HAZARD SENSING

---

- 13056 0H **Biolayer interferometry as a biological detection platform** [13056-15]
- 13056 0K **Detection of microorganisms in drinking water using fluorescence spectroscopy** [13056-18]

---

#### AEROSOL CHARACTERIZATION I

---

- 13056 OL **Optical constants measurements of liquids for modeling aerosolized threats** [13056-19]
- 13056 OM **Aerosol release tracking via optical barcodes: aerosol sensor testing ground truth** [13056-20]
- 13056 ON **Aerosol mass spectrometer for aerosol characterization at the ambient aerosol test facility** [13056-21]
- 13056 OO **Constructing arbitrary-shape scatterer models for analysis of optical spectral data** [13056-22]

---

#### RADIOLOGICAL SENSING

---

- 13056 OP **Development of spectroscopic tools for nuclear forensics signatures development (Invited Paper)** [13056-23]
- 13056 OQ **A dedicated autonomous ground contamination detection system for dispersed radioactive materials** [13056-24]
- 13056 OR **Monitoring the reaction dynamics of UF<sub>6</sub> by cryogenic layering and FTIR spectroscopy** [13056-25]
- 13056 OS **Single-photon quantum Raman spectroscopy for stand-off, hand-held detection of gas-phase molecules** [13056-26]

---

#### NEXT-GENERATION AND CBRNE SENSING: JOINT SESSION WITH CONFERENCES 13026 AND 13056

---

- 13056 OU **Evaluation of emerging chemical sensors for food protection and chemical sensing** [13056-28]

---

#### CHEMICAL HAZARD SENSING II

---

- 13056 OW **Optical sensing in context: a twenty-five year retrospective (Invited Paper)** [13056-30]
- 13056 OX **Single image spectroscopy using a grating spectrometer and a broadband IR laser source** [13056-31]
- 13056 OY **High-speed single-pixel long-wave-infrared trace chemical detection system** [13056-32]
- 13056 OZ **Combining standoff tomography with point detection: a game changer for the identification of airborne toxic chemicals** [13056-33]
- 13056 IO **Low-SWaP-C colorimetric detection of vapor-phase chemical threats** [13056-34]

---

## EXPLOSIVE SENSING

---

- 13056 11 **Blue is the new white: collection and correlation of spectroscopic data of explosive tetraammine copper complexes to their physical characteristics** [13056-48]
- 13056 12 **Emerging explosive threat analysis for using threat anomaly detection (ThreAD)** [13056-35]
- 13056 13 **Stand-off explosive sensing and imaging with scanning dual-comb IR spectrometer: limits of detection and operation in scanning mode** [13056-36]
- 13056 14 **Molecular dynamics models for sublimation of explosive materials** [13056-37]

---

## ADVANCES IN CBRNE SIGNATURES AND SENSOR ALGORITHMS

---

- 13056 17 **Deep learning for hazard quantification from imagery** [13056-40]
- 13056 18 **Infrared signatures from chemical warfare agent simulants on kaolinite** [13056-41]
- 13056 19 **Revisiting the liquid mull technique to derive the infrared optical constants of organic powders from transmission IR spectroscopy** [13056-42]
- 13056 1A **Optimal spectral resolution for solids and liquids using FT and other infrared spectrometers: How much resolution do you really need?** [13056-43]
- 13056 1B **Infrared signatures of thermal degradation products from chemical warfare agent simulants** [13056-44]

---

## AEROSOL CHARACTERIZATION II

---

- 13056 1D **Analysis of chemical aerosol generation and characterization using various liquid aerosol generators** [13056-46]
- 13056 1E **Modeling of infrared scattering signatures of liquid and solid aerosol clouds** [13056-47]

---

## POSTER SESSION

---

- 13056 1F **The TLX-VIS component library for the AIM photonics silicon nitride passive PIC process** [13056-51]
- 13056 1G **IR absorption spectra for common polyfluorides in food and pharmaceutical production using density functional theory** [13056-52]

13056 1J      **Discerning molecular transitions using adaptive Savitzky-Golay filtering and ML-based classification in mid-infrared sensing** [13056-55]

13056 1K      **Improving Raman stand-off distance for the detection of chemical warfare agents** [13056-56]

**DIGITAL POSTER SESSION**

---

13056 1L      **Hydrogen peroxide sensors in the literature** [13056-57]
