**Volume 13059**

Proceedings of SPIE 0277-786X, V. 13059

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Smart Biomedical and Physiological Sensor Technology XXI*, edited by Brian M. Cullum, Douglas Kiehl, Eric S. McLamore, Proc. of SPIE 13059, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## NOVEL MATERIALS SENSING

---

- 13059 02 **Multiwavelength spectral photon detection system with 10.9nm resolution capable of perform data stream at 420Gs/s** [13059-1]
- 13059 03 **Dielectric energy storage materials for space sensors: effect of processing on the performance** [13059-4]
- 13059 04 **Studies of multifunctional Bi<sub>12</sub>GeO<sub>20</sub> compound synthesized by chemical route** [13059-5]
- 13059 05 **Flux growth of optical sensor zinc selenide crystals** [13059-6]

---

## FUTURE OF INDIVIDUAL CARE AND MONITORING

---

- 13059 06 **Quantifying knowledge: medical applications of radar aging through the lens of bibliometrics** [13059-11]
- 13059 07 **Inkjet-printed 2-D conductors for electromyography (EMG) electrodes in biosensing applications** [13059-7]
- 13059 08 **Functional connectivity differences between cocaine users and healthy controls: an fMRI study** [13059-9]
- 13059 09 **Extracting functional connectivity signatures in substance use disorder using energy landscape analysis** [13059-8]
- 13059 0A **Exploring connections between auditory hallucinations and language model structures and functions** [13059-10]

---

## SERS BIOSENSING FOR DEFENSE AND HEALTH

---

- 13059 0B **Exploring MOF-based micromotors as SERS sensors (Invited Paper)** [13059-17]
- 13059 0C **Label-free surface-enhanced Raman scattering (SERS) and machine learning for biological analysis** [13059-19]

**POSTER SESSION**

---

- 13059 0D     **Harnessing data and satellites for early malaria warning: a global health imperative** [13059-20]
- 13059 0E     **Advancements in pathogen detection: the integration of SERS and LSPR technologies in handheld clinical diagnostics** [13059-21]
