**Volume 13169**

Proceedings of SPIE 0277-786X, V. 13169

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Fifth International Conference on Computer Vision and Computational Intelligence (CVCI 2024)*, edited by Chin-Chen Chang, Chutisant Kerdvibulvech, Proc. of SPIE 13169, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

**SESSION 1 IMAGE RECOGNITION AND IMAGE CLASSIFICATION**

13169 02 **Efficient boxing punch classification: fine-grained skeleton-based recognition made light** [13169-5]

13169 03 **Recognition of vehicle country from license plate image based on Siamese network model with triplet loss function and negative sampling technique** [13169-16]

13169 04 **Promptable model for premium connection sealing surface detection and segmentation** [13169-14]

13169 05 **E-commerce image classification with transfer learning** [13169-1]

**SESSION 2 DIGITAL IMAGE ANALYSIS AND PROCESSING METHODS**

13169 06 **A local distance descriptor for 3D point clouds** [13169-3]

13169 07 **Zero/few-shot anomaly localisation using language prompts** [13169-10]

13169 08 **Purifying adversarial perturbations based on a text-guided diffusion model** [13169-17]

13169 09 **CLEVR-BT-DB: a benchmark dataset to evaluate the reasoning abilities of deep neural models in visual question answering problems** [13169-13]

13169 0A **2D virtual YouTuber character generation using generative adversarial networks** [13169-2]

**SESSION 3 ADVANCED INTELLIGENT INFORMATION SYSTEMS AND ARTIFICIAL INTELLIGENCE APPLICATIONS**

13169 0B **AI-based, automated longitudinal performance monitoring of multiple boxers in large scale videos** [13169-8]

13169 0C **Hiding information in a reordered codebook using pairwise adjustments in codewords** [13169-4]

13169 0D **Analysis of various machine learning models in detecting credit card fraud activities** [13169-7]

13169 0E **Enhance routing efficiency in dynamic edge computing environments through multi-agents optimization** [13169-9]

13169 0F **Calculation and planning of multi-beam survey lines based on geometric analysis** [13169-12]
