

PROCEEDINGS OF SPIE

International Conference on Remote Sensing, Surveying, and Mapping (RSSM 2024)

Yang Zhao

Editor

12–14 January 2024

Wuhan, China

Sponsored by

Nanjing University of Information Science and Technology (China)

Co-organized by

Shandong Jianzhu University (China)

Xi'an University of Science and Technology (China)

Shandong University of Technology (China)

Supported by

Global Scientific Research Association (China)

Published by

SPIE

Volume 13170

Proceedings of SPIE 0277-786X, V. 13170

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Remote Sensing, Surveying, and Mapping (RSSM 2024)*, edited by Yang Zhao, Proc. of SPIE 13170, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*
ix *Introduction*

GEOGRAPHIC INFORMATION TECHNOLOGY AND POSITIONING RESEARCH

- 13170 02 **Public geoinformation-assisted geo-positioning for Chinese commercial satellite imagery**
[13170-46]
- 13170 03 **Analysis of the impact of magnetic prospecting unmanned aerial vehicle route planning
on the positioning accuracy of simulated unexploded ordnance** [13170-80]
- 13170 04 **Research on positioning method of civil airport PAPI system based on AutoCAD drawing**
[13170-83]
- 13170 05 **Geological hazard meteorological risk warning model based on heterogeneous integration
machine learning: a case study in Yichang City** [13170-81]
- 13170 06 **Analysis and on-orbit verification of aiming accuracy for spaceborne SAR** [13170-61]
- 13170 07 **Spatiotemporal evolution of vegetation in the karst region in southwest China based on the
Google Earth Engine platform** [13170-29]
- 13170 08 **Monitoring and analysis of ground subsidence in Pingxiang City based on SBAS-InSAR
technology** [13170-68]
- 13170 09 **Relative elevation modelling of Linyi district and applications for the study of active faults**
[13170-86]
- 13170 0A **Vector water body type recognition integrating terrain features and spatial relationships**
[13170-34]
- 13170 0B **Analysis of the temporal and spatial characteristics of straw incineration in Hunan province
based on multi-source meteorological satellite** [13170-54]
- 13170 0C **Microwave soil moisture products in North China Plain based on triple collocation method
applicability evaluation** [13170-24]
- 13170 0D **Temporal and spatial evolution analysis of ecosystem service value based on land use in the
Jiaodong Economic Circle** [13170-30]
- 13170 0E **ArcGIS-based assessment of the water conservation capacity in the Hehuang Valley**
[13170-43]
- 13170 0F **Bathymetry prediction in Mariana Trench seabed terrain based on altimetry gravity anomalies
and vertical gravity gradients** [13170-89]

- 13170 OG **Research on the detection method of sensitive information of internet remote sensing image map** [13170-98]
- 13170 OH **A new radar vegetation index for research in the dry areas** [13170-75]
- 13170 OI **Remote sensing-based multi-scenario land use change simulation in Hefei, China** [13170-64]
- 13170 OJ **Monitoring technology of near-surface atmospheric carbon dioxide concentration in multiple regions based on unmanned aerial vehicle** [13170-25]
- 13170 OK **Method for the detection of road bridge pavement crack depth based on acoustic signal analysis** [13170-72]
- 13170 OL **Landslide susceptibility assessment in Qingyijiang river basin based on different machine learning methods** [13170-50]
- 13170 OM **Distribution and existing problems of open-pit mining land in China** [13170-31]

SPATIAL INFORMATION MAPPING AND SURVEYING TECHNOLOGY

- 13170 ON **Sensitivity analysis of carbon dioxide inversion in near-infrared spectra for TanSat-2 satellite** [13170-82]
- 13170 OO **Influence of flattening point cloud on filtering accuracy** [13170-33]
- 13170 OP **Thermal control method of high temperature stability for high resolution space camera** [13170-36]
- 13170 OQ **Color correction of remote sensing images based on style transfer** [13170-66]
- 13170 OR **AFCE-Net: attention fusion and context enhancement for object detection in remote sensing images** [13170-26]
- 13170 OS **Evaluation of the applicability of high-resolution temperature real-time products during high-temperature weather in Sichuan, summer 2022** [13170-27]
- 13170 OT **Bionic eye movement transformer for cross-domain semantic segmentation of high-resolution remote sensing images** [13170-87]
- 13170 OU **Research on target center elevation extraction method based on photogrammetric point cloud** [13170-52]
- 13170 OV **Analysis on spatial and temporal changes of land use in Yangzonghai Basin from 2009 to 2019** [13170-58]
- 13170 OW **Spatial distribution of reed in Baiyangdian Lake from 2016 to 2022 interpreted by remote sensing** [13170-69]

- 13170 0X **The relationship between urban green belts and blue-green space thermal environment from ecological perspective combined with remote sensing technology** [13170-76]
- 13170 0Y **Research on optimization of CCSDS compression algorithm based on snapshot mosaic hyperspectral images** [13170-62]
- 13170 0Z **Mapping the suitable areas for future urbanization in Jiangxi, China** [13170-88]
- 13170 10 **Semi-supervised oil spill detection of SAR images based on pseudo-labelling** [13170-42]
- 13170 11 **The impact of scale effects on the relationships between urbanization and landscape metrics** [13170-90]
- 13170 12 **Quantitative analysis and optimization of urban park cold island in Wuhan's main urban area from the perspective of residents' demand: based on Landsat-8 remote sensing images** [13170-53]
- 13170 13 **Application of virtual instrument in dynamic resolution detection of aerial camera** [13170-101]
- 13170 14 **SuperView-1 satellite image-based winter wheat spatial distribution information refined extraction using the fusion of machine learning and deep learning** [13170-63]
- 13170 15 **Fusion technology for green tide information in the Yellow Sea detected from multi-source satellite images** [13170-84]

REMOTE SENSING SPECIALIZED TECHNOLOGY AND DATA PROCESSING METHOD

- 13170 16 **Experimental design of decision-level fusion block filtering based on ground imagery and LiDAR point cloud data** [13170-44]
- 13170 17 **Inversion of soil moisture based on improved change detection method using Sentinel-1A and MODIS time-series data** [13170-21]
- 13170 18 **Research on the calculation model of mid-infrared reflectivity of vegetation based on VIIRS data** [13170-70]
- 13170 19 **Mountainous road vector data update method based on matching point pair grouping** [13170-39]
- 13170 1A **Classification of wetland vegetation in the Yellow River Delta based on the fusion of hyperspectral data** [13170-102]
- 13170 1B **Soil moisture retrieval in plateau areas based on Sentinel-1 and Landsat-8 remote sensing data** [13170-23]
- 13170 1C **Comparison and accuracy evaluation of denoising methods for ICESat-2 shallow-sea photon point clouds** [13170-51]
- 13170 1D **Leg laying zone selection technology for deep sea exploration platform based on gradient and variance of digital elevation model** [13170-74]

- 13170 1E **Improved target detection algorithm for remote sensing images with YOLOV7** [13170-79]
- 13170 1F **Design and implementation of IDL-based batch processing for DMCIll aerial image reflectance retrieval** [13170-78]
- 13170 1G **Application of unmanned aerial vehicle remote sensing technology in completion survey of land increase and decrease connection projects in mountainous area** [13170-77]
- 13170 1H **Quantitative analysis of ionospheric impact on spaceborne P-band ultra-wideband radar** [13170-35]
- 13170 1I **SAR ship detection method in complex scenes based on enhanced VarifocalNet** [13170-40]
- 13170 1J **The spatiotemporal evolution of carbon emissions in China using machine learning methods: evidence from remote sensing data** [13170-49]
- 13170 1K **High-precision binocular fringe reflectometry based on normal vector consistency** [13170-67]
- 13170 1L **Design and realization of antennal control system software in telemetry ground station** [13170-57]
- 13170 1M **Effectiveness evaluation of multi-satellite joint coverage data for large area targets based on cloud prediction information** [13170-73]
- 13170 1N **Identification of altered minerals in the Yingshan area of Aksu City, Xinjiang, based on the GF-5 hyperspectral data** [13170-59]
- 13170 1O **Enhancing small object detection in remote sensing imagery with advanced generative adversarial networks** [13170-94]
- 13170 1P **Identification and risk level prediction of plastic sheds along transmission corridors with improved SegFormer-based high-resolution remote sensing imagery** [13170-56]
- 13170 1Q **Comparative study of image fusion methods for WorldView-3 data** [13170-28]
