

PROCEEDINGS OF SPIE

International Conference on Computer Network Security and Software Engineering (CNSSE 2024)

**Dimitrios Karras
Mehdi Gheisari**
Editors

**23–25 February 2024
Sanya, China**

Organized by
Southwest University of Science and Technology (China)

Sponsored by
AEIC Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13175

Proceedings of SPIE 0277-786X, V. 13175

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Computer Network Security and Software Engineering (CNSSE 2024)*, edited by Dimitrios A. Karras, Mehdi Gheisari, Proc. of SPIE 13175, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

SESSION 1 NETWORK SECURITY ASSESSMENT AND PRIVACY PROTECTION

13175 02	CATL: contrast adaptive transfer learning for cross-system log anomaly detection [13175-40]
13175 03	Vehicle CAN bus intrusion detection model based on Bayesian network [13175-76]
13175 04	EPTDMS: efficient and privacy-preserving top-k disease matching scheme for cloud-assisted e-healthcare system [13175-9]
13175 05	Efficient multiparty private set intersection protocol based on function secret sharing [13175-13]
13175 06	Based on QUBO models with quantum-inspired algorithms to enhance the CVQKD systems to ensure security of hacking [13175-38]
13175 07	Trajectory privacy preserving method for transmission resources [13175-37]
13175 08	A new zhoneypot defence for deep neural networks [13175-19]
13175 09	On-chain federated learning approach for Internet of Vehicles [13175-3]
13175 0A	Isolate cache shield: defending cache attacks via cache set isolation [13175-51]
13175 0B	Physical layer secure transmission method based on MSK modulator structure hopping [13175-74]
13175 0C	Research on malicious code detection and classification based on dynamic and static features [13175-16]
13175 0D	Real-time traffic intrusion detection based on CNN-LSTM deep neural networks [13175-20]
13175 0E	Privacy federation learning framework based on principal component analysis [13175-23]
13175 0F	Low-code vulnerability identification based on TextCNN [13175-4]
13175 0G	Research on health evaluation method of data center security protection system [13175-72]
13175 0H	Design of a flow detection system for high pressure reducing valves in ships [13175-10]

13175 0I	CBAN: A DDoS detection method based on CNN, BiGRU, and attention mechanism [13175-69]
13175 0J	A secure routing protocol for wireless sensor network [13175-41]
13175 0K	Zero trust-based federated autonomous technology for code repository [13175-6]
13175 0L	A hierarchical software architecture for smart firefighting platform [13175-82]
13175 0M	Synergizing next-generation firewalls and defense-in-depth strategies in a dynamic cybersecurity landscape [13175-39]
13175 0N	In-vehicle CAN bus security communication protocol based on identity encryption [13175-17]

SESSION 2 INTELLIGENT DATA VISUALIZATION AND IMAGE PROCESSING

13175 0O	Text-based sentiment analysis for evaluating the service provider professionalism (SPP) of macro work on online labor platforms (OLPs) [13175-15]
13175 0P	BGP prefix hijack detection algorithm based on MOAS event feature [13175-66]
13175 0Q	Reversible data hiding in JPEG images based on two-stage embedding [13175-81]
13175 0R	Research on a more safe image encryption communication algorithm [13175-79]
13175 0S	Research on network topology visualization under HTML5 technology [13175-61]
13175 0T	Research on privacy data processing based on symmetric encryption algorithm [13175-11]
13175 0U	Multiview stereo reconstruction based on context-aware transformer [13175-68]
13175 0V	Evaluation of civil aircraft project management capability based on improved analytic hierarchy process algorithm [13175-62]
13175 0W	Research on key privacy protection technologies supporting flexible distributed resource layered aggregation transactions [13175-30]
13175 0X	Haptic texture rendering based on vision [13175-80]
13175 0Y	Method and design of encrypted image hiding based on random LSB matching [13175-63]
13175 0Z	FMAMPN: lightweight feature map attention multipath network for semantic segmentation of remote sensing image [13175-33]
13175 10	Fuzzing technology based on suspicious basic block orientation [13175-83]

- 13175 11 **TeTPCM: building endogenous trusted computing on trusted execution environment** [13175-35]
- 13175 12 **Research on adaptive beamforming algorithm based on FPGA** [13175-67]
- 13175 13 **3D reconstruction in industrial environments based on an improved neural radiation field method research** [13175-34]
- 13175 14 **Load-balancing system for SDN data center based on improved ant colony optimization** [13175-29]
- 13175 15 **Cross-language entity alignment based on graph convolution neural network and attribute information** [13175-12]
- 13175 16 **Securing digital media: embedding and extracting encrypted digital watermarks using HTML5 Canvas** [13175-2]
- 13175 17 **Image steganalysis based on model compression** [13175-21]
- 13175 18 **Research on distributed heterogeneous task scheduling and resource allocation algorithms based on deep learning** [13175-75]
- 13175 19 **Research on key distribution methods supporting trusted data migration of cloud platform** [13175-78]

SESSION 3 AUTOMATIC SOFTWARE DESIGN AND SYSTEM CONTROL

- 13175 1A **An improved method for reverse engineering ECU firmware** [13175-70]
- 13175 1B **Can large language model replace static analysis tools** [13175-24]
- 13175 1C **Automatic mapping based on CVE and ATT&CK** [13175-85]
- 13175 1D **Research on WCET assessment method of airborne display software** [13175-52]
- 13175 1E **Prediction and application of wax thickness on tube wall based on improved DGM (1,1) model** [13175-71]
- 13175 1F **Optimization of parallel compilation techniques using genetic algorithms** [13175-18]
- 13175 1G **Just-in-time software defect prediction based on feature selection** [13175-45]
- 13175 1H **Design and research of MCU innovation simulation based on the perspective of technological innovation product development** [13175-55]
- 13175 1I **MCPKI-based certificate chain extension scheme for vTPM** [13175-36]

13175 1J	Design and implementation of electronic medical record information management system of community health service center [13175-31]
13175 1K	A keystone extension to defend against cache timing attacks [13175-54]
13175 1L	Innovative design and analysis of C language program based on game development orientation [13175-53]
13175 1M	Construction of unmanned path tracking optimization control system based on MPC algorithm [13175-42]
13175 1N	Software vulnerability detection method based on code attribute graph presentation and Bi-LSTM neural network extraction [13175-60]
13175 1O	Atmospheric coherence length instrument remote control network software system design [13175-77]
13175 1P	Blockchain-based federal learning program for drone safety [13175-8]
13175 1Q	Design of lightweight memory protection solution based on RISC-V processor [13175-56]
13175 1R	A method for microservice partitioning of monolithic systems based on multifeature fusion [13175-44]
13175 1S	Design method and system of software application based on intelligent terminal [13175-25]
13175 1T	Core software supportability engineering of new generation information equipment [13175-28]
13175 1U	Design of kinematics simulation software for 6R series robot [13175-22]
13175 1V	Design of embedded target turntable system based on BS mode [13175-26]
13175 1W	An approach for microservices-oriented migration based on business information and GNN [13175-57]
13175 1X	Research and implementation of urban water supply pipe network management system based on WebGIS [13175-50]
