*Published by*  
SPIE

**Volume 13185**

Proceedings of SPIE 0277-786X, V. 13185

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Communication, Information, and Digital Technologies (CIDT2024)*, edited by Guosong Jiang, Proc. of SPIE 13185, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## INFORMATION AND DIGITAL TECHNOLOGIES

---

13185 02	<b>A novel research on design of automated penetration testing system</b> [13185-11]
13185 03	<b>Semi-supervised deep learning for automatic classification of medical images</b> [13185-12]
13185 04	<b>Construction of a machine-learning-based risk management evaluation model for enterprise financial reporting</b> [13185-14]
13185 05	<b>High availability and fault tolerance design of big data analysis platform</b> [13185-16]
13185 06	<b>Research on feature extraction methods of academic papers</b> [13185-19]
13185 07	<b>Research on the construction of automobile big data governance system based on data 5W2H analysis model</b> [13185-20]
13185 08	<b>The artificial intelligence automatic diagnosis model based on the needle tissue of prostate ultrasound</b> [13185-23]
13185 09	<b>SAUFEE: a datacenter task scheduling algorithm considering user fairness and energy efficiency</b> [13185-24]
13185 0A	<b>Leveraging AI for sustainable leadership: a transformative approach</b> [13185-28]
13185 0B	<b>Study on English verb classification based on K-means algorithm and support vector machine algorithm</b> [13185-29]
13185 0C	<b>Research on the detection characteristic of portal radiation alarm system for low-activity radioactive material based on artificial intelligence applications</b> [13185-31]
13185 0D	<b>Lightweight convolutional neural network model for skin lesions classification</b> [13185-33]

---

## COMMUNICATION ENGINEERING AND NEXT-GENERATION NETWORKS

---

13185 0E	<b>Star-earth cooperative network channel allocation algorithm based on power grid and deep learning</b> [13185-1]
13185 0F	<b>Routing optimization strategy for power SDN communication network based on NSGA-II</b> [13185-7]

13185 OG	<b>Optimizing log parsing efficiency: a heuristic-based distributed system approach [13185-8]</b>
13185 OH	<b>Autonomous network defense in cloud data center environments based on reinforcement learning [13185-9]</b>
13185 OI	<b>A polymorphic perception AODV routing algorithm for high-speed mobile Ad hoc network [13185-10]</b>
13185 OJ	<b>Load monitoring of distribution terminal-based handover algorithm of power grid for satellite communication [13185-13]</b>
13185 OK	<b>Transmission characteristics of microwave in a coaxial hollow cathode glow discharge weakly ionized dusty plasma study [13185-15]</b>
13185 OL	<b>Network connectivity analysis of command information system based on link heterogeneity [13185-18]</b>
13185 OM	<b>A survey of the cryptography enhancement technology in 5G and evolving network [13185-21]</b>
13185 ON	<b>Deep-learning-based resource allocation of satellite-assisted emergency rescue network for power grid [13185-22]</b>
13185 OO	<b>Research and design of smart campus security information recognition and architecture based on LoRaWAN [13185-26]</b>
