PROCEEDINGS OF SPIE

International Conference on Signal Processing and Communication Security (ICSPCS 2024)

Parikshit N. Mahalle
Dimitrios Karras
Editors

7–9 June 2024
Chengdu, China

Organized by
Shandong University (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13222

Proceedings of SPIE 0277-786X, V. 13222

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Signal Processing and Communication Security (ICSPCS 2024)*, edited by Parikshit N. Mahalle, Dimitrios A. Karras, Proc. of SPIE 13222, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

SESSION 1 ADVANCED COMMUNICATION AND INFORMATION SECURITY TECHNOLOGY RESEARCH

13222 02 **High-capacity and high-security color image hiding based on generative pixel shuffle residual-CNN** [13222-14]

13222 03 **Joint precoding design for wideband intelligent reflecting surface-assisted cell-free network** [13222-47]

13222 04 **Research on deep learning-based channel estimation algorithm in 5G high-speed mobile scenario** [13222-46]

13222 05 **A method for identifying similar duplicate records in domestic database migration based on an improved LSSVM algorithm** [13222-56]

13222 06 **DVT: transformer-based style transfer from reality to art** [13222-43]

13222 07 **Research implementation of FL privacy-preserving blockchain and differential data sharing** [13222-28]

13222 08 **Method for reconstructing distorted array data with limited suppression of strong interference** [13222-52]

13222 09 **The research focuses on the symmetric encryption scheme for industrial data based on MQTT** [13222-18]

13222 0A **Defense method of quantum secure communication network attacks based on AES algorithm and time window** [13222-30]

13222 0B **Research on coherent optical communication performance monitoring and damage compensation technology based on machine learning** [13222-59]

13222 0C **Research on adolescent emotion recognition based on visual information** [13222-27]

13222 0D **Application of target sound source presence probability combined with RTF features in GSC beamforming** [13222-20]

13222 0E **Agricultural IoT PDRR scheme based on an improved cyber kill chain** [13222-45]

13222 0F **Certificateless cross-domain authentication key agreement protocol for Internet of Vehicles** [13222-55]

13222 0G **CAC-Net: A fire detection method based on residual feature extraction and a self-attention mechanism** [13222-50]

13222 0H **A spatio-temporal feature learning method based on transformer** [13222-39]

13222 0I **Image encryption algorithm based on homogenized one-dimensional chaotic mapping and compressed sensing** [13222-23]

SESSION 2 ADVANCED SIGNAL PROCESSING AND POSITIONING TECHNOLOGY APPLICATIONS

13222 0J **A fault traveling wave location method based on VMD and SampEn entropy** [13222-25]

13222 0K **Sensor design and signal decoupling algorithm based on conductive hydrogel** [13222-2]

13222 0L **A long-time accumulation method for high-speed and large maneuvering targets in quasi-continuous wave system missile-borne radar** [13222-34]

13222 0M **Double block zero padding differential coherent weak signal acquisition algorithm under ionospheric interference** [13222-54]

13222 0N **Pulse wave signal preprocessing based on improved threshold** [13222-31]

13222 0O **Research on map building and positioning technology for AGV navigation system** [13222-3]

13222 0P **Research on the subject of main lobe range deception jamming with frequency diverse multiple-input multiple-output radar** [13222-36]

13222 0Q **Deep learning-based satellite signal modulation identification and doppler shift impact study** [13222-24]

13222 0R **Research on sound pressure-vibration velocity sensor based on acoustic thermal field effects** [13222-15]

13222 0S **Radar target recognition method based on one-dimensional convolutional neural network** [13222-16]

13222 0T **Multisound source joint localization algorithm for moving targets with multipath coherent sources based on DOA clustering algorithm** [13222-48]

13222 0U **External guidance of anti-drone equipment based on GPS/INS combination algorithm design and accuracy analysis** [13222-58]

13222 0V **A comparative study of EMD, NSP and VMD for signal decomposition** [13222-12]

13222 0W **Research on fall risk prediction method based on electrostatic gait signals** [13222-4]

13222 0X **A localization method for multistation passive radar based on DOA and TOA** [13222-51]

13222 0Y **An effective method for filtering laser bathymetry echo signals** [13222-9]

SESSION 3 INTELLIGENT SYSTEM DESIGN AND NETWORK SECURITY DETECTION

13222 0Z **Design and development of a remote water quality testing system based on cloud platform** [13222-32]

13222 10 **Tow ship noise suppression of a towed line array based on sector spatial prefiltering method** [13222-33]

13222 11 **Risk analysis of signal system renovation for urban rail transit** [13222-37]

13222 12 **Research on the architecture design of optical fiber communication digital twin system and its key technology** [13222-40]

13222 13 **Research on cold storage environment monitoring system based on ZigBee** [13222-17]

13222 14 **Research and testing of comprehensive deterministic networks based on SDN** [13222-21]

13222 15 **Research on operating system login options from the perspective of HID attack** [13222-41]

13222 16 **Blockchain-based Uptane optimization framework** [13222-49]

13222 17 **Design of photovoltaic radio energy transmission system based on NSGA-II** [13222-6]

13222 18 **Implementation of the sliding window moving target detection algorithm for blade server** [13222-19]

13222 19 **SQL injection attack detection method based on textCNN** [13222-11]

13222 1A **Research on intrusion detection method of party building network in colleges and universities based on machine learning** [13222-42]

13222 1B **Online detection of automotive oil pipe surface defects based on improved YOLOv8 algorithm** [13222-29]

13222 1C **Research on self-training enhanced semi-supervised support vector machine framework** [13222-13]

13222 1D **Network security threat detection algorithm based on machine learning** [13222-7]
