## TABLE OF CONTENTS

|                                                                                                                                                             |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Editorial.....                                                                                                                                              | 1  |
| <i>Steffen Ihlenfeldt</i>                                                                                                                                   |    |
| Engineering Knowledge for Medical Applications .....                                                                                                        | 2  |
| <i>Mamoru Mitsuishi</i>                                                                                                                                     |    |
| Bio-Inspired Frugal Engineering Strategies for Resilient Supply Chains .....                                                                                | 10 |
| <i>Salil Bapat, Ajay P. Malshe</i>                                                                                                                          |    |
| Bio-Intelligent Machine Tool: Vision and Steps Towards Realisation .....                                                                                    | 16 |
| <i>Konrad Wegener, Adriaan Spierings, Lukas Weiss, Daniel Knüttel</i>                                                                                       |    |
| An Analysis of Biomechanical Requirements and Actuating Technologies of Biomimetic Hand<br>Exoskeletons Regarding to Driving Force and Stroke.....          | 24 |
| <i>Alina Carabello, Kenny Pagel, Welf-Guntram Drossel</i>                                                                                                   |    |
| Sustainable Product Lifecycle Management – Implementation of a Digital Twin of a Biologically<br>Transformed Product-Ecosystem.....                         | 30 |
| <i>Sebastian Wehking, Anne Seegrün, Theresa Riedelsheimer, Kai Lindow</i>                                                                                   |    |
| A Production Scheduling and Control System for CAR T Cell Manufacturing .....                                                                               | 36 |
| <i>Tamás Kis, Simon Hort, Péter Györgyi, Evelin Szögi, Robert H. Schmitt</i>                                                                                |    |
| FRESH 3D Bioprinting of Alginate – Cellulose – Gelatin Constructs for Soft Tissue Biofabrication.....                                                       | 42 |
| <i>Miriam Seiti, Elena Laura Mazzoldi, Stefano Pandini, Silvia Giliani, Elisabetta Ceretti</i>                                                              |    |
| Data Management in Biorefineries: Conceptual Thoughts on Lean Digital Twinning.....                                                                         | 48 |
| <i>Edgar Gamero, Arber Shoshi, Johannes Full, Alexander Sauer, Robert Miehe</i>                                                                             |    |
| Influence of Clearance and Velocity During Blanking on the Fatigue Behavior of Cellulose-Based<br>Biocomposites .....                                       | 54 |
| <i>Ronja Scholz, Sven Winter, Alexander Delp, Tobias Breitfeld, Frank Walther</i>                                                                           |    |
| Bioinspired Active Hemocompatible Coating Systems for Mechanical Circulatory Support<br>Devices: When Engineering Meets Nano and Molecular Technology ..... | 60 |
| <i>Martin Kohse, Lena Witzdam, Felix Jakob, Alexander Boes, Thomas Bergs</i>                                                                                |    |
| Finite Element Analysis for the Virtual Surgical Planning of Stiffness-Matched Personalized Load-<br>Bearing Percutaneous Implants .....                    | 66 |
| <i>Luis H. Olivas-Alanis, Michela Sanguedolce, Jason M. Souza, David Dean</i>                                                                               |    |
| A Novel Low-Cost Spray Coating Machine for PLA Solution on Tubular Metallic Geometries.....                                                                 | 72 |
| <i>Mariana Macías-Naranjo, Erika García-López, Victor Segura-Ibarra, Ciro A. Rodriguez,<br/>Elisa Vázquez-Lepe</i>                                          |    |
| Mycelium-Based-Composites – Vision for Substitution of Fossil-Based Materials.....                                                                          | 78 |
| <i>Steffen Ihlenfeldt, Stefan Schillberg, Christoph Herrmann, Simon Vogel, Simon Harst</i>                                                                  |    |
| Characterization of the Performance of Microbial-Based Metalworking Fluids in Grinding Using<br>Cell Analogues .....                                        | 84 |
| <i>Daniel Meyer, Benedikt Seidel, Carsten Heinzl</i>                                                                                                        |    |

|                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Virtual Surgical Planning for Point-Of-Care Manufacturing.....                                                                            | 90  |
| <i>David Dean, Luis H. Olivas-Alanis, Brian Thurston, Javier Vazquez, Glenn Daehn</i>                                                     |     |
| 3D Bioprinting of Gelatin-Alginate Bioinks for Biofabrication of in Vitro Liver Sinusoid Model.....                                       | 96  |
| <i>Ashwini Rahul Akkineni, Anja Lode, Michael Gelinsky</i>                                                                                |     |
| Additive Manufacturing of External Breast Prosthesis: Design, Fabrication and Mechanical Characterization.....                            | 101 |
| <i>Jose Cansing, Fausto A. Maldonado G., Jorge L. Amaya-Rivas, Francis Loayza, Carlos G. Helguero</i>                                     |     |
| Bio-Inspired Robots for Confined Space Industrial Applications: A Novel Cable-Driven Snake Robot Design.....                              | 107 |
| <i>Nikos Dimitropoulos, Niki Tzirtzilaki, George Michalos, Sotiris Makris</i>                                                             |     |
| Analysis of Biobased Cooling Lubricants in Milling Stainless Steel for Aerospace Applications – a Study of Tribology and Performance..... | 113 |
| <i>Erik Selbmann, Johanna Sophie Hagen, Albrecht Hänel, Anas Ben Achour, Steffen Ihlenfeldt</i>                                           |     |
| ICT, Manufacturing and Industrial Automation of Biological Processes .....                                                                | 119 |
| <i>Giulia Sardella, Rosalba Monica Ferraro, Gabriele Benini, Elisabetta Ceretti, Paola Serena Ginestra</i>                                |     |
| A Flexible Digital Twin Framework for ATMP Production – Towards an Efficient CAR T Cell Manufacturing .....                               | 124 |
| <i>Arber Shoshi, Yuchen Xia, Andrea Fieschi, Thomas Ackermann, Robert Mieke</i>                                                           |     |
| Adhesion Reduction in Plastics Processing by Means of Laser-Generated Microstructuring.....                                               | 130 |
| <i>Eric Gärtner, Justus Von Freeden, Michael Schreiter</i>                                                                                |     |
| Mechanical and Corrosion Behaviour of Superelastic Additively Manufactured Nitinol for Biomedical Applications .....                      | 136 |
| <i>A. Guarise, R. Bertolini, M. Franceschi, A. Ghiotti, S. Bruschi</i>                                                                    |     |
| Biologicalisation of Surface Structuring: Comparative Environmental Assessment of Microbial Biomachining Vs. Chemical Etching .....       | 142 |
| <i>Sophia Kohn, Felix Wanielik, Robar Arafat, Max Juraschek, Christoph Herrmann</i>                                                       |     |
| Exploring the Potential of Residual Aspergillus Mycelium as a Sustainable Material for Additive Biomanufacturing .....                    | 148 |
| <i>Nadine Silber, Sebastian Butzke, Kristin Protte-Freitag, Jana Renz, Robert Mieke</i>                                                   |     |
| Reinforcement Learning Based Resource Management for CAR T-Cell Therapies .....                                                           | 154 |
| <i>Szabolcs Szentpéteri, Krisztián B. Kis, Péter Egri, Carmen Sanges, Balázs Cs. Csáji</i>                                                |     |
| Conceptional Thoughts on a Holistic Support Tool for Biointelligence-Related Strategic Decisions in Enterprises.....                      | 160 |
| <i>Ronny Hauf, Robert Mieke, Oliver Schöllhammer, Thomas Bauernhansl</i>                                                                  |     |
| Influence of Manufacturing-Related Deviations on the Junction Strength of Double Modular Hip Endoprostheses.....                          | 166 |
| <i>Berend Denkena, Beate Legutko, Benjamin Bergmann, Christof Hurschler, Ann-Katrin Einfeldt</i>                                          |     |

|                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Melt Electrowriting on Out-Of-Plane Surfaces: The Challenge of Controlling the Electric Field for Textile Biomanufacturing .....                  | 172 |
| <i>Javier Vazquez-Armendariz, Raquel Tejada-Alejandre, Athena Zhang, Ciro A. Rodriguez, David Dean</i>                                            |     |
| New Gentle Extraction Method of Hemp Bast Strips for Use as Bio-Based Reinforcing Fibers in Highly Loaded Fiber Composites .....                  | 178 |
| <i>Steffen Ihlenfeldt, Jens Müller, Christoph Peukert, Ludwig Rogall</i>                                                                          |     |
| Development of a Suction Gripper Network Based on the Biological Role Model of an Octopus .....                                                   | 184 |
| <i>Rayk Fritzsche, Henriette Kunze, Erik Jäger</i>                                                                                                |     |
| Designing Porous Structure with Optimized Topology Using Machine Learning .....                                                                   | 190 |
| <i>Shradha Ghansiyal, Li Yi, Matthias Klar, Jan C. Aurich</i>                                                                                     |     |
| Eco-Friendly Lubricants for Improving Performance and Environmental Impact in Cold Rolling .....                                                  | 196 |
| <i>M. Antonicelli, A. Piccininni, G. Palumbo</i>                                                                                                  |     |
| Towards a Sustainability-Oriented Development of Biointelligent Products .....                                                                    | 201 |
| <i>Surya Mächten, Yannick Baumgarten, Alexandra Müller, Jörg Woidasky, Robert Mieke</i>                                                           |     |
| Replicative Production of Multifunctional Microfluidic Polymer Films for Biomedical Disposables.....                                              | 207 |
| <i>Eric Gärtner, Frederic Schell, Lukas Nitschke, Richard Chukwudi Okafor, Claudia Hackl</i>                                                      |     |
| Robotic Bending of Craniomaxillofacial Fixation Plates .....                                                                                      | 213 |
| <i>Brian Thurston, Javier Vazquez-Armendariz, Luis H. Olivas-Alanis, David Dean, Glenn Daehn</i>                                                  |     |
| Reducing Damage with Higher Precision in Drilling Bones .....                                                                                     | 219 |
| <i>Raafat Hussein, Anna Carla Araujo, Yann Landon</i>                                                                                             |     |
| Polymer-Based Electrospun Vascular Grafts: A Study of Constructs and Endothelial Interactions .....                                               | 225 |
| <i>Janset Oztemur, Suzan Ozdemir, Havva Tezcan-Unlu, Gulsah Cecener, Ipek Yalcin-Enis</i>                                                         |     |
| Comparative Analysis of Cutting Characteristics of Simulated and Bovine Cortical Bone .....                                                       | 231 |
| <i>Han Wang, Urara Satake, Toshiyuki Enomoto</i>                                                                                                  |     |
| A Conceptual Basis for Reducing the Number of Complex Multi-Parametric Experiments in Bio-Production Engineering Via Artificial Intelligence..... | 237 |
| <i>Oliver Schwarz, Robin Pröllochs, Frederik Löw, Caroline Heinzelmann, Robert Mieke</i>                                                          |     |
| Ultrathin Polymeric Platform for Drug-Eluting Stent: A Proof of Concept.....                                                                      | 243 |
| <i>A. Bosch, E. Casanova-Batlle, S. Ausellé-Bosch, E. Polonio-Alcalá, A. J. Guerra</i>                                                            |     |
| Bioinspired Approaches for Resource-Efficient Material Flow in Production – an Innovative Actuator Concept for Peristaltic-Based Transport.....   | 249 |
| <i>Henriette Kunze, Marcel Lorenz</i>                                                                                                             |     |
| Machine Learning-Driven Optimization of 3D Printing Parameters for PLA Bone Scaffolds with Enhanced Mechanical Properties.....                    | 255 |
| <i>Rixiang Quan, Sergio Cantero Chinchilla, Aydin Nassehi, Fengyuan Liu</i>                                                                       |     |
| A Process Chain Study for Manufacturing Nitinol Stents .....                                                                                      | 260 |
| <i>Giovanni Palencia-Mercado, Luis D. Cedeño-Viveros, Alex Elías-Zúñiga, Elisa Vazquez-Lepe, Erika García-López</i>                               |     |

|                                                                                                                                        |     |
|----------------------------------------------------------------------------------------------------------------------------------------|-----|
| Substrate Shapes Generation for Additive Manufacturing of Medical Corsets Tailored to Various Patient Morphologies.....                | 266 |
| <i>Alexis Claude, Maxime Chalvin, Sébastien Campocasso, Vincent Hugel</i>                                                              |     |
| Optimizing Orthopaedic Bone Plates for Directed Energy Deposition with Generative Design and Topological Optimization Approaches ..... | 272 |
| <i>Weiting Xu, Fengyuan Liu, Aydin Nassehi</i>                                                                                         |     |
| Antibacterial Surface Protection Using Electrical Discharge Machining with Zinc Tool Electrode for Medical Devices .....               | 278 |
| <i>Viet D. Bui, André Martin, Thomas Berger, Philipp Steinert, Andreas Schubert</i>                                                    |     |
| Additive Manufacturing of Ceramics Opens the Door to Components for Biomanufacturing Applications with High Functionality .....        | 284 |
| <i>Uwe Scheithauer, Stefan Holtzhausen, Hajo Wiemer</i>                                                                                |     |
| Apparatus to Measure Wear of Soft Tissue Induced by Reconstruction Plates – a Preliminary Study.....                                   | 290 |
| <i>Anas Ben Achour, Allani Mohamed Hedi, Uwe Teicher, Günter Lauer, Tom Alexander Schröder</i>                                         |     |
| On the Concept of Decentralization in Biointelligent Manufacturing.....                                                                | 296 |
| <i>Robert Mieke</i>                                                                                                                    |     |
| Development Approach of a Workflow for 3D Printing of Living Mycelium Materials and Their Growth Manipulation .....                    | 302 |
| <i>Sophia Elsner, Rebekka Jesch, Linda Weisheit, Lukas Boxberger, Welf-Guntram Drossel</i>                                             |     |
| Improving the Energy Efficiency of Machine Tools Using a Thermal Storage Unit Based on a Phase Change Material .....                   | 308 |
| <i>Nico Bertaggia, Daniel Reibert, Phillip Knuth, Daniel Zontar, Christian Brecher</i>                                                 |     |
| The Effect of Selected Process Parameters on Shape Fidelity in Extrusion-Based Bioprinting of Natural and Synthetic Hydrogels.....     | 314 |
| <i>Carmine Borgia, David Rodriguez Izquierdo, Francesco Gagliardi, Elisabetta Bruno, Gerardo Catapano</i>                              |     |
| 3D Printing for Growth Adaptive Medical Devices: An Alternative Approach for Craniosynostosis.....                                     | 319 |
| <i>Andrea Mussini, Luke Carter, Victor Villapun, Emily Cao, Paola Ginestra</i>                                                         |     |
| The Effect of Light on a Bioprinted Co-Culture System of Murine Rat Islets and Photosynthetically Active Microalgae .....              | 325 |
| <i>Sophie Dani, Sarah Duin, Kathleen Schütz, Johannes Windisch, Anja Lode</i>                                                          |     |
| Towards a Manufacturing Related Description of Bifunctional Assemblies .....                                                           | 331 |
| <i>Hakim El Kadaoui, Fan Yang, Sebastian Apelt, Gonsalves Grünert, Ulrich Schwaneberg</i>                                              |     |
| Design and Testing of a Single-Tentacle Soft Gripper with an Embedded Suction Cup .....                                                | 337 |
| <i>Benedetta Maria Vita Ostuni, Stanislao Grazioso, Teodorico Caporaso, Antonio Lanzotti</i>                                           |     |
