2024 IEEE 24th International Conference on Software Quality, Reliability and Security (QRS) **QRS 2024**

Table of Contents

Message from the QRS 2024 Chairs	xvi
QRS 2024 Steering Committee	xviii
QRS 2024 Advisory Committee	xix
QRS 2024 Organizing Committee	xx
QRS 2024 Program Committee	xxi
QRS 2024 Keynotes	xxv

Software Testing I

A Strategy of Dynamic Random Testing with Hybrid Distance Metrics for Quantum Programs	1
<i>Linzhi Huang (Beihang University, China), Hanyu Pei (University of Science and Technology Beijing, China), Yuechen Li (Beihang University, China), Beibei Yin (Beihang University, China), and Kai-Yuan Cai (Beihang University, China)</i>	
An Automatic Approach for Uniquely Discovering Actionable Elements for Systematic GUI Testing in Web Applications	13
<i>Thiago Santos de Moura (Federal University of Campina Grande, Campina Grande, Brazil), Francisco Igor de Lima Mendes (Federal University of Campina Grande, Campina Grande, Brazil), Everton L. G. Alves (Federal University of Campina Grande, Campina Grande, Brazil), Ismael Raimundo da Silva Neto (Federal University of Campina Grande, Campina Grande, Brazil), and Cláudio de Souza Baptista (Federal University of Campina Grande, Campina Grande, Brazil)</i>	
Testing in the Evolving World of DL Systems Insights from Python GitHub Projects	25
<i>Qurban Ali (University of Milano-Bicocca, Italy), Oliviero Riganelli (University of Milano-Bicocca, Italy), and Leonardo Mariani (University of Milano-Bicocca, Italy)</i>	

EATS Efficient Adaptive Test Case Selection for Deep Neural Networks	36
<i>Huanze Meng (Nanjing University of Aeronautics and Astronautics, China), Zhiyi Zhang (Nanjing University of Aeronautics and Astronautics, China; Collaborative Innovation Center of Novel Software Technology and Industrialization, China), Yuchen Ding (Yangzhou University, China), Shuxian Chen (Nanjing University of Aeronautics and Astronautics, China; Nanjing University of Aeronautics and Astronautics, China), and Yongming Yao (Army Engineering of PLA, China)</i>	
DeepWeak Weak Mutation Testing for Deep Learning Systems	49
<i>Yinjie Xue (Nanjing University of Aeronautics and Astronautics, China), Zhiyi Zhang (Nanjing University of Aeronautics and Astronautics, China; Collaborative Innovation Center of Novel Software Technology and Industrialization, China), Chen Liu (Yangzhou University, China), Shuxian Chen (Nanjing University of Aeronautics and Astronautics, China), and Zhiqiu Huang (Nanjing University of Aeronautics and Astronautics, China)</i>	
Multimodal Multi-Objective Test Data Generation Method Based on Particle Swarm Optimization	61
<i>Qi Yao (Beihang University, China), Yizhuo Zhang (Beihang University, China), Yujia Li (China Electric Power Research Institute, China), Fang Liu (China Electric Power Research Institute, China), and Shunkun Yang (Beihang University, China)</i>	

Software Testing II

PADRAIG Precise Android Automated Input Generation	72
<i>Jordan Doyle (SFI Lero &, School of Computer Science and Statistics, Trinity College Dublin, Ireland), Thomas Laurent (SFI Lero &, School of Computer Science and Statistics, Trinity College Dublin, Ireland), and Anthony Ventresque (SFI Lero &, School of Computer Science and Statistics, Trinity College Dublin, Ireland)</i>	
OTCP-ISVM: Online Test Case Prioritization Based on Incremental Support Vector Machine	84
<i>Huaixu Lin (Southeast University, Nanjing, China), Bixin Li (Southeast University, Nanjing, China), Liang Liu (Suzhou Aerospace Information Research Institute, Suzhou, China), Lulu Wang (Southeast University, Nanjing, China), and Jianming Chang (Southeast University, Nanjing, China)</i>	
Test Case Generation for Access Control Based on UML Activity Diagram	95
<i>Ao Fan (Southeast University, China), Li Liao (Southeast University, China), Lulu Wang (Southeast University, China), and Bixin Li (Southeast University, China)</i>	
Triggering Adaptation via Contextual Metamorphic Relations	105
<i>Byron DeVries (Grand Valley State University Allendale, USA) and Erik M. Fredericks (Grand Valley State University Allendale, USA)</i>	
Detecting Faults vs. Revealing Failures Exploring the Missing Link	115
<i>Amani Ayad (Kean University, USA), Samia Alblwi (NJIT, USA), and Ali Mili (NJIT, USA)</i>	

The ACPATH Structural Complexity Metric	127
<i>Roberto Bagnara (University of Parma, Italy; BUGSENG, Italy), Abramo Bagnara (BUGSENG, Italy), Alessandro Benedetti (Formerly at University of Parma, Italy), and Patricia M. Hill (BUGSENG, Italy)</i>	

Reliability Modeling and Prediction

Ensuring the Reliability of AI Systems Through Methodological Processes	139
<i>Afef Awadid (IRT SystemX, France), Xavier Le Roux (IRT SystemX, France; Thales, France), Boris Robert (IRT Saint Exupéry; IRT SystemX, France), Morayo Adedjouma (Université Paris-Saclay, CEA List, France), and Eric Jenn (IRT Saint Exupéry)</i>	
Enhancing Software Reliability Growth Modeling: A Comprehensive Analysis of Historical Datasets and Optimal Model Selections	147
<i>Taehyoun Kim (Agency for Defense Development, Republic of Korea), Duksan Ryu (Jeonbuk national university, Jeonju-si, Republic of Korea), and Jongmoon Baik (Korea Advanced Institute of Science and Technology, Daejeon, Republic of Korea)</i>	
Online Reliability Prediction for Web Applications: An Adaptive Approach with AdaRel	159
<i>Chun Yen Chang-Sundin (SUNY Albany, USA), Ninad Chaudhari (SUNY Albany, USA), and Mei-Hwa Chen (SUNY Albany, USA)</i>	

Large Language Models and Applications I

A Software Bug Fixing Approach Based on Knowledge-Enhanced Large Language Models	169
<i>Lili Bo (Yangzhou University), Yuting He (Yangzhou University), Xiaobing Sun (Yangzhou University), Wangjie Ji (Yangzhou University), and Xiaohan Wu (Yangzhou University)</i>	
Empirical Evaluation of Large Language Models for Novice Program Fault Localization	180
<i>Yangtao Liu (Beijing University of Chemical Technology, China), Hengyuan Liu (Beijing University of Chemical Technology, China), Zezhong Yang (Beijing University of Chemical Technology, China), Zheng Li (Beijing University of Chemical Technology, China), and Yong Liu (Beijing University of Chemical Technology, China)</i>	
Exploring Large Language Models for Method Name Prediction	192
<i>Hanwei Qian (Nanjing University, China; Engineering Research Center of Electronic Data Forensics Analysis, Jiangsu Province, China), Tingting Xu (Nanjing University, China), Ziqi Ding (Engineering Research Center of Electronic Data Forensics Analysis, Jiangsu Province, China), Wei Liu (City University of Macau, China), and Shaomin Zhu (Tongji University, Shanghai, China)</i>	
Learning from Failures Translation of Natural Language Requirements Into Linear Temporal Logic with Large Language Models	204
<i>Yilongfei Xu (East China Normal University, China), Jincao Feng (East China Normal University, China), and Weikai Miao (East China Normal University, China)</i>	

On the Effectiveness of Large Language Models in Statement-Level Code Summarization	216
<i>Jie Zhu (Yangzhou University, Yangzhou, China), Yun Miao (Nanjing University, China), Tingting Xu (Nanjing University, China), Junwu Zhu (Yangzhou University, Yangzhou, China), and Xiaolei Sun (Anhui Communications Vocational and Technical College, China)</i>	

Large Language Models and Applications II

Symbolic Execution with Test Cases Generated by Large Language Models	228
<i>Jiahe Xu (Nanjing University, Nanjing, China), Jingwei Xu (Nanjing University, Nanjing, China), Taolue Chen (University of London, UK), and Xiaoxing Ma (Nanjing University, Nanjing, China)</i>	
Evaluating OpenAI Large Language Models for Generating Logical Abstractions of Technical Requirements Documents	238
<i>Alexander Perko (Graz University of Technology, Institute of Software Technology, Austria) and Franz Wotawa (Graz University of Technology, Institute of Software Technology, Austria)</i>	
Weaknesses in LLM-Generated Code for Embedded Systems Networking	250
<i>Murray Dunne (University of Waterloo, Canada), Kylee Schram (University of Waterloo, Canada), and Sebastian Fischmeister (University of Waterloo, Canada)</i>	
A Traffic Domain Classification Method Based on Large Model Multiple Optimization Strategies Neural Network	262
<i>Qizheng Wu (East China Jiaotong University, China), Sen Wang (East China Jiaotong University, China), Xingyu Han (East China Jiaotong University, China), Lu Xu (East China Jiaotong University, China), and Xiang Chen (East China Jiaotong University, China)</i>	

Bug Analysis and Detection

Beyond Memory Safety: An Empirical Study on Bugs and Fixes of Rust Programs	272
<i>Chengquan Zhang (Nanjing University, China), Yang Feng (Nanjing University, China), Yaokun Zhang (Nanjing University, China), Yuxuan Dai (Nanjing University, China), and Baowen Xu (Nanjing University, China)</i>	
Towards Understanding Bugs in Go Programming Language	284
<i>Yaping Feng (Nanjing University of Posts and Telecommunications, China) and Ziyuan Wang (Nanjing University of Posts and Telecommunications, China)</i>	
An Empirical Study on Bugs in Rust Programming Language	296
<i>Sijie Yu (Nanjing University of Posts and Telecommunications, China) and Ziyuan Wang (Nanjing University of Posts and Telecommunications, China)</i>	

Fault Prediction and Localization

- Investigating Reproducibility in Deep Learning-Based Software Fault Prediction 306
Adil Mukhtar (Graz University of Technology, Austria), Dietmar Jannach (University of Klagenfurt, Austria), and Franz Wotawa (Graz University of Technology, Austria)
- Employing CNN with Spatial Pyramid Pooling for Predicting Software Defects through Image Analysis 318
Zong-Yi Chen (National Tsing Hua University, Taiwan), Chin-Yu Huang (National Tsing Hua University, Taiwan), Jing-Rong Lin (National Tsing Hua University, Taiwan), Chih-Chiang Fang (National Tsing Hua University, Taiwan), and William Cheng-chung Chu (Tunghai University, Taiwan)
- TWAO Time-Weight-Aware Oversampling Method for Just-in-Time Software Defect Prediction .. 328
Qi Xue (Soochow University, China), Weiyuan Zhuang (Soochow University, China), Lei Zhao (Soochow University, China), and Xiaofang Zhang (Soochow University, China)
- Query Quality Prediction for Text Retrieval-Based Bug Localization 340
Wenjie Liu (Nanjing University of Aeronautics and Astronautics, China), Weiqin Zou (Nanjing University of Aeronautics and Astronautics, China), Bingting Chen (Nanjing University of Aeronautics and Astronautics, China), Biyu Cai (Nanjing University of Aeronautics and Astronautics, China), and Jingxuan Zhang (Nanjing University of Aeronautics and Astronautics, China)

Cyber-Physical and Industry Control Systems

- Assets Criticality Assessment of Industrial Control Systems: A Wind Farm Case Study 352
Shwetha Gowdanakatte (Colorado State University, Fort Collins, USA), Mahmoud Abdelgawad (Colorado State University, Fort Collins, USA), and Indrakshi Ray (Colorado State University, Fort Collins, USA)
- Application Scenario Modeling and Verification for Unmanned Aerial Vehicle Swarm 364
Manqing Zhang (Northwestern Polytechnical University, China), Renliang Wu (Northwestern Polytechnical University, China), Kang Su (Northwestern Polytechnical University, China), Yunwei Dong (Northwestern Polytechnical University, China), and Tao Zhang (Macau University of Science and Technology, China)

Cybersecurity and Network Attack

- A Method of Network Attack Named Entity Recognition Based on Deep Active Learning 376
Li Wang (Inner Mongolia University, China), Yunxiao Ma (Inner Mongolia University, China), Mingyue Li (Inner Mongolia University, China), Hua Li (Inner Mongolia University, China), and Peilong Zhang (Inner Mongolia University, China)
- Requirements for Applying SCIA: A Structured Cyberattack Impact Analysis Approach for ICS 388
Alvi Jawad (Carleton University, Canada), Zoe Arnott (Carleton University, Canada), and Jason Jaskolka (Carleton University, Canada)

A Novel Explainable Method based on Grad-CAM for Network Intrusion Detection	400
<i>Yunpeng Sun (Nanjing University of Science and Technology, China), Zhichao Lian (Nanjing University of Science and Technology, China), Shuangquan Zhang (Nanjing University of Science and Technology, China), Zhanfeng Wang (Nanjing Lexbell Information Technology Co, LTD, China), and Tao Duan (China Rongtong Group Information Technology Co, LTD, China)</i>	

Artificial Neural Networks

Designing Deep Neural Net Controller for Quadrotor Attitude Stabilization	407
<i>Xudong He (Florida International University, Miami, USA)</i>	
cf-TDFM A Framework for Limiting Fault Infusion Attacks on Deep Neural Networks	418
<i>Mehar Prateek Kalra (Dayalbagh Educational Institute, Agra, India), Soniya Soniya (The University of Western Ontario, London, Canada), and Apurva Narayan (The University of Western Ontario, London, Canada)</i>	
Neural Network-Based Functional Degradation for Cyber-Physical Systems	425
<i>Zheng-Hong Huang (National Yang Ming Chiao Tung University, Hsinchu, Taiwan), Yu-Sung Wu (National Yang Ming Chiao Tung University, Hsinchu, Taiwan), Ying-Dar Lin (National Yang Ming Chiao Tung University, Hsinchu, Taiwan), Chia-Mu Yu (National Yang Ming Chiao Tung University, Hsinchu, Taiwan), and Wei-Bin Lee (Information Security Research Center, Hon Hai Research Institute, Taiwan)</i>	
Enhanced Privacy Protection in Graph Neural Networks Using Local Differential Privacy	435
<i>JunJie Yu (Xinjiang Normal University, China; Xinjiang Electronics Research Institute, China), Yong Li (Xinjiang Normal University, China), Ming Wen (Xinjiang Electronics Research Institute, China), and QianRen Yang (Xinjiang Normal University, China; Xinjiang Electronics Research Institute, China)</i>	

Machine/Deep Learning and Applications I

Multi-Modal Feature Distillation Emotion Recognition Method for Social Media	445
<i>Xue Zhang (Key Laboratory for Key Technologies of IoT Terminals, Harbin Institute of Technology, China), Mingjiang Wang (Key Laboratory for Key Technologies of IoT Terminals, Harbin Institute of Technology, China), and Xiao Zeng (Key Laboratory for Key Technologies of IoT Terminals, Harbin Institute of Technology, China)</i>	
Enhancing Data Retrieval with Custom Embedding Models and ChatGPT	455
<i>Jens Christian Toftdahl (Jens Christian Toftdahl, Denmark), Kamrul Islam Shahin (Kamrul Islam Shahin, Denmark), and Thomas Hylle (Thomas Hylle, City, Denmark)</i>	
Portable Intelligent ECG Monitoring System Based on End-Edge-Cloud Architecture	462
<i>Zhenxing Zhang (Ludong University, China), Jun Ge (Qufu Normal University, China), Qikang Sun (Ludong University, China), Qianxiang An (Qufu Normal University, China), and Yihao Li (Ludong University, China)</i>	

Transferrable DP-Adapter Tuning: A Privacy-Preserving Multimodal Parameter-Efficient Fine-Tuning Framework	471
<i>Lixia Ji (Zhengzhou University, China; Sichuan University, China), Shijie Xiao (Zhengzhou University, China), Bingzhi Xu (Zhengzhou University, China), and Han Zhang (Zhengzhou University, China)</i>	

Machine/Deep Learning and Applications II

Automated Machine Learning for Enhanced Software Reliability Growth Modeling: A Comparative Analysis with Traditional SRGMs	483
<i>Taehyoun Kim (Agency for Defense Development, Republic of Korea), Duksan Ryu (Jeonbuk National University, Republic of Korea), and Jongmoon Baik (Korea Advanced Institute of Science and Technology, Republic of Korea)</i>	
An Improved Adaptive Angle Weakly Supervised Learning Object Detection	494
<i>Yantong Chen (Dalian Maritime University, China), Yuxin Shi (Dalian Maritime University, China), Jianzhao Ren (Dalian Maritime University, China), and Jiabao Li (Dalian Maritime University, China)</i>	
An Empirical Study on Python Library Dependency and Conflict Issues	504
<i>Xinyu Jia (Nanjing University of Aeronautics and Astronautics, China), Yu Zhou (Nanjing University of Aeronautics and Astronautics, China), Yasir Hussain (Nanjing University of Aeronautics and Astronautics, China), and Wenhua Yang (Nanjing University of Aeronautics and Astronautics, China)</i>	

Fuzzing Systems and Techniques

Fuzzing Command-Line Interface by Edge Coverage Guided Combinatorial Testing and Input Clustering	516
<i>Han-Lin Lu (National Yang Ming Chiao Tung University, Taiwan), Zong-Yuan Wu (National Yang Ming Chiao Tung University, Taiwan), Chien-Hsing Wu (National Yang Ming Chiao Tung University, Taiwan), Guan-Zhong Wang (National Yang Ming Chiao Tung University, Taiwan), and Shih-Kun Huang (National Yang Ming Chiao Tung University, Taiwan)</i>	
RumFuzz Coverage-Guided Greybox Fuzzing with Reasonable Use of Memory	526
<i>Jiangyun Xu (University of Chinese Academy of Sciences, China; Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China), Jinbo Wang (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China), Yunyun Ma (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China), Lu Li (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China), and Chang Jia (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China)</i>	

Fuzzy Safety and Liveness Properties in Linear-Time	536
<i>Fan Shi (College of Computer Science and Technology/College of Software, Nanjing University of Aeronautics and Astronautics, China; Key Laboratory for Safety-critical Software Development and Verification, Ministry of Industry and Information Technology, China), Zhiqiu Huang (College of Computer Science and Technology/College of Software, Nanjing University of Aeronautics and Astronautics, China; Key Laboratory for Safety-critical Software Development and Verification, Ministry of Industry and Information Technology, China), Haiyu Pan (School of Computer and Information Security/School of Software, Guilin University of Electronic Technology, China), Yuting Chang (Nokis Solutions and Networks System Technology (Beijing) Co., Ltd., China), and Heng Xu (College of Computer Science and Technology/College of Software, Nanjing University of Aeronautics and Astronautics, China; Key Laboratory for Safety-critical Software Development and Verification, Ministry of Industry and Information Technology, China)</i>	
FMUZZ A Novel Greybox Fuzzing Approach Based on Mutation Strategy Optimization with Byte Scheduling	550
<i>JinFu Chen (Jiangsu University, China), Fei Yan (Jiangsu University, Zhenjiang, China), Saihua Cai (Jiangsu University, Zhenjiang, China), Shengran Wang (Jiangsu University, Zhenjiang, China), and Jingyi Chen (Jiangsu University, Zhenjiang, China)</i>	

System Security and Dependability

Building Secure Software for Smart Aging Care Systems: An Agile Approach	562
<i>Nilesh Chakraborty (Queen's University, Canada), Shahrear Iqbal (National Research Council, Canada), and Mohammad Zulkernine (Queen's University, Canada)</i>	
Impact of Prior Beliefs on Dependability Prediction for a Changed System Using Pre-Change Operational Evidence	572
<i>Robab Aghazadeh Chakherlou (University of London, United Kingdom) and Lorenzo Strigini (University of London, United Kingdom)</i>	
The PIT-Cerberus Framework Preventing Device Tampering During Transit	584
<i>Rakesh Podder (Colorado State University, Fort Collins, USA), Jack Sovereign (Colorado State University, Fort Collins, USA), Indrajit Ray (Colorado State University, Fort Collins, USA), Madhan B. Santharam (AMI US Holdings Inc., USA), and Stefano Righi (AMI US Holdings Inc., USA)</i>	

Code Analysis and Generation

GNN-Based Transfer Learning and Tuning for Detecting Code Vulnerabilities across Different Programming Languages	596
<i>Irfan Ali Khan (University of Missouri-Kansas City, USA), Yu Luo (University of Missouri-Kansas City, USA), Weifeng Xu (The University of Baltimore, USA), and Dianxiang Xu (University of Missouri-Kansas City, USA)</i>	

Which API is Faster Mining Fine-Grained Performance Opinion from Online Discussions	608
<i>Yuekai Huang (State Key Laboratory of Intelligent Game, Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Junjie Wang (State Key Laboratory of Intelligent Game, Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Song Wang (York University, Canada), Rupeng Zhang (State Key Laboratory of Intelligent Game, Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Qing Wang (State Key Laboratory of Intelligent Game, Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)</i>	
Graph-Based Salient Class Classification in Commits	620
<i>Jiahao Ren (Southeast University, China), Jianming Chang (Southeast University, China), Lulu Wang (Southeast University, China), Zaixing Zhang (Southeast University, China), and Bixin Li (Southeast University, China)</i>	
FMCS Improving Code Search by Multi-Modal Representation Fusion and Momentum Contrastive Learning	632
<i>Wenjie Liu (Wuhan University, China), Gong Chen (Wuhan University, China), and Xiaoyuan Xie (Wuhan University, China)</i>	

Log Analysis and Fault Detection

Semantic Log Partitioning: Towards Automated Root Cause Analysis	639
<i>Bahareh Afshinpour (Université Grenoble Alpes, INP, CNRS, France), Massih-Reza Amini (Université Grenoble Alpes, INP, CNRS, France), and Roland Groz (Université Grenoble Alpes, INP, CNRS, France)</i>	
Event-Level Anomaly Detection on Software Logs Role of Algorithm, Threshold, and Window Size	649
<i>Jesse Nyysölä (University of Helsinki, Finland) and Mika Mäntylä (University of Helsinki, Finland)</i>	
Speed and Performance of Parserless and Unsupervised Anomaly Detection Methods on Software Logs	657
<i>Jesse Nyysölä (University of Helsinki, Finland) and Mika Mäntylä (University of Helsinki, Finland)</i>	
Log Parsing Using Semantic Filtering Based Prompt Learning	667
<i>Zhun Xu (Guangxi University, China), Baohua Huang (Guangxi University, China; Guangxi Intelligent Digital Services Research Center of Engineering Technology, China), and Ningjiang Chen (Guangxi University, China; Guangxi Intelligent Digital Services Research Center of Engineering Technology, China; Distributed and Intelligent Computation (Guangxi University), China)</i>	

Process Management and Optimization

Semi-Automated Refactoring of BPMN Processes	677
<i>Quentin Nivon (Univ. Grenoble Alpes, CNRS, Grenoble INP, Inria, LIG, France) and Gwen Salaün (Univ. Grenoble Alpes, CNRS, Grenoble INP, Inria, LIG, France)</i>	
Dynamic Resource Allocation for Executable BPMN Processes Leveraging Predictive Analytics	689
<i>Yliès Falcone (Univ. Grenoble Alpes, CNRS, Grenoble INP, Inria, LIG, France), Gwen Salaün (Univ. Grenoble Alpes, CNRS, Grenoble INP, Inria, LIG, France), and Ahang Zuo (Univ. Grenoble Alpes, CNRS, Grenoble INP, Inria, LIG, France)</i>	
Ant Colony Optimization Based Algorithm for Test Path Generation Problem with Negative Constraints	701
<i>Matej Klima (Czech Technical University in Prague, Czech Republic), Miroslav Bures (Czech Technical University in Prague, Czech Republic), and Martin Blaha (University of Defence, Czech Republic)</i>	
A Novel Approach for Traveling Salesman Problem via Probe Machine	713
<i>Changfeng Duan (East China Normal University, China), Jing Liu (East China Normal University, China), Jin Xu (Peking University, China), Dongdong An (Shanghai Normal University, China), and Yu Bao (East China Normal University, China)</i>	
Model-Driven Development of Single-Page Applications using UML State Machines and Maude .	724
<i>Alexander Müller-Lobeck (Hochschule für Technik und Wirtschaft, Germany) and Gefei Zhang (Hochschule für Technik und Wirtschaft, Germany)</i>	

Systems Verification, Quality, and Safety

Classification Method of Ethereum Smart Contracts Based on Statistical Model Checking	733
<i>Miaoer Li (Jiangsu Normal University, China), Yi Zhu (Jiangsu Normal University, China; Key Laboratory of Safety-Critical Software (Nanjing University of Aeronautics and Astronautics), Ministry of Industry and Information Technology, China), Yali Liu (Jiangsu Normal University, China), and Chan Yin (Jiangsu Normal University, China)</i>	
Efficient Verification of Multi-Agent Systems Through Parallel	745
<i>Zhen Yao (East China Normal University, China), Jing Liu (East China Normal University, China), Xiaohong Chen (East China Normal University, China), Li Han (East China Normal University, China), and Haiying Sun (East China Normal University, China)</i>	
SIAF Systematic Interference Analysis Framework for Household Microprocessor Services	757
<i>Christoph Dropmann (RPTU, Germany) and Daniel Schneider (Fraunhofer IESE, Germany)</i>	
A Distributed Service Function Chain Orchestration Approach with VNF Reuse to Balance Latency and Resource Efficiency	769
<i>Wenlin Cheng (Northeastern University, China), Xingwei Wang (Northeastern University, China), Bo Yi (Northeastern University, China), Chuangchuang Zhang (Ludong University, China), and Min Huang (Northeastern University, China)</i>	

Author Index 779
