

# **Electric Aircraft Testing I**

Papers Presented at the AIAA Aviation Forum 2024 and  
ASCEND 2024

Las Vegas, Nevada, USA  
29 July – 2 August 2024

Volume 1 of 2

ISBN: 979-8-3313-0565-9

# TABLE OF CONTENTS

## VOLUME 1

### **ELECTRIC AIRCRAFT TESTING I**

|                                                                                                                                                               |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Hybrid Electric Aircraft Testbed: Ground and Flight Testing of an Electric Propulsion System and Energy Storage System.....                                   | 1  |
| <i>Alexander D. Crain, Patrick Zdunich, Pervez Canteenwalla, Natesa Macrae, Reagh Sherwood, Peter Earle, Shahrukh Alavi, Sebastien Chouinard, Evan Gibney</i> |    |
| Hybrid-Electric Aircraft Testbed: Electric Propulsion System and Energy Storage System Qualification Testing .....                                            | 25 |
| <i>Alexander D. Crain, Pervez Canteenwalla, Natesa Macrae, Patrick Zdunich, Sebastien Chouinard, Shahrukh Alavi, Evan Gibney</i>                              |    |

### **ELECTRIC VEHICLE DESIGN CONSIDERATIONS I**

|                                                                                                                                                    |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Enhancement of the DO-178C/DO-331 Based Software Verification Framework and Its Practical Application .....                                        | 51 |
| <i>Purav Panchal, Luca Hein, Wolfgang Bliemetsrieder, Nina Sorokina, Stephan Myszchik</i>                                                          |    |
| Experimental Study of Two-Phase Cryogenic Cooling of Aluminum Stator Conductors Using a Multi-Slots Test Configuratio .....                        | 62 |
| <i>Yang Guo, Mike D. Sumption, C. G Cantemir, Jin Kwon, Chris Kovacs, Milan Majoros, Edward Collings, Mike Tomsic, Dave Doll, Matt Rindfleisch</i> |    |
| Power Management Optimization of Off-Design Missions for a Sized Hybrid-Electric Turboprop Aircraft .....                                          | 70 |
| <i>Alexander M. Kehler, Yu Cai, Dimitri Mavris</i>                                                                                                 |    |

### **MODELING INSIGHTS FOR ELECTRIC AIRCRAFT DESIGN I**

|                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------|-----|
| Numerical Modeling of a Two-Phase Skin Heat Exchanger for Hybrid-Electric Regional Aircraft .....                               | 87  |
| <i>Andrés Felgueroso, Iván González-Nieves, Miguel Díaz-Barja, Jorge García-Rodríguez</i>                                       |     |
| Modeling Thermal Soak Temperature Variation of Electric Aircraft Motors .....                                                   | 99  |
| <i>Julia Taylor, David B. Stringer</i>                                                                                          |     |
| Parametric Modeling and Mission Performance Analysis of a True Parallel Hybrid Turboprop Aircraft for Freighter Operations..... | 128 |
| <i>Dahlia Pham, Jeffrey V. Bowles, Gregory G. Zilliac, Noah Listgarten, Susie Go, Ralph H. Jansen</i>                           |     |

### **ELECTRIC AIRCRAFT BATTERY TESTING & ANALYSIS I**

|                                                                                              |     |
|----------------------------------------------------------------------------------------------|-----|
| Comparison and Application of Battery Modeling Methods for Conceptual Electric Aircraft..... | 146 |
| <i>Jeshurun P. Horton, Jeffryes W. Chapman, Mark K. Leader</i>                               |     |

|                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------|-----|
| Experimental Study of a Thermal Ground Plane in a Battery Thermal Management System for Electric Aircraft Applications ..... | 161 |
| <i>William Mooney, Doriane Ibtissam Hassaine Daoudji, David Rancourt</i>                                                     |     |
| Battery Performance Optimization for Sustainable Aviation: A Comprehensive Analysis for Battery Electric Aircraft .....      | 174 |
| <i>Todd Spierling, Alexander Lynch, Thomas Bradley</i>                                                                       |     |
| Heat Pipe-Based Air-Cooled Battery Thermal Management Strategies for an Electric Trainer Aircraft .....                      | 186 |
| <i>Émile Veilleux, Hadi Pasharshahri, David Rancourt</i>                                                                     |     |

## **MODELING INSIGHTS FOR ELECTRIC AIRCRAFT DESIGN II**

|                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------|-----|
| Lift-Plus-Cruise Aircraft Modeling, Guidance, Adaptive Control, and Flight Simulation .....                                     | 198 |
| <i>Eric Johnson, Thanakorn Khamvilai, Jeffrey Lewis, Venkatakrishnan Iyer, Joseph Horn, Brian Taylor</i>                        |     |
| Static and Dynamic Models for the Electric Environmental Control System in Initial Design.....                                  | 215 |
| <i>Marco Fioriti, Guido Pavan, Sofia Caggese</i>                                                                                |     |
| Modeling and Trade Space for Fuel Cell Powered Aircraft.....                                                                    | 232 |
| <i>Patrick Hanlon, Jessica Cashman, Zhimin Zhong, Vadim Lvovich</i>                                                             |     |
| General Aviation Synthesis Program Advancements with Symbolic Computations, Optimization, and Decoupled Numerical Methods ..... | 245 |
| <i>Benjamin Margolis, Kenneth Lyons, Joseph A. Garcia, Dahlia Pham, Jeffrey V. Bowles, Nolan Bridges, Evan Chang</i>            |     |

## **NASA ULI ZERO-E - SPECIAL SESSION - AERODYNAMIC DESIGN AND AIRCRAFT SYSTEM CONFIGURATIONS**

|                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------|-----|
| Towards the Conversion to Electrified Commercial Aircraft, the Boeing 737 Max 800 Field Data Analysis .....               | 258 |
| <i>Bruce W. Jo, Achintya K. Saha, Muhammad Akbar, Md Mashiur Rahman, Elijah Barrit, Ahmad Vasselbehagh, Taehyouon Kim</i> |     |
| Near Zero Emissions Flight Enabled by a Robust Hybrid-Electric Architecture .....                                         | 269 |
| <i>Jonathan C. Gladin, Srujal Paatel, Jai Ahuja, Dimitri Mavris</i>                                                       |     |
| Co-Flow Jet Design Optimization .....                                                                                     | 283 |
| <i>Nickolas E. Payne, Yang Zhang, Louis N. Cattafesta</i>                                                                 |     |
| Estimation of Critical Aeroelastic Damping Using Dynamic Eigen Decomposition and Artificial Damping .....                 | 299 |
| <i>Taehyouon Kim, Shan Siddiqui, Bruce Jo</i>                                                                             |     |

## **ELECTRIC AIRCRAFT BATTERY TESTING & ANALYSIS II**

|                                                                                             |     |
|---------------------------------------------------------------------------------------------|-----|
| Development of Air-Cooled Battery Sizing Method for eVTOL Aircraft .....                    | 313 |
| <i>Junhwi Park, Taemin Jeong, Kwanjung Yee</i>                                              |     |
| A Prognostics Framework for Battery Health Monitoring Integrated with Thermal Modeling..... | 327 |
| <i>Chetan S. Kulkarni, Mohit R. Mehta, Michael Khasin, John Lawson</i>                      |     |

|                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------|-----|
| Hybrid Electric Aircraft Testbed: Safety System Validation Via Thermal Runaway for Lithium-Ion Propulsion Battery .....   | 342 |
| <i>Patrick Zdunich, Evan Gibney, Alexander D. Crain, Steven Recoskie, Natesa Macrae, Pervez Canteenwalla, Jayson Tang</i> |     |

|                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----|
| Optimal Sizing and Energy Management of a Battery to Support a Fuel Cell Powered Regional Electric Aircraft During Take-Off Phase ..... | 374 |
| <i>Vimarsh P. Joshi, Thomas F. Geyer</i>                                                                                                |     |

## **ELECTRIC AIRCRAFT TESTING II**

|                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------|-----|
| Hybrid Electric Aircraft Testbed: Sizing and Simulations of an Electric Propulsion System and Energy Storage System..... | 387 |
| <i>Alexander D. Crain, Patrick Zdunich, Pervez Canteenwalla, Natesa Macrae</i>                                           |     |

|                                                                                                                               |     |
|-------------------------------------------------------------------------------------------------------------------------------|-----|
| Accelerated Aging Tests to Evaluate Partial Discharge Endurance of Insulating Materials for HV Electric Aircraft Assets ..... | 407 |
| <i>Sukesh Babu Myneni, Gian Carlo Montanari</i>                                                                               |     |

|                                                                                                                                     |     |
|-------------------------------------------------------------------------------------------------------------------------------------|-----|
| NASA AREAL Testbed and UE Power Quality Testing.....                                                                                | 416 |
| <i>Patrick Hanlon, David J. Sadey, Xavier Collazo-Fernandez, Keith Hunker, Casey Theman, Linda Taylor, Paul Nowak, Brian Malone</i> |     |

|                                                                                      |     |
|--------------------------------------------------------------------------------------|-----|
| Subsonic Wind Tunnel Facilities for Testing Low-Emission Vehicles in Tennessee ..... | 434 |
| <i>Bruce W. Jo, Peng Zhang</i>                                                       |     |

## **NASA ULI ZERO-E - SPECIAL SESSION - ELECTRIFIED SYSTEM ARCHITECTURES**

|                                                                                                               |     |
|---------------------------------------------------------------------------------------------------------------|-----|
| Solid Oxide Fuel Cell Based Electric Aircraft Power Plant: Mass Modeling, Optimization, and Application ..... | 441 |
| <i>Trevor J. Kramer, Rory Roberts, David Schafer, Noah Simpson</i>                                            |     |

|                                                                                                |     |
|------------------------------------------------------------------------------------------------|-----|
| Investigation of Power Split in an Ammonia Gas Turbine and SOFC Hybrid Propulsion System ..... | 474 |
| <i>David Schafer, Griffin Layhew, Trevor J. Kramer, Rory Roberts</i>                           |     |

|                                                                        |     |
|------------------------------------------------------------------------|-----|
| Evaluation of Power Distribution Architectures for the IZEA Fleet..... | 484 |
| <i>Muhammad Tahir Mehmood Khan Niazi, Peter Cheetham</i>               |     |

|                                                                                                                                               |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Design and Development of the CHEETA LH2 Electrical Wiring and Interconnection System and Suitable Electrical Power System Architectures..... | 503 |
| <i>Chris Kovacs, Timothy J. Haugan, Mike D. Sumption, Jin Kwon, Yang Guo, Phillip J. Ansell</i>                                               |     |

|                                                                                                                    |     |
|--------------------------------------------------------------------------------------------------------------------|-----|
| Design and Scaling Laws of a 22-MW-Class Electric-Wire-Interconnect-System for Liquid-H2 Fuel-Cell Propulsion..... | 522 |
| <i>Timothy J. Haugan, Mary A. Sebastian, Chris Kovacs, Bang Tsao</i>                                               |     |

## **ELECTRIC AIRCRAFT TESTING III**

|                                                                                                    |     |
|----------------------------------------------------------------------------------------------------|-----|
| Subsonic Single Aft eNginE (SUSAN) Power/Propulsion System Hardware-In-The-Loop Test Results ..... | 534 |
| <i>Jonah Sachs-Wetstone, Halle E. Buescher, Marcus Horning</i>                                     |     |

|                                                                                                                                        |     |
|----------------------------------------------------------------------------------------------------------------------------------------|-----|
| The Advanced Geared Turbofan 30,000 Lbf – Electrified (AGTF30-E): A Virtual Testbed for Electrified Aircraft Propulsion Research ..... | 544 |
| <i>Jonathan L. Kratz</i>                                                                                                               |     |

|                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------|-----|
| Partial Discharge Testing Under DC and Switching Transients of SiC-Based Solid State Circuit Breakers..... | 561 |
| <i>Muhammad Shafiq, Gian Carlo Montanari, Bo Liu, Jeffrey Ewanchuk</i>                                     |     |

## **ELECTRIC VEHICLE DESIGN CONSIDERATIONS II**

|                                                                                                                         |     |
|-------------------------------------------------------------------------------------------------------------------------|-----|
