Volume 13106

Proceedings of SPIE 0277-786X, V. 13106

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonics for Quantum 2024*, edited by Michael Reimer, Nir Rotenberg, Donald F. Figer, Proc. of SPIE 13106, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SATELLITE QUANTUM KEY DISTRIBUTION

13106 02 **Phase correction using deep learning for satellite-to-ground CV-QKD** [13106-17]

ENTANGLED PHOTONS

13106 03 **Liquid crystals as new tunable sources of entangled photon pairs** [13106-8]

13106 04 **The effect of phase-matching on OAM entanglement in high-gain SPDC** [13106-9]

QUANTUM KEY DISTRIBUTION

13106 05 **A detailed model for polarization mode dispersion in broadband polarization-encoded QKD** [13106-22]

13106 06 **Time-bin QKD free space field-trial link in the third telecommunication window** [13106-24]

POSTER SESSION

13106 07 **Universal photonic neural networks with quantum-free data reuploading** [13106-48]

13106 08 **Exploring advancements and prospects of laser technologies towards practical quantum advantage** [13106-65]

13106 09 **Quantum annealing task mapping for heterogeneous computing systems** [13106-68]

13106 0A **Effects of atmospheric turbulence on polarization entanglement in free-space quantum communication links** [13106-25]
