

PROCEEDINGS OF SPIE

***Photonic Computing:
From Materials and Devices
to Systems and Applications***

Xingjie Ni
Wenshan Cai
Editors

19–21 August 2024
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 13113

Proceedings of SPIE 0277-786X, V. 13113

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonic Computing: From Materials and Devices to Systems and Applications*, edited by Xingjie Ni, Wenshan Cai, Proc. of SPIE 13113, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

INTEGRATED PHOTONIC COMPUTING PLATFORMS II

- 13113 02 **Cryogenic integrated optical modulators for classical and quantum computing (Invited Paper)** [13113-5]

PHOTONIC NEUROMORPHIC COMPUTING I

- 13113 03 **Orbital angular momentum beams multiplexing and demultiplexing using hybrid optical-electronic neural network** [13113-14]

PHOTONIC CO-PROCESSORS AND ACCELERATORS

- 13113 04 **Optical data compression and hashing via 4f-based reconfigurable complex convolution module** [13113-24]

MATERIAL AND DEVICE INNOVATIONS FOR PHOTONIC COMPUTING I

- 13113 05 **Nonvolatile photonics based on phase change materials: where are the limits? (Keynote Paper)** [13113-26]
- 13113 06 **Energy-efficient optical memory architecture using phase change memory: clock frequency trade-offs for edge computing** [13113-28]

MATERIAL AND DEVICE INNOVATIONS FOR PHOTONIC COMPUTING II

- 13113 07 **Intersubband engineered nonlinear activation function for photonic neural networks** [13113-33]
- 13113 08 **Interpretable inverse-designed cavity for nonlinear photon pair generation on-chip** [13113-34]

POSTER SESSION

- 13113 09 **Probing ring resonator sensor based on Vernier effect** [13113-35]
- 13113 0A **Enhanced photonic accelerator design for efficient vector-matrix multiplication in deep learning** [13113-36]
- 13113 0B **Weight bank addition photonic accelerator for artificial intelligence** [13113-37]
