**Volume 13121**

Proceedings of SPIE 0277-786X, V. 13121

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Liquid Crystals XXVIII*, edited by lam Choon Khoo, Proc. of SPIE 13121, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510679023

ISBN: 9781510679030 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## LC ALIGNMENT, ELECTRO- AND OPTICAL-ACTIVATED DEVICES

---

- 13121 02 **Microsecond electro-optic switching in nematic phase of ferroelectric nematic liquid crystal (Invited Paper)** [13121-3]

---

## LIGHT-DRIVEN PROCESSES DEVICES

---

- 13121 03 **Super-thick and large areal size monocrystalline cholesteric and blue-phase liquid crystals for ultrafast switching and image processing** [13121-39]
- 13121 04 **In situ control of the photoinduced birefringence of photoalignable liquid crystalline polymeric films (Invited Paper)** [13121-8]

---

## NOVEL LIQUID CRYSTALS AND PROPERTIES

---

- 13121 05 **Organization of droplets at an air-LC interface (Invited Paper)** [13121-12]
- 13121 06 **Array and alignment of topological defects in liquid crystal** [13121-13]

---

## INSPECTION, GEOENGINEERING, MACHINE LEARNING, AND PHOTONIC COMPUTING

---

- 13121 07 **Inspection of internal structures of objects by laser ultrasonics using photorefractive liquid crystals (Keynote Paper)** [13121-15]
- 13121 08 **Hyperspectral  $S_3$  imager using liquid crystal polarized grating and its demonstration of material classification with deep learning** [13121-17]

---

## CONTROLLED SYNTHESIS AND STIMULI-DRIVEN LC DEVICES

---

- 13121 09 **Development of liquid crystal geometric phase elements for mid- and far-infrared wavelengths (Invited Paper)** [13121-22]

---

**MICROFLUIDIC, SINGLE-PHOTON EMITTER, SOFT MATTER, AND MOLECULAR DYNAMICS**

---

13121 0A **Single-emitter nanocrystal fluorescence in liquid crystal hosts: nonclassical light sources with definite polarization (Invited Paper)** [13121-26]

13121 0B **Chiral columnar liquid crystals formed by chiral octahedral metallomesogen** [13121-29]

---

**LIQUID CRYSTALS ALIGNMENT AND STRUCTURES AND FIELD EFFECTS**

---

13121 0C **Smectic layer influence induced by surface anchoring on its dynamic optical response behavior (Invited Paper)** [13121-35]

---

**HIGH POWER/INTENSITY LASER, ASTRONOMICAL, AND ACTUATOR APPLICATIONS**

---

13121 0D **Looking for planets with liquid crystal polymer optics (Keynote Paper)** [13121-40]

13121 0E **Novel plasma mirrors for petawatt (PW)-class lasers using ultrathin films of liquid crystal (Invited Paper)** [13121-41]

13121 0F **Controlled molecular orientation in nematic liquid crystal polymer particles** [13121-43]

---

**IMAGING, ACTUATOR BIOMEDICAL, AND MICROWAVE APPLICATIONS**

---

13121 0G **Solid state LCPG (liquid crystal polarized grating) steerable camera** [13121-49]

---

**POSTER SESSION**

---

13121 0H **Research on liquid crystal-based smart windows for application of building-integrated solar power system** [13121-51]

13121 0I **Vortex transitions on liquid crystal light valve** [13121-52]

13121 0J **The fabrication of liquid crystal networks microstructures using two-photon polymerization** [13121-53]

13121 0K **Nonlinear wave propagation in a bistable optical chain with controlled non-reciprocal coupling** [13121-54]

13121 0L **Reliable method to characterise parameters and surface effects in wedge and thin liquid crystal cells** [13121-55]
