Sponsored and Published by
SPIE

Volume 13124

Proceedings of SPIE 0277-786X, V. 13124

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Organic and Hybrid Sensors and Bioelectronics XVII*, edited by Ioannis Kymissis, Emil J. List-Kratochvil, Sahika Inal, Proc. of SPIE 13124, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SENSOR MATERIALS

- 13124 04 **Organometallic compounds for gas and VOC sensing (Invited Paper)** [13124-2]
- 13124 05 **Highly sensitive ammonia gas sensing up to PPB region based on a carbazole-triazine derivative** [13124-3]

POSTER SESSION

- 13124 0L **Photobiomodulation therapy effects of the flexible red-OLED devices by in vitro evaluation** [13124-22]
- 13124 0Q **Development of a porphyrin based optoelectrical platform for DNA sensing** [13124-27]
